EXPLANATORY NOTES

General information

“East West Agro” JSC (hereinafter referred to as the **Company**) is a joint-stock company registered with the State Enterprise Centre of Registers on 4 August 2006. The Company’s registered address is Sausinė street 1, Sausinė village, Kaunas district, Lithuania.

The Company’s authorised share capital amounts to EUR 1,000,000 and is divided into 1,000,000 ordinary registered shares with a nominal value of EUR 1 each.

The principal activity of the Company is wholesale and retail trade in agricultural machinery and spare parts for agricultural machinery.

“East West Agro” JSC operates in the Kaunas, Šiauliai, and Kupiškis districts. The main administrative and production facilities are located at Sausinė street 1, Sausinė village, Kaunas district. The Šiauliai district branch operates in a Company-owned building at Plento street 51, Kairiai. Operations in the Kupiškis district are conducted at Technikos street 8A, Kupiškis, and in the Plungė district at Dobilų street 7, Truikiai village, Babrungas eldership, Plungė district.

The average number of employees during the reporting financial year was 84, and the average number of employees during the previous financial year was 81.

The Company’s financial year begins on 1 January and ends on 31 December.

Accounting Policy

Basis for Accounting

The Company’s financial statements have been prepared in accordance with the financial accounting and reporting legislation of the Republic of Lithuania and the provisions of the Lithuanian Financial Reporting Standards in effect as of 1 January 2025.

In maintaining its accounting records and preparing financial statements, the Company applies the general accounting principles, including: entity, going concern, periodicity, consistency, monetary measurement, accrual, comparability, prudence, neutrality, and materiality.

The financial statements have been prepared based on the accrual and going concern principles. Under the accrual principle, the effects of transactions and other events are recognized when they occur: recorded in the accounting records and presented in the financial statements in the period to which they relate. Additionally, the financial statements have been prepared under the assumption that the Company has no intention or need to liquidate or significantly reduce the scale of its operations.

Non-current Intangible Assets

Intangible fixed assets are recorded at acquisition cost, less accumulated amortization and impairment losses. Amortization is calculated on a straight-line basis. The useful life and amortization method are reviewed at the end of each reporting period, with prospective adjustments made to the accounting estimates as necessary.

„East West Agro” JSC, company registration number 300588407
 Financial Statements and Explanatory Notes
 For the year ended December 31, 2025
 (All amounts in euros unless otherwise stated)

Non-current Intangible Assets (continuation)

The software intangible asset category is recorded at acquisition cost and production (development) cost (including costs of materials and services used or consumed in producing/developing the asset; wages and related taxes of employees directly involved in the production/development; and other expenses directly attributable to the production/development of the intangible asset), less accumulated amortization and impairment losses.

The useful lives of the following intangible asset categories have been determined as follows:

<u>Non-current intangible asset group</u>	<u>Useful life period</u>
Computer software	3 years
Other intangible assets	4 years

Non-current Tangible Assets

Tangible fixed assets are assets that the Company owns and controls, from which it expects to obtain economic benefits in future periods, that are used for more than one year, whose acquisition (or production) cost can be reliably determined, and whose value exceeds the established minimum threshold for that asset category.

Tangible fixed assets are recorded at acquisition (or production) cost, less accumulated depreciation and accumulated impairment losses, if any.

Depreciation of tangible fixed assets is calculated on a straight-line basis. The residual value is determined and ranges from EUR 0.29 to EUR 1.

Assets with an acquisition cost exceeding EUR 144.81 and a useful life longer than one year are capitalized. Mobile phones are classified as tangible fixed assets only when their cost exceeds EUR 434.43.

The useful lives of assets have been determined according to the following asset categories:

<u>Non-current tangible assets group</u>	<u>Useful life period (in years)</u>
Buildings	15-30 years
Equipment (structural and other)	8 years
Mobile phones	3 years
Machinery and equipment	10 years
Inventory and furniture	6 years
Vehicles	4-10 years
Trucks	4 years
Computer equipment and communication devices	3 years
Other tangible assets	4 years

At the end of each year, the Company reviews the useful lives, residual values, and depreciation methods of its fixed assets and assesses any impact of changes, which is applied prospectively.

Non-current Intangible Assets (continuation)

Repair and maintenance costs related to tangible fixed assets already put into use are added to the carrying amount of the asset if they extend its useful life or enhance its useful characteristics. All other repair costs are recognized as expenses in the income statement in the period in which they are incurred.

Repair costs of leased and/or otherwise utilized assets, which extend the useful life of the leased asset or improve its useful characteristics, are capitalized as part of the asset and recognized as expenses over the remaining lease term.

Assets acquired under a finance lease are depreciated over the same useful lives as owned assets. Assets acquired under an operating lease are depreciated over the remaining lease term.

Gains or losses from the disposal of tangible fixed assets are recognized in the income statement in the year in which they occur.

Inventories

Inventories are measured at cost or net realizable value, whichever is lower. Net realizable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and the estimated costs necessary to make the sale.

The cost of inventories includes purchase, transportation, and preparation costs for sale. The cost of spare parts is calculated using the FIFO method, while the cost of heavy machinery is determined using the specific identification method. When calculating the cost of goods, the Company allocates a portion of received discounts to unsold inventories purchased from suppliers.

Goods in transit are recognized when the risks and rewards associated with the inventories transfer to the Company.

Inventories are managed by dividing them into machinery and spare parts. Inventories held in stock for more than 4 years are written down by 20%, those held for more than 5 years by 50%, and those held for more than 6 years by 100%.

Loans and receivables

Amounts receivable from customers, loans, and other receivables with fixed or determinable payments not traded in an active market are classified as “Loans and receivables.”

Loans and receivables are initially recognized at acquisition cost and subsequently measured at amortized cost using the effective interest rate method, less any impairment losses. Interest income is recognized using the effective interest rate method, except for short-term receivables where the recognition of interest would be insignificant.

Cash and cash equivalents

Cash and cash equivalents comprise cash on hand, cash in transit, and cash in bank accounts, as well as other short-term highly liquid investments with maturities of up to three months from the date of acquisition, which can be easily converted into known amounts of cash and are subject to an insignificant risk of changes in value.

Financial assets

Financial assets in the Company are recorded at acquisition cost. The acquisition cost of financial assets includes direct transaction costs.

Impairment of financial assets

At each reporting date, a financial asset is assessed for any indications of impairment. A financial asset is considered impaired when there is objective evidence that one or more events occurring after its initial recognition have negatively affected the expected future cash flows from the asset.

The carrying amount of financial assets is directly reduced by recognized impairment losses, except for trade receivables, which are reduced through an allowance account. When a trade receivable becomes irrecoverable, it is written off against the allowance account. Any amounts subsequently recovered that were previously written off are credited to the allowance account. Changes in the carrying amount of the allowance are recognized in profit or loss.

If, in a subsequent period, the amount of recognized impairment losses decreases and this decrease can be objectively related to an event occurring after the recognition of the impairment loss, the previously recognized impairment losses are reversed through profit or loss, but only to the extent that, on the date of reversal, the carrying amount of the investment does not exceed the amortized cost that would have been determined if the impairment losses had not been recognized in prior periods.

Effective interest rate method

The effective interest rate method is a method for calculating the amortized cost of financial assets and liabilities and allocating interest income and expenses over the relevant period. The effective interest rate is the rate that exactly discounts the estimated future cash flows (including all fees paid or received that are an integral part of the effective interest rate, transaction costs, and any premiums or discounts) to the net carrying amount at initial recognition over the expected life of the financial asset or liability, or, where appropriate, over a shorter period.

Prepaid expenses

Prepaid expenses arise when the Company has paid during the reporting or prior periods for services to be provided in future periods. The amounts paid are recognized as expenses evenly over the periods in which the services are consumed.

Equity and reserves

The Company's equity consists of paid-up share capital, share premiums, statutory reserve, reserve for the acquisition of own shares, and retained earnings (losses).

Ordinary registered shares are recorded at their nominal value. Amounts received from the sale of shares exceeding their nominal value are recognized as share premiums. Costs related to a new share issue reduce the share premiums. Gains or losses from the sale, issuance, or cancellation of own shares are not recognized in the income statement.

Under the Law on Joint-Stock Companies of the Republic of Lithuania, the statutory reserve must amount to 1/10 of the share capital. Until this required reserve is reached, the Company's contributions to it must be at least 1/20 of net profit. Any portion of the statutory reserve exceeding the required amount may be reallocated when distributing the Company's profit. A statutory reserve used to cover the Company's losses must be reestablished.

Equity and reserves (continuation)

The retained earnings (losses) line item shows profit earned in the reporting and prior periods that has not yet been distributed, or losses not yet covered.

Profit distribution is recorded in the Company’s accounts when the owners decide to distribute the profit, i.e., on the date of the shareholders’ meeting, regardless of when it was earned.

Financial liabilities

Financial liabilities are recognized in the accounts when the Company incurs an obligation to pay cash or settle with another financial asset. Amounts payable for goods and services are measured at acquisition cost, i.e., the value of the goods or services received. Loans are initially recognized at acquisition cost and subsequently measured at amortized cost. Accrued interest is recorded under other payables.

Financial liabilities include amounts payable for goods and services received, loans, and finance lease obligations.

Current liabilities are obligations that are due to be settled within one year from the balance sheet date.

Revenue from sales

Revenue from sales is recognized in accordance with the accrual principle. The amount of revenue is measured at fair value, taking into account granted and expected discounts, as well as returns and write-downs of sold goods. Revenue from the sale of goods is recognized when the goods are delivered and the amount of revenue can be reliably measured.

Other operating income includes gains from the disposal of used fixed assets, as well as other income not related to the Company’s main activities but received from third parties, excluding financial income and subsidies.

Financial income includes gains from foreign exchange rate fluctuations, interest received, and penalties and late fees paid by customers.

Expenses

Expenses are recognized in the accounts in accordance with the accrual and matching principles in the period in which the related revenues are earned, regardless of when cash is paid. Expenses that are not related to the generation of revenue in the reporting period but are intended to generate revenue in future periods are recorded as assets in the accounts and presented as such in the financial statements.

Cost of sales is the expenses incurred by the Company during the reporting period that relate to goods sold and services provided in that period. This item includes only the portion of expenses directly attributable to the products, goods, and services sold during the reporting period.

General and administrative expenses represent the costs incurred during the reporting period that are related to the Company’s ordinary activities and support the generation of revenue in the reporting period, but are not dependent on the quantity of products, goods, or services sold. These expenses are recognized, recorded in the accounts, and presented in the financial statements in the same reporting period in which they are incurred.

Other operating expenses include losses from the sale of used fixed assets, as well as other expenses not related to the Company’s main activities but incurred to generate other operating income.

Expenses (continuation)

Financial expenses include the negative impact of foreign exchange rate fluctuations, paid fines and penalties, interest, and commitment fees related to financial debts.

Accrued expenses

Accrued expenses represent amounts recognized as expenses on an accrual basis during the current and prior reporting periods for ongoing services received, for which the Company has incurred an obligation to pay in future reporting periods.

Cost of goods sold recognized during the current and prior reporting periods in relation to sales revenue, for which the Company has incurred an obligation to pay in future reporting periods.

Lease accounting

A lease is classified as a finance lease when the terms of the lease transfer substantially all the risks and rewards incidental to ownership of the asset. All other leases are classified as operating leases.

The Company as a lessee

At the commencement of the lease term, assets held under finance leases are recognized as assets of the Company at amounts equal to the fair value of the leased property or, if lower, at the present value of the minimum lease payments. The corresponding liability to the lessor is included in the balance sheet as a finance lease obligation.

Lease payments are apportioned between finance costs and the reduction of the outstanding liability so as to achieve a constant rate of interest on the remaining balance of the liability. Finance costs are recognized immediately in profit or loss. Contingent rents are recognized as an expense in the periods in which they are incurred.

Foreign currency

Foreign currency transactions are recorded in Euros at the official exchange rate published by the Bank of Lithuania on the date of the transaction, which approximates the market rate. At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the exchange rate of that date.

Non-monetary items denominated in foreign currencies that are measured at fair value are retranslated at the exchange rate on the date when the fair value was determined. Non-monetary items measured at historical cost in a foreign currency are not retranslated.

Monetary assets and liabilities are translated into Euros at the exchange rate as of the date of the financial statements. Foreign exchange gains and losses resulting from the translation of monetary assets and liabilities into Euros are included in the profit or loss statement for the reporting period.

Income tax

Income tax expense represents the sum of the current year tax payable and the deferred tax.

Current year tax payable

Current income tax is calculated based on the taxable profit for the year. Taxable profit differs from the profit reported in the statement of profit or loss because it excludes items of income or expense that are taxable or

„East West Agro” JSC, company registration number 300588407

Financial Statements and Explanatory Notes

For the year ended December 31, 2025

(All amounts in euros unless otherwise stated)

deductible in other years and it further excludes items that are never taxable or deductible. Income tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period. In 2025, the income tax rate applicable to the Company is 16%, and in 2024 it was 15%. Current income tax is calculated based on the taxable profit for the year. Taxable profit differs from the profit reported in the statement of profit or loss because it excludes items of income or expense that are taxable or deductible in other years and it further excludes items that are never taxable or deductible. Income tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period. In 2025, the income tax rate applicable to the Company is 16%, and in 2024 it was 15%.

Deferred tax

Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities in the financial statements and their respective tax bases. Deferred tax liabilities are generally recognized for all taxable temporary differences, while deferred tax assets are recognized only to the extent that it is probable that future taxable profits will be available against which those temporary differences can be utilized. Such assets and liabilities are not recognized if the temporary difference arises from goodwill or from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction that affects neither taxable profit nor accounting profit.

Financial risk management policy

Credit risk

The Company has no significant concentration of credit risk, as the credit risk is distributed among a large number of customers.

Credit risk related to cash in banks is limited, as the Company performs transactions with banks that have sufficient credit ratings assigned by international credit rating agencies.

Interest rate risk

The Company borrows funds at both fixed and variable interest rates. The Company manages this risk by maintaining an appropriate mix of fixed and variable rate borrowings.

As of 31 December 2025 and 31 December 2024, the Company did not use any derivative financial instruments for the purpose of managing interest rate fluctuation risk.

Liquidity risk

The Company manages liquidity risk by maintaining adequate reserves, banking facilities, and reserve borrowing facilities, continuously monitoring actual and forecast cash flows, and matching the maturity profiles of financial assets and liabilities.

The Company's policy is to maintain a sufficient level of cash and cash equivalents or to secure funding through adequate credit lines in order to meet its obligations as set out in its strategic plans.

Foreign exchange risk

The majority of the Company's transactions during the financial year ended 31 December 2025 are denominated in Euros; therefore, the Company is not exposed to significant foreign exchange risk.

Provisions

A provision is recognized when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

Provisions (continuation)

The amount recognized as a provision is the best estimate of the expenditure required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. Where a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows.

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognized as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

Related parties

Related parties are defined as shareholders, employees, members of the Board, their close relatives, and companies that directly or indirectly through an intermediary control the Company, or are controlled separately or jointly with another party that is also recognized as a related party.

Events after the reporting period

Events after the reporting period are economic events that occur between the balance sheet date and the date the financial statements are prepared, signed by the Head of the Company, and submitted for approval.

Events after the reporting period that provide additional information about the Company's position at the balance sheet date (adjusting events) are reflected in the financial statements. Events after the reporting period that are non-adjusting events are disclosed in the notes if they are material.

The Company recognizes fines and penalties at the time they are incurred.

16. Income Tax Expense

	2025	2024
Income Tax	(447 343)	(235 453)
Deferred Income Tax	22 864	6 563
	(424 479)	(228 890)

17. Transactions with Management and Other Related Parties

During 2025, the Company accrued salaries for members of the management (2 persons) amounting to EUR 252,825 (2024: EUR 206,162). In 2025, the Company granted loans to the Company’s CEO totaling EUR 399,000 (2024: EUR 101,000). As of 31 December 2025, the outstanding balance of the CEO’s loan amounted to EUR 415,799. No other income, loans, guarantees, or benefits were provided to the members of the management.

The Company’s Board of Directors consists of three members. During 2025, no loans, guarantees, other payments, accrued amounts, or transfers of assets were granted to any Board member who is not an employee of the Company.

18. Off-balance sheet rights and obligations

The Company has issued a guarantee for the benefit of third parties, which was opened on 7 December 2015 and is valid until 31 May 2026, for the amount of EUR 1,550,000.

19. Contingent liabilities

As at the end of the reporting year, the Company had no contingent liabilities.

20. Events after the reporting period

There were no other events after the end of the financial year and up to the date of approval of these financial statements that could have a significant impact on these financial statements or would require additional disclosure.
