I. GENERAL INFORMATION

Accounting period covered by the Report

The report covers 9 months period ended 30 September 2018.

Key data on the issuer

Name of the company:	AUGA group, AB (hereinafter – AUGA group, AB or the Company)
Share capital:	EUR 65,950,713.08
Address of headquarters:	Konstitucijos av. 21C, Quadrum North, LT-08130, Vilnius, Lithuania
Telephone:	+370 5 233 53 40
Fax:	+370 5 233 53 45
E-mail address:	info@auga.lt
Website:	www.auga.lt
Legal entity form:	Legal entity, joint stock company
Place and date of registration:	25 June 2003, Vilnius
Register code:	126264360
Registrant of the Register of Legal entities:	VĮ Registrų centras

CONSOLIDATED INTERIM FINANCIAL STATEMENTS

(All amounts are in EUR thousand, unless stated otherwise)

II. MANAGEMENT REPORT

During the first nine months of 2018, AUGA group, AB and its subsidiaries (hereinafter - the Group) sales revenue amounted to EUR 42.16 million, a 15% increase compared to the same period of 2017, when it was EUR 36.59 million.

The Group's gross profit of the first nine months of 2018 amounted to EUR 1.76 million and was lower compared to the same period of 2017 (gross profit for the first nine months of 2017 - EUR 14.86 million).

The Group's EBITDA for the three quarters of the current year, eliminating one-time transactions, amounted to EUR 1.74 million. Compared to the same period last year, EBITDA indicator was EUR 13.19 million.

During nine months period of 2018, the Group accumulated EUR 4.88 million net loss (EUR 7.34 million net profit was earned in the same period last year).

Crop segment overview

The third quarter of 2018 was very important to the Group, as most crops of the 2017/2018 crop segment were harvested during this quarter. The harvest of the crop segment has a significant impact on the Group's annual results. In accordance with International Accounting Standards (Standard 41 Agriculture) agricultural produce, at its point of harvest, is measured at fair value which reflects the expected market price of the produce, eliminating related sales costs. The difference between the fair value of the harvest and the total costs incurred when growing the harvest is represented in profit (loss) statement line Gain (loss) on changes in fair values of biological assets and on recognition at fair value of agricultural produce at point of harvest. The year of 2017/2018 was difficult and unfavorable for the crop segment.

Due to the rainy autumn in 2017, relatively small area of winter crops was planted. As a result, the area of summer crops increased significantly from about 10 thousand ha in the season of 2016/2017 to 21.5 thousand ha in the season of 2017/2018. Based on the results of the season of 2016/2017, when legume crops were highly successful in terms of profitability as well as crop rotation requirements, half of all summer cash crops (about 10.7 thousand ha) in 2017/2018 consisted of leguminous crops - peas and beans.

The summer of 2018 was arid and in most regions of Lithuania there was a shortage of rain. It was recorded, in several dozen areas, to be a dangerous meteorological phenomenon. The shortage of rain had a significant negative impact on the crop yields in most of the Group's cultivated lands. After harvesting, it can be stated that the worst adverse effect of the drought was on summer legume crops - peas and beans - whose yields in the 2017/2018 season were more than twice as low as in the season of 2016/2017. The large area dedicated to these crops had a very significant negative effect on the results of the harvest of 2017/2018. Below is a comparison of the two main crops grown by the Group - wheat and legumes.

Wheat yield in Lithuania, t/ha

Legumes yield in Lithuania, t/ha

NOTE: The data of LT organic farms in 2018 has not yet been published, the data of conventional farms in the LT is preliminary.

Reference: Lithuanian Statistics Department, data of the survey of the activities of Lithuanian agricultural producers included in the Farm Accountancy Data Network (FADN), the Group's data.

(All amounts are in EUR thousand, unless stated otherwise)

Management report (continued)

The challenges and adverse factors discussed above have led to a negative 2017/2018 crop segment outcome in the third quarter of 2018. Evaluating the grain crops harvested in the third quarter of 2018, EUR 3.8 million loss of agricultural produce at fair value was recognized. For comparison, in the third quarter of 2017, EUR 6.8 million were recognized as profit.

When evaluating the results of the harvest in 2017/2018, it is necessary to consider the fact that this year's harvest, was negatively impacted by the costs incurred due to the handling abandoned lands which, in 2017, were taken over from the bankrupt companies of KTG group in Lithuania. In the first year, most of the overtaken lands were managed by improving their quality, but in the season of 2016/2017, they were not sown and left to fallow (about 6 thousand ha). For this reason, in the season of 2016/2017, the costs associated with the management of these lands, were accumulated and left for the season of 2017/2018, when the crops were harvested from the respective land. Such costs amounted to about EUR 3.0 million and are reflected in the results of the harvest of 2017/2018. Eliminating these one-off costs (related to processes and works that are not typical of the ordinary crop rotation cycle of organic farming), the loss of agricultural production at the fair value in the third quarter of 2018 would be significantly lower.

The comparison of the costs of the two main grain crops - wheat and legumes - per hectare of land for the seasons of 2016/2017 and 2017/2018 is presented in the table below.

Cost per 1 ha cultivated land, EUR	2017/2018*	2017/2018**	2016/2017	Comparison 2017/2018** with 2016/2017, %
Wheat	881	811	762	6%
Legumes	790	671	759	-12%

* Costs per 1 ha of cultivated land without eliminating one-off costs related to the proper preparation of abandoned land overtaken in the season of 2016/2017;

** Costs per 1 ha of cultivated land, eliminating one-off costs related to the proper preparation of abandoned land overtaken in the season of 2016/2017.

As can be seen from the data presented, eliminating one-off costs mentioned above, the costs per 1 ha of cultivated land remained at a similar level. The increase in wheat costs was mainly due to higher seed prices, related to the lack of seeds in the market in the spring of 2018, as well as rising fuel costs due to higher fuel prices. As can be seen from the comparison of costs, despite the significant increase in cultivated land, as well as the difficult autumn (due to rainy weather) and spring sowing (due to double sown areas), the Group has managed to control the costs associated with the crop segment.

Another important criterion for assessing the results for 2017/2018 is the harvest sales prices. It should be noted that at the time of the publication of the financial statements for the third quarter of 2018, a significant part of the harvest in 2017/2018 had already been sold or contracted at fixed prices for the sale of the crop, so the fair value of the crop can be measured reliably. Below is a comparison of the same main cash crops - wheat and legume - prices, in which the harvest was evaluated (at fair value) in the seasons of 2016/2017 and 2017/2018.

Price of 1 tonne of crop, eliminating sales costs, EUR	2017/2018	2016/2017	Comparison 2017/2018 with 2016/2017, %
Wheat	268	254	5%
Legumes	354	374	-5%

As can be seen from the data presented, the price of 1 tonne of wheat in the season of 2017/2018 was 5% higher compared to the season of 2016/2017, while legumes - 5% lower. This indicates that the prices of the respective products are sufficiently stable and that the Group can sell the harvested production in international markets for organic raw materials at the prices which reflect the "price premium" of organic produce.

When evaluating the results of the crop segment, it should be noted that the harvest of maize, soya, buckwheat and vegetables had not yet been completed by the end of the third quarter of 2018, and therefore the results of these crops are not yet reflected in the three-quarter reports. Based on preliminary results, the Group expects better results from the respective crops than in the season of 2016/2017, when due to the rainy weather in the fall of 2017 and crop harvesting problems, respective harvest amounted to around EUR 1.8 million losses in the fourth quarter of 2017.

It is important to note that the fall of 2018 was very favorable for autumn sowing and other preparatory land works for the season of 2018/2019. During the autumn of 2018 the Group had sowed 15,5 thousand ha of winter crops, which represent about

CONSOLIDATED INTERIM FINANCIAL STATEMENTS

(All amounts are in EUR thousand, unless stated otherwise)

Management report (continued)

half of the total planted grain crops area in the season of 2018/2019. For comparison, in the season of 2017/2018, due to bad weather in the autumn of 2017, the Group harvested winter crops from only 5,5 thousand ha (winter crops amounted to only about 20% of the total cash crops area). In the season of 2016/2017, the Group had sown winter crops of about 44% of total area of cash crops. Winter crops generally have higher yield potential compared to summer crops. For instance, according to the Group's harvest data, in the season of 2017/2018 winter wheat yields were 27% higher compared to summer wheat. The quality of crops planted in 2018 autumn was very good at the end of the reporting period.

In addition, favorable 2018 autumn weather also allowed for proper cultivation of the land and preparation for summer crop sowing in the spring. In the case of organic farming, land works require more time and resources, and their proper performance has a very significant effect on yield.

Mushroom segment overview

In the three quarters of 2018, the revenue from the mushroom segment was almost EUR 1.0 million or about 5,0% higher than the respective period of 2017. Income growth in 2018 mainly relates to the increase in the average price of mushrooms sold. It can be noted that the share of sold organic produce in the mushroom segment is steadily increasing. In the first three quarters of 2018, the share of organic mushrooms was about 8,0% of all mushrooms sold, which was about 5,6% in the corresponding period of 2017. The increasing share of organic produce in the mushroom segment not only reflects the strategic goals of the Group, but also improves the results of the overall profit of the mushroom segment, since the average price of organic produce was about 50% higher, but costs are very similar to that of conventional products, because the organic compost is prepared from raw material of the by-products of other segments such as cow manure, straw, etc.

The total cost of sales of the mushroom segment also remained at a very similar level to 2017. Thus, the mushroom segment is characterized by rather stable revenue, costs and gross profit.

Dairy segment overview

The result in the dairy segment for the three quarters of 2018 amounted to EUR 1,9 million loss comparing to EUR 0,6 million gross profit during same period in 2017. The deterioration of the dairy segment was mainly driven by an increase in cost of feed. It resulted in both higher milk production costs and cattle growing costs. The cost of feed increased due to the following main reasons: (a) due to the rainy autumn the preparation of grass feed was complicated, and part of the grass was not harvested, although the costs for field preparation and mowing were incurred. The quality of the collected grass feeds was also relatively poor. All this has led to an increase in the cost of grass feed. (b) organic grains used for cattle feed during 2018 were harvested in 2017 and evaluated at the higher organic prices, reflecting their market value. The increase in the cost of feed has led to an increase in the cost of milk production.

On the other hand, in the three quarters of 2018, the average milk sales price remained almost the same as in the corresponding period of 2017, i.e. about 347 euros per tonne. During 2018 the share of organic milk sales increased to 37% comparing to 15% in the same period of 2017, however, lower market prices for non-organic milk led to an average sale price of milk sold at almost similar level as in 2017. The share of organic milk sales fluctuated between 30-40% in the first three quarters of 2018, but as of September has increased significantly and reached about 95% in November. The increasing share of milk sold at organic prices also results in an increase in the average price of milk sold.

CONSOLIDATED INTERIM FINANCIAL STATEMENTS

(All amounts are in EUR thousand, unless stated otherwise)

Dairy segment overview (continued)

As already mentioned, the higher cost of feed results in the higher cost of cattle growing and increases in the loss of sales of cattle meat. The Group does not grow beef cattle, but because of the natural change in the cattle herd, aged and unproductive dairy cattle are sold for meat. The market price of such cattle meat is relatively low and does not compensate the value of the cattle, used for accounting purposes.

Operating expenses

The Group's operating expenses for the three quarters of 2018 were significantly influenced by two one-off effects recorded in the first quarter of 2018: (a) the reversal of impairment loss of the assets of Karakash Agro OOO and Karakash OOO due to the signed agreement to sell the respective subsidiaries in the first quarter of 2018 (effect of EUR 1.8 million); (b) accrued expenses related to the termination of the acquisition of shares of UAB Arginta Engineering in the first quarter of 2018 (effect of EUR 0.7 million). After eliminating one-off effects, the Group's operating expenses for the three quarters of 2018 amounted to EUR 6.8 million comparing to EUR 6.6 million for the same period in 2017. There was a slight increase in centralized operating expenses related to the development of sales, marketing and research and development activities.

Earnings before interest, taxes, depreciation and amortization (EBITDA) and performance of covenants

Negative results for the third quarter of 2018 had a significant negative impact on the Group's EBITDA for the first three quarters of this year. Eliminating one-off transaction, in particular, the one-off costs related to the termination of the acquisition of shares of UAB Arginta Engineering, the Group's EBITDA for 2018 amounted to EUR 1.73 million. Last year for the respective period EBITDA was EUR 13.19 million.

The EBITDA level has a significant impact on the relative performance of the covenants provided in the financing agreements with banks. Most financial contracts contain two covenants at the consolidated level of the Group: Financial Debt to EBITDA ratio and Equity ratio. Due to a significant deterioration in the EBITDA, the Group did not fulfill the Financial Debt to EBITDA ratio in the third quarter of 2018, but the Group has received waiver from banks, with which financing agreements provide a relevant covenant, that banks will not impose sanctions in the third quarter of 2018 due to non-fulfilment of the relative covenant. In the third quarter of 2018, the Equity ratio covenant was fulfilled.

Ratio calculation explanation:

EBITDA = net cash flow from operating activities before changes in working capital, as it is disclosed in cash flow statement, including gain (loss) on changes in fair value of biological assets.

Financial debt = long-term financial liabilities + short-term financial liabilities.

Equity ratio = (share capital + share premium + reserves + retained earnings (accumulated losses) + subordinated loans + grants – intangible assets, arisen after financing agreement signing date)/total assets.

IV. EXPLANATORY NOTES

1. Basis of the preparation

The accompanying interim financial information for the period ended 30 September 2018, has been prepared in accordance with IAS 34, 'Interim financial reporting'. The accounting policies applied are consistent with those of the annual financial statements for the year ended 31 December 2017, as described in those annual financial statements. This financial information should be read in conjunction with the annual financial statements for the year ended 31 December 2017, which have been prepared in accordance with IFRS as adopted by the EU.

The presentation currency is euro (EUR). The financial statements are presented in thousands of euro, unless indicated otherwise. Financial statements for the 9 months period ended 30 September 2018 are not audited. Financial statements for the year ended 31 December 2017 are audited by the external auditor UAB PriceWaterhouseCoopers.

The preparation of financial information in conformity with IAS 34 requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the group's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the consolidated financial information, are disclosed below.

Business combinations

On 26 February 2018 AUGA group, AB has completed the purchase of 100% share of UAB Raseinių agra (now – UAB AUGA Raseiniai) for EUR 2.4 million. Share sale and purchase agreement was signed on 10 November 2017, as per released notification on material event. UAB Raseinių agra was established in October 2017 as a result of spin-off procedure from UAB Agra Corporation, shareholders of which decided to withdraw from agricultural business and to focus in the area of investment property management. UAB Raseinių agra managed around 5,200 ha of agricultural land. The preliminary fair value estimation of UAB Raseinių agra as at the date of acquisition is as follows:

	Raseinių agra UAB
	Fair value as at 26 February 2018
<i>Non-current assets</i>	
Land-rent contracts	2,120
PPE	2,932
<i>Current assets</i>	
Inventory	834
Trade receivables and other current assets	337
Cash and cash equivalents	231
<i>Long term liabilities</i>	
Financial liabilities	(2,046)
Borrowings from AGRA companies	(1,273)
Deferred tax liability	(20)
<i>Short term liabilities</i>	
Other financial liabilities	(107)
Trade payables and other current liabilities	(573)
Net assets at acquisition date	2,435
Acquired share capital, %	100.0
Total value of the acquired investment	2,435
Cash paid for shares at the time of the purchase	2,435
Total purchase consideration	2,435
Goodwill	-

The purchase price allocation of the acquired net assets will be finalized till the end of 2018.

The Group has acquired UAB Raseinių agra to expand its agricultural land area and increase efficiency of human and technical resources. The companies under acquisition are located next to Group's cultivation areas in the Raseiniai region.

CONSOLIDATED INTERIM FINANCIAL STATEMENTS

(All amounts are in EUR thousand, unless stated otherwise)

Business combinations (continued)

Outflow of cash to acquire UAB Raseinių agra, net of cash acquired:

Purchase consideration settled in cash	2,435
Less: cash and cash equivalents acquired	231
Net cash outflow on acquisition	2,204

The fair value of acquired trade receivables is EUR 337 thousand. The gross contractual amount for trade receivables is EUR 337 thousand, of which none is expected to be uncollectible.

The acquired UAB Raseinių agra did not contribute any revenue or profit (loss) to the Group till 26 February 2018.

If the acquisition of UAB Raseinių agra had occurred on 1 January 2018, the Group's Revenue of 2018 would have been larger by EUR 29 thousand; net profit lower by EUR 169 thousand.

On 9 February 2018 the Group has signed a contract to sell two subsidiaries - Karakash OOO and Karakash Agro OOO which were operating in Crimea. The sale was finalized in 10 May 2018 and the gain on the transaction was accounted in other income. The result in the table is the preliminary impact based on the current assessment of timing and amount of payment. The details of the result of the Group's subsidiaries disposal is as follows:

Disposal of subsidiaries

Assets classified as held for sale

Property plant and equipment (after reversal of impairment)	2,742
Biological assets	737
Inventory	144
Trade receivables and other current assets	683
Cash and cash equivalents	5

Liabilities directly associated with assets classified as held for sale

Trade payables and other current liabilities	(1,416)
--	---------

Net assets at disposal date

	2,895
--	--------------

Sold share capital, %	100.00
-----------------------	--------

Paid in cash	500
--------------	-----

Deferred consideration	2,568
------------------------	-------

Total sales consideration	3,068
----------------------------------	--------------

Expenses incurred due to disposal of subsidiaries	11
---	----

Total gain on transaction	162
----------------------------------	------------

2. Share capital

The share capital of AUGA group, AB as at 30 September 2018 was EUR 65,950,713.08 (54,350,713.08 as at 31 December 2017). The share capital was divided into 227,416,252 ordinary shares (187,416,252 ordinary shares as at 31 December 2017). Each issued share has a EUR 0.29 nominal value and fully paid. Each share had usual material and proprietary and non-proprietary rights as per Law on Companies of the Republic of Lithuania and the Company's Articles of Association.
