## **AS ELKO GRUPA MANAGEMENT REPORT ON INTERIM CONSOLIDATED FINANCIAL STATEMENTS FOR THE QUARTER ENDED 31 MARCH 2010**

### **Business activities**

AS ELKO Grupa (hereinafter – the Company) is one of the largest distributors of IT products in the Baltic States, Central and Eastern Europe. The Company's core business activity is wholesale distribution of computer desktop components and peripherals, notebooks, monitors, multimedia and software products, server, network component and networking solutions, using the wide network of the ELKO GRUPA subsidiaries and cooperation partners, representing a broad range of vendors of these products all over the world, including Acer, Intel, Samsung, Sony and Western Digital.

The key to the success of AS ELKO Grupa as the parent company is the long-term strategy for cooperation with vendors developed over the years, centralized purchase system, functionality of business process management and financial management.

### **Financial analysis**

ELKO Grupa AS turnover in year Q1 2010 has reached USD 160.5m that constitutes 9.6% increase from the corresponding period in 2009. Gross margin has increased by 11.0% and reached USD 6.2m. The increase in both turnover and gross margin results demonstrates that the Company has recovered from the local market contractions and the global financial crisis that affected Company's performance in 2009.

During the market contraction phase Company implemented strict cost cutting policy where the most substantial savings were achieved on personnel costs, which decreased from USD 2.7m in Q1 2009 to USD 2.2m in Q1 2010. In Q1 2010 other expenses decreased to USD 7 thousand comparing to USD 4.4m in Q1 2009, where difference is related to provisions for bad debts in the amount of 4.1m USD which the Company made as a result of customer defaults on their payments.

The equity ratio of the company calculated as equity over assets is 29.7% and has experienced decrease from 41.2% on December 31, 2009. The decrease in equity ratio is primarily related to the seasonality of the business. At the same time the Company has also gradually strengthened its financial leverage as the borrowings-to-equity ratio has decreased from 0.73 to 0.69.

### **Prospects**

The Company's performance is and will be influenced by macroeconomic, competition and political situation and developments of markets where the Company has cooperation partners. The key factors driving the Company's growth was the increase in demand in the markets where the Company operates. The demand was stimulated by the rapid economical development in operating markets as well as comparatively low use of computers. The other factors include inflow of the EU structural funds and increase in local productivity of the Baltic and Eastern European companies as well as reforms in the government sector in the CIS region.

There are positive signs that demand in the Company's markets have stabilized and indicate trend towards growth. That allows company to remain optimistic regarding the increased trade volumes in 2010.

During the market contraction phase Company implemented strict cost cutting policy as the result the Company managed to decrease its administrative and distribution costs. In next periods the Company plans to increase its turnover and profit margin by adapting to the current market conditions and completing all internal efficiency improvements in the meantime keeping administrative costs at the same level. The turnover is expected to grow faster than distribution costs.

In the light of given credit and IT market risks the management has assigned priority towards working capital management. The Company has tightened its credit policies by reviewing customer payment terms and requiring additional securities from customers in order to back up the provided credit lines. It is expected that some part of the provided provisions are recoverable pending customers' ability to solve the liquidity issues. The management is strongly convinced that in nearest future existing clients will remain stable and does not expect considerable defaults.

### **AS ELKO Grupa structure**

AS ELKO Grupa has majority shareholding in all of the subsidiaries.

### **Financial risk management**

#### ***Multi-currency risk***

AS ELKO Grupa operates internationally and is exposed to foreign exchange risk arising from primarily with respect to US dollar, euro and Russian rubles. Foreign exchange risk arises from future multi-currency transactions and recognition of assets, liabilities and long-term investments in various currencies.

The purchase of goods is predominantly in US dollars, but sales are conducted in different currencies. In the CIS region main currency is US dollar, but in the Baltic trade is conducted in local currencies that are pegged to the euro. CEE countries Slovakia and Slovenia trades in Euros, but Romania in national currency – Romanian lei(s).

The Company has shareholding in foreign currencies and is therefore exposed to foreign currency risk when financial assets and liabilities denominated in foreign currencies are translated into the presentation currency – US dollar.

The sales of the Company are mainly in US dollars accordingly to minimize the currency risk the financing is also in US dollars.

#### ***Interest rate risk***

AS ELKO Grupa uses short-term borrowing for the partial financing of its current assets. All of the borrowings are at floating rate thus exposing the Company to interest rate risk.

#### ***Credit risk***

Credit risk arises from the credit exposure to outstanding trade receivables. AS ELKO Grupa has implemented procedures and control mechanisms to manage credit risk. Credit risk is partly minimized through credit risk insurance but mainly the risk is minimized by internally developed conservative credit monitoring policies. Individual risk limits are set based on internal or external ratings in accordance with the credit policy. The utilization of credit limits is regularly monitored.

#### ***Inventories***

AS ELKO Grupa determines the amount of inventories based on the expected future demand and market saturation. Any changes in the demand and/or rapid obsolescence of the products or technological changes will result in excess stock and accumulation of obsolete items. The Company makes centralized plans for purchase and sale of the products. Furthermore the procedure for placing the orders has helped to decrease the inventory days. Weekly inventory analysis minimizes the need to establish provisions for obsolete items.

The risk related to product flow management is partially reduced through price protection arrangements under the cooperation agreements with major vendors. The agreements provide the rights to claim the compensation on preordered goods in the warehouse in case of price reduction or decline in the market prices.

### 2. Segment information

#### *Geographical segments by location of customers*

The Group considers geography as its only reporting segment. The range of products sold by the Group, classes of its customers and distribution channels do not represent separate business segments as they are not subject to different risks and returns. Accordingly, the Group has only one business segment.

The purchasing of inventory from vendors as well as financing is managed by the Company globally. Therefore, financing items like interest income and expense, as well as cash and borrowings are managed on a global basis at corporate level. This activity is further referred to as central operation.

Therefore, the Group measures geographical segment performance, including corporate performance, based on the segment's operating result. Unallocated remain operating expenses of the central operation.

The segment assets as at 31 March 2010 are as follows:

	<b>The Baltic</b>	<b>Central and Eastern Europe</b>	<b>CIS and other countries</b>	<b>Adjustments and</b>	<b>Group</b>
