I GENERAL PROVISIONS

1. General

- 1.1. This price list (hereinafter: Issuer Price List) shall set out the fees charged by Nasdaq Tallinn (hereinafter: the Exchange) for the services provided by it to the Issuers on the stock exchange and regulated market operated by it.
- 1.2. The Price List shall be effected and amended with the decision of the Management Board of the Exchange.
- 1.3. The payment is due the date stipulated in the Issuer Price List or on the invoice of the Exchange.
- 1.4. In case the payment is not made on due time, the Exchange may request a fine for delay of 0.1% of the unpaid amount per delayed day.
- 1.5. In the cases provided by law, VAT is added to the fees; the fees to which VAT is not applicable, are marked with an asterisk * for the sake of clarity.

2. Admission fee

- 2.1. Upon admission to trading/listing, the Issuer shall pay admission fee; and application fee as a part of it. The admission fee is one-off, non-refundable fee, which may consist of fixed part (fixed fee) and variable part based on the average market capitalization of the securities (variable fee).

The admission fee shall be paid upon the listing/admission to trading. The admission fee is due by the date indicated in the invoice of the Exchange, but not later than two (2) trading days before the trading in the Issuer's securities begins.

- 2.2. Prior the initial listing/admission procedure, the Issuer shall pay an application fee (fee for commencing the listing/admission procedure). The application fee is due by the date indicated in the invoice of the Exchange.

After listing/admission to trading decision, the admission fee shall be offset against the application fee paid and the Issuer shall pay the remaining amount of the admission fee. If the Issuer's securities are not admitted to trading/not listed, the application fee shall not be refunded to the Issuer.

- 2.3. The admission fee for a Share Issuer is calculated based on the market value of the Issuer's shares to be listed or admitted to trading. The market value of the shares is understood as the price of the public offer of shares immediately preceding the admission to trading (the offer price multiplied by the number of shares), or, if there is no public offer, the weighted average price of the shares (the share price multiplied by the number of shares) in the Issuer CSD during ten (10) trading days preceding the listing decision or the decision on admission to trading. Where the market value is not estimable, the initial calculation of the admission fee will be made on the basis of the Issuer's owners' equity as stated in the Issuer's latest audited financial report. In such case, the amount of admission fee will be adjusted ten (10) trading days after the first trading day, based on the developed market value, calculated as the arithmetic mean of the products of the closing prices and numbers of shares for the first ten (10) trading days.

- 2.4. In case of new issue of same type of shares, the size of the issue is found by multiplying the number of shares issued by the issue price. In case a non-monetary payment is made for shares to be issued, the size of the issue is found by multiplying the number of shares issued by market price of the same type listed/admitted shares.
- 2.5. In case of possibility to apply discounts from admission fees under several clauses, only one of the relevant clauses is applicable.

3. Annual fee

- 3.1. The annual fee covers one calendar year and is payable as a combination of fixed fee and variable fee. The SPAC annual fee is payable as fixed fee only.
- 3.2. The annual fee is payable split by quarters, i.e. on a quarterly basis as a prepayment in the beginning of each quarter for each quarter to follow. The annual fee is due within 14 days after the date of respective invoice, unless indicated later in the invoice.

The SPAC annual fee is payable on annual basis, i.e. as a prepayment for the whole year in the beginning of the year. The annual fee is due by the date indicated in the respective invoice.

- 3.3. At the beginning of each quarter the Exchange calculates the fee for the pending quarter based on the data from the previous quarter.

The variable part of the annual fee for shares is calculated on basis of the market value of listed or tradable shares.

The market value of the securities is calculated by taking the arithmetic average of the securities' market value, whereas the securities' market value is found by multiplying the number of shares by closing prices of these securities during all trading days of the previous quarter.

The variable part for debt securities is calculated on the basis of total nominal value of the debt securities.

For fund units the total net asset value of the fund on the last date of each quarter is used in the calculations.

- 3.4. In case the securities are listed/admitted to trading or delisted/trading terminated in the middle of a quarter, the fee is calculated proportionally for those months when the securities are listed/tradable, by dividing the quarterly fee by three and multiplying the result by number of months named above.

In case SPAC is admitted to trading or the period for completion of the Business Combination specified in the Listing Rules clause 17.5. ends during the year, the fee is calculated proportionally for those months when the securities are tradable, by dividing the annual fee by twelve and multiplying the result by number of months named above.

In calculations, incomplete month is treated as a full month.

- 3.5. In case of possibility to apply discounts from annual fees under several clauses, only one of the relevant clauses is applicable.

II MAIN LIST**4. Admission fee**

4.1.	<u>Fixed fee</u>	<u>EUR 6,390</u>
	<u>Variable fee</u>	<u>0.02% of the MCAP</u>
