OPERATING HIGHLIGHTS

The retail turnover (including VAT) of Apranga Group reached EUR 81.2 million in 1st half 2021 or by 6.3% less than in 1st half 2020.

Due to epidemic coronavirus (COVID-19) infection, from 16 December 2020, all the Group's stores in Lithuania were temporarily closed. Stores in Lithuania with a separate entrance from outside and a sales area not exceeding 300 square meters had been open since 15 February 2021. All stores with a separate entrance from outside had been open since 15 March 2021. All Group's stores have been reopened in Lithuania from 19 April 2021, however, stores operating in shopping malls were not allowed to work on weekends, unless they had separate entrance from outside. Eventually, all Group's stores have been open in Lithuania as of 29 May 2021. In Latvia, stores were temporarily closed from 19 December 2020. Stores with a separate entrance from outside and an area not exceeding 7,000 square meters have been open in Latvia from 7 April 2021. Group's stores that operate in shopping malls and have separate entrance from outside were reopened as of 22 May 2021. Eventually, all Group's stores have been open in Latvia as of 3 June 2021. In Estonia, all Group's stores were temporarily closed from 11 March 2021, and from 6 March 2021 to 11 March 2021 stores were not allowed to work on weekends. All Group's stores have been reopened in Estonia from 3 May 2021. **These temporary store closures had a significant impact on the Group's generated turnover, earned profit and, accordingly, financial performance.**

According to EUROSTAT data, the retail trade (except of motor vehicles, motorcycles and fuel) in Baltic States in January-May 2021 grew in Lithuania (+15%) and Estonia (+10%). In Latvia, the retail trade remained at the level of the corresponding period of last year. In April-May 2021, retail trade demonstrated a solid recovery and grew in all three countries: by 27% in Lithuania, by 10% in Latvia and by 19% in Estonia. European Union (27 countries) retail trade in January-May 2021 increased by 8%, when in April-May 2021 the growth was 14%. The retail trade of clothing, footwear and textiles diminished in Baltic states in the period of January-May 2021 due to extended lock-down, which in particular affected physical stores.

OPERATIONAL PLANS

In 2021 Apranga Group plans to renovate or open a total of 15 stores. The net investment is planned to be about EUR 5 million.

Considering unclear trends of coronavirus developments and different scenarios of business restrictions, the management estimates that the Group may reach a turnover (including VAT) from EUR 204 to 230 million in year 2021.

RISK MANAGEMENT

Financial risk factors

The risk management function within the Group is carried out in respect of financial risks (credit, market, currency, liquidity and interest rate), operational risks and legal risks. The primary objectives of the financial risk management function are to establish risk limits, and then ensure that exposure to risks stays within these limits. The operational and legal risk management functions are intended to ensure proper functioning of internal policies and procedures to minimize operational and legal risks.

The financial risks relate to the following financial instruments: trade receivables, cash and cash equivalents, trade and other payables, bonds and borrowings. The accounting policy with respect to these financial instruments is the same as it was in 2020.

APB APRANGA, Company's code 121933274, Ukmerges 362, Vilnius

FOR THE SIX MONTHS PERIOD ENDED 30 JUNE 2021

(all tabular amounts are in EUR thousands unless otherwise stated)

Credit risk

Credit risk is managed on Group basis. Credit risk arises from cash and cash equivalents and deposits with banks and financial institutions, as well as credit exposures to wholesale and retail customers, including outstanding receivables and committed transactions. For banks and financial institutions, only independently rated parties with high credit ratings are accepted. Sales to wholesale customers are rare and immaterial; therefore, risk control only assesses the credit quality of the customer, taking into account its financial position, past experience and other factors. Sales to retail customers are settled in cash or using major credit cards.

Company's credit risk arising from trade receivables from subsidiaries and loans to subsidiaries is managed by controlling financial performance of subsidiaries on a monthly basis.

The Company and the Group has no significant concentration of credit risk.

Liquidity risk

Liquidity risk management implies maintaining sufficient cash, the availability of funding through an adequate amount of committed credit facilities. Due to the dynamic nature of the underlying businesses, Group treasury maintains flexibility in funding by maintaining availability under committed credit lines.

Management monitors rolling forecasts of the Group's liquidity reserve (comprises undrawn borrowing facility and cash and cash equivalents) on the basis of expected cash flow. This is generally carried out at local level in the operating companies of the Group in accordance with practice set by the Group. In addition, the Group's liquidity management policy involves projecting cash flows and considering the level of liquid assets necessary to meet these; and maintaining debt financing plans.

Market risk

Cash flow and fair value interest rate risk

As the Group has no significant interest-bearing assets, its income and operating cash flows are substantially independent of changes in market interest rates. The Company has loans to subsidiaries with floating interest rates, but the cash flow risk is mitigated by applying the same variable element of interest rate on those loans as the banks are charging the Company.

The Group's interest rate risk arises from borrowings. Borrowings issued at variable rates expose the Group to cash flow interest rate risk. Borrowings issued at fixed rates expose the Group to fair value interest rate risk, but this is not included in sensitivity analysis as the change in interest rates has no impact on profit or equity of the Group.

The Company's and Group's borrowings consist of loans with floating interest rate, which is related to EURIBOR. The Company and the Group did not use any derivative financial instruments in order to control the risk of interest rate changes.

Trade and other receivables and payables are interest-free and have settlement dates within one year.

The Group's cash flow and fair value interest rate risk is periodically monitored by the Group's management. It analyses its interest rate exposure on a dynamic basis taking into consideration refinancing, renewal of existing positions, alternative financing. Based on these scenarios, the Group calculates the impact on profit and loss of a defined interest rate shift. The scenarios are run only for liabilities that represent the major interest-bearing positions.

Based on the simulations performed, management considers the impact on post-tax profit of a 0.5% shift in interest rates to be not material to the financial statements of the Group and the Company.

Foreign exchange risk

The Company and the Group has a policy to synchronize the cash flows from expected sales in the future with the expected purchases and other expenses in each foreign currency. Substantially all the Group's payables and receivables are short-term and in addition revenues and expenses in foreign currencies are insignificant (less than 10%) as compared to those in Euro. At the moment the Company and the Group to some extent uses derivative financial instruments in order to control foreign currencies exchange risk. The use of derivative financial instruments is limited to forward foreign currency (US dollar) purchase transactions with maturities of less than 30 days.

The Group operates in Lithuania, Latvia and Estonia, and during the reporting period used Euro currency. Since Estonia, Latvia and Lithuania introduced the Euro (respectively, since 1st January 2011, 1st January 2014 and 1st January 2015), so there is no exchange rate fluctuations.

Price risk

The Group is not exposed to the market risk with respect to financial instruments as it does not hold any equity securities.

Capital risk management

The Group's objectives when managing capital are to safeguard the Group's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital. In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt.

Consistent with others in the industry, the Group monitors capital on the basis of the gearing ratio. This ratio is calculated as net debt divided by total capital. Net debt is calculated as total borrowings (including 'current and non-current borrowings' as shown in the consolidated balance sheet) less cash and cash equivalents. Total capital is calculated as 'equity' as shown in the consolidated balance sheet plus net debt.

In addition, the Group should comply with the financial covenants imposed in the agreements with SEB bankas AB and Luminor Bank AB. The Group and the Company followed the covenants as at 30 June 2021.
