Notes to the consolidated financial statements

1 General information

ELKO Grupa AS ("the Parent Company") and its subsidiaries (together "the Group") principal activity is wholesale distribution of computer desktop components, notebooks, monitors, peripherals, multimedia, consumer and solution products, using the wide network of the Group companies and cooperation partners, representing a broad range of vendors of these products all over the world. The selection includes products from a range of vendors, including Intel, Seagate, Western Digital, Hitachi, Acer, Sony, Toshiba, Samsung and Asus.

The Parent Company is a joint stock company incorporated and domiciled in Latvia with company's registered office at Rupniecibas str, 27, Riga, LV-1045, Latvia. These consolidated financial statements have been prepared for issue by the Management on 26 March 2010 and signed on its behalf by the Chairman of the Board Egons Mednis.

The financial statements are subject to the approval of the shareholders in general meeting.

The Parent Company has the following participating interests in its subsidiaries:

Name	Country	Participating interest in share capital of subsidiaries	
		31.12.2009	31.12.2008
		%	%
ELKO Eesti AS	Estonia	100%	100%
WESTech s.r.o.	Slovakia	51%	51%

Alma Limited	Russia	100%	100%

Notes to the consolidated financial statements (continued)

2 Summary of significant accounting policies

The principal accounting policies applied in the preparation of these consolidated financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

2.1 Basis of preparation

The consolidated financial statements have been prepared on a historical cost basis. The consolidated financial statements are presented in euros (EUR) and all values are rounded to the nearest thousand (EUR 000) except when otherwise indicated.

Statement of compliance

The consolidated financial statements of the Group have been prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB), as adopted by the EU.

Basis of consolidation

The consolidated financial statements comprise the financial statements of the Group and all its subsidiaries as at the 31st of December each year.

Subsidiaries

Subsidiaries are all entities over which the Group has the power to govern the financial and operating policies generally accompanying a shareholding of more than one half of the voting rights. Subsidiaries are fully consolidated from the date on which the Group obtains control until the date that such control ceases. The financial statements of the subsidiaries are prepared for the same reporting period as the parent company, using consistent accounting policies.

The purchase method of accounting is used to account for the acquisition of subsidiaries by the Group. The cost of an acquisition is measured as the fair value of the assets given, equity instruments issued and liabilities incurred or assumed at the date of exchange, plus costs directly attributable to the acquisition. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date, irrespective of the extent of any non-controlling interest. The excess of the cost of acquisition over the fair value of the Group's share of the identifiable net assets acquired is recorded as goodwill. If the cost of acquisition is less than the fair value of the net assets of the subsidiary acquired, the difference is recognised directly in the statement of comprehensive income.

Intra-Group transactions and non-controlling interests

Inter-company transactions, balances and unrealized gains on transactions between group companies are eliminated in full. Unrealized losses are also eliminated but considered an impairment indicator of the asset transferred. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Group.

The Group applies a policy of treating transactions with non-controlling interests as transactions with parties external to the Group. Disposals of non-controlling interests result in gains and losses for the Group that are recorded in the statement of the comprehensive income. Purchases from non-controlling interests result in goodwill, being the difference between any consideration paid and the relevant share acquired of the carrying value of net assets of the subsidiary.

Notes to the consolidated financial statements (continued)

2.2 Changes in accounting policies and disclosures

The accounting policies adopted are consistent with those of the previous financial year except as follows:

The Group has adopted the following new and amended IFRS and IFRIC interpretations as of 1 January 2009:

- IFRS 2 *Share-based Payment: Vesting Conditions and Cancellations* effective 1 January 2009
- IFRS 2 *Share-based Payment: Group Cash-settled Share-based Payment Transactions* effective 1 January 2010 (early adopted)
- IFRS 7 *Financial Instruments: Disclosures* effective 1 January 2009
- IFRS 8 *Operating Segments* effective 1 January 2009
- IAS 1 *Presentation of Financial Statements* effective 1 January 2009
- IAS 23 *Borrowing Costs (Revised)* effective 1 January 2009
- IAS 32 *Financial Instruments: Presentation* and IAS 1 *Puttable Financial Instruments and Obligations Arising on Liquidation* effective 1 January 2009
- IAS 39 *Financial Instruments: Recognition and Measurement – Eligible Hedged Items* effective 1 July 2009 (early adopted)
- IFRIC 9 *Remeasurement of Embedded Derivatives* and IAS 39 *Financial Instruments: Recognition and Measurement* effective for periods ending on or after 30 June 2009
- IFRIC 13 *Customer Loyalty Programmes* effective 1 July 2008
- IFRIC 15 *Agreement for the Construction of Real Estate*
- IFRIC 16 *Hedges of a Net Investment in a Foreign Operation* effective 1 October 2008
- IFRIC 18 *Transfers of Assets from Customers* effective 1 July 2009 (early adopted)
- Improvements to IFRSs (May 2008)
- Improvements to IFRSs (April 2009, early adopted)

When the adoption of the standard or interpretation is deemed to have an impact on the financial statements or performance of the Group, its impact is described below:

IFRS 7 Financial Instruments: Disclosures

The amended standard requires additional disclosures about fair value measurement and liquidity risk. Fair value measurements related to items recorded at fair value are to be disclosed by source of inputs using a three level fair value hierarchy, by class, for all financial instruments recognised at fair value. In addition, a reconciliation between the beginning and ending balance for level 3 fair value measurements is now required, as well as significant transfers between levels in the fair value hierarchy. The amendments also clarify the requirements for liquidity risk disclosures with respect to derivative transactions and assets used for liquidity management. The fair value measurement disclosures are presented in Note 17. The liquidity risk disclosures are not significantly impacted by the amendments and are presented in Note 5.1.3.

IFRS 8 Operating segments

IFRS 8 replaced IAS 14 *Segment reporting* upon its effective date. The Group concluded that the operating segments determined in accordance with IFRS 8 are the same as the business segments previously identified under IAS 14. IFRS 8 disclosures are shown in Note 6.

IAS 1 Presentation of Financial Statements

The revised standard separates owner and non-owner changes in equity. The statement of changes in equity includes only details of transactions with owners, with non-owner changes in equity presented in a reconciliation of each component of equity. In addition, the standard introduces the statement of comprehensive income: it presents all items of recognised income and expense, either in one single statement, or in two linked statements. The Group has elected to present one statement.

IAS 23 Borrowing Costs

The revised IAS 23 requires capitalisation of borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset. The Group's previous policy was to expense borrowing costs as they were incurred. In accordance with the transitional provisions of the amended IAS 23, the Group has adopted the standard on a prospective basis. Therefore, borrowing costs are capitalised on qualifying assets with a commencement date on or after 1 January 2009. During the 12 months to 31 December 2009, no borrowing costs have been capitalised since there was no expenditure on qualifying assets.

Notes to the consolidated financial statements (continued)

Improvements to IFRSs

In May 2008 and April 2009 the IASB issued omnibus of amendments to its standards, primarily with a view to removing inconsistencies and clarifying wording. There are separate transitional provisions for each standard. The adoption of the following amendments resulted in changes to accounting policies but did not have any impact on the financial position or performance of the group.

IFRS 5 Non-current Assets Held for Sale and Discontinued Operations: clarifies that the disclosures required in respect of non-current assets and disposal groups classified as held for sale or discontinued operations are only those set out in IFRS 5. The disclosure requirements of other IFRSs only apply if specifically required for such non-current assets or discontinued operations. The amendment did not have any effect on the financial statements.

IFRS 8 Operating Segment Information: clarifies that segment assets and liabilities need only be reported when those assets and liabilities are included in measures that are used by the chief operating decision maker. As the Group's chief operating decision maker does review segment assets and liabilities, the Group has continued to disclose this information in Note 6.

IAS 1 Presentation of Financial Statements: Assets and liabilities classified as held for trading in accordance with IAS 39 *Financial Instruments: Recognition and Measurement* are not automatically classified as current in the statement of financial position. The Group analysed whether the expected period of realisation of financial assets and liabilities differed from the classification of the instrument. This did not result in any reclassification of financial instruments between current and non-current in the statement of financial position.

IAS 7 Statement of Cash Flows: Explicitly states that only expenditure that results in recognising an asset can be classified as a cash flow from investing activities. The amendment did not have any effect on the financial statements.

IAS 16 Property, Plant and Equipment: Replaces the term "net selling price" with "fair value less costs to sell". The Group amended its accounting policy accordingly, which did not result in any change in the financial position.

IAS 18 Revenue: The Board has added guidance (which accompanies the standard) to determine whether an entity is acting as a principal or as an agent. The features to consider are whether the entity:

- Has primary responsibility for providing the goods or service
- Has inventory risk
- Has discretion in establishing prices
- Bears the credit risk

The Group has assessed its revenue arrangements against these criteria and concluded that it is acting as principal in all arrangements. The revenue recognition accounting policy has been updated accordingly.

IAS 20 Accounting for Government Grants and Disclosures of Government Assistance: Loans granted with no or low interest will not be exempt from the requirement to impute interest. Interest is to be imputed on loans granted with below-market interest rates. This amendment did not impact the Group.

IAS 23 Borrowing Costs: The definition of borrowing costs is revised to consolidate the two types of items that are considered components of 'borrowing costs' into one – the interest expense calculated using the effective interest rate method calculated in accordance with IAS 39. The Group has amended its accounting policy accordingly which did not result in any change in its financial position.

IAS 36 Impairment of Assets: When discounted cash flows are used to estimate 'fair value less cost to sell' additional disclosure is required about the discount rate, consistent with disclosures required when the discounted cash flows are used to estimate 'value in use'. This amendment had no immediate impact on the consolidated financial statements of the Group.

Notes to the consolidated financial statements (continued)

IAS 38 *Intangible Assets*: Expenditure on advertising and promotional activities is recognised as an expense when the Group either has the right to access the goods or has received the service. This amendment has no impact on the Group because it does not enter into such promotional activities.

The reference to there being rarely, if ever, persuasive evidence to support an amortisation method of intangible assets other than a straight-line method has been removed. The Group reassessed the useful lives of its intangible assets and concluded that the straight-line method was still appropriate.

Other amendments resulting from Improvements to IFRSs to the following standards did not have any impact on the accounting policies, financial position or performance of the Group:

- IFRS 2 *Share-based Payment*
- IFRS 7 *Financial Instruments: Disclosures*
- IAS 8 *Accounting Policies, Change in Accounting Estimates and Error*
- IAS 10 *Events after the Reporting Period*
- IAS 19 *Employee Benefits*
- IAS 27 *Consolidated and Separate Financial Statements*
- IAS 28 *Investments in Associates*
- IAS 31 *Interest in Joint Ventures*
- IAS 34 *Interim Financial Reporting*
- IAS 38 *Intangible Assets*
- IAS 40 *Investment Properties*
- IAS 39 *Financial Instruments: Recognition and Measurement*
- IFRIC 9 *Reassessment of Embedded Derivatives*
- IFRIC 16 *Hedge of a Net Investment in a Foreign Operation*

2.3 Foreign currency translation

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates ('the functional currency'). For the majority of the Group companies, the functional currency is USD dollar. For the reporting purposes the Company has chosen euros (EUR) as reporting currency in accordance with the regulation of Riga Stock Exchange.

Transactions and balances

Transactions in foreign currencies are initially recorded by the Group entities at their respective functional currency rates prevailing at the date of the transaction.

Monetary assets and liabilities denominated in foreign currencies are retranslated into the functional currency at the functional currency spot rate of exchange ruling at the reporting date.

All differences are taken to the statement of comprehensive income with the exception of all monetary items that provide an effective hedge for a net investment in a foreign operation. These are recognised in other comprehensive income until the disposal of the net investment, at which time they are recognised in the statement of comprehensive income. Tax charges and credits attributable to exchange differences on those monetary items are also recorded in equity.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated into the functional currency using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined.

Group companies

The assets and liabilities of foreign operations are translated into U.S.dollars at the rate of exchange prevailing at the reporting date and their statements of comprehensive income are translated at the average exchange rates for the year. The exchange differences arising on the translation are recognised in other comprehensive income. On disposal of a foreign operation, the component of other comprehensive income relating to that particular foreign operation is recognised in the statement of comprehensive income.

Notes to the consolidated financial statements (continued)

Any goodwill arising on the acquisition of a foreign operation subsequent to 1 January 2005 and any fair value adjustments to the carrying amounts of assets and liabilities arising on the acquisition are treated as assets and liabilities of the foreign operation and translated at the closing rate.

2.4 Revenue recognition

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Group and the revenue can be reliably measured. Revenue is measured at the fair value of the consideration received, excluding discounts, rebates, and sales taxes or duties. The Group assesses its revenue arrangements against specific criteria in order to determine if it is acting as principal or agent. The Group has concluded that it is acting as a principal in all of its revenue arrangements. The following specific recognition criteria must also be met before revenue is recognised:

Sale of goods

Revenue from the sale of goods is recognised when the significant risks and rewards of ownership of the goods have passed to the buyer, usually on delivery of the goods.

Rendering of services

The Group generates income from providing marketing and transport agency services. Since these services do not comprise Group's core business, the income is classified as other income in the statement of comprehensive income. These services are provided based on agreed time and material costs incurred or as a fixed-price contract. Revenue from fixed-price contracts for delivering transportation services is generally recognised by reference to the stage of completion of the service. Revenue from time and material contracts is recognized at contractual rates as direct expenses are incurred.

If circumstances arise that may change the original estimates of revenues, costs or extent of progress toward completion, estimates are revised. These revisions may result in increases or decreases in estimated revenues or costs and are reflected in income in the period in which the circumstances that give rise to the revision become known by management.

Interest income

For all financial instruments measured at amortised cost and interest bearing financial assets classified as available-for-sale, interest income is recorded using the effective interest rate (EIR), which is the rate that exactly discounts the estimated future cash receipts through the expected life of the financial instrument or a shorter period, where appropriate, to the net carrying amount of the financial asset or liability. Interest income is included in finance income in the statement of comprehensive income.

Dividends

Revenue is recognised when the Group's right to receive the payment is established.

Other income

Income from penalties charged to clients is recognized at the moment of receipt. Penalties represent mostly charges to customers for late payments.

2.5 Taxes

Current income tax

Current income tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, by the reporting date, in the countries where the Group operates and generates taxable income.

Current income tax relating to items recognised directly in equity is recognised in equity and not in the statement of comprehensive income. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

Notes to the consolidated financial statements (continued)

Deferred tax

Deferred tax is provided using the liability method on temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred tax liabilities are recognised for all taxable temporary differences, except:

- Where the deferred tax liability arises from the initial recognition of goodwill or of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss
- In respect of taxable temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, where the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognised for all deductible temporary differences, carry forward of unused tax credits and unused tax losses, to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised except:

- Where the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss
- In respect of deductible temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, deferred tax assets are recognised only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilised.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are reassessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognised outside profit or loss is recognised outside profit or loss. Deferred tax items are recognised in correlation to the underlying transaction either in other comprehensive income or directly in equity.

Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set off current tax assets against current income tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

Sales tax

Revenues, expenses and assets are recognised net of the amount of sales tax except:

- Where the sales tax incurred on a purchase of assets or services is not recoverable from the taxation authority, in which case the sales tax is recognised as part of the cost of acquisition of the asset or as part of the expense item as applicable.
- Receivables and payables that are stated with the amount of sales tax included.

The net amount of sales tax recoverable from, or payable to, the taxation authority is included as part of receivables or payables in the statement of financial position.

Notes to the consolidated financial statements (continued)

2.6 Financial instruments – initial recognition and subsequent measurement

Financial assets

Initial recognition and measurement

Financial assets within the scope of IAS 39 are classified as financial assets at fair value through profit or loss, loans and receivables, held-to-maturity investments, available-for-sale financial assets, or as derivatives designated as hedging instruments in an effective hedge, as appropriate. The Group determines the classification of its financial assets at initial recognition.

All financial assets are recognised initially at fair value plus, in the case of investments not at fair value through profit or loss, directly attributable transaction costs.

Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the marketplace (regular way trades) are recognised on the trade date, i.e., the date that the Group commits to purchase or sell the asset.

The Group's financial assets include cash and short-term deposits, trade and other receivables, and loans.

Subsequent measurement

The subsequent measurement of financial assets depends on their classification as follows:

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate method (EIR), less impairment. Amortised cost is calculated by taking into account any discount or premium on acquisition and fee or costs that are an integral part of the EIR. The EIR amortisation is included in finance income in the statement of comprehensive income. The losses arising from impairment are recognised in the statement of comprehensive income in finance costs.

Impairment of financial assets

The Group assesses at each reporting date whether there is any objective evidence that a financial asset or a group of financial assets is impaired. A financial asset or a group of financial assets is deemed to be impaired if, and only if, there is objective evidence of impairment as a result of one or more events that has occurred after the initial recognition of the asset (an incurred 'loss event') and that loss event has an impact on the estimated future cash flows of the financial asset or the group of financial assets that can be reliably estimated. Evidence of impairment may include indications that the debtors or a group of debtors is experiencing significant financial difficulty, default or delinquency in interest or principal payments, the probability that they will enter bankruptcy or other financial reorganisation and where observable data indicate that there is a measurable decrease in the estimated future cash flows, such as changes in arrears or economic conditions that correlate with defaults.

Financial assets carried at amortised cost

For financial assets carried at amortised cost the Group first assesses individually whether objective evidence of impairment exists individually for financial assets that are individually significant, or collectively for financial assets that are not individually significant. If the Group determines that no objective evidence of impairment exists for an individually assessed financial asset, whether significant or not, it includes the asset in a group of financial assets with similar credit risk characteristics and collectively assesses them for impairment. Assets that are individually assessed for impairment and for which an impairment loss is, or continues to be, recognised are not included in a collective assessment of impairment.

If there is objective evidence that an impairment loss has incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future expected credit losses that have not yet been incurred). The present value of the estimated future cash flows is discounted at the financial assets original effective interest rate. If a loan has a variable interest rate, the discount rate for measuring any impairment loss is the current effective interest rate.

Notes to the consolidated financial statements (continued)

Financial liabilities

Initial recognition and measurement

Financial liabilities within the scope of IAS 39 are classified as financial liabilities at fair value through profit or loss, loans and borrowings, or as derivatives designated as hedging instruments in an effective hedge, as appropriate. The Group determines the classification of its financial liabilities at initial recognition.

All financial liabilities are recognised initially at fair value and in the case of loans and borrowings, plus directly attributable transaction costs.

The Group's financial liabilities include trade and other payables, bank overdraft, loans and borrowings, financial guarantee contracts, and derivative financial instruments.

Subsequent measurement

The measurement of financial liabilities depends on their classification as follows:

Loans and borrowings

After initial recognition, interest bearing loans and borrowings are subsequently measured at amortised cost using the effective interest rate method. Gains and losses are recognised in the statement of comprehensive income when the liabilities are derecognised as well as through the effective interest rate method (EIR) amortisation process. Amortised cost is calculated by taking into account any discount or premium on acquisition and fee or costs that are an integral part of the EIR. The EIR amortisation is included in finance cost in the statement of comprehensive income.

Derecognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognised in the statement of comprehensive income.

A financial asset (or, where applicable a part of a financial asset or part of a group of similar financial assets) is derecognised when:

- The rights to receive cash flows from the asset have expired
- The Group has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Group has transferred substantially all the risks and rewards of the asset, or (b) the Group has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount reported in the consolidated statement of financial position if, and only if, there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the assets and settle the liabilities simultaneously.

2.7 Property, plant and equipment

Plant and equipment is stated at cost, net of accumulated depreciation and/or accumulated impairment losses, if any. Such cost includes the cost of replacing part of the plant and equipment and borrowing costs for longterm construction projects if the recognition criteria are met. When significant parts of property, plant and equipment are required to be replaced in intervals, the Group recognises such parts as individual assets with specific useful lives and depreciation, respectively. All other repair and maintenance costs are recognised in the statement of comprehensive income as incurred.

Depreciation is calculated on a straight-line basis over the estimated useful life of the asset as follows:

IT equipment	2 years
Other	4-5 years

Notes to the consolidated financial statements (continued)

An item of property, plant and equipment and any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the statement of comprehensive income when the asset is derecognised.

The assets' residual values, useful lives and methods of depreciation are reviewed at each financial year end, and adjusted prospectively, if appropriate.

2.8 Leases

The determination of whether an arrangement is, or contains, a lease is based on the substance of the arrangement at inception date: whether fulfilment of the arrangement is dependent on the use of a specific asset or assets or the arrangement conveys a right to use the asset.

Group as a lessee

Finance leases, which transfer to the Group substantially all the risks and benefits incidental to ownership of the leased item, are capitalised at the commencement of the lease at the fair value of the leased property or, if lower, at the present value of the minimum lease payments. Lease payments are apportioned between finance charges and reduction of the lease liability so as to achieve a constant rate of interest on the remaining balance of the liability. Finance charges are recognised in the statement of comprehensive income.

Leased assets are depreciated over the useful life of the asset. However, if there is no reasonable certainty that the Group will obtain ownership by the end of the lease term, the asset is depreciated over the shorter of the estimated useful life of the asset and the lease term.

Operating lease payments are recognised as an expense in the statement of comprehensive income on a straight line basis over the lease term.

2.9 Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the respective assets. All other borrowing costs are expensed in the period they occur. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds.

2.10 Intangible assets

Intangible assets acquired separately are measured on initial recognition at cost. The cost of intangible assets acquired in a business combination is its fair value as at the date of acquisition. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and any accumulated impairment losses. Internally generated intangible assets, excluding capitalised development costs, are not capitalised and expenditure is reflected in the statement of comprehensive income in the year in which the expenditure is incurred.

The useful lives of intangible assets are assessed at 5 years.

Intangible assets with finite lives are amortised over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset with a finite useful life is reviewed at least at each financial year end. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset is accounted for by changing the amortisation period or method, as appropriate, and are treated as changes in accounting estimates. The amortisation expense on intangible assets with finite lives is recognised in the statement of comprehensive income in the expense category consistent with the function of the intangible asset.

Notes to the consolidated financial statements (continued)

Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the income statement when the asset is derecognised.

2.11 Inventories

Inventories are valued at the lower of cost and net realisable value, Cost is determined using the weighted average method. The cost of goods comprises acquisition costs, additional expenses related to transportation, import duties for environmental protection and insurance as well as any discounts and allowances granted by vendors. Net realisable value is the estimated selling price in the ordinary course of business, less applicable variable selling expenses. Estimated selling price is based upon an aging analysis of the inventory on hand, technological obsolescence, the nature of vendor relations and assumptions about future demand.

2.12 Impairment of non-financial assets

The Group assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Group estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) fair value less costs to sell and its value in use and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs to sell, an appropriate valuation model is used. These calculations are corroborated by valuation multiples or other available fair value indicators.

Impairment losses of continuing operations are recognised in the statement of comprehensive income in those expense categories consistent with the function of the impaired asset.

For assets excluding goodwill, an assessment is made at each reporting date as to whether there is any indication that previously recognised impairment losses may no longer exist or may have decreased. If such indication exists, the Group estimates the asset's or cash-generating unit's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years.

The following criteria are also applied in assessing impairment of specific assets:

Goodwill

Goodwill is tested for impairment annually (as at 31 December) and when circumstances indicate that the carrying value may be impaired.

Impairment is determined for goodwill by assessing the recoverable amount of each cash-generating unit (or group of cash-generating units) to which the goodwill relates. Where the recoverable amount of the cashgenerating unit is less than their carrying amount an impairment loss is recognised. Impairment losses relating to goodwill cannot be reversed in future periods.

2.13 Cash and short-term deposits

Cash and short-term deposits in the statement of financial position comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less.

For the purpose of the consolidated statement cash flows, cash and cash equivalents consist of cash and short-term deposits as defined above.

Notes to the consolidated financial statements (continued)

2.14 Provisions

Provisions are recognised when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Where the Group expects some or all of a provision to be reimbursed, for example under an insurance contract, the reimbursement is recognised as a separate asset but only when the reimbursement is virtually certain. The expense relating to any provision is presented in the statement of comprehensive income net of any reimbursement. If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, where appropriate, the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

2.15 Share capital and dividend distribution

Ordinary shares are classified as equity. The Parent Company has issued only ordinary shares.

Dividend distribution to the Parent Company's shareholders is recognised as a liability in the Group's financial statements in the period, in which the dividends are approved by the Parent Company's shareholders.

2.16 Warranties

The Group's vendors generally warrant the products distributed by the Group and allow returning defective products, including those that have been returned to the Group by its customers. Based on the past experience and the contractual agreements with vendors, the Group assesses that the receipt of the reimbursement from vendors is virtually certain. The Group does not independently warrant the products it distributes. Historically the Group has not incurred any significant service warranty costs. The costs occur along the process of handling the returned goods. A provision for these estimated costs is recorded at the time of sale and is periodically adjusted to reflect actual experience.

2.17 Vendor programs

The Group receives funds from vendors in a form of credit notes for price protection, product rebates, marketing and other product promotions. The credit notes for price protection are booked as decrease of the cost value of the inventory. The credit notes for rebates are recognized directly in statement of comprehensive income as decrease of cost of sales. The credit notes for marketing and other product promotion are recognized as other revenue. Some of these programs may extend over one or more reporting periods. Rebates or other vendor incentives are recognized as earned based on sales of respective products or as services are provided in accordance with the terms of the related program.

2.18 Pension obligations

The Group companies do not operate any pension plans other than those required by the applicable legislations in the respective countries. The Group companies pay social security contributions to the state social security funds (the Funds) on behalf of its employees based on the defined contribution plan in accordance with the local legal requirements.

A defined contribution plan is a plan under which Group pays fixed contributions into the Fund and will have no legal or constructive obligations to pay further contributions if the Fund does not hold sufficient assets to pay all employees benefits relating to employee service in the current and prior period. The social security contributions are recognised as an expense on an accrual basis and are included within staff costs.

2.19 Going concern

According to the financial covenants in the loan and bond agreements the Parent Company and the Group has to maintain certain financial ratios. The main financial covenants are related to maintaining certain liquidity ratios, gearing ratios and profitability ratios. During the year the Parent Company and the Group has failed to comply with the financial covenant on certain profitability ratio. According to IFRS 7.19 and prudence principle if the Group is in breach of financial covenants the loans and bonds payable should be disclosed as short term

Notes to the consolidated financial statements (continued)

(please see note 17). During 2010 AS DNB Nord Bank has confirmed that they do not have an intention to reclaim the outstanding loan at once due to breach of financial covenants. Accordingly, these consolidated financial statements for the year ended 31 December 2009 are prepared on a going concern basis, consistently applying International Financial Reporting Standards as adopted in the European Union.

Furthermore the operations of the Group are considerably dependant on the operations in CIS region, accordingly as described in Note 5.1.4 the future operations of the Group can be affected by legislative risk aspects in CIS countries.

3 Significant accounting judgments, estimates and assumption

The preparation of the Group's consolidated financial statements requires management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the disclosure of contingent liabilities, at the end of the reporting period. However, uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of the asset or liability affected in future periods.

In the process of applying the Group's accounting policies, management has made the following judgments and estimates, which have the most significant effect on the amounts recognised in the consolidated financial statements:

3.1 Vendor programs

The Group has to apply use of estimates about the credit notes due from vendors at the date of the statement of financial position based on the available information and past experience. In several vendor programs the size of the rebate is dependent on the performance of other distributors and is known exclusively by the vendor.

An estimate of a receivable from vendors in relation to the vendors programs as of 31 December 2009 amounted to EUR 3,847 thousand (2008: EUR 3,002 thousand) based on the individual vendor agreements.

The Group does not expect any material additional unrecognized rebate to be received related to year 2009.

3.2 Income taxes

The Group is subject to income taxes in numerous jurisdictions. Significant judgment is required in determining the worldwide provision for income taxes. There are many transactions and calculations for which the ultimate tax determination is uncertain during the ordinary course of business. The Group recognizes liabilities for anticipated tax audit issues based on estimates of whether additional taxes will be due. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the income tax and deferred tax provisions in the period in which such determination is made (Note 12).

3.3 Impairment of inventories

The Group is subject to the risk that the value of its inventory will decline as a result of price reductions by vendors or technological obsolescence. It is the policy of most of the Group's vendors to protect distributors from the loss in value of inventory due to technological change or the vendors' price reductions.

However, the price protection to distributors is at vendors' discretion, accordingly, there are instances when vendors might be unable or unwilling to compensate the Group for price protection claims.

The outstanding price protection claims are EUR 65 thousand (2008: EUR 83 thousand).

Significant judgment is applied, when estimating the net realizable value of inventory. Incorrect assumptions could be made about the state of technological obsolescence, the nature of vendor relations and future demand (Note 18).

Notes to the consolidated financial statements (continued)

3.4 Impairment of trade receivables

Significant judgment is applied, when estimating the provisions for impairment of trade receivables (Note 19).

3.5 Warranty provisions

The Group's vendors generally warrant the products distributed by the Group and allow returning defective products, including those that have been returned to the Group by its customers. Based on the past experience and the contractual agreements with vendors, the Group assesses that the receipt of the reimbursement from vendors is virtually certain. The Group does not independently warrant the products it distributes. Historically the Group has not incurred any significant service warranty costs. The costs are incurred along the process of handling the returned goods. A provision for these estimated costs is recorded at the time of sale and periodically adjusted to reflect actual experience. The amount of provision with respect to warranties is disclosed in Note 22.

3.6 Revenue recognition

The Group's sales to CIS and other countries segment (Note 6) are performed to the end customers using a number of intermediaries. The customers perceive the Group as a seller of the goods, the intermediaries in substance do not assume general inventory risk and usually the payments are made by the intermediaries to the Group after the intermediaries have received cash from the customers. Based on the above the management has concluded that the intermediaries act as agents and the Group recognizes revenue after the intermediaries have sold goods to the customers. The goods that have been legally sold but for which no revenue is yet recognized are included in Inventories as consignment inventories (Note 18).

4 Standards issued but not yet effective

The Group has not applied the following IFRSs and IFRIC Interpretations that have been issued but are not yet effective:

Amendment to IFRS 2 Share-based Payment (effective for financial years beginning on or after 1 January 2010)

The amendment clarifies the scope and the accounting for group cash-settled share-based payment transactions. The amendment will have no impact on the financial position or performance of the Group, as the Group does not have share-based payments.

Amendments to IFRS 3 Business Combinations and IAS 27 Consolidated and Separate Financial Statements (effective for financial years beginning on or after 1 July 2009)

Revised IFRS 3 (IFRS 3R) introduces a number of changes in the accounting for business combinations that will impact the amount of goodwill recognised, the reported results in the period that an acquisition occurs, and future reported results. IAS 27R requires that a change in the ownership interest of a subsidiary (without loss of control) is accounted for as an equity transaction. Therefore, such transactions will no longer give rise to goodwill, nor will it give rise to a gain or loss. Furthermore, the amended standard changes the accounting for losses incurred by the subsidiary as well as the loss of control of a subsidiary. Other consequential amendments were made to IAS 7 *Statement of Cash Flows*, IAS 12 *Income Taxes*, IAS 21 *The Effects of Changes in Foreign Exchange Rates*, IAS 28 *Investment in Associates* and IAS 31 *Interests in Joint Ventures*. In accordance with the transitional requirements of these amendments, the Group will adopt them as a prospective change. Accordingly, assets and liabilities arising from business combinations prior to the date of application of the revised standards will not be restated.

IFRS 9 Financial Instruments (effective for financial years beginning on or after 1 January 2013, once adopted by the EU)

IFRS 9 will eventually replace IAS 39. The IASB has issued the first part of the standard, establishing a new classification and measurement framework for financial assets. The Group has not estimated yet the impact of the implementation of this standard.

Notes to the consolidated financial statements (continued)

Amendments to IAS 24 *Related Party Disclosures* (effective for financial years beginning on or after 1 January 2011, once adopted by the EU)

The amendments simplify the definition of a related parties, clarifying its intended meaning and eliminating inconsistencies from the definition. They also provide a partial exemption from the disclosure requirements for government-related entities. The implementation of these amendments will have no impact on the financial position or performance of the Group, however it may impact the related parties disclosures.

Amendment to IAS 32 *Financial Instruments: Presentation – Classification of Rights Issues* (effective for financial years beginning on or after 1 February 2010)

The amendment changes the definition of a financial liability to exclude certain rights, options and warrants. The amendment will have no impact on the financial position or performance of the Group, as the Group does not have such instruments.

Amendment to IFRIC 14 *IAS 19—The Limit on a Defined Benefit Asset, Minimum Funding Requirements and their Interaction* (effective for financial years beginning on or after 1 January 2011, once adopted by the EU)

The amendment modifies the accounting for prepayments of future contributions when there is a minimum funding requirement. This amendment will not have any impact on the consolidated financial statements because the Group does not have defined benefit assets.

IFRIC 17 *Distributions of Non-cash Assets to Owners* (effective for financial years beginning on or after 1 July 2009)

The interpretation provides guidance on the appropriate accounting treatment when an entity distributes assets other than cash as dividends to its shareholders. IFRIC 17 will not have any impact on the consolidated financial statements because the Group does not distribute non-cash assets to owners.

IFRIC 19 *Extinguishing Financial Liabilities with Equity Instruments* (effective for financial years beginning on or after 1 April 2010, once adopted by the EU)

The interpretation provides guidance on accounting for extinguishing financial liabilities with equity instruments. Since the Group does not have such transactions, IFRIC 19 will not have any impact on its consolidated financial statements.

5 Financial risk management objectives and policies

5.1 Financial risk factors

The Group's activities provide exposure to a variety of financial risks: market risk (including currency risk and interest rate risk), credit risk and liquidity risk. The Group's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Group's financial performance.

Risk management is carried out by the finance management of the Group both under policies approved and separate decisions made by the Board of Directors. It identifies, evaluates and hedges financial risks in close co-operation with the Group's operating units.

5.1.1 Market risk

Foreign exchange risk

The Group operates internationally and is exposed to foreign exchange risk arising primarily with respect to the US dollar changes towards the EUR and other currencies tied to EUR. Foreign exchange risk arises from future commercial transactions, recognised assets and liabilities and net investments in foreign operations.

The purchase of goods from vendors is predominantly done in US dollars. The sales from the Parent Company to subsidiaries are done in US dollars. The sales to customers are carried out by the subsidiaries in the respective local currencies, except for ELKO Trading Switzerland AG, whose sales are done in US dollars. Although the subsidiaries carry out the sales in the local currencies, the prices in the market tend to follow the purchasing currency i.e. US dollars, ELKO Trading Switzerland sales in US dollars and its significant weight in the Group's sales result in the fact, that trade payables and receivables have very similar structure in terms of currency composition (Notes 19 and 23).

Notes to the consolidated financial statements (continued)

The Group has investments in foreign operations, whose net assets are exposed to foreign currency translation risk. As at 31 December 2009, the Group did not have any hedging agreements.

The following table demonstrates the sensitivity to a reasonably possible change of the US dollar exchange rate to other currencies used by the Group, with all other variables held constant, of the Group's profit before tax (due to changes in the fair value of monetary assets and liabilities) and the Group's equity (due to changes in the fair value of monetary assets and liabilities, forward exchange contracts and net investment hedges).

Increase / decrease in US dollar rate to EUR	Effect on profit (‘000)	Effect on equity (‘000)
2009		
+5%	63	63
-5%	(63)	(63)
2008		
+5%	68	68
-5%	(68)	(68)

Interest rate risk

The Group's exposure to the risk of changes in market interest rates relates primarily to the Group's short-term borrowings to finance a part of its working capital needs, which exposes the Group's income and operating cash flows towards the changes in market interest rates. Borrowings are taken in a form of credit lines. During 2009, the Group's borrowings at variable rates were predominantly denominated in US dollars and Euro (Note 17).

The following table demonstrates the sensitivity to a reasonable possible change in interest rates, with all other variables held constant, of the Group's profit before tax through the impact on floating rate borrowings.

	Increase / decrease in basis points	Effect on profit before tax (‘000)
2009	+10	30
	- 10	(30)
2008	+10	89
	- 10	(89)

5.1.2 Credit risk

Credit risk is managed on a Group basis by implementing centralised procedures and control. Credit risk arises from the credit exposure to outstanding trade receivables (Note 19 to trade and other receivables). The Group minimizes these risks through credit risk insurance and conservative credit policy. Individual risk limits are set based on internal or external ratings in accordance with the credit policy. The utilisation of credit limits is regularly monitored. The requirement for impairment is assessed at each reporting date on an individual basis for major clients. Additionally, a large number of minor receivables is grouped into homogenous groups and assessed for impairment collectively. The calculation is based on actually incurred historical data.

The maximum exposure as at 31 December 2009 is EUR 60,468 thousands (2008: EUR 85,680 thousand).

Notes to the consolidated financial statements (continued)

5.1.3 Liquidity risk

Prudent liquidity risk management includes maintaining sufficient cash, the availability of funding from an adequate amount of committed credit facilities. Due to the dynamic nature of the underlying businesses, the Group maintains flexibility in funding by maintaining availability under committed credit lines. Management monitors rolling forecasts of the Group's liquidity reserve on the basis of expected cash flows.

The table below summarises the maturity profile of the Group's financial liabilities at 31 December 2009 based on contractual undiscounted payments:

Year ended 31/12/2009	On demand	< 3 months	3 to 12 months	1 to 5 years	Total
Non-current borrowings	-	-	-	71	71
Current borrowings	-	36,543	-	-	36,543
Trade and other payables	-	33,786	-	-	33,786

The table below summarises the maturity profile of the Group's financial liabilities at 31 December 2008 based on contractual undiscounted payments:

Year ended 31/12/2008	On demand	< 3 months	3 to 12 months	1 to 5 years	Total
Non-current borrowings	-	-	-	188	188
Current borrowings	-	99,930	-	-	99,930
Dividends	4,835	-	-	-	4,835
Trade and other payables	-	52,582	-	-	52,582

5.1.4 Legislative risk

The Group has used, and continues to use, a variety of third-party entities in which it does not hold any direct or indirect equity interest to facilitate the import of products into Russia and Ukraine. In the Eastern European countries the tax legislation and rulings are still subject to frequent change, and are consequently not as stable as the tax practices in most of the Western world countries. In the event that Russian and/or Ukrainian tax authorities choose to take a more aggressive position in their interpretation and enforcement of tax legislation, the Group might be held liable in case of a failure of a third party to comply with the interpretations of the authorities in Russia and/or Ukraine. Any estimate of a likelihood of any liability arising as a result of the Russian or Ukrainian tax enforcement, its effect on the financial position of the Group or the maximum amount cannot be reasonably assessed. Historically no such claims have arisen. Sales of products to Russian and Ukrainian customers are disclosed in Note 6.

5.2 Fair value estimation

The carrying value of trade receivables, other receivables, payables and other payables approximates fair value. The fair value of financial liabilities for disclosure purposes is estimated by discounting the future contractual cash flows at the current market interest rate that is available to the Group for similar financial instruments. The estimated fair value of derivative financial instruments represents the amount required to enter into similar offsetting contracts with similar remaining maturities based on quoted market prices.

Notes to the consolidated financial statements (continued)

5.3 Capital management

The primary objective of the Group's capital management is to ensure that it maintains a strong credit rating and healthy capital ratios in order to support its business and maximise shareholder value.

The Group manages its capital structure and makes adjustments to it, in light of changes in economic conditions. No changes were made in the objectives, policies or processes during the financial years presented.

According to legal requirements the board has to ask for shareholder meeting to deal with going concern issue if equity falls below 50% of total capital.

The Group monitors capital using the following ratios:

	31.12.2009	31.12.2008
Consolidated financials		
Equity without non-controlling Interest	46,595	64,731
Total assets	117,307	221,206
Equity ratio	40%	29%
Net Debt*	31,215	91,476
Total equity	48,306	66,986
Net Liabilities/ Equity	0.65	1.37

* Net debt is calculated as all borrowings less cash and deposits.

Notes to the consolidated financial statements (continued)

6 Operating segment information

The Group is organized into three reportable segments by location of customers:

- The Baltic area relates to Latvia, Lithuania and Estonia;
- Central and Eastern Europe area relates to Slovakia, Slovenia, Romania and Croatia;
- The area of CIS and other countries primarily relate to Russia and Ukraine.

The purchasing of inventory from vendors as well as financing is managed by the Parent Company. Therefore, financing items like interest income and expense, as well as cash and borrowings are managed by the Parent Company at the corporate level and are included in the Baltic segment.

Therefore, the Group measures segment performance, including corporate performance, based on the segment's operating result. Unallocated remain operating expenses of the central operation.

The segment results for the year ended 31 December 2009 are as follows:

	The Baltic ¹⁾	Central and Eastern Europe ²⁾	CIS and other countries	Adjustments and eliminations ³⁾	Group
Third-party revenue	35,428	96,143	330,127	-	461,698
Inter-segment revenue	275,221	144	-	(275,365)	-
Revenue	310,649	96,287	330,127	(275,365)	461,698
Operating profit / Segment result	253	(859)	(16,858)	904	(16,560)

The segment results for the year ended 31 December 2008 are as follows:

	The Baltic ¹⁾	Central and Eastern Europe ²⁾	CIS and other countries	Adjustments and eliminations ³⁾	Group
Third-party revenue	68,471	101,880	548,734	-	719,085
Inter-segment revenue	601,131	1,498	18,490	(621,119)	-
Revenue	669,602	103,378	567,224	(621,119)	719,085
Operating profit / Segment result	5,925	(472)	8,532	(88)	13,897

¹⁾ Majority of sales are done from Domicile country – Latvia.

²⁾ In 2009 due to adverse market perspectives and growth possibilities in Croatian market the management of the Group has decided to close the operations of ELKOTECH d.o.o. (Croatia). The sales of ELKOTECH Croatia constituted around 1.6% of total Group's turnover. The management of the Group plans to liquidate the respective entity during the year 2010.

³⁾ Inter-segment revenues as well as realized/(unrealized) profits on unsold inventory intercompany and loss on accounts receivables are eliminated on consolidation.

There are no single end-customer or group of end-customers that exceed 10%

Notes to the consolidated financial statements (continued)

Segment assets consist primarily of equipment, intangible assets, inventories, trade and other receivables. Segment liabilities comprise operating liabilities, borrowings and other payables. Capital expenditure comprises additions to equipment (Note 15) and intangible assets (Note 16).

The segment assets and liabilities at 31 December 2009 and capital expenditure for the year ended are as follows:

	Year ended 31 December 2009				
	The Baltic ¹⁾	Central and Eastern Europe	CIS and other countries	Adjustments and eliminations ²⁾	Group
Assets	96,570	15,792	103,863	(98,918)	117,307
Liabilities	65,242	12,927	90,621	(99,789)	69,001
Capital expenditure (Note 16)	8	21	-	-	29
Amortisation (Note 16)	20	26	-	-	46
Capital expenditure (Note 15)	76	113	-	-	189
Depreciation (Note 15)	325	121	-	-	446

The segment assets and liabilities at 31 December 2008 and capital expenditure for the year ended are as follows:

	Year ended 31 December 2008				
	The Baltic ¹⁾	Central and Eastern Europe	CIS and other countries	Adjustments and eliminations ²⁾	Group
Assets	175,150	24,255	198,316	(176,515)	221,206
Liabilities	141,651	20,044	167,329	(174,804)	154,220
Capital expenditure (Note 16)	26	27	-	-	53
Amortization (Note 16)	16	23	-	-	39
Capital expenditure (Note 15)	421	254	-	-	675
Depreciation (Note 15)	262	125	-	-	387

¹⁾ The majority of the assets and the liabilities relates to Domicile country – Latvia.

²⁾ The adjustments and eliminations practically include only elimination of the intercompany receivables and payables

The distribution of the revenue by the product groups is disclosed in Note 11.

Notes to the consolidated financial statements (continued)

7 Other income/expenses**7.1 Other operating income**

	2009	2008
Income from services provided	2,259	2,920
Gain from disposal of fixed assets	7	38
Other income	63	68
	2,329	3,026

7.2 Other operating expenses

	2009	2008
Provisions for bad debts*	22,164	38
Net loss from foreign exchange influence	1,547	1,160
Direct operating expenses arising on providing services	167	222
Penalties and similar expenses	46	403
Other expenses	292	206
	24,216	2,029

* Due to overall economic crisis the Group had evaluate its assets more critically. As a result the Group had to recognise provisions for bad debts in the amount of 22.2 million EUR. The majority of the amounts provided relate to the CIS region.

8 Finance income and costs

	2009	2008
Interest expense:		
– Bank borrowings	(1,900)	(3,820)
– Bonds	(652)	(652)
– Other interests	(4)	(21)
Finance costs	(2,556)	(4,493)
Finance income:		
– Interest income on short-term bank deposits	70	122
– Other interest income	158	50
Finance income	228	172
Net finance costs	(2,328)	(4,321)

9 Expenses by nature

	2009	2008
Trade inventory sold	442,293	690,629
Employee benefit expense	7,036	8,123
Rent and office maintenance expenses	1,316	1,242
Transportation expenses	957	939
Warehousing expenses	914	876
Advertising costs	652	1,016
Professional fees	514	1,646
Depreciation and amortisation charges (Notes 15, 16)	492	426
Write-off of damaged goods (Note 18)	234	454
Other expenses	1,963	834
	456,371	706,185

Notes to the consolidated financial statements (continued)

10 Employee benefit expense

	2009	2008
Wages and salaries	5,650	6,296
Social security costs	1,347	1,500
Other employment benefits	39	327
	7,036	8,123

Employees involved in the sales functions are subject to a partial variable remuneration based on the sales performance.

11 Sale of goods

	2009	2008
Desktop components	197,131	335,219
Notebooks	155,343	242,590
Solution products	38,679	39,842
Monitors	27,736	50,415
Consumer and multimedia	38,687	34,698
Peripherals	4,118	16,292
Other	4	29
	461,698	719,085

12 Income tax

The major components of income tax expense for the years ended 31 December 2009 and 2008 are:

Consolidated statement of comprehensive income

	2009	2008
Current income tax:		
Current income tax charge	257	881
<i>Deferred tax :</i>		
Relating to origination and reversal of temporary differences	-	(16)
	257	865

Consolidated statement of financial position

	2009	2008
Current income tax receivable	424	896
Current income tax payable	(3)	(545)
Current income receivable, net	421	351

The tax charge differs from the theoretical amount that would arise using the tax rate applicable to the Company to the Group's profit before tax as follows:

	2009	2008
Accounting profit before income tax	(18,888)	9,576
At Latvia's statutory income tax rate of 15%	(2,833)	1,436
Effect of different tax rates in other countries and related unrecognized deferred tax assets	2,889	(279)
Income not subject to tax	(54)	(433)
Expenses not deductible for tax purposes	279	168
Tax discount for donations	(24)	(27)
Tax charge	257	865

Notes to the consolidated financial statements (continued)

13 Earnings per share

The Group has no dilutive potential shares therefore diluted earnings per share are equal to basic earnings per share.

Basic earnings per share are calculated by dividing net profit for the year attributable to ordinary equity holders of the parent by the weighted average number of ordinary shares outstanding during the year.

The following reflects the income and share data used in the basic and diluted earnings per share computations:

	2009	2008
Profit attributable to equity holders of the Parent Company	(18,680)	8,946
Weighted average number of ordinary shares in issue (thousands)	6,877	6,877
Basic earnings per share (EUR per share)	<u>(2.72)</u>	<u>1.30</u>

There have been no other transactions involving ordinary shares or potential ordinary shares between the reporting date and the date of completion of these financial statements.

14 Dividends per share

During the year the shareholders have decided on the distribution of the dividends on prior year retained earnings in amount of EUR 0 thousand, in 2008 EUR 4,269 thousand (EUR 0.62 per share).

Notes to the consolidated financial statements (continued)

15 Property, plant and equipment

	Leasehold improvements	Communication and computer engineering	Other fixed assets	Total
At 31 December 2007				
Cost	226	679	1,604	2,509

Net book amount	2	279	715	996
Year ended 31 December 2009				
Opening net book amount	2	279	715	996
Exchange differences	-	(7)	(5)	(12)
Additions	-	70	119	189
Disposals at cost	-	(20)	(91)	(111)
Depreciation reversal on disposals	-	19	88	107
Depreciation charge (Note 9)	(1)	(200)	(245)	(446)
Reclassification	-	-	(19)	(19)
Closing net book amount	1	141	562	704
At 31 December 2009				
Cost	20	860	1,437	2,317
Accumulated depreciation	(19)	(719)	(875)	(1,613)
Net book amount	1	141	562	704

Depreciation expenses of tangible assets in the amount of EUR 446 thousand (2008: EUR 387 thousand) have been charged in statement of comprehensive income and are shown in administrative expenses.

All tangible assets have been pledged to secure bank credit lines (Note 17).

Finance leases

The carrying value of plant and equipment held under finance leases and hire purchase contracts at 31 December 2009 was EUR 189 thousand (2008: EUR 310 thousand). Leased assets and assets under hire purchase contracts are pledged as security for the related finance lease and hire purchase liabilities.

Notes to the consolidated financial statements (continued)

16 Intangible assets

Other – credit cards (Estonia)			-	-
			35,020	95,892
Non-current				
Obligations under finance lease and hire purchase contracts	EURIBOR + 3,25%	28.11.2011	68	176
			68	176
			35,088	96,068

¹⁾ At the end of the year the Parent Company and the Group have failed to comply with the financial covenants on profitability. As a result the Parent Company was in breach of the credit line agreement's covenants with AS DnB Nord Banka (Latvia). The Parent Company's management has ongoing negotiations with the bank on new terms. Please see also Note 2.19 Going concern.

²⁾ In 2009 as part of the agreement the Group acquired 9,500 of their own bonds from the bond holders for the nominal amount EUR 100. In the statement of the financial position the acquired bonds are netted with the liabilities to bond holders for the issued ELKO Grupa AS bonds. The Group intends to keep the assets till the maturity i.e. 29th November 2010.

Notes to the consolidated financial statements (continued)

The carrying amounts of the Group's borrowings are denominated in the following currencies:

	31.12.2009	31.12.2008
USD	27,540	85,566
EUR	7,540	10,499
Other	8	3
	35,088	96,068

Most of the borrowings are provided in a form of bank credit lines amounting to EUR 29,354 thousand (2008: EUR 85,621 thousand). Borrowings are secured by property, plant and equipment, intangible assets, trade receivables and inventory (Notes 15, 16, 18 and 19). The fair value of current borrowings approximates their carrying amount, as they bear floating interest rates and the impact of discounting is not significant. The average effective interest rate on the bank borrowings as at 31 December 2009 was 4.35% (2008: 4.47 %).

Finance leases

The present value of finance lease liabilities is as follows:

	31.12.2009	31.12.2008
No later than 1 year	109	132
Later than 1 year and no later than 5 years	68	176
	177	308
Finance lease liabilities – minimum lease payments:		
No later than 1 year	113	140
Later than 1 year and no later than 5 years	71	188
	184	328
Future finance charges on finance costs	(7)	(20)
Present value of finance lease liabilities	177	308

The effective interest rate on the finance leases as at 31 December 2009 was 3.95 % (2008: 6.30%).

18 Inventories

	31.12.2009	31.12.2008
Trade inventory at cost	48,961	116,430
Trade inventory in transit	189	708
Prepayments for trade inventory	12	304
Allowance for impairment of inventory	-	(39)
Total inventories at the lower of cost and net realisable value	49,162	117,403

Estimates of net realisable value of inventory are based on the most reliable evidence available at the time the estimates are made. As such estimates are continuously evaluated; it is common that in the normal course of business, circumstances that previously caused inventories to be written down below cost no longer exist resulting in reversals of write-downs. Write-downs for damaged and missing inventory amount to EUR 234 thousand (2008: EUR 454 thousand) and are charged to distribution costs in the statement of comprehensive income (Note 9).

The cost of inventories recognised as expense and included in cost of sales amounted to EUR 442,293 thousand (2008: EUR 690,629 thousand). All inventories except for trade inventory in transit have been pledged to secure bank credit lines (Note 17).

Of the total inventories consignment inventories as at 31 December 2009 was EUR 26,666 thousand (2008: EUR 81,679 thousand).

Notes to the consolidated financial statements (continued)

19 Trade and other receivables

	31.12.2009	31.12.2008
Trade receivables	82,164	94,889
Less: allowance for impairment of trade receivables	(21,696)	(308)
Trade receivables – net	60,468	94,581
VAT receivable	739	627
Other debtors	493	296
Accrued income	36	-
Other tax receivable in foreign countries	6	36
Personal income tax receivable	1	1
	61,743	95,541

All trade receivables have been pledged to secure bank credit lines (Note 17).

Trade receivables are non-interest bearing and are generally on 7-90 days' terms.

As at 31 December, the ageing analysis of net trade receivables is as follows:

	Total	Neither past due nor impaired	Past due but not impaired*		
			<90 day	90-180 day	>180 day
31.12.2009	60,468	48,235	7,233	2,574	2,426
31.12.2008	94,581	56,796	37,780	5	-

* The Group has evaluated the receivable according to IAS 39 evaluating each overdue receivable individually. Based on further business performance of the debtors in 2010 and improved incoming cash flows from the respective non impaired receivables, the management evaluated these receivables and noted that the impairment is not necessary.

Considerable part of the outstanding receivables that are overdue and are not impaired have been insured and currently the Group awaits the decision of the insurance companies to settle the insurance cases.

Movements in the allowance for impairment of trade receivables are as follows:

	2009	2008
At 1 January	308	171
Impairment charge (individual basis)	22,007	308
Receivables written off during the year as uncollectible	(619)	(171)
At 31 December	21,696	308

The creation and release of allowance for impaired receivables have been included in administrative costs in the statement of comprehensive income. Amounts charged to the allowance account are generally written off when there is no expectation of recovering additional cash.

Notes to the consolidated financial statements (continued)

20 Cash and short-term deposits

	31.12.2009	31.12.2008
Cash at banks and on hand	3,873	3,888
Short-term deposits	-	704
	3,873	4,592

The effective interest rate on the cash deposits as at 31 December 2008 was 4.36%. Deposited EUR 704 (USD 1,000) thousands for period 03.10.2008-03.04.2009.

21 Issued capital and reserves**21.1 Share capital**

The total authorised and issued number of ordinary shares is 6,877 thousand shares (2008: 6,877 thousand shares) with a par value of EUR 1,423 per share (2008: EUR 1,423 per share). All issued shares are fully paid. There were no share options in any of the years presented. All issued shares were purchased by cash contribution.

21.2 Share Premium

During 2005 share capital was increased, attracting new shareholders. As a result of share capital increase and attraction of new shareholders, share premium reserve in amount of EUR 4,974 thousand was created.

21.3 Foreign currency translation reserve

The foreign currency translation reserve is used to record exchange differences arising from the translation of the financial statements of foreign operations.

22 Provisions

	2009	2008
Beginning of year	190	158
Charged / (credited) to the statement of comprehensive income:		
– Additional provisions	-	85
– Used during year	(66)	(53)
End of year	124	190

Provisions represent expected costs with regards to handling warranty process of the sold goods.

Notes to the consolidated financial statements (continued)

23 Trade and other payables

	31.12.2009	31.12.2008
Trade payables	31,697	50,228
Social security and other taxes	835	968
Unpaid dividends	-	4,835
Unpaid salaries	63	125
Other	235	238
Accrued expenses	956	1,023
	33,786	57,417

Terms and conditions of the above financial liabilities:

- Trade payables are non-interest bearing and normally have 30 to 45 day terms;
- Other payables are non-interested bearing and have an average term of 30 days;
- Interest payable is normally settled monthly throughout the financial year;
- For terms and conditions relating to related parties, refer to Note 24.

24 Fair value

Cash and short-term deposits, trade receivables, trade payables, and other current liabilities approximate their carrying amounts largely due to the short-term maturities of these instruments.

Long-term fixed-rate and variable-rate receivables / borrowings are evaluated by the Group based on parameters such as interest rates, specific country risk factors, individual creditworthiness of the customer and the risk characteristics of the financed project. Based on this evaluation, allowances are taken to account for the expected losses of these receivables. As at 31 December 2009, the carrying amounts of such receivables, net of allowances, are not materially different from their calculated fair values.

Fair value of quoted notes and bonds is based on price quotations at the reporting date. The fair value of the bonds approximated to its book value.

25 Related party disclosures

There are no ultimate controlling parties of the Group, The shareholders of the Company are as follows:

	% for Share Capital	
	31.12.2009	31.12.2008

Notes to the consolidated financial statements (continued)

25.1 Key management compensation

The members of the Council do not receive any remuneration. The members of the Board of Directors were entitled to a remuneration of EUR 252 thousand (2008: EUR 236 thousand).

	2009	2008
The Board members' remuneration:		
- salary expenses	204	191
- social insurance	48	45
	252	236

25.2 Transactions with related parties:

The payables to related parties arise mainly from operating lease transactions. Particularly, rental services in the amount of EUR 602 thousand (2008: EUR 555 thousand) were provided by AST BALTS that are controlled by some of the shareholders of the Company.

Accordingly the Company has entered into an agreement with related party AST BALTS for rent of warehousing and office space. The respective office premises are in a construction process with expected completion at the end of 2010.

Since August 2008 the warehouse premises are used as central warehouse for Baltic region. In 2008 the Company has done additional prepayment for the rent in the amount of EUR 200 thousand.

There were no sales to related parties in any of the years presented. There were no receivables from or loans or guarantees issued to related parties at any statement of financial position date presented.

26 Commitments and contingencies

26.1 Operating lease commitments – Group as lessee

The Group leases various offices and warehouses under cancellable operating lease agreements. Should the Group decide to terminate these agreements, it is required to give one month notice. There are no further penalty payments required.

26.2 Guarantees

AS DnB NORD Banka with mediation of DnB NOR Bank ASA has issued guarantees in the amount of USD 3 million. The maturity of the guarantees is within 1 year.

All assets of ELKO GRUPA AS have been pledged as security in favour of AS DnB NORD Banka.

27 Events after the reporting period

There are no subsequent events except for the ones mentioned in the financial statement since the last date of the reporting year, which would have a significant effect on the financial position of the Group as at 31 December 2009.

AS ELKO GRUPA MANAGEMENT REPORT ON CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2009

Business activities

AS ELKO Grupa (hereinafter – the Company) is one of the largest distributors of IT products in the Baltic States, Central and Eastern Europe. The Company's core business activity is wholesale distribution of computer desktop components and peripherals, notebooks, monitors, multimedia and software products, server, network component and networking solutions, using the wide network of the ELKO GRUPA subsidiaries and cooperation partners, representing a broad range of vendors of these products all over the world, including Acer, Intel, Samsung, Sony and Western Digital.

The key to the success of AS ELKO Grupa as the parent company is the long-term strategy for cooperation with vendors developed over the years, centralized purchase system, functionality of business process management and financial management.

Financial analysis

ELKO Grupa AS turnover in year 2009 has reached USD 642.1m that constitutes 39.3% decrease from the corresponding period in 2008. Consequently gross margin has decreased by 35.6% and reached to USD 27m in 2009. Both turnover and gross margin results have decreased due to the local market contractions and the global financial crisis that affected Company performance particularly in 2008Q4 and in the first half of the 2009. However second half of the 2009 has brought positive trend to the market and to the Company results respectively. Turnover of the last quarter of 2009 has increased by the 6.8% comparatively to the 2008Q4. Furthermore gross margin was USD 4.5m in 2009Q3 and USD 13.8m in 2009Q4 that constitutes 4.7% and 25.9% increase respectively.

During the market contraction phase Company has significantly decreased its distribution and administration costs 13.1% and 15.0% accordingly. Personnel costs were cut from USD 12m in 2008 to USD 9.8m in 2009 thus corresponding to the most significant decrease in expenses.

The Company conservatively evaluated its financial assets in 2009 and booked USD 30.8m in provisions for bad debtors. Thus as of end of 2009 Company reports negative net result and loss in amount of USD 26.6m contrary to the profit of USD 12.9m in 2008. However positive market trends in second half of the 2009 allowed Company to report positive net results in last two quarters of the year USD 1.9m and 3m respectively. In 2008 Company reported net loss in amount of USD 1.7m and USD 0.2m in last two quarters.

The equity ratio of the company calculated as equity over assets reached 41.2% and has significantly increased from December 31, 2008 (30.3%). The Company has also improved its financial leverage as the debt-to-equity ratio has decreased from 1.43 to 0.73.

Management report (cont'd)

Prospects

The Company's performance is and will be influenced by macroeconomic, competition and political situation and developments of markets where the Company has cooperation partners. The key factors driving the Company's growth was the increase in demand in the markets where the Company operates that were mainly affected by rapid economical development as well as comparatively low use of computers. The other factors include inflow of the EU structural funds and increase in local productivity of the Baltic and Eastern European companies as well as reforms in the government sector in the CIS region.

There are positive signs that demand in the Company's markets have stabilized and show weak, but tendency to grow. That allows company to remain conservatively optimistic regarding trade volumes in 2010.

Given the current market conditions the Company has implemented strict cost saving policies to align the costs with the sales amounts. The measures taken include reduction of the salaries by 15% as of April 1, 2009 and reduction of staff by approximately 10%. Significant resources have been devoted towards review of processes and efficiency improvements. As a result the distribution and administrative costs were decreased by 13.1% and 15.0% in 2009. The Company plans to increase its turnover and profit margin by adapting to the current market conditions and completing all internal efficiency improvements in the meantime keeping administrative and distribution costs at the same level.

In the light of given credit and IT market risks the management has assigned priority towards working capital management. The Company has tightened its credit policies by reviewing customer payment terms and requiring additional securities from customers in order to back up the provided credit lines. It is expected that some part of the provided provisions are recoverable pending customers' ability to solve the liquidity issues. The management has strong belief that furtherly there should not be any considerable defaults by customers.

Despite negative net result as of end of 2009, Company remains positive about future prospects due to the positive trend in second half of 2009. The Company in very short period has been able to balance expenses and significantly change internal business processes, like procurement, credit policies, logistics etc. Results of rationalization lead to the positive results in second half of 2009 and provide positive improvement for 2010. The Company management believes that current sound financial standing provides solid base for the future business growth.

Significant events during reporting period

In 2009 the Company has become the official distributor and/or has established business partnerships with well known IT companies, such as: Compucase, In WIN, NVIDIA, Lenovo and MSI.

In August 2009 the Company has announced the suspension of operations in Croatian market. Due to the adverse market conditions as well as unacceptable cash cycle and profitability in Croatian market the management has evaluated further options and decided to suspend the operations in the respective market and continue to devote more efforts and resources for developing the operations in the remaining markets. The suspensions of the operations in Croatian market will not significantly affect the operations of ELKO Group.

AS ELKO Grupa has majority shareholding in all of the subsidiaries.

Management report (cont'd)

Financial risk management

Multi-currency risk

AS ELKO Grupa operates internationally and is exposed to foreign exchange risk arising from primarily with respect to US dollar, euro and Russian rubles. Foreign exchange risk arises from future multi-currency transactions and recognition of assets, liabilities and long-term investments in various currencies.

The purchase of goods is predominantly in US dollars, but sales are conducted in different currencies. In the CIS region main currency is US dollar, but in the Baltic trade is conducted in local currencies that are pegged to the euro. CEE countries Slovakia and Slovenia trades in Euros, but Romania in national currency – Romanian lei(s).

The Company has shareholding in foreign currencies and is therefore exposed to foreign currency risk when financial assets and liabilities denominated in foreign currencies are translated into the presentation currency – US dollar.

The sales of the Company are mainly in US dollars accordingly to minimize the currency risk the financing is also in US dollars.

Interest rate risk

AS ELKO Grupa uses current borrowing for financing part of its current assets. All the borrowings are at floating rate that exposes the Company to interest rate risk.

Credit risk

Credit risk arises from the credit exposure to outstanding trade receivables. AS ELKO Grupa has implemented procedures and control mechanisms to manage credit risk. Credit risk is partly minimized through credit risk insurance that the Company started using in August 2006 and conservative credit monitoring policies. Individual risk limits are set based on internal or external ratings in accordance with the credit policy. The utilization of credit limits is regularly monitored.

Inventories

AS ELKO Grupa determines the amount of inventories based on the expected future demand and market saturation. Any changes in the demand and/ or rapid obsolescence of the products or technological changes will result in excess stock and accumulation of obsolete items. The Company makes centralized plans for purchase and sale of the products and the procedures for ordering of the goods help to decrease the inventory days. Weekly inventory analysis decreases the need to establish provisions for obsolete items.

The risk related to product flow management is partially reduced through price protection arrangements under the cooperation agreements with major vendors. The agreements provide for compensation for the price reduction in case of decline of the market prices for the goods at the Company's warehouse or that are already ordered.

Management report (cont'd)

Financial risk management (cont'd)

Liquidity risk

Prudent liquidity risk management includes maintaining sufficient cash, the availability of funding from an adequate amount of committed credit facilities. In future the Company's management plans to increase the liquidity reserve based on the expected cash flows by improving the management of working capital.

Events after balance sheet date

Except for the aforementioned events there are no subsequent events since the last date of the reporting period, which would have a significant effect on the financial position of the Group as of December 31, 2009.

Riga, March 26, 2010

INDEPENDENT AUDITOR'S REPORT

To the shareholders of AS Elko Grupa

Report on the Financial Statements

We have audited the accompanying 2009 consolidated financial statements of AS Elko Grupa, and its subsidiaries (the "Group"), which are set out on pages 4 through 38 and which comprise the consolidated balance sheet as at 31 December 2009, the consolidated statements of comprehensive income, changes in equity and consolidated cash flows for the year then ended, and a summary of significant accounting policies and other explanatory notes.

Management's Responsibility for the Financial Statements

The Group's management is responsible for the preparation and fair presentation of these financial statements in accordance with International Financial Reporting Standards, as adopted by the EU. This responsibility includes: designing, implementing and maintaining internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above give a true and fair view of the financial position of the Group as of 31 December 2009, and of its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards, as adopted by the EU.

Emphasis of Matter

Without qualifying our opinion, we draw attention to Note 5.1 to the consolidated financial statements which indicate legislative risk of the Group in relation to its export of products into Russia and Ukraine. The going concern of the Group and its financial position and financial performance may significantly be affected by future changes in interpretation and enforcement of tax legislation by the Russian or Ukrainian tax authorities
