18. Fair value of financial instruments

The Company does not have any financial instruments carried at fair value.

Fair value is defined as the amount at which the instrument could be exchanged between knowledgeable willing parties in an arm's length transaction, other than in forced or liquidation sale. As fair values cannot be obtained with reference from quoted market prices the discounted cash flow models are used.

Trade and other receivable amounts as well as trade and other payable amounts are of short-term nature. Received loans and borrowings bear variable interest rates, which are reviewed every 3-6 months. Therefore, the management is of the opinion that carrying amounts of these financial instruments are similar to their fair values.

6. The objective review of the Company's state, activity performance and development; the description of the main risk types and uncertainties encountered by the enterprise

As of 30 June 2014, the Company owned 6 vessels: 4 reefer ships and 2 container ships (as of 30 June 2013 – 4 reefer ships and 2 container ships).

As of 30 June 2014, 4 ships were operated under a Pool agreement and 2 ships under long-term charter agreements (As of 30 June 2013, 4 ships were operated under a Pool agreement, 2 ships under long-term charter agreements).

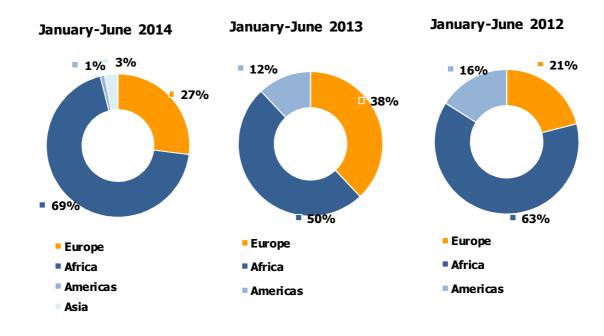

During the first six months of 2014 Limarko laivininkystes kompanija AB transported a total of 235 thousand tons of cargo, whereof 78% accounted for dry cargo accounted and the remaining 22% for frozen, chilled and perishable food products:

The total amount of cargo transported during the six months of 2014 decreased by 32 when compared to the first six months of 2013. The main reason for the decrease – diminishing fleet of the Company. Due to varying length of transportation routes and cargo structure, revenue of the Company is not directly related to the quantity of cargo transported.

During the first six months of 2014, the main discharge regions of company's vessels were West Africa and Europe, which respectively accounted for 69 and 27 percent of all transported cargo. Transportations in Asia constituted 8 percent, in Americas – 1 percent.

Risk factors related to the Issuer's activity:

Economic risk factors. The vessels of Limarko laivininkystes kompanija AB are operating in the international market of sea cargo transportation, and the quality of its rendered services conforms to the international requirements.

The Company's sales depend on the situation in the international market. It is not dependant on monopoly consumers.

Procurement opportunities – of raw materials, consumables, manufacturing areas, workforce and financial resources – are unlimited. Raw materials and services are bought from diverse suppliers; consequently, the Company is not dependent on particular suppliers.

In the market of frozen, chilled and perishable food products transportation there exists the influence of seasonality, which manifests itself in the decrease of freight rates in the summer season.

<u>Currency exchange risk.</u> The Company encounters with the currency exchange risk, related to sales, purchases and borrowing costs denominated in currencies other than Litas and Euro.

Fair value interest rate risk. In general, the Company's income and cash flows from ordinary activity are not dependent on changes in the market interest rate. The Company has not been granted nor issued itself any loans with a fixed interest rate, therefore was not exposed to the fair value interest rate risk.

Price risk. The rates of cargo transportation by sea as well as vessel hire rates vary depending on the situation in the market. The Company seeks to minimize the impact of the mentioned fluctuations by diversifying the fleet, i.e. maintaining the number of vessels for transportation of frozen, chilled and perishable food products or containers as well as proposing different ways of vessel charters (short-term, long-term, voyage).

<u>Credit risk.</u> The Company uses procedures which ensure that sales are performed to clients having a proper crediting history without exceeding the limit of credit risk set by the management. The Company did not have any concentration of significant credit risk at the balance sheet date.

<u>Liquidity risk.</u> Current ratio as of 30 June 2014 was 0.6 (after classifying financial debt as current liabilities); external financing for cash-flow was not used.

<u>Interest rate risk.</u> The Company's borrowings are subject to variable interest rates, related to 6 or 3 Month USD LIBOR.

Bank Loans. As at 30 June 2014, ships with the carrying amount of 107 154 thousand Litas (as of 30 June 2013 – 121 397 thousand Litas) are pledged to secure bank loans.

<u>Capital management</u>. According to the Law on Companies of the Republic of Lithuania, equity of the company cannot be lesser than one half of the authorised capital of the company.

According to the Financial statements of the Company for the year ended 31 December 2013, equity of the company, as of 31 December 2013 amounted to 2 218 thousand Litas and was less than one half of the authorised capital of the Company (4 300 thousand Litas). Compared to the data as of 31 December 2013, the shareholders' equity increased by 2 238 tLTL to 4 456 tLTL during the first six months of 2014 and became sufficient for the purposes of the Law on Companies of the Republic of Lithuania, as the equity exceeds one half of the authorised capital.

Political risk factors. Having regard to the particularities of the shipping business, the European Commission in 2004 adopted the Guidelines on State aid to maritime transport (2004/C 13/03). It is established in the Guidelines that one of the main measures to strengthen the maritime transport is the reduction of fiscal and other expenses of the ship owners. The aim of such state aid measures is to ensure the competitiveness of the European Union shipping sector in relation to the third countries. The Guidelines contain state aid measures, which are exclusively designed to promote maritime transport; however, this does not influence competition between different trades of the company, because shipping is developed in international markets.

<u>Social risk factors.</u> The average salary in the Enterprise exceeds the average salary in Lithuania. Part of the Enterprise's employees belongs to the trade-union of Limarko laivininkystes kompanija AB.

Technical-technological risk factors. The technical condition of the Enterprise's vessels is supervised by classification societies authorized by the national supervisory authority in charge of the technical condition of the vessels. These companies certify that the vessels conform to the international standards for the technical condition of vessels, that they may be operated and that no obstacles are applied to them in ports. The Enterprise's vessels undergo scheduled maintenance works, as well as dock repair works every 2-3 years in ship-repair enterprises both in Lithuania and abroad.

Ecological risk factors. The main ecological risk factor is related to the operation of the Company's vessels. The vessels are operated in most safe manner and in accordance with the strictest environmental standards. However, there still exists some probability that during an accident the environment may be negatively affected. However, the Company's vessels are insured in respect of incidents and consequences thereof, so in these cases the damage to the environment would be indemnified and fines would be paid by the insurance company, and such incidents and consequences thereof would have no impact on the Company's financial status.

7. Analysis of financial and non-financial activity results

The revenue of Limarko laivininkystės kompanija AB for the first six months of 2014 amounted to LTL 22.6 million and decreased by 5% when compared to the revenue of LTL 23.9 million during the first six months of 2013.

EBITDA for the first half of 2014 was LTL 8.1 million. EBITDA for the first six months of 2013 was LTL 8.9 million.

The profit of the Company for the first six months of 2014 was LTL 2.2 million. The profit of the Company for the first six months of 2013 was LTL 1.0 million.

During the first six months of 2014 the increase of the exchange rate of the US Dollar resulted in LTL 1.0 million loss from currency exchange rate change. During the first six months of 2013 the increase of the exchange rate of the US Dollar resulted in LTL 2.1 million loss from currency exchange rate change.
