

ABLV Bank, AS

public quarterly report for the period ended on 30 September 2012

Bank's management report

Dear shareholders of ABLV Bank, AS,

Q3 2012 was very successful for ABLV Bank, AS and the group. The business volume and all major performance indicators continued to grow. The bank's profit amounted to EUR 15.4 million.

Whereas global economy growth continued to slow down in Q3 2012, and the euro zone economy entered recession. In order to support growth, the European Central Bank announced beginning of the new programme, under which bonds will be bought on the market without amount limitation. The FRS also implemented long-awaited QE3 programme. The world's financial markets were enthusiastic about these decisions, and leading global stock indexes ended the quarter with a good increase, whereas MSCI stock index grew by 6.2%.

In the reporting period, Latvian economic indicators still were much better than average in the European Union. During the quarter, the unemployment rate decreased from 12.3% to 11.0%. Published data on Latvian GDP for Q3 2012 evidenced growth by 5.3% (YoY). In the first quarter, GDP increase was equal to 6.9%, and in the second – to 5.0%. According to forecasts by the International Monetary Fund, Latvia can end the year 2012 with an economy increase of 4.4%, which would be one of the best indicators in the European Union.

In Q3 we continued gradually substituting long-term deposits with investments in bonds by performing another issue of ABLV Bank, AS bonds. Under the Second Bond Offer Programme, there was issue of 2-year bonds performed in July, the issue size being USD 50 million. The annual interest rate is floating: LIBOR 6M + 1.20% with coupon payment twice a year. The issue maturity date is 30 July 2014. The bonds were acquired by 58 bank's customers, 20% of which are individuals, and 80% – legal entities. The issued bonds are included in NASDAQ OMX Riga list of debt securities, to ensure public quotation of the bonds. Investments in bonds allow customers to receive higher income than that under deposits and also ensure wider transaction opportunities — those can be purchased, sold or used as collateral to obtain financing, meanwhile retaining the investment amount and planned yield. NASDAQ OMX Riga stock exchange named our bank the largest issuer of corporate securities.

Other companies of ABLV Group also continued to grow. At the end of September, there was a project of changing brand of ABLV Group companies operating in real estate area commenced. Since beginning their operations in 2008, this group of companies was known as ABLV Transform. Now they will have a new single brand – Pillar, continuing real estate development, management and trade. The potential of this line of business is evidenced by large-scale projects accomplished in recent years: Saules Rasa, Pine Breeze, Aristo, and Mārtiṇa Nams 2. Another two important projects are nearing completion – Lielezeres Apartment House and Elizabetes Park House. During several years, Pillar has realized 450 objects in total. Currently, Pillar supervises more than 1200 properties worth about EUR 85.4 million, which is one of the largest real estate portfolios in Latvia.
