On 21st of December, 2015 Finasta AB has been joined to Siaulių bankas AB, which from that date became successor to all assets, rights and obligations of Finasta AB.

The Company has signed a contract with Orion Securities UAB (financial brokerage company) (A. Tumėno str. 4, Vilnius, tel. (8-5) 231 3833, fax: (8-5) 231 3840, info@orion.lt) on the handling of securities issued by the Company and for making the market for the shares of Grigeo AB.

7. AUTHORISED CAPITAL OF THE ISSUER

7.1. The authorized capital registered at the Register of Legal Persons

7.1.1. Table. Structure of the authorized capital

Tape of shares	Number of shares	Par value, EUR	Total value, EUR	Interest in the authorised capital, %
Ordinary registered shares	65,700,000	0.29	19,053,000	100

All shares of the Issuer are fully paid up.

7.2. Information on the prospective increase of the authorized capital by converting issued debt securities or derivative securities into shares

The issuer has not issued any debt securities or derivative securities to be converted into shares.

7.3. Rights and obligations conferred by the shares

The shareholders have the following property and non-property rights:

- 1) to receive a part of the Company's profit - dividend;
- 2) to receive the Company's funds when the authorized capital of the Company is being reduced with a view to paying out the Company's funds to the shareholders;
- 3) to receive shares without payment if the authorized capital is increased out of the Company funds, except in cases specified in the Law on Companies of the Republic of Lithuania;
- 4) to have the pre-emption right in acquiring shares or convertible debentures issued by the Company, except in cases when the general meeting decides to withdraw the pre-emption right in acquiring the Company's newly issued shares or convertible debentures for all the shareholders in the manner prescribed by Law on Companies of the Republic of Lithuania;
- 5) to lend to the Company in the manner prescribed by laws of the Republic of Lithuania; however, when borrowing from its shareholders, the Company may not pledge its assets to the shareholders. When the company borrows from a shareholder, the interest may not be higher than the average interest rate offered by commercial banks of the locality where the lender has his place of residence

- or business, which was in effect on the day of conclusion of the loan agreement. In such a case the Company and shareholders shall be prohibited from negotiating a higher interest rate;
- 6) to receive a part of assets of the Company in liquidation;
 - 7) to bequeath all or a part of the shares to the ownership of the other people;
 - 8) to transfer all or part of the shares to ownership of other people;
 - 9) to attend the general meetings of shareholders;
 - 10) to vote at general meetings of the shareholders according to voting rights carried by their shares (each fully paid share of the nominal value of 0.29 EUR gives its holder one vote at the general meeting);
 - 11) to receive information on the Company according to the procedure laid down in the laws of the Republic of Lithuania and the Articles of Association of the Company;
 - 12) to file a claim with the court for reparation of damage resulting from nonfeasance or malfeasance by the Company manager and Board members of their obligations prescribed by the Law on Companies and other laws of the Republic of Lithuania and the Articles of Association of the Company as well as in other cases laid down by laws of the Republic of Lithuania;
 - 13) to authorize a person to vote on his/her behalf at the general meeting of the shareholders;
 - 14) to exercise other property and non-property rights provided by laws of the Republic of Lithuania.

These forecasts are not audited.

14.8. Financial indicators of the Group and the Company

Items	Group			Company		
	nine months of 2019	nine months of 2018	Change, %	nine months of 2019	nine months of 2018	Change, %
EBITDA	20,082,876	21,953,207	-8.5	7,778,292	7,071,193	10.0
Profitability ratios						
EBITDA profitability	18.9%	20.3%	-1.4	15.8%	11.5%	4.3
Gross margin	21.9%	22.3%	-0.4	18.1%	14.0%	4.1
Operating margin	11.1%	11.2%	-0.1	8.2%	2.4%	5.8
Net margin	9.9%	10.6%	-0.7	34.2%	2.6%	31.6
ROE profitability	15.2%	19.5%	-4.3	37.7%	4.2%	33.5
ROA profitability	8.9%	9.8%	-0.9	23.4%	2.3%	21.1
Liquidity ratio, %						
Current ratio	1.38	1.12	26	1.26	0.90	36
Quick ratio	1.04	0.79	25	0.98	0.65	33
Capital structure ratio						
Debt to equity ratio	0.63	0.81	-18	0.42	0.88	-46
Debt to total assets ratio	0.39	0.45	-6	0.30	0.47	-17
Market value ratio						
P/E	8.17	8.62	-5.2	5.09	61.14	-91.7
Earnings per share	0.160	0.174	-8.2	0.256	0.025	945.3

The indicators are calculated in accordance with the Nasdaq Vilnius recommended formulas:

EBITDA profitability = EBITDA / revenue. EBITDA to revenue ratio shows the overview of operational efficiency and cash flows.

Gross margin = Gross profit / sales revenue. Gross profit margin shows ability to earn profit from operating activity, control the level of sales revenue and cost.

Operating margin = Profit from operations / sales revenue. Monetary value of the coefficient shows operating margin to 1 sales EUR. Higher ratio shows higher profitability.

Net margin = Net profit from operations / sales revenue. The ratio describing profitability of the final total operational result.

ROE profitability = Net profit / average equity. This ratio estimates shareholders' return on investment.

ROA profitability = Net profit / average assets. Return on assets shows how effectively assets are used to generate profit.

Current ratio = Current assets / current liabilities. The ratio shows the ability to cover current liabilities with current assets.

Quick ratio = (Current assets – Inventories)/ current liabilities. Liquidity describing the ability to fulfil current liabilities from quickly realisable current assets.

Debt to equity ratio = Liabilities / equity. The ratio estimates the combination of fund resources in the balance and compares funds from owners and those that were borrowed.

Debt ratio = Liabilities / assets. The ratio shows the asset share financed from borrowed funds. The lower the value, the more borrowings are covered with assets.

P/E = the market price of share / total of attributable profit. The ratio shows how much investors pay for one EUR of profit.

Earnings per share = (Net profit – preferred stock dividends)/ weighted average number of ordinary shares in circulation. The calculated profit shows the earned net profit per share.

14.9. Related party transactions

All transactions with related persons were carried out at market prices.

Grigeo Klaipėda AB – subsidiary of Grigeo AB.

Grigeo Baltwood UAB – subsidiary of Grigeo AB.

15.5. Basis of preparation

The financial statements of the Group and the Company are prepared in accordance with International Financial Reporting Standards effective as at 30 September 2019 that have been adopted for use in the European Union. These financial statements have been prepared on a historical cost basis, except of the financial instruments used for hedging, which are accounted at fair value.

Changes in accounting policies

The Group and the Company have consistently applied the accounting policies to all periods presented in these consolidated and separate financial statements.

15.6. Accounting policies

Basis of consolidation

The consolidated financial statements of the Group include Grigeo AB and its subsidiaries.

Subsidiaries are fully consolidated from the date of acquisition, being the date on which the Company or the Group obtains control, and continue to be consolidated until the date when such control ceases. The financial statements of the subsidiaries are prepared for the same reporting period as the parent company, using consistent accounting policies. All intra-group balances, transactions, unrealised gains and losses resulting from intra-group transactions and dividends are eliminated in full.

Total comprehensive income within a subsidiary is attributed to the non-controlling interest even if that results in a deficit balance. A change in the ownership interest of a subsidiary, without a loss of control, is accounted for as an equity transaction. If the Group loses control over a subsidiary, it:

- Derecognises the assets (including goodwill) and liabilities of the subsidiary;
- Derecognises the carrying amount of any non-controlling interest;
- Derecognises the cumulative translation differences, recorded in equity;
- Recognises the fair value of the consideration received;
- Recognises the fair value of any investment retained;
- Recognises any surplus or deficit in profit or loss;
- Reclassifies the parent's share of components previously recognised in other comprehensive income to profit or loss or retained earnings, as appropriate.

Business combinations and goodwill

Business combinations are accounted for using the acquisition method. The cost of an acquisition is measured as the aggregate of the consideration transferred, measured at acquisition date fair value and the amount of any non-controlling interest in the acquiree. For each business combination, the acquirer measures the non-controlling interest in the acquiree either at fair value or at the proportionate share of the acquiree's identifiable net assets. Acquisition costs incurred are expensed and included in administrative expenses.

If the business combination is achieved in stages, the acquisition date fair value of the acquirer's previously held equity interest in the acquiree is remeasured to fair value at the acquisition date through profit or loss. Any contingent consideration to be transferred by the acquirer will be recognised at fair value at the acquisition date. Subsequent changes to the fair value of the contingent consideration which is deemed to be an asset or liability, will be recognised in accordance with IFRS 9 either in profit or loss or as a change to other comprehensive income. If the contingent consideration is classified as equity, it should not be remeasured until it is finally settled within equity.

Goodwill is initially measured at cost being the excess of the aggregate of the consideration transferred and the amount recognised for non-controlling interest over the net identifiable assets acquired and liabilities assumed.

If this consideration is lower than the fair value of the net assets of the subsidiary acquired, the difference is recognised in profit or loss.

After initial recognition, goodwill is measured at cost less any accumulated impairment losses. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Group's cash-generating units that are expected to benefit from the combination, irrespective of whether other assets or liabilities of the acquiree are assigned to those units.

Where goodwill forms part of a cash-generating unit and part of the operation within that unit is disposed of, the goodwill associated with the operation disposed of is included in the carrying amount of the operation when determining the gain or loss on disposal of the operation. Goodwill disposed of in this circumstance is measured based on the relative values of the operation disposed of and the portion of the cash-generating unit retained.

Presentation currency

The amounts shown in these financial statements are presented in euro, unless otherwise stated.

The functional currency of the Company and its subsidiaries operating in Lithuania is euro. The functional currencies of foreign subsidiaries are the respective foreign currencies of the country of residence. Items included in the financial statements of these subsidiaries are measured using their functional currency.

Transactions in foreign currencies are initially recorded in the functional currency as of the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are retranslated at the functional currency rate of exchange as at the date of the statement of financial position. Non-cash items carried at cost are translated using the exchange rate at the date of the transaction.

The assets and liabilities of foreign subsidiaries are translated into euro at the reporting date using the rate of exchange as at the date of the statement of financial position, and their statements of comprehensive income are translated at the weighted average exchange rates for the year. The exchange differences arising on this translation are recognised in other comprehensive income. On disposal of a foreign subsidiary, the deferred cumulative amount recognised in other comprehensive income relating to that foreign operation is recognised in the statement of comprehensive income.

Investments in subsidiaries (the Company)

Investments in subsidiaries in the Company's separate financial statements are carried at cost, less impairment.

Discontinued operations

A discontinued operation is a component of the Group's or the Company's business, the operations and cash flows of which can be clearly distinguished from the rest of the Group and the Company and which:

- represents a separate major line of business or geographical area of operations,
- is part of a single co-ordinated plan to dispose of a separate major line of business or geographical area of operations or
- is a subsidiary acquired exclusively with a view to resale.

Classification as a discontinued operation occurs at the earlier of disposal or when the operation meets the criteria to be classified as held-for-sale.

When an operation is classified as a discontinued operation, the comparative statement of profit or loss and other comprehensive income is re-presented as if the operation had been discontinued from the start of the comparative year.

Intangible assets other than goodwill

Intangible assets acquired separately are initially measured at cost. The cost of intangible assets acquired in a business combination is stated at fair value as at the date of acquisition. Intangible assets are recognised if it is probable that future economic benefits that are attributable to the asset will flow to the enterprise and the cost of asset can be measured reliably.

The useful lives of intangible assets are assessed to be either finite or indefinite.

After initial recognition, intangible assets with finite lives are measured at cost less accumulated amortisation and any accumulated impairment losses. Intangible assets are amortised on a straight-line basis over their useful lives:

Land lease right	90 years
Licenses, patents and etc.	3–5 years
Software	3–6 years
Other intangible assets	3–6 years

Intangible assets are assessed for impairment whenever there is an indication that the intangible asset may be impaired.

The useful lives, residual values and amortisation method are reviewed annually to ensure that they are consistent with the expected pattern of economic benefits from items in intangible assets other than goodwill.

The Group and the Company do not have any intangible assets with infinite useful life other than goodwill.

Property, plant and equipment

Property, plant and equipment are stated at cost (or deemed cost – see below) less accumulated depreciation and impairment losses.

Before 31 December 2010, buildings were accounted as follows:

- The Company's buildings, acquired before 1 January 1996, were stated at indexed cost less indexed accumulated depreciation and impairment losses.
- The Company's buildings, acquired after 1 January 1996, were stated at acquisition cost less accumulated depreciation and impairment losses.

As at 31 December 2010, according to the exception available under IFRS 1, part of buildings, acquired before 1 January 1996, were measured at fair values, determined as at that date by independent property valuator, and these values were used as deemed cost at that date.

After 31 December 2010 all property, plant and equipment are stated at cost less accumulated depreciation and impairment losses.

The initial cost of property, plant and equipment comprises its purchase price, including non-refundable purchase taxes and any directly attributable costs of bringing the asset to its working condition and location for its intended use. Expenditures incurred after the property, plant and equipment is ready for its intended use, such as repair and maintenance costs, are normally charged to the statement of comprehensive income in the period the costs are incurred. Depreciation is computed on a straight-line basis over the following estimated useful lives:

Buildings and structures	8–91 years
Machinery and equipment	5–15 years
Vehicles	4–8 years
Other equipment and other assets	4–6 years

The useful lives, residual values and depreciation method are reviewed annually to ensure that they are consistent with the expected pattern of economic benefits from items in property, plant and equipment.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the statement of comprehensive income in the year the asset is derecognised.

Construction in progress is stated at cost. This includes the cost of construction, plant and equipment and other directly attributable costs. Construction-in-progress is not depreciated until the relevant assets are completed and put into operation.

Investment property

Investment property, including part of buildings and structures, is held for earning rentals and / or for capital appreciation rather than for use in the production, provision of services, or for administration purposes or sale.

Investment property is stated at historical cost less accumulated depreciation and adjusted for impairment loss, if any. Depreciation is calculated on the straight-line method to write-off the cost of each asset to their residual values over their estimated useful life: 10-50 years.

Transfers to and from investment property are made only when there is an evidence of change in an asset's use. For a transfer from investment property to owner-occupied property, the deemed cost for subsequent accounting is the carrying value of investment property at the date of change in use. If owner-occupied property becomes an investment property the Company and the Group account for such property in accordance with the policy stated under property, plant and equipment up to the date of change in use. The deemed cost for subsequent investment property accounting is the carrying value at the time of assets' transfer.

Disposed assets

Assets held for sale are measured at the lower of their carrying amount and the fair value less costs to sell. Assets are classified as held for sale when its carrying amount value will be recovered after its sale and when such sale is highly probable. This condition is regarded as met only when the sale is highly probable, and the asset is available for immediate sale in its present condition. Management must be committed to the sale, which should be expected to qualify for recognition as a completed sale within one year from the date of classification.

Non-current tangible and intangible assets once classified as held for sale are not depreciated or amortised.

Emission allowances

The EU Emission Allowance Trading Scheme was established by Directive 2003/87/EC and commenced on 1 January 2005. The first phase ran for the three-year period from 2005 to 2007; the second runs for five years from 2008 to 2012 to coincide with the first Kyoto Commitment Period; the third – for 8 years from 2013 to 2020. The scheme works on a 'Cap and Trade' basis. EU Member States' governments are required to set an emission cap for each phase for all 'installations' covered by the Scheme.

This cap is established in the National Allocation Plan (NAP), which is issued by the relevant authority in each Member State. The NAP describes the amount of yearly emissions (measured in tonnes of carbon dioxide equivalents) permitted per installation for each phase for which allowances will be allocated on an annual basis.

Member States are required to allocate allowances to installations by 28 February each year according to the NAP (a certain number of allowances are kept in reserve for new installations).

Member States must ensure that by 30 April of the following year at the latest, that the operator of each installation surrenders a number of allowances equal to the total emissions from that installation during the preceding calendar year.

The Group and the Company apply the net liability approach in accounting for the emission allowances received. It records the emission allowances granted to it at a nominal (nil) amount. When actual emissions exceed allocated emission allowances, the obligation of purchasing additional allowances is recognised as a provision measured at the market value of the allowances as at the reporting date. The Group and the Company have chosen a system that measures deficits on the basis of an annual allocation of emission allowances.

The outright sale of emission allowances is recorded as a sale at the fair value of consideration received. Any difference between the fair value of the consideration received and its carrying amount is recorded as a gain or loss, irrespective of whether this creates an actual or an expected deficit of the allowances held. When a sale creates an actual deficit, an additional liability is recognised in the statement of financial position.

Borrowing costs

Borrowing costs are interest and other costs that the Company and the Group incur in connection with the borrowing of funds. Borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset form part of the cost of that asset. Other borrowing costs are recognised as costs when incurred.

A qualifying asset is an asset that necessarily takes a substantial period to get ready for its intended use or sale.

Borrowing costs may include:

- interest expenses calculated using the effective interest,
- finance charges in respect of finance leases and
- exchange differences arising from foreign currency borrowings to the extent that they are regarded as an adjustment to interest costs.

The commencement date for capitalisation is the date when all of the following three conditions are met:

- expenditures for the asset are incurred,
- borrowing costs are incurred,
- activities necessary to bring the asset into its intended use or sale are undertaken.

Capitalising of borrowing costs is ceased when substantially all the activities necessary to prepare the qualifying asset for its intended use or sale are complete.

Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Recognition and initial measurement

The Group and the Company recognise a financial asset or a financial liability in its statement of financial position when, and only when, the entity becomes a party to the contractual provisions of the instrument. When financial instruments are recognised initially, they are measured at fair value equal to the fair value of the compensation paid, including transaction costs, except for financial assets measured at fair value through profit or loss.

Classification and subsequent measurement

Starting from 1 January 2018 the Group and the Company qualify financial assets to one of the following categories:

- measured at amortised cost,
- measured at fair value through other comprehensive income,
- measured at fair value through profit or loss,
- hedging financial instruments.

The Group and the Company qualify financial assets to the appropriate category depending on the business model of financial assets management and on the characteristics of contractual cash flows for a given financial asset.

The Group and the Company attribute to assets, measured at amortised cost, trade accounts receivable, loans granted, other accounts receivable of financial assets, and cash and cash equivalents.

At the initial recognition the Group and the Company attribute equity instruments, i.e. shares of other entities, to financial instruments measured at fair value through other comprehensive income.

The Group and the Company attribute to assets measured at fair value through profit or loss the financial derivatives not used for hedge accounting and hedging instruments measured in accordance with the hedge accounting principles.

The Group and the Company qualify financial liabilities to one of the following categories:

- measured at amortised cost,
- measured at fair value through profit or loss,
- hedging financial instruments.

The Group and the Company attribute to financial liabilities, measured at amortised cost, trade liabilities, other accounts payable and loans received.

Liabilities of derivative financial instruments not designated for hedge accounting and measured by the Group and the Company at fair value in profit or loss.

Measurement of financial assets at amortised cost

The Group and the Company apply the effective interest rate method to measure financial assets at amortised cost.

Trade receivables initially are measured at amortised cost using the effective interest rate method, including impairment losses, while trade receivables with a maturity date of less than 12 months from the date of recognition (i.e., not containing a financing element) and not designated to factoring, are not discounted and are measured at nominal value.

The effective interest method is a method of calculating the amortized cost of a financial asset or liability and of allocating interest income and expense over the relevant period. The effective interest rate is the rate that discounts estimated future cash payments through the expected life of the financial liability, or, where appropriate, a shorter period.

Measurement of financial assets at fair value through other comprehensive income

Gains and losses on a financial asset constituting an equity instrument for which the option of fair value was applied for other comprehensive income is recognised in other comprehensive income, except for revenues from received dividends.

Financial assets at fair value through profit or loss

The category financial assets at fair value through profit or loss includes financial assets classified as held for trading. Financial assets are classified as held for trading if they are acquired for the purpose of selling in the near term. Gains or losses on investments held for trading are recognised in profit or loss. Gains or losses on assets at fair value through profit or loss also include interest or dividend income.

The Group and the Company do not have any financial instruments at fair value through profit or loss as at 30 September 2019.

Derivative financial instruments and hedge accounting

The Group and the Company holds derivative financial instruments to hedge their interest rate risk exposures. Embedded derivatives are separated from the host contract and accounted for separately if certain criteria are met.

Derivatives initially are measured at fair value; any directly attributable transaction costs are recognised in profit or loss as incurred. Subsequent to initial recognition, derivatives are measured at fair value, and changes therein are generally recognised in profit or loss.

Cash flow hedges

When a derivative is designated as a cash flow hedging instrument, the effective portion of changes in the fair value of the derivative is recognised in OCI and accumulated in the hedging reserve. Any ineffective portion of changes in the fair value of the derivative is recognised immediately in profit or loss.

The amount accumulated in equity is retained in other comprehensive income and reclassified to profit or loss in the same period or periods during which the hedged forecast cash flows affect profit or loss or the hedged item affects profit or loss.

If the forecast transaction is no longer expected to occur, the hedge no longer meets the criteria for the hedge accounting, the hedging instrument expires or is sold, terminated or exercised, or the designation is revoked, then hedge accounting is discontinued prospectively. If the forecast transaction is no longer expected to occur, then the amount accumulated in equity is reclassified to profit or loss.

Derecognition in the statement of financial position

Financial assets (or, where appropriate, part of financial assets or part of the group of similar financial assets) are derecognised when:

- the rights to cash flows from the assets expire;
- the Group / the Company retains the right to receive cash flows from the asset, but has assumed an obligation to

- pay them in full without material delay to a third party under a 'pass through' arrangement; or
- the Group / the Company has transferred its rights to receive cash flows from the asset and either (a) has transferred substantially all the risks and rewards of the asset, or (b) has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Group / the Company has transferred its rights to receive cash flows from an asset and has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the asset is recognised to the extent of the Company's / the Group's continuing involvement in the asset. Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Group / the Company could be required to repay.

The Group / the Company derecognises financial liabilities when, and only when the Group's / the Company's obligations are discharged, cancelled or they expire. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognised in profit or loss.

Offsetting financial assets and financial liabilities

Financial assets and financial liabilities are offset, and the net amount presented in the statement of financial position when, and only when, the Company currently has a legally enforceable right to offset the amounts and intends either to settle them on a net basis or to realise the asset and settle the liability simultaneously.

Impairment of financial assets

IFRS 9 contains a new model for calculation of impairment of financial assets measured at amortised cost or FVOCI (except for investments in equity instruments, and to contract assets). The impairment model is based on the calculated possible losses and not the losses incurred as applied prior to 2018 under IAS 39.

The Group and the Company apply the following models for determining impairment write-offs:

- general model (basic),
- simplified model.

The general model is applied by the Group and the Company for financial assets measured at amortised cost – other than trade receivables and for assets measured at fair value through other comprehensive income.

In the general model, the Group and the Company monitor changes in the level of credit risk associated with a given financial asset and classify financial assets to one of the three stages for determining impairment allowances based on the observation of the change in the credit risk level in relation to the initial recognition of the instrument.

Depending on the classification to individual stages, the impairment allowance is estimated in the 12-month horizon (stage 1) or in the life horizon of the instrument (stage 2 and stage 3).

On each day ending the reporting period, the Group and the Company analyse the occurrence of indications leading to the classification of financial assets for individual stages of determining impairment allowances. The indications can include changes in the debtor's rating, serious financial problems of the debtor, occurrence of a significant unfavourable change in its economic, legal or market environment.

For the purpose of estimating the expected credit loss, the Group and the Company apply default probability levels, implied from market quotes of credit derivatives, for entities with a given rating and from a given sector.

The Group and the Company include information about the future in the parameters of the expected loss estimation model by calculating the probability of insolvency parameters based on current market quotes.

The simplified model is applied by the Group and the Company for trade receivables.

In the simplified model, the Group and the Company do not monitor changes in the credit risk level during the life of the instrument and estimate the expected credit loss in the horizon until maturity of the instrument.

For the purpose of estimating the expected credit loss, the Group and the Company use the provision matrix estimated on the basis of historical levels of repayment and recoveries from receivables from contractors.

The Group and the Company include information about the future in the parameters used in the expected loss estimation model through the management adjustment of the basic insolvency probability parameters.

For the purpose of calculating the expected credit loss, the Group and the Company determine default probability levels for liabilities of accounts receivable, calculated based on historical analysis of the number of unpaid invoices, and default levels for liabilities of accounts receivable, calculated based on historical analysis of the value of unpaid invoices.

The expected credit loss is calculated when the receivable is recognised in the statement of financial position and is updated on each subsequent day ending the reporting period, depending on the number of overdue days of the receivable.

Losses (reversal of losses) due to impairment of financial instruments

The losses due to impairment of financial instruments (including reversal of losses) include, in particular, losses (reversal of losses) due to impairment of trade receivables and losses (reversal of losses) due to impairment of granted loans.

Inventories

Inventories are stated at the lower of cost and net realisable value. Net realisable value is the selling price in the ordinary course of business, less the costs of completion, marketing and distribution. The costs of inventories are determined based on FIFO principle. The cost of finished goods and work in progress includes the applicable allocation of fixed and variable overhead costs based on a normal operating capacity.

Financial and operating leases

The determination of whether an arrangement is, or contains a lease is based on the substance of the arrangement at inception date of whether the fulfilment of the arrangement is dependent on the use of a specific asset or assets or the arrangement conveys a right to use the asset.

Finance lease – Group and the Company as a lessee

Leases in terms of which the Group and the Company assume substantially all the risks and rewards of ownership are classified as finance leases.

The Group and the Company recognise finance leases as assets and liabilities in the statement of financial position at amounts equal at the inception of the lease to the fair value of the leased property or, if lower, to the present value of the minimum lease payments. In calculating the present value of the minimum lease payments, the discount factor used is the interest rate implicit in the lease, when it is practicable to determine it; otherwise, the Company's incremental borrowing rate is used. Any initial direct costs are added to the amount recognised as an asset. Lease payments are apportioned between the finance charge and the reduction of the outstanding liability. The finance charge is allocated to each period during the lease term so as to produce a constant periodic rate of interest on the remaining balance of the liability.

The depreciation is accounted for finance lease assets and it also gives rise to financial expenses in the Group's and the Company's statement of profit or loss for each accounting period. The depreciation policy for leased assets is consistent with that for depreciable assets that are owned. The leased assets cannot be depreciated over the period longer than lease term, unless the Group or the Company, according to the lease contract, gets transferred their ownership after the lease term is over.

Operating lease – the Group and the Company as lessee

Leases of assets under which the risks and rewards of ownership are effectively retained by the lessor are classified as operating leases. Operating lease payments are recognised as an expense in profit or loss on a straight-line basis over the lease term.

The aggregate benefit of incentives provided by the lessor is recognised as a reduction of rental expense over the lease term, on a straight-line basis.

If a sale and leaseback transaction results in an operating lease, and it is clear that the transaction is established at fair value, any profit or loss is recognised immediately. If the sale price is lower than the fair value, any gain or loss is recognised immediately, save for the cases when losses are compensated by future lease payments that are lower

than market prices. The profit is then deferred, and it is amortised in proportion to the lease payments over a period, during which the assets are expected to be operated. If the sale price is above fair value, the excess over fair value is deferred and amortised over the period for which the asset is expected to be used.

Operating lease – the Group and the Company as lessor

Assets leased under operating lease in the statement of financial position of the Group and the Company are accounted for depending on their nature. Income from operating lease is recognised as other income in profit or loss within the lease period using the straight-line method. The aggregate cost of incentives provided to lessees is recognised as a reduction of rental revenue over the lease term on a straight-line basis. Initial direct expenses incurred in order to generate lease income are included in the carrying value of the leased asset.

Non-current employee benefits

According to the requirements of Lithuanian Labour Code, each employee leaving the Group or the Company at the age of retirement is entitled to a one-off payment in the amount of 2-month salary.

The past service costs are recognised as an expense on a straight-line basis in profit or loss immediately after the assessment of such liability. Any gains or losses appearing as a result of curtailment and/or settlement are recognised in profit or loss as incurred.

The above-mentioned employee benefit obligation is calculated based on actuarial assumptions, using the projected unit credit method. Obligation is recognised in the statement of financial position and reflects the present value of these benefits on the preparation date of the statement of financial position.

Present value of the non-current obligation to employees is determined by discounting estimated future cash flows using the discount rate which reflects the interest rate of the Government bonds of the same currency and similar maturity as the employment benefits. Actuarial gains and losses are recognised in other comprehensive income as incurred.

Financial guarantee contracts

Financial guarantees provided for the liabilities of the Group companies (i.e. companies controlled by the same parent) during the initial recognition are accounted at estimated fair value as distribution to shareholder and financial liability in the balance sheet.

Subsequent to initial recognition this financial liability is amortised and recognised as income depending on the related amortisation / repayment of the sister company's financial liability to the bank. If there is a possibility that the sister company may fail to fulfil its obligations to the bank, a financial liability of the Company is accounted for at the higher of amortised value and the value estimated according to IAS 37 Provisions, Contingent Liabilities and Contingent Assets.

Grants and subsidies

Grants and subsidies (hereinafter "grants") intended for the purchase, construction or other acquisition of non-current assets are considered as asset-related grants. Assets received free of charge are also allocated to this group of grants. The amount of the asset related grants is recognised in profit and loss gradually according to the depreciation rate of the assets associated with this grant. In profit or loss, a relevant expense account is reduced by the amount of grant amortisation. Grants are accounted at the fair value of the assets received.

Grants received as a compensation for the expenses or unearned income of the current or previous reporting period, also, all the grants, which are not grants related to assets, are considered as grants related to income. The income-related grants are recognised as used in parts to the extent of the expenses incurred during the reporting period or unearned income to be compensated by that grant.

Income tax

The Group companies are taxed individually, irrespective of the overall results of the Group. Income tax calculations are based on annual profit net of deferred income tax. The charge for taxation included in these financial statements is based on the calculation made by the management in accordance with tax legislation of the Republic of Lithuania and Ukraine.

Income tax rate of 15% has been introduced starting from 1 January 2010 for companies operating in the Republic of Lithuania. Standard income tax rate in Ukraine for the year 2018 was 18% (2017: 18%).

Tax losses can be carried forward for indefinite period, except for the losses incurred as a result of disposal of securities and/or derivative financial instruments and for the losses accumulated in the Ukrainian company (under the Ukrainian law, losses can be carried forward for 4 years). Such carrying forward is disrupted if the Company changes its activities due to which these losses incurred except when the Company does not continue its activities due to reasons which do not depend on Company itself. The losses from disposal of securities and/or derivative financial instruments can be carried forward for 5 consecutive years and can only be used to reduce the taxable income earned from the transactions of the same nature.

From 2014 tax losses carried forward can cover not more than 70 percent of the taxable profit of a taxable period according to Lithuanian laws.

Deferred taxes are calculated using the balance sheet liability method. Deferred taxes reflect the net tax effect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. Deferred tax assets and liabilities are measured using the tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled based on tax rates enacted or substantially enacted at the date of the statement of financial position.

Deferred tax assets have been recognised in the statement of financial position to the extent the management believes they will be realised in the foreseeable future, based on taxable profit forecasts. When it is probable that a portion of deferred tax will not be utilised, this portion of deferred tax is not recognised in the financial statements.

Revenue recognition

Starting from 1 January 2018 revenue of the Group and the Company is recognised in accordance with the provisions of IFRS 15, i.e. the Group and the Company recognise revenue at the time and to such an extent so that the transfer of goods or services to customers would show the amount which corresponds to the compensation that the Company expects to receive in exchange for the goods or services. When applying the standard, the Company takes into consideration the terms of the contract and all significant facts and circumstances. Revenue is recognised in the Company using the five-step model.

Identification requirements for contracts with customers

The contract with the customer meets its definition when all of the following criteria are met: the parties of the contract concluded a contract and are required to perform their duties; the Group and the Company are able to identify the rights of each party regarding goods or services to be transferred; the Group and the Company are able to identify the payment terms for goods or services to be transferred; the contract has economic substance and it is probable that the Group and the Company will receive a remuneration which they will be entitled to in exchange for goods or services that will be transferred to the customer. Contracts with customers can be combined or separated into several contracts by maintaining the criteria of the previous contracts. Such combination or separation constitutes an amendment of the contract.

Identification of performance obligations

At the time of concluding the contract, the Group and the Company evaluate the goods or services promised in the contract with the client and identify as a commitment to perform any promise to transfer to the client: good or service (or a package of goods or services) that can be separated or groups of separate goods or services which are basically the same and for which the transfer to the client is of the same nature.

Determination of transaction price

In order to determine the transaction price, the Group and the Company take into account the terms of the contract and the customary business practices. The transaction price is the amount of consideration which, according to the Group's and the Company's expectation, will be due in exchange for the transfer of promised goods or services to the customer, excluding amounts collected on behalf of third parties. The consideration specified in the contract with the customer may include fixed amounts, variable amounts or both.

When calculating variable amounts, the Group and the Company reached the decision to apply the most probable value method for contracts with one threshold or the expected value method for contracts where there are more value thresholds from which the customer receives a discount.

Allocation of the transaction price for each performance obligation

The Group and the Company allocate the transaction price to each performance obligation (or distinct good or service) at an amount that reflects the amount of consideration to which the Group and the Company expect to be entitled in exchange for transferring the promised goods or services to the customer.

Revenue recognition when all performance obligations are fulfilled

The Group and the Company recognise revenue when the Group and the Company fulfils an obligation by transferring to the customer the promised goods or services (i.e. the customer obtains control of the assets). Revenues are recognised as amounts equal to the transaction price that was assigned to a given performance obligation.

The Group and the Company transfer control over good or service over time and thus satisfy the performance obligation and recognise revenues over time if one of the following criteria is met:

- the customer simultaneously receives and consumes the benefits from performance of obligation as the Group and the Company performs it,
- the asset is created or enhanced as a result of the performance, and the customer controls the asset as it is created or enhanced,
- as a result of the performance of the service, an alternative component for the Group and the Company is not created, and the Group and the Company have an enforceable right to payment for performance completed until a certain date.

Impairment of non-financial assets

Non-financial assets, except for goodwill, inventories and deferred tax, are reviewed for impairment whenever events or changes in circumstances indicate that carrying amount of an asset may not be recoverable. If such conditions exist, the asset's recoverable amount is estimated. Whenever the carrying amount of an asset exceeds its recoverable amount, an impairment loss is recognised in profit or loss. Reversal of impairment losses recognised in prior years is recorded when there is an indication that the impairment losses recognised for the asset no longer exist or have decreased. The reversal is accounted for in the same caption of profit or loss as the impairment loss. An impairment loss of the goodwill is recognised in profit or loss.

An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) fair value less costs to sell and its value in use and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

Use of estimates in the preparation of financial statements

The preparation of financial statements in conformity with International Financial Reporting Standards as adopted by EU requires management to make judgements, estimates and assumptions that affect the reported amounts of assets, liabilities, income and expenses and disclosure of contingencies, at the reporting date and within the next financial year. The significant areas of estimation used in the preparation of the accompanying financial statements relate to depreciation, amortisation, impairment of buildings, non-current employee benefits, impairment evaluation of goodwill, recognition of deferred income tax asset, and impairment evaluation of other assets. Future events may occur which will cause the assumptions used in arriving at the estimates to change. Estimates and judgements are continually evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

Fair value measurement

A number of the Group's and the Company's accounting policies and disclosures require the determination of fair value, for both financial and non-financial assets and liabilities.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal, or in its absence, the most advantageous market to which the Group and the Company have access at that date. The fair value of a liability reflects its non-performance risk.

When measuring the fair value of an asset or a liability, the Group and the Company use market observable data as far as possible. Fair values are categorised within different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices);
- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

If the inputs used to measure the fair value of an asset or a liability fall into different levels of the fair value hierarchy then the fair value measurement is categorised in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.

The Group and the Company recognise transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

Fair values have been determined for measurement and / or disclosure purposes based on the following methods. Where applicable, further information about the assumptions made in determining fair values is disclosed in the notes specific to that asset or liability:

- Investment property
- Financial instruments – fair values and risk management

Contingencies

Contingent liabilities are not recognised in the financial statements, except for contingent liabilities associated with business acquisitions. They are disclosed unless the possibility of an outflow of resources embodying economic benefits is remote.

A contingent asset is not recognised in the financial statements but disclosed when an inflow of economic benefits is probable.

Subsequent events

Subsequent events that provide additional information about the Group's / the Company's position at the date of statements of financial position (adjusting events) are reflected in the financial statements. Subsequent events that are not adjusting events are disclosed in the notes to the financial statements when material.
