

26-02-2021

CONFIRMATION OF RESPONSIBLE PERSONS

In accordance with the Law on Securities of the Republic of Lithuania and the Rules on the Information Disclosure approved by the Board of the Bank of Lithuania, we hereby confirm that, to the best of our knowledge, the attached consolidated interim financial statements of AUGA group, AB for the twelve months period ended 31 December 2020, have been prepared in accordance with the International Financial Reporting Standards, give a true and fair view of the assets, liabilities, financial position and profit or loss and cash flow of AUGA group, AB group.

ENCLOSURE: Consolidated interim financial statements of AUGA group, AB for the twelve months period ended 31 December 2020.

I. GENERAL INFORMATION

1.1. Accounting period covered by the report

Consolidated annual report was prepared for the 12 months period ended 31 December 2020.

1.2. Key data on the issuer

Name of the company:	AUGA group, AB (hereinafter – AUGA group, AB or the Company)
Share capital:	EUR 65,950,713.08
Address of head office:	Konstitucijos av. 21C, Quadrum North, LT-08130, Vilnius, Lithuania
Telephone:	+370 5 233 53 40
Fax:	+370 5 233 53 45
E-mail address:	info@auga.lt
Website:	www.auga.lt
Legal entity form:	Legal entity, joint stock company
Place and date of registration:	25 June 2003, Vilnius
Register code:	126264360
Registrant of the Register of Legal entities:	VĮ Registrų centras

1.3. Main lines of business of the Group

Operations area:	Organic agriculture
Main operating segments:	Grain growing and sale, milk production and sale, mushroom growing and sale, fast moving consumer goods production and sale.

1.4. The structure of the Group

As of 31 December 2020, the consolidated Group (hereinafter the Group) consists of the Company and 137 subsidiaries (31 December 2019: 136 subsidiaries). Please refer to the financial statements note 3 for a detailed list of the Group companies.

1.5. Agreements with the mediators of securities public circulation

The Company and FMĮ Orion Securities UAB (A. Tumėno st. 4, B building, LT-01109 Vilnius) signed an agreement regarding handling of Shareholders accounts.

1.6. Data about securities traded on regulated markets

The securities of the Company are included in Main List of NASDAQ Vilnius stock exchange (symbol: AUG1L).

Type of shares	Number of shares	Share nominal value (in EUR)	Total share capital (in EUR)	Issue Code ISIN
Ordinary registered shares	227,416,252	0.29	65,950,713.08	LT0000127466

The securities of the Company are also traded in Warsaw stock exchange.

Information about the Company's shares trading on the NASDAQ Vilnius:

Reporting period	Price, EUR			Date of last session	Total turnover	
	max	min	Last session		Units	EUR, million
2020 I quarter	0.362	0.265	0.273	2020.03.31	2,953,395	0.957
2020 II quarter	0.406	0.268	0.398	2020.06.30	3,615,072	1.226
2020 III quarter	0.478	0.398	0.446	2020.09.30	1,725,034	0.754

1.7. Information on non-financial reporting

The Company does not prepare interim non-financial reporting information. Annual Sustainability report of the Company for the year 2019 is provided as Annex No. 2 of the Company's consolidated annual report for the year ending 31 December 2019. Annual Sustainability report for the year 2020 will be provided with the Company's consolidated annual report for the year ending 31 December 2020.

1.8. Significant post balance sheet events

Post balance sheet events are disclosed in the consolidated financial statements of the Group for the 12 months period ending 31 December 2020. See financial statements' note 16 for more details.

II. MANAGEMENT REPORT

2.1. Overall results

AUGA group, AB, and its subsidiaries demonstrated strong financial results, improving both revenue and profitability.

During the 12 months of 2020, the Group's sales revenue amounted to EUR 83.11 million in the 12-month period of 2020. This marks a 17% rise on the equivalent period of the year before, when sales revenue was EUR 71.13 million. Revenue increased in all segments, with the highest increases in crop-growing segment (sales increased by EUR 7.89 million) and FMCG segment (sales increased by EUR 2.12 million).

The Group's gross profit reached EUR 15.83 million in 2020. This demonstrated a 61% rise compared to the same period last year (2019), when gross profit amounted to EUR 9.85 million. During the 12 months of 2020, the Group earned a EUR 0.94 million net profit, compared to a EUR 3.22 million loss a year earlier.

In 2020, the Group's EBITDA amounted to EUR 21.07 million, representing a 23% rise compared to the previous year, when EBITDA was EUR 17.12 million.

Main financial results, EUR million	12 months of 2020	12 months of 2019	12 months of 2018	Variance 2020/2019, %	Variance 2019/2018, %
Revenues	83.11	71.13	54.75	+17%	+30%
Gross profit (loss)	15.83	9.85	3.66	+61%	+169%
Gross profit margin	19%	14%	7%	+38%	+107%
Net profit (loss)	0.94	(3.22)	(5.98)	n/a	+46%
Net profit margin	1%	(5%)	(11%)	n/a	+59%
EBITDA	21.07	17.12	3.55*	+23%	+383%
EBITDA margin	25%	24%	6%	+5%	+272%

*Excluding IFRS16 effect, as IFRS16 implemented as of 1 January 2019

2.2. Crop growing segment overview

In 2020, the Group achieved significantly better results in the crop growing segment compared to the previous year. This is due to improved production technologies and somewhat favourable weather conditions. The early harvesting and lower quality of certain crops prevented the Company from achieving even higher results in the segment.

The sowing of crops for the upcoming season proceeded smoothly, and the current condition of crops is good. Therefore, the management of the company has positive expectations for 2021's results.

Results of crop growing segment consist of crop harvest fair value, sales of the previous and current year harvest and agricultural subsidies.

Harvest in the season of 2019/2020

The total cultivated land area by the Group amounted to 39.6 thousand hectares (ha) in the 2019/2020 season and was more than 1 thousand ha larger than in the 2018/2019 season. In the 2019/2020 season, 30.6 thousand ha were seeded with cash crops (28.7 thousand in the 2018/2019 season) out of which 11.9 thousand ha were dedicated to wheat, 9.0 thousand ha to legumes and 9.7 thousand ha to other cash crops. The majority – 11.3 thousand ha out of total 11.9 thousand ha – of wheat was winter wheat, which was a similar proportion to the season of 2018/2019 as winter crops usually have higher yield potential compared to summer alternatives. Forage crops comprised 8.2 thousand ha in the 2019/2020 season compared to 8.9 thousand ha in the 2018/2019 season.

By the end of reporting period (31 December 2020), all cultures of the 2019/2020 season were fully harvested. Gain (loss) on initial recognition of biological assets at fair value was recognised for wheat, legumes, and other cash crops, while harvest of forage crops was valued at cost. Gain on initial recognition of crops at fair value harvested in the 2019/2020 season amounted to EUR 7.11 million compared to EUR 3.83 million gain recognized for the season of 2018/2019. In 2020, the harvest's fair value increased by EUR 3.28 million or by 85%. It should be noted that EUR 1.45 million gain on initial recognition of biological assets at fair value for the 2019/2020 season's harvest had already been recognized as of 31 December 2019. Thus, gain on initial recognition of biological assets at fair value accounted for as of 31 December 2020 amounts to EUR 5.66 million.

At the end of each quarter the Group evaluates the fair value of crops which have not yet been sown. Weather conditions in the fall of 2020 were favourable for sowing and other preparatory land works for the season of 2020/2021. As a result, seeding and land preparation works for winter cash crops to be sown in the season of 2020/2021 were completed on time. In 2020, the Group sowed around 15.99 thousand ha of cash crops – winter wheat, winter rye, winter rapeseed and seed clover - which will be harvested in 2021. This represent 51% of total cash crops area to be sown in the season of 2020/2021. For comparison, in the 2019/2020 season around 14.5 thousand ha of winter cash crops were sown in the autumn of 2019. The condition of the cash crops at the reporting date is good. Cold weather during winter months should not have adverse impact to the seeded crops as high amount of snow protects the crop from cold temperatures. Favourable autumn weather also allowed for proper cultivation of the land and preparation for summer crop sowing in the spring 2021. As a result, the Group is well prepared for the season of 2020/2021 and positive about next year harvest potential.

As of the 31 December 2020 the Group recognized a EUR 2.02 million gain from the revaluation on biological assets at fair value for winter crops and seed clover (to be sown in 2021).

The formula and assumptions used for crop fair value estimation are provided below:

Fair value of the crop = Costs incurred + (Cultivated area in ha * forecasted average yield as tonnes per ha * forecasted grain price per tonne – cultivated area in ha * forecasted total cost per ha) * T * (1 - x), where:

- Cost incurred is cost actually incurred for particular crop during the season of 2019/2020 as of 31 December 2020.
- Cultivated area in ha is the area of particular crop seeded and expected to be harvested.
- Forecasted average yield in tonnes per ha is the expected yield for a particular crop based on the current season's results.
- Forecasted grain price per tonne – average sales prices in contracts for the 2019/2020 season harvest. 96% of the current year's harvest has been contracted at the date of this report's publication.
- Forecasted total cost per ha. The current level of accumulated costs adjusted by average historical cost levels of 2018 - 2020 were used for fair value estimation. It is expected that costs will remain at a similar level as that recorded in the previous periods.
- T is the portion of time that has already passed from sowing date until the forecasted harvest date expressed as a percentage. As of 31 December 2020 the average completion percentage estimated was around 37% depending on the crop.
- X is an adjustment parameter for possible unexpected negative effects to the harvest. 20% was used in fair value estimations as of 31 December 2020.

Total gain on the initial recognition of biological assets at fair value as of 31 December 2020 amounts to EUR 7.68 million compared to EUR 5.28 million gain accounted for in 2019. The results of the current season's harvest have improved by EUR 2.40 million compared to previous period.

Harvest results, EUR million	12 months of 2020	12 months of 2019	12 months of 2018	Variance 2020/2019, %	Variance 2019/2018, %
Gain (loss) on revaluation of biological assets at fair value (harvest of the 2019/2020 season)	5.66	3.83	(3.45)	+48%	n/a
Gain (loss) on revaluation of biological assets at fair value (crops to be sown in the 2020/2021 season)	2.02	1.45	-	+39%	-
Total gain (loss) on revaluation of biological assets at fair value	7.68	5.28	(3.45)	+45%	n/a

As presented below, land plots of wheat, legumes and other cash crops have slightly increased in the 2019/2020 season compared to the previous period and constituted 77% (2019: 74%) of total land area.

Harvested land plot by culture group, ha	12 months of 2020	12 months of 2019	12 months of 2018	Variance 2020/2019, %	Variance 2019/2018, %
Wheat	11,896	11,503	8,852	+3%	+30%
Legumes	9,035	8,039	10,682	+12%	-25%
Other cash crops	9,664	9,129	8,950	+6%	+2%

Comparison of wheat, legumes and other cash crops average cost per hectare of land is provided in the table below.

Cost per 1 ha cultivated land, EUR/ha	12 months of 2020	12 months of 2019	12 months of 2018	Variance 2020/2019, %	Variance 2019/2018, %
Wheat	818	884	881	-7%	0%
Legumes	805	792	790	+2%	0%
Other cash crops	1,139	1,176	1,038	-3%	+13%

The cost of legumes remained at a similar level in the 2019/2020 season compared to previous season, while the average cost of wheat has decreased by 7% and average cost of other cash crops have decreased by 3%. The cost of legumes slightly increased compared to the previous year due to increased harvest transportation, cleaning, and drying cost as the harvest in 2020 significantly increased compared to 2019. The cost of wheat and other cash crops has slightly decreased due to reduced land tillage costs as more effective technologies are now being applied for land tillage and other land preparatory work. By decreasing crop growing costs whilst implementing more efficient methods for land tillage and crop harvesting is important milestone in improving crop growing segment results.

The table below depicts the variance between yields in current and previous seasons. Wheat yield in 2020 was 4.11 t/ha which is similar to 4.21 t/ha in 2019. The Group has anticipated a higher yield for wheat of at least 4% this year. Legumes' yield in 2020 increased compared to the previous year from 1.67 t/ha to 2.70 t/ha. However, increase in legumes' yield was 10% lower than expected for the 2019/2020 season. The average yield of other cash crops was 18% higher as the yields for 8 out of 13 other cash crops have increased compared to the previous year.

Average yield, t/ha	12 months of 2020	12 months of 2019	12 months of 2018	Variance 2020/2019, %	Variance 2019/2018, %
Wheat	4.11	4.21	2.83	-2%	+49%
Legumes	2.70	1.67	1.41	+62%	+18%
Other cash crops	9.72	8.24	5.10	+18%	+62%

As it can be seen from the data presented, the Group's average yields of legumes are close to the average yields achieved by non-organic farms in Lithuania. While the yield of wheat in 2020 was lower than the yield of conventional wheat, due to specific fertilisation and weather conditions, the Group is constantly improving its technology and agricultural practices and in the long-term aims to achieve organic crop yields that are as close as possible to country's average conventional crop yields.

Wheat yield in Lithuania, t/ha

Legumes yield in Lithuania, t/ha

NOTE: The data of LT organic farms for 2020 has not yet been published, the data of conventional farms in the LT is preliminary. Reference: Lithuanian Statistics Department, data of the survey of the activities of Lithuanian agricultural producers included in the Farm Accountancy Data Network (FADN), the Group's data.

The table below provides comparison of wheat, legumes and other cash crops prices at which the harvest was evaluated at fair value in the seasons of 2019/2020, 2018/2019 and 2017/2018. It should be noted that at the time of publication of this report, 96% of the 2019/2020 season's harvest has already been contracted at fixed prices, therefore fair value of crops was estimated based on average contract prices.

Average price of 1 tonne of crop, eliminating sales costs, EUR/t	12 months of 2020	12 months of 2019	12 months of 2018	Variance 2020/2019, %	Variance 2019/2018, %
Wheat	208	243	256	-15%	-5%
Legumes	353	357	371	-1%	-4%
Other cash crops	174	181	221	-4%	-18%

As can be seen from the data above, the price of 1 tonne of wheat in the 2019/2020 season decreased by 15% compared to the previous season. This decrease in wheat prices was caused by two reasons: price decrease in the market and the unusually large amount of feed quality wheat in the mix. In the 2019/2020 season, the quality of harvested wheat was worse compared to previous seasons: in the 2019/2020 season the feed wheat (lower quality and price) proportion in the whole harvest reached 75% compared to the 2018/2019 season when it was 35%. As the Group had much more feed wheat than expected, more wheat had to be sold on the spot, which decreased the average wheat price even more.

The average price of legumes remained stable in the 2019/2020 season and allowed for the improvement of harvest results as the yield increased and the costs remained at similar level. The prices of other cash crops slightly decreased in 2020. It should be noted that the average price of other cash crops group depends on the actual crop mix each year. A moderate decrease in prices in 2020 were observed for sugar beet, rye and barley, while prices of oat and rapeseed increased.

The table below provide information on gain (loss) per hectare for wheat, legumes, and other cash crops.

Gain (loss) on revaluation of agricultural produce at point of harvest, EUR/ha	12 months of 2020	12 months of 2019	12 months of 2018	Variance 2020/2019, %	Variance 2019/2018, %
Wheat	35	217	(157)	-84%	n/a
Legumes	148	(195)	(269)	n/a	+28%
Other cash crops	550	324	90	+70%	+260%

Average gain per 1 hectare from wheat significantly decreased in the 2019/2020 season compared to previous season due to decreased market prices and the lower quality of the harvest. However, the Group succeeded in cutting wheat growing costs, which helped to diminish the negative impact of price and quality decreases. Legumes' result in the 2019/2020 season was significantly better compared to previous seasons. Higher results were achieved due to increased yield. However, the Group believes that the yield potential was around 10% higher for legumes and expects even better results in the future. Results from other cash crops have increased due to the increased yield of most cultures – 8 out of 13 cultures included in the other cash crops group had better yields in 2020 compared to the previous year. The improved results of rapeseed and oat mostly contributed to the positive results of other cash crops.

While evaluating the harvest results of forage crops, it should be noted that the produce of forage crops at the point of harvest is measured at production cost. In other words, forage crops production cost is used as a measure of the fair value of the produce of that forage crop since there is no active market for forage crops and there is no reliable data to calculate market price of forage crops. Due to this, the net result on revaluation of forage crops at the point of harvest is equal to zero. Average cost per 1 ha of cultivated land of forage crop was 767 EUR/ha in the 2019/2020 season or 6% higher than in the 2018/2019 season when it was 721 EUR/ha. This increase in production cost directly relates to the increased harvesting cost due to increased yield. The Group achieved better yields for forage crops in 2020 – the yield increased by 21% compared to previous year.

Results of forage crops	12 months of 2020	12 months of 2019	12 months of 2018	Variance 2020/2019, %	Variance 2019/2018, %
Cost per 1 ha cultivated land, EUR	767	721	643	+6%	+12%
Average yield, t/ha	7.39	6.10	4.93	+21%	+24%

The Group grows forage crops for its own use. Therefore, the quality and yields of forage crops directly impact the results of the dairy segment. Higher yields of forage crops at stable cost level allows for the reduction of forage crops cost per tonne and this positively affects the cost level of milk produced. In addition, the quality of forage crops harvested is important in achieving higher milk yields. The harvest of the forage crops in the 2019/2020 season is of a better quality compared to the previous year. Better quality and reduced cost per tonne of forage crops in the 2019/2020 season is expected to have a positive impact on the milk cost and yields in 2021.

Despite the improved results in 2020, the Group believes that the potential of this year's harvest could have been even higher:

- Weather conditions in the season 2019/2020 were rather favourable, however heavy rain during the winter and spring of 2020 led to the poorer quality of certain crops.
- Sales prices have decreased for 8 out of 17 cultures in 2020 compared to the previous year; however, the negative impact on wheat quality reflected in the sales prices of wheat as the average price decreased by 15% compared to the previous season.
- Yields increased for 11 out of 17 cultures, however the yield potential was not fully realized for several main crops – wheat, legumes and sugar beets.

Crop growing segment sales results

Total revenue generated from sales in the crop growing segment amounted to EUR 37.38 million in 2020. This is a 27% rise in revenue compared to 2019, when sales revenue was EUR 29.49 million.

As of 31 December 2020 around 95% of current season harvest was contracted, out of which 63% were sold and delivered to the clients. Group's sales in the 12 months of 2020 increased due to larger quantities sold as the harvest quantities are increasing year-on-year.

Crop growing segment results, EUR million	12 months of 2020	12 months of 2019	12 months of 2018	Variance 2020/2019, %	Variance 2019/2018, %
Sales revenue	37.38	29.49	17.48	+27%	+69%
Cost of sales	38.20	30.45	17.42	+25%	+75%
Inventory write-offs	1.43	1.54	1.40	-7%	+10%
Result of sales of agricultural produce	(2.25)	(2.49)	(1.34)	-10%	+86%

The crop growing segment's sales cost for the 12 months of 2020 amounted to EUR 38.20 million versus EUR 30.45 million in 2019. The cost of sales increase was 2% lower compared to the percentage of revenue increase. Total agricultural produce inventory write-offs and impairment during the 12 months of 2020 amounted to EUR 1.43 million compared to EUR 1.54 million during the 12 months of 2019. Even though crops sales quantities in 2020 have increased, prices of commodities in 2020 were lower than in 2019, which resulted in a sales of agricultural produce loss of EUR 2.25 million for the first 12 months of 2020. The result of agricultural produce sales improved by EUR 0.24 million compared to previous period.

Agricultural subsidies and gross profit of the crop growing segment

As of 31 December 2020, the Group has reclassified the subsidies related to grasslands and pastures from agricultural to dairy segment in order to gain a better representation of the segments' results. This reclassification was performed in comparable the period as well. The performed reclassification does not affect any other disclosures or results in general.

The total amount of agricultural subsidies accrued for 12 months of 2020 was EUR 7.45 million compared to EUR 5.19 million during the same period in 2019. It should be noted that in 2019 the Group was sanctioned and did not receive EUR 2.07 million of expected organic subsidies. If the number of sanctions imposed in 2019 were eliminated, the subsidies amount for 2020 slightly increased due to the declaration of larger land plots. By the end of 2020, the majority of expected subsidies' amount had already been received. The received subsidies were in line with the Group's expectations and no sanctions were applied as organic farming requirements for which Group had been sanctioned in 2019 were removed in 2020.

In 2020, gross profit from the crop growing segment, encompassing the results of agricultural produce sales, gain (loss) on changes in fair value of biological assets, and agricultural subsidies amounted to EUR 12.88 million. This demonstrated a 61% uplift compared to a gross profit of EUR 7.98 million in 2019. The gain on the initial recognition of biological assets at fair value recognized in 2020 increased by 45% comparing to previous period.

Gross profit of crop growing segment, EUR million	12 months of 2020	12 months of 2019	12 months of 2018	Variance 2020/2019 %	Variance 2019/2018, %
Gain (loss) on initial recognition of a biological asset at fair value and from a change in fair value of a biological asset recognized in reporting period	7.68	5.28	(3.45)	+45%	n/a
Result of sales of agricultural produce	(2.25)	(2.49)	(1.34)	+10%	+86%
Subsidies	7.45	5.19	6.96	+43%	-25%
Gross profit	12.88	7.98	(1.29)	+61%	n/a

2.3. Dairy segment overview

In 2020, the primary focus of the AUGA group was to increase the efficiency of its dairy segment, and the Group can already see that this strategy is yielding its first positive impact on results.

The Group is planning to continue its efficiency agenda in 2021 by increasing dairy cow herd numbers, improving feed quality, and achieving a lower feed cost.

Total sales revenue of the dairy segment grew to EUR 10.81 million in 2020. This compares to total sales of EUR 10.14 million in 2019 and represents a 7% increase. The increased volume of milk sold, as a result of improved yields per cow, and the higher share of milk sold at organic production prices both contributed to this increase in sales revenue. The total quantity of milk sold increased by 4% - from 24.49 thousand tonnes (or 19.91 kg per cow per day) in the 12 months of 2019 to 25.38 thousand tonnes (or 21.09 kg per cow per day) in the 12 months of 2020. Milk yields dynamics for the past three years are provided in the graph below.

The decrease in milk yields in the third and fourth quarters of 2020 is a seasonal drop that is directly related to the change in feed regime from pasture to farms and other conditions that affect the productivity of milking cows. Despite this seasonal decrease, milk yields are still better than in previous years.

The Group's organic milk price decreased by 1.7 % in the 12 months of 2020 and was EUR 401 per tonne (in the 12 months of 2019 the price of organic milk was EUR 408 per tonne). In the 12 months of 2020 the average price of milk sold was around EUR 397 per tonne or 3.1% higher comparing to the same period last year when it was EUR 385 per tonne. Average milk price increased due to the larger share of organic milk sold.

The share of milk sold at organic production prices reached 94% in the 12 months of 2020 which is significantly higher compared to 74% during the same period in 2019. As can be seen from the graph below, the share of milk sold at organic prices has been steadily growing from the beginning of 2019 and there have been no significant fluctuations in the share of organic milk sold.

The dairy segment's cost of sales amounted to EUR 10.43 million during the 12 months of 2020 compared to EUR 10.64 million during the same period last year (2% decrease). The cost of milk remained at the similar level compared to the previous year; however, the Group is currently reviewing its forage structure in order to reduce cost and to increase the yield of milk. In addition, draught in the 2018/2019 season adversely impacted yields and the quality of forage crops which were fed to cows during 2020. The improved quality and harvest of forage crops of the 2019/2020 season should have a positive impact on milk cost in 2021.

During the 12 months of 2020, a loss of EUR 2.52 million was incurred on the revaluation of biological assets (animal herd). In comparison, a EUR 2.19 million loss was incurred during the same period a year earlier. The Group is seeking to increase milk yields per cow, which would result in increased production quantities and reduced costs. In order to achieve higher milk yields, and the quality of cow herd in general, aged and not productive cows are substituted with younger heifers. Write-offs of aged cows increased loss from revaluation of biological assets.

As of 31 December 2020, the Group has reclassified the subsidies related to grasslands and pastures from the agricultural to dairy segment to provide a better representation of the segments' results. This reclassification was performed in all periods; therefore, the results between periods are comparable and respective reclassification does not affect any other disclosures or results at large.

As milk yields and the gross result from milk sales increased, whilst costs remained at a similar level, the gross result of the dairy segment improved compared to the previous year. In the 12-month period of 2020, gross profit for the dairy segment amounted to EUR 0.39 million, compared to a EUR 0.66 million gross loss in 2019.

	12 months of 2020	12 months of 2019	12 months of 2018	Variance 2020/2019, %	Variance 2019/2018, %

2.4. Mushroom segment overview

Although production volumes increased in 2020, overall results were lower.

The global pandemic had a tangible impact on results. The market became volatile in terms of supply and demand, there was a drop in sales to the catering sector and reduced consumption during the winter holiday season. This situation was compounded by limited export sales of mushroom seedbed. Moreover, the cost of goods increased due to the heightened demand for packaged mushrooms, and operational costs grew due to increased spending on employee safety. The sales price increase only partially offset these additional costs.

The Group expects the market situation to stabilize once the pandemic is under control and is actively looking for new export markets to diversify sales. It is also implementing efficiency initiatives to reduce costs.

Overall, the sales in the mushroom growing segment increased by 5% to EUR 30.00 million during the 12 months of 2020. In the equivalent period in 2019, sales in this segment were EUR 28.71 million. The revenue from mushroom sales grew by EUR 2.06 million while revenue from mushroom seedbed sales decreased by EUR 0.77 million.

Mushroom sales revenue increased due to the higher volume of sales – 12.91 thousand tonnes of mushrooms were sold in the 12 months of 2020 compared to 12.26 thousand tonnes a year earlier (5% increase). This increase was mostly related to better mushroom yields compared to previous period.

During the 12 months of 2020, the share of organic mushrooms remained unchanged compared to previous year and amounted to 7.5% of total volume of mushrooms sold.

In the 12 months of 2020, average non-organic and organic mushrooms sales price increased by around 4% compared to the same period in 2019. The average price of 1 tonne of mushrooms sold was 2,199 EUR/tonne in the 12 months of 2020 (2,147 EUR/tonne in the 12 months of 2019). The average mushroom price increased due to larger sales of packaged mushrooms and the resale of forest mushrooms. However due to the unusually high amount of wild forest mushrooms in local forests, the demand for fresh mushrooms decreased in the second half of 2020 and the Group had to sell a larger proportion of mushrooms to processing (at a lower price). In addition, the global pandemic caused by COVID-19 and quarantine limitations negatively impacted sales to the HoReCa segment and household consumption in the last quarter of 2020 during the winter holiday season.

The sales of seedbed in 2020 have decreased by 32% compared to the previous year. This reduction was due to the closed sales channel to Russia due to the COVID-19 pandemic.

The total cost of sales of the mushroom growing segment amounted to EUR 28.25 million in the 12 months of 2020 and was EUR 2.03 million higher compared to the same period in 2019 when it was EUR 26.22 million. The average cost of 1 tonne of mushrooms sold increased from 1,936 EUR/tonne to 2,083 EUR/tonne. Cost of mushrooms mainly increased due to higher sales of packaged mushrooms.

According to the Group's data, the gross profit of the segment for the 12-month period of 2020 amounted to EUR 1.75 million, demonstrating a 29% fall on the same period last year, when the gross profit of the segment was EUR 2.49 million. The decrease in gross profit is mainly related to market volatility and increased costs in the current environment caused by the global pandemic.

	12 months of 2020	12 months of 2019	12 months of 2018	Variance 2020/2019, %	Variance 2019/2018, %
Sold mushrooms, t	12,906	12,256	12,147	+5%	+1%
Average price (Eur/t)	2,199	2,147	1,966	+2%	+9%
Total revenue, EUR million	30.00	28.71	26.46	+5%	+9%
Mushroom sales revenue, EUR million	28.38	26.32	23.88	+8%	+10%
Compost sales revenue, EUR million	1.62	2.39	2.58	-32%	-7%
Cost of sale, EUR million	28.25	26.22	24.73	+8%	+6%
Cost of mushrooms sold, EUR million	26.89	23.73	22.33	+13%	+6%
Cost of compost sold, EUR million	1.36	2.49	2.40	-45%	+4%
Gross profit, EUR million	1.75	2.49	1.82	-29%	+37%

2.5. Fast moving consumer goods (FMCG) segment

The segment continued to experience significant growth in 2020, mainly driven by development in its export operations, in particular to the U.S. market.

In the future, the Group will continue expanding its presence in home market and export business. The access to newly opened markets and successful contracts signed in 2020 will continue to have a positive impact on the segment's growth in 2021.

Total sales of the segment grew to EUR 4.92 million in 2020. This compares to sales of EUR 2.80 million in 2019 and represents a 76% increase. The significant increase in the FMCG segment sales has been impacted by the higher demand in both local and foreign markets. While COVID-19 pandemic has slowed the launch of new products, the demand for long shelf-life products compensated for the deceleration. Moreover, the Group expanded its exports markets, which positively affected sales.

FMCG segment results, EUR million	12 months of 2020	12 months of 2019	12 months of 2018	Variance 2020/2019, %	Variance 2019/2018, %
Sales revenue	4.92	2.80	1.86	+76%	+50%
Cost of goods sold	4.12	2.75	1.79	+50%	+53%
Gross profit	0.80	0.05	0.70	+1636%	-93%

The table below provide information on FMCG sales share and sales increase by major markets.

Country	Share of total sales, %			Increase in sales, %	
	12 months of 2020	12 months of 2019	12 months of 2018	2020/2019	2019/2018
Lithuania	29%	53%	69%	+14%	+46%
USA	36%	14%	0%	+458%	n/a
Sweden	6%	5%	0%	+163%	n/a
Japan	6%	4%	0%	+206%	n/a
Latvia	5%	5%	4%	+91%	+146%
Other	19%	20%	27%	+111%	+39%

During the 12 months of 2020 the Group has expanded its exports and currently sells its products to 31 countries compared to 23 countries in the same period in 2019. Sales grew in both local and foreign markets, however, due to export expansion, the share of local sales has decreased. Increased sales to the USA by 458% had the highest impact on sales growth in the FMCG segment.

Preserved products, especially ready-to-eat organic soups, remain the main product group in the segment. The FMCG sales revenue structure for 2020 is depicted in the chart below.

FMCG sales revenue structure 2020 12M,%

Cost of sales were EUR 4.12 million for the 12 months of 2020 compared to EUR 2.75 million for the same period in 2019. In the 12 months of 2020, the FMCG segment's gross profit jumped to EUR 0.80 million, while during the same period in 2019, gross profit amounted to EUR 0.05 million.

As of 28 May 2020 the Group has acquired full control of Grybai LT, KB which produces and sells packaged consumer goods. Grybai LT, KB is included in the Group's consolidated financial statements as of 1 June 2020. The acquisition of Grybai LT, KB improved the results of the FMCG segment as Grybai LT, KB contribution to consolidated sales revenue of the Group amounted to EUR 1.30 million in 2020.

2.6. Operating expenses

The Group's operating expenses during 2020 amounted to EUR 10.21 million compared to EUR 9.58 million in the same period last year. The increase is mostly related to the increased insurance and selling expenses. Additionally, the operating expenses of the newly acquired entity Grybai LT, KB were included in consolidated financial statements as of 1 June 2020.

2.7. COVID-19 pandemic effect

In light of the COVID-19 pandemic's effects on the business environment, measures have been taken to address the most significant coronavirus-related risks throughout the Group's key business units, namely crop growing, dairy production, mushroom growing and fast-moving consumer goods (FMCG).

Additional measures have been taken to ensure the safety of the Group's employees and the continuation of its daily activities. With additional measures applied, all Group companies are operating at the required capacities.

At the market level, agricultural production companies stood out as some of the least affected by the crisis, given the nature of their produce and increased demand from households. However, prolonged restrictions eventually impact all businesses. Later in the year, the mushroom segment was somewhat affected by pandemic caused changes in the market.

Crop growing

The Company's management did not see any significant changes in the crop market. If the pandemic continues and the Group would face a labour shortage due to high numbers of infected or quarantined persons this risk may be mitigated via temporary employment, as was successfully done in 2020.

Dairy

Milk production has been running at regular capacity and there were no problems with product demand. The management is not seeing at present nor does it forecast a decrease of demand in this segment. However, the risk of labour shortage remains, if the numbers of infected or quarantined persons were to rise dramatically. If this scenario occurs, the Group is ready to mitigate this risk with temporary employment, as was done in 2020.

Mushroom growing

The biggest threat in the mushroom growing segment is related to production, given the labour intensity of the production operations. Therefore, the Company has implemented various measures to ensure the safety of employees and to minimize contact among them. The Group could face a shortage of labour if the number of infected or quarantined persons were to increase dramatically. Labour shortages were successfully compensated with temporary employment from the outside and secondment from other companies of the Group in 2020.

In 2020, several business areas of the segment were negatively affected by the pandemic due to instability in the market:

- sales to wholesalers working with HoReCa decreased,
- sales of mushroom seedbeds to Russia decreased,
- market volatility increased which made it challenging to sell mushrooms at the best fresh mushroom price.

The Group is looking for new export markets for sales diversification and implements efficiency initiatives to reduce costs.

FMCG

The growing demand for long shelf-life packaged products (dairy products, soups, etc.) was observed across all markets. In terms of the associated risks in this segment, these are mainly related to possible interruptions in the supply chain of raw materials that the Group cannot produce in-house.

III. FINANCIAL STATEMENTS

VI. EXPLANATORY NOTES

1. Basis of the preparation

The accompanying interim financial information for the 12-month period ending 31 December 2020, has been prepared in accordance with IAS 34, 'Interim financial reporting'. The accounting policies applied are consistent with those of the annual financial statements for the year ending 31 December 2019, as described in those annual financial statements. This financial information should be read in conjunction with the annual financial statements for the year ending 31 December 2019 which have been prepared in accordance with IFRS as adopted by the EU.

The presentation currency is euro (EUR). The financial statements are presented in thousands of euro, unless indicated otherwise. Financial statements for the 12-month period ending 31 December 2020 are not audited. Financial statements for the year ending 31 December 2019 are audited by the external auditor UAB PriceWaterhouseCoopers.

Critical accounting estimates and assumptions

The preparation of financial information in conformity with IAS 34 requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Group's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the consolidated financial information, are disclosed below. Critical accounting estimates and assumptions remain the same as disclosed in the audited annual financial statements for period ending 31 December 2019.

IFRS 16, Leases

Based on IFRS 16, the Group recognised lease liabilities in relation to leases which had previously been classified as 'operating leases' under the principles of IAS 17 Leases. These liabilities were measured at the present value of the remaining lease payments, discounted using the lessee's incremental borrowing rate as of 1 January 2019. The weighted average lessee's incremental borrowing rate applied to the lease liabilities as of 1 January 2019 was 6%. The incremental borrowing remained unchanged throughout 2019 and 2020.

In applying IFRS 16, the Group has used the following practical expedients permitted by the standard:

- the use of a single discount rate to a portfolio of leases with reasonably similar characteristics;
- reliance on previous assessments on whether leases are onerous;
- the accounting for operating leases with a remaining lease term of less than 12 months as short-term leases (which were recognized as expense on a straight-line basis);
- the exclusion of initial direct costs for the measurement of the right-of-use asset at the date of initial application;
- the use of hindsight in determining the lease term where the contract contains options to extend or terminate the lease.

Revaluation of biological assets (crops)

The Group estimates the total fair value of crops using following formula and assumptions:

Fair value of the crop = Costs incurred + (Cultivated area in ha * forecasted average yield as tonnes per ha * forecasted grain price per tonne – cultivated area in ha * forecasted total cost per ha) * T * (1 - x), where:

- Cost incurred is cost actually incurred for particular crop during the season till the reporting date.
- Cultivated area in ha is an area of particular crop seeded and expected to be harvested.
- Forecasted average yield tonnes per ha.
- Forecasted grain price per tonne. contracted average sales prices are used for fair value estimation.
- Forecasted total cost per ha. Average historical cost levels are used for fair value estimation.
- T is a time portion, spanning from the sowing date to the forecasted harvest date.
- X is an adjustment parameter for possible unexpected negative effects to the harvest.

Revaluation of biological assets (livestock)

Due to the specifics of the agricultural market, fair value of milking cows cannot be determined by using comparable market prices method, as such biological assets in areas where the Group operates are not traded on active markets which could enable the use of market value. The Group values cows using the discounted cash flow method. The model uses projected revenues from milk sales over the remaining useful life of each animal using a forecasted milk price. Milk price forecast is the average milk price assumption of the following 3 years was. Current cow herd has an estimated working life of 1 to 3 years. At the end of the working period the cow is estimated to be sold for meat. The forecasted revenues are reduced with costs directly related to herd growing (feeds, medicines, employee salaries and other). The free cash-flow is discounted with post tax WACC.

Revaluation of biological assets (livestock) (continued)

For valuation of other livestock the Group calculates the fair value by taking the average price of meat per kilo. For young bulls and heifers, the value of livestock is determined by using the market values of meat (different for different groups of animals) and multiplying the price of 1 kg by the total weight of specific group of animals.

Share-based payments

Total cumulative expenses of share-based payments are calculated based on the formula described below. The expenses are accrued in the profit (loss) statement and equity based on the days lapsed since the grant date till the reporting date. Each year the entity will revise the expense to reflect the best available estimate of the number of equity instruments expected to vest.

The total expenses of share-based payments are calculated based on the formula:

$$\text{Share price @ grant date} \times \text{Granted shares} \times (1 - \text{annual staff turnover})^{\text{vesting period}}$$

Where:

The share price of options is based on the closing price at grant date at which the company's shares are traded on the Nasdaq Stock Exchange.

The grant date of the Option is set to be the date of the share-based payment agreement between the Company and the receiver as all the terms and conditions are set in this agreement and there are no other arrangements which would need to be confirmed at a later date.

Granted shares – shares to be granted to employee based on the Option agreement.

Staff turnover – chance that the option will be exercised is adjusted by the forecasted staff turnover percent during the vesting period. The ratio is calculated based on historical staff turnover data of 2 years. The historical staff turnover data includes turnover only of the positions which are set to receive the share-based payments. The turnover of other positions are excluded from the ratio.

There are option agreements which are signed with a special condition – that the receivers do not need to fulfill the service condition, but they will still need to wait 3 years vesting period before being able to exercise the option. Due to this staff turnover adjustment is excluded in the calculation of the expenses of these options as it does not affect their chances to receive the option.

2. Share capital and reserves

Share capital and premium of the Company

The share capital of AUGA group AB as of 31 December 2020 was EUR 65,951 thousand (as of 31 December 2019: EUR 65,951 thousand). The share capital is divided into 227,416,252 ordinary shares (2019: 227,416,252 ordinary shares). Each issued share has a EUR 0.29 nominal value and fully paid. Each share had usual material and intangible rights as per Law on Companies of the Republic of Lithuania and the Company's statutes.

On 23 August 2018 AUGA group AB successfully completed secondary public offering by issuing 40,000,000 share units. The shares were sold for the total amount of EUR 18 million at EUR 0.45 price per share. Share premium represent the price premium paid by the shareholders, deducting the expenses related to the whole offering process. Share premium at the end of 31 December 2020 amounted to EUR 6,707 thousand (31 December 2019: EUR 6,707 thousand).

Shareholders

Total number of shareholders on 31 December 2020 was 1,866 (one thousand eight hundred sixty six) and on 31 December 2019 it was 1,330 (one thousand three hundred thirty).

2. Share capital and reserves (continued)

The shareholders owning more than 5% of shares in the Company are the following:

Entity / person	31 December 2020		31 December 2019	
	Number of shares	% owned	Number of shares	% owned

Information on the shares of the Company held by the members of the Board and the top executives as of 31 December 2020:

Name, Surname	Position	Owned shares in the Company, units	Owned shares in the Company, %
Kęstutis Juščius*	CEO	1,392	0.0006%
Tomas Krakauskas**	Member of the Board	119,000	0.052%
Mindaugas Ambrasas	CFO	6,881	0.003%

* Kęstutis Juščius, CEO, is the ultimate owner of Baltic Champs Group UAB, controlling 55.04% of the Company's shares.

** Tomas Krakauskas is an employee of UAB ME Investicijos, which holds 8.39% of the Company's shares.

Reserves of the Company

A legal reserve is a compulsory reserve under Lithuanian legislation. Annual transfer of at least 5% of net profit, calculated in accordance with Lithuanian regulatory legislation on accounting, is compulsory until the reserve including share premium reaches 10% of the share capital. The legal reserve can be used to cover the accumulated losses. The legal reserve of the Company equalled to EUR 1,834 thousand as of 31 December 2020 (EUR 1,834 thousand as of 31 December 2019).

Revaluation reserve comprises revaluation of land portfolio owned by the Group. Land portfolio valuation is performed by independent valuator. The valuation for reporting period was performed in 2020. Revaluation reserve as of 31 December 2020 amounted to EUR 9,092 thousand (EUR 8,488 thousand as of 31 December 2019).

In 2018 the Company formed a reserve to grant shares for employees. The value of the reserve increased by EUR 885 thousand in 2020 due to implementation of employee share option plan (in 2019 reserve increased by EUR 667 thousand). Reserve to grant shares for employees as of 31 December 2020 amounted to EUR 2,509 thousand (EUR 1,624 thousand as of 31 December 2019).

Employee Option Plan was approved by shareholders at the annual general shareholders' meeting on 30 April, 2019. The service condition for the Option receiver is to complete a 3-year term of service to the Group. After the condition is met employee is eligible to exercise the option.

Reserve to grant shares for employees

	Number of shares, units	Value, EUR
Total reserve as of 31 December 2018	3,300,000	957
Shares allocated to employees based on option agreements as of 31 December 2019	2,548,860	739
Unallocated shares as of 31 December 2019	3,051,140	885
Total reserve as of 31 December 2019	5,600,000	1,624
Shares allocated to employees based on option agreements as of 31 December 2020	4,765,690	1,382
Unallocated shares as of 31 December 2020	3,886,034	1,127
Total reserve as of 31 December 2020	8,651,724	2,509

In 2020 the reserve to provide share for employees was increased by 3,051,724 shares with a nominal value of EUR 0.29 and in total of EUR 885 thousand. In 2020 the Group recognised employee benefit expenses of EUR 247 thousand related share options granted to employees.

3. The structure of the Group

As of 31 December 2020, the consolidated Group (hereinafter the Group) consisted of the Company and 137 subsidiaries (31 December 2019: 136). On 14 February 2020 Group companies Baltic Champs UAB and AUGA Luganta UAB together with other shareholders of Grybai LT KB, capitalised loans provided to Grybai LT KB which resulted in an increase in share capital of Grybai LT KB and a change in the Group's interest in the company. As a result, the Group's share in Grybai LT KB increased from 22% to 61 %. On 28 May 2020 Group companies Agromilk, KB, Juodmargelis, KB and Šventosios pievos, KB bought-out the rest of minority shareholders and with this transaction the Group took over the full control of Grybai LT KB. On 15 December 2020 Agromilk, KB, Juodmargelis, KB and Šventosios pievos, KB sold its shares to Grybai LT, KB to Baltic Champs UAB. Detailed list of all subsidiaries is provided below.

Consumed in preparation of biological assets (crops and mycelium seedbed)	(1,236)	(3,713)	-	-	-	(1,910)	-	(7,263)	(14,122)
Inventory write-offs	(81)	(23)	-	(190)	(16)	(365)	(672)	(83)	(1,430)
Balance as of 31 December 2020	3,516	5,009	13	11	353	6,193	7,785	7,664	30,544

7. **Receivables and advance payments**

As of the balance sheet date Group's receivables and advance payments consisted of the following:

	As of 31 December 2020	As of 31 December 2019
Trade receivables	8,422	7,247
VAT receivable	1,280	639
Receivables from National Paying Agency	272	1,385
Accounts receivable from private individuals	83	43
Other receivables	538	1,173
Advance payments and deferred expenses	4,353	2,982
Less: loss allowance	(66)	(148)
Total trade accounts receivable, net	14,880	13,322
Non-current receivables, gross	1,948	5,975
Less: loss allowance	(538)	(299)
Total	16,289	18,998

Receivables from the National Paying Agency are the direct subsidies receivable for crops and milk, which are due by 30 April of the following year. Majority of subsidies for 2020 were already received by the end of 2020.

8. Financial liabilities

The Group's long-term borrowings consisted of the following:

	<u>As of 31 December 2020</u>	<u>As of 31 December 2019</u>
<i>Borrowings from banks</i>		
Mushroom growing companies	8,892	1,970
FMCG companies	1,184	-
Agricultural entities	11,003	6,435
Parent company	3,000	-
<i>Other borrowings</i>		
Creditors	753	3,489
Investment fund for purchased land	253	1,072
Green Bonds	18,818	18,523
Total	43,903	31,489
Less: amounts, payable within one year (according to agreements)	(3,409)	(10,819)
Total long-term borrowings	40,494	20,670

On 13 December 2019 the Group issued 20,000 units of Green Bonds (hereinafter – Bonds) with a nominal value of EUR 1,000 and an annual interest rate of 6%. The maturity date of Bonds falls on 17 December 2024. Interest payment dates are set at 17 December of each year until 2024. The Bonds were introduced to trading on regulated market in AB Nasdaq Vilnius Bond list. Balance sheet value of the bonds represent the value of the bonds after discounts and other related expenses. These expenses and discounts are accounted as interest expenses and capitalized to the value of the bonds over the 5-year period.

The companies of the Group have signed agreements to refinance loans and provide additional limits with commercial banks on November 25 of this year.

The long-term borrowings and payables are repayable as follows:

	<u>As of 31 December 2020</u>	<u>As of 31 December 2019</u>
<i>Financial liabilities to banks and bondholders</i>		
Within second year	5,186	997
Within third and fourth year	25,843	571
After fifth year and later	9,465	19,102
Total	40,494	20,670

The Group's short-term borrowings were the following:

	<u>As of 31 December 2020</u>	<u>As of 31 December 2019</u>
<i>Borrowings from banks</i>		
Mushroom growing companies	2,400	2,400
FMCG companies	-	-
Parent company	-	16,900
Grain selling entity	7,000	-
Total short-term borrowings	9,400	19,300

Short-term loans from banks include EUR 9,400 thousand (in 2019: EUR 19,300 thousand) credit-line facilities.

9. Leases

The Group's leases consisted of the following:

	As of 31 December 2020	As of 31 December 2019
<i>Lease liabilities</i>		
Lease liabilities related to right-of-use assets*	34,626	34,960
Lease liabilities related to other assets**	6,613	8,245
Total	41,239	43,205
 Less: amounts payable within one year		
Lease liabilities related to right-of-use assets*	4,607	4,113
Lease liabilities related to other assets**	2,950	2,942
Total	7,557	7,054
 Total long-term leases	33,682	36,150

* Lease liabilities accounted as operational lease before adoption of IFRS 16.

** Lease liabilities accounted as financial lease before adoption of IFRS 16.
