

#### INDEPENDENT AUDITOR'S REPORT

### To the Shareholders of AS "GROBINA"

## Report on the Financial Statements

We have audited the accompanying financial statements of AS "GROBINA", registration No. 40003017297, set out on pages 8 to 24 of the accompanying annual report, which comprise the balance sheet as of 31 December 2015 and the profit and loss account and the statements of changes in equity and cash flows for the year then ended and a summary of significant accounting policies and other explanatory information.

## Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with the Law of the Republic of Latvia on Annual Reports, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

#### Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

#### Opinion

In our opinion, the financial statements give a true and fair view of the financial position of AS "GROBINA" as of 31 December 2015, and of its financial performance and its cash flows for the year then ended in accordance with the Law of the Republic of Latvia on Annual Reports.

### Report on Other Legal and Regulatory Requirements

We have read the management report for 2015 set out on page 5 and 6 of the accompanying annual report for 2015 and did not identify material inconsistencies between the financial information contained in the management report and that contained in the financial statements for 2015.

### Management report

Core business activity of JSC "GROBIŅA" is fur-farming of minks for fur production and farm animals feed production.

#### During the reporting period

In 2015 company has worked with neto turnover of 4 865 347 EUR, representing growth of 69%. In 2015 12 months has realized 113 521 mink skins and the average price of the skin is 40.18 EUR / pcs, while - 12 months of 2014 were sold 94 849 mink skins at an average sales price of 28.39 EUR / pcs. 2015 profit of the company is 756 903 EUR, net earnings per share is 1,5138 EUR, but in 2014 was a net loss per share 4,2797 EUR. Average number of employees in 2015 was 108 employees, in 2014 - 95 employees.

Fur market in 2015 was positive trended, as evidenced by the production increase in prices of 41.5% compared to the previous years of crisis in the sector. Also JSC "Grobina" in 2015 is increased product sales by 20% and, based to investments made in advance, in 2015 the company has increased its production amounts.

However, in 2015 held the Finnish auction house Saga Furs fur auctions (March, June, September) was very significant fluctuations in the price of fur, which showed an even more precarious situation in the fur market. In general there was observed price increase comparing with 2014, but prices in 2015 still did not reach the expected, they were 26% below of the average prices which were the industry pre-crisis years (2012, 2013 average JSC "Grobina" product sales the price was 54.70 EUR for mink skin).

In response to market fluctuations, the two Scandinavian auction houses in 2015 changed the procedure for implementation mink i.e. mink collection was completely removed from the December 2015 auction, for which JSC "Grobina" management was forced to review existing contracts and future payment arrangements with their suppliers and service providers to transfer payments to the 2016 March and June auctions where was realised production of 2015. However, in spite of the unstable situation in 2015 in the fur market, JSC "Grobina" has arranged part of financial obligations from previous crisis years as far as it was possible, as well in cooperation with major creditors of the company in 2015 was realised JSC "Grobina" financial commitment restructuring plan within which the share of short-term liabilities are restructured in the long run.

Also, at the end of 2015 it has been realized project, which was started in 2014 under which has been upgraded fur animal feed production in Dubeni, Lapsu street 3 and completed the centralized feed production factory in Liepaja, Brivibas street 119a. The project is implemented in cooperation with the Rural Support Service, attracting public funding for EU EFF measure "Fishery and aquaculture products processing" program.

In he global markets in 2016 there was a dramatic fur sales prices fall, as compared to March 2015 the average auction price of EUR 48.44 - March 2016 auction, the average price fell by 54% and amounted to only EUR 22.30. Consequently, it is given that March 2016 was sold at auction essential JSC "Grobina" produced skin amount ~ 78 300 skins - JSC "Grobina" cash flow March planned auction revenues lagged behind by about 2 million. EUR. Result of these developments the company was unable to meet in full its obligations towards its creditors. Thus, the rapid response to the situation in the Court there was submitted an application for the JSC "Grobina" process of legal protection proceedings. Consequently, the Court of Liepaja on April 6, 2016 a decision was instituted Nr.C20153616 JSC "Grobina" legal protection proceedings. As the majority of the creditors, according to the Insolvency Law Article 42, third paragraph, agreed JSC "Grobina" management developed by the process of legal protection plan with respect to the accumulation of unsecured creditors (suppliers) debts essentially provides only the debt principal repayments deferred until June 2018, based on the Liepaja Court judgment of 29 June 2016 the JSC "Grobina" May 17, 2016 the legal defence plan was approved. By 3d of March 2017, Liepaja court decision is confirmed JSC "Grobina" redress process plan amendments.

Since JSC "Grobina" legal protection proceedings prosecutioncompany continues economic activities in accordance with an approved JSC "Grobina" legal protection process action plan and its amendments. JSC "Grobina" legal protection proceedings action plan was based on a forecast that the 2016 the average auction price will be EUR 30 per skin, according to the March 2016 auction results have materialized as a result of the JSC "Grobina" management reasonably believes that company will be able to comply with the court approved legal protection process action plan and to restore its ability to cover its financial obligations. In addition, based to the performance of the project as an independent fur animal feed production factory establishment, JSC "Grobina" can make realistation of produced fur animal feed to other sompanies in industry in Latvia, as well in abroad, thus gaining more revenue in addition to the production of fur.

### Joint Stock Company "GROBINA"

Annual Report 2015

Address: Lapsu istreet 3, Dubeni, Grobina parish., Grobina county., LV-3438

Unified registration Nr: 40003017297

JSC "Grobina" in 2015 is increased product sales reaching 12 months of 2015 the net turnover of 6 220 362 EUR. Therefore, the 12 months of 2015 were sold 113 521 mink skins at an average sales price of 40.18 EUR / pcs., An increase of 20% more than in 2014 12 months, when it was realized 94 849 mink skins at an average price of 28 39 EUR / pcs. As a result, 2015 12-month profit is 756 903 EUR which was basement for successful reconstruction process completing in 2015 with JSC "Citadele banka", there were covered bank debts accumulated in the previous season. Therefore, 2015 net earnings per share are1,5138 EUR, 2014 when the 12-month net loss per share was 4.2797 EUR.

Although the fur market in 2015 as a whole showed a positive trend, as evidenced by the production increase in prices of 41.5% compared to the previous years of crisis in the sector - fur sales prices in 2015 still did not reach the expected levels. However, in 2015 held the Finnish auction house Saga Furs fur auctions (March, June, September) was very significant fluctuations in the price of fur, which showed that the fur market situation is not stable.

As a result, by 2016 the world's markets was fur sales price of a dramatic decline as a result of the JSC "Grobina" appealed to the court with a legal protection process application. Since the majority of the creditors, according to the Insolvency Law Article 42, third paragraph, agreed JSC "Grobina" management developed by the process of legal protection plan based on the Liepaja Court judgment of 29 June 2016 the JSC "Grobina" 17 May 2016 Legal Protection Proceedings the plan was approved. By March 03, 2017, Liepaja court decision is confirmed JSC "Grobina" legal protection proceedings plan amendments. Since JSC "Grobina" legal protection proceedings prosecution excitation, company continues economic activities in accordance with an approved JSC "Grobina" legal protection proceedings action plan and its amendments.

### Attachment of the Financial Statement

#### 1. Important accounting policies

### The princips of makinf financial statemnet

JSC"Grobina" is primarily engaged in growing mink fur and livestock feed production.

Compared with the previous period, the reporting period, the accounting and valuation methods have not changed.

The annual statements were prepared in accordance with these following principles ::

- a) It is assumed that the company will be active in future;
- b) There are used the same valuation methods as in the previous year
- c) Evaluation of items is made with due caution:
  - In statement there is included only till the date of balance gained profit;
  - There are taken in account all predictable risk amounts and losses incurred in the reporting year or in previous years, even if they appear between balance date and preparation of annual report;
  - There are calculated and taken into account all impairments and depreciation amounts, regardless of whether the financial result was a loss or profit.
- d) there are taken in account all in the reporting year related incomes and expenses, regardless of the payment date and receipt of the invoice or the date of issue. Costs aligned with revenue in the reporting period;
- e) Assets and liabilities were evaluated separately;
- f) The opening balance agrees with the prior year closing balance;
- g) All items that have a significant impact on the annual report, assessment or decision-making, insignificant items have been combined and their details disclosed in the notes:
- h) Business transactions are recorded taking into account their economic content and substance rather than legal form. Financial statements the monetary unit used in the European Union currency Euro (EUR). The financial statements cover the period from 1 January 2015 until 31 December 2015.

#### Use of estimates

When preparing the Financial Statement, the management has to rely on certain estimates and assumptions, which have an effect on balances of the Balance Sheet and the Profit or Loss Account reflected in certain statements, as well as the amount of contingent liabilities. Future events may affect assumptions, based on which the respective estimates were made. Any impact from changes in estimates is reflected in the Financial Statement at the moment they are established.

#### Foreign currency exchange

Monetary assets and liabilities denominated in foreign currencies are translated into euros at the European Central Bank exchange rate on the last day. Exchange rate differences arising on settlements of transactions or on reporting of assets and liabilities, using the exchange rates that differ from the initial transaction accounting rates, are recognized in profit or loss in net value.

#### Intangible assets

Intangible assets are stated at cost, which is being amortized during the useful life using the straight-line method. When events or changes in circumstances indicate that the carrying value of intangible assets may not be recoverable, the value of intangible assets are reviewed for impairment.

#### Fixed assets

All fixed assets are valued at cost or valuation, less accumulated depreciation and accumulated impairment losses. Land are not depreciated. Depreciation is calculated on the asset's useful life on a straight-line basis. Production technological equipment purchased from January 1, 2007 are depreciated using the declining balance method. Depreciation rates are set by the company management, assessing each individual asset's useful life.

Depreciation is calculated starting with the following month after the fixed assets are put into operation or engaged in commercial activity. Depreciation is calculated separately for each unit of fixed assets, the cost of which is significant in relation to the total cost of this fixes asset. If the Company depreciates separately certain units of fixed assets, it also depreciates separately the remaining units of this fixed asset. The remainder consists of those units of the fixed asset, which individually are not important. The remaining part of depreciation is calculated using approximation techniques to faithfully represent their useful life.

Address: Lapsu istreet 3, Dubeni, Grobina parish., Grobina county., LV-3438

Unified registration Nr: 40003017297

When any events or changes in circumstances indicate that the fixed asset balance value may not be recoverable, the value of the respective fixed asset is reviewed to determine its impairment. In case of any signs that the value may not be recoverable and if the balance sheet value of the asset exceeds the recoverable amount calculated, the asset or cash-generating unit is written down to its recoverable amount. The recoverable amount of the fixed asset is the higher of the net realizable value and use-value. When determining the use-value, the estimated future cash flows are discounted to their present value using a pre-tax discount rate, which reflects the current market assessments and risks related to it. For an asset that does not generate cash flows, the recoverable amount is determined according to the cash flow-generating asset to which it belongs. Impairment losses are recognized in the Profit or Loss Account as production costs of goods sold.

Recognition of carrying amount of fixed assets' objects is discontinued if it is alienated or if no economic benefit is expected from further use of an asset. Any profit or losses resulting from a discontinued recognition of fixed assets' object (calculated as difference between net revenue from alienation and balance sheet value of fixed asset), is recognized in profit and loss account in the period when the fixed asset recognition was discontinued.

Expenditure related to improvements of leased property are capitalized and listed as fixed assets. Depreciation of said assets is calculated for the entire lease period using the linear method

#### Stock valuating

The stocks are valued at the lower of net realizable value and acquisition or production cost. The purchase cost consists of the purchase price and overheads arising from delivering the stocks in their current value and state. The cost of output stocks includes the costs of raw materials and materials used and other expenses directly related to production of the specific object, as well as respective part of the overall expenditure. The cost did not include selling costs. The balances of the value of stocks are calculated using the weighted average method. If the net realizable value of stocks is lower than their cost, the difference is recorded as provision for impairment.

#### Trade receivables and other debtors

Trade receivables are listed and reflected in the Balance Sheet according to the original invoice amount, deducting the provisions for doubtful debts. Provisions for doubtful debts are calculated when it is no longer credible to receive the full amount of the debt. Debts are written off when their recovery is deemed impossible.

#### Cash and cash equivalents

Cash and cash equivalents include the cash at a bank and on hand and short-term deposits, the original maturity of which does not exceed three months.

#### **Financial leasing**

Finance leases, under which the Company has substantially all the risks and benefits incidental to ownership of the leased item, are capitalized at the amount, leasing launching comply with the leasing of the leased property at fair value or, if lower, the minimum lease payments at the present value. Finance lease payments are apportioned between finance charges and reduction of the lease so as to achieve a constant rate on the finance balance outstanding. Financial costs are included in the income statement as interest expense.

If there are sufficient grounds to believe that the leasing period at the end of the leasing object will pass ownership of the lessee of the expected service life is assumed that the asset's useful life. Otherwise capitalized leased assets are depreciated using the straight-line method for the estimated useful lives of assets or the lease term, depending on which of these periods shorter.

Assets, under which substantially all of the ownership of the risks and the lessor are classified as operating leases. Operating lease payments are recognized as an expense over the lease term using the straight-line method.

#### **Provisions**

The provisions are recognized, when the Company has a present obligation (legal or constructive) resulting from a past event and it is probable that fulfilment of this obligation will require outflow of economically beneficial resources from the Company, and the amount of the obligation can be reliably estimated. In case the time value of money has a material impact, provisions are calculated by discounting the expected future cash flow by using a pre-tax rate, which reflects the current market assessment of time value of money and the risks concerning the specific obligations, if any. Where discounting is used, increase in provisions over time is recognized as borrowing costs.

### Joint Stock Company "GROBINA"

Address: Lapsu istreet 3, Dubeni, Grobina parish., Grobina county., LV-3438

Unified registration Nr: 40003017297

#### **Provisions of unused vacations**

Provisions are determined by counting the number of provised days of vacation sum for each employee. Provision sum is calculated if each employee one day average earnings multiply byamount of not used vacation days number at the end of the year.

#### Recognition of revenue

Revenue is recognized according to the confidence in the possibility that the Company will gain economic benefits and to the extent to which it can be reasonably determined, deducting the value added tax and sales-related discounts. In recognition of revenue, the following conditions are also taken into account::

Sale of goods

Revenue is recognized, when the Company has transferred to the buyer all material risks and rewards related to the ownership of the goods.

- Services provision

Revenue is recognized based on the stage.

Interest

Revenue is recognized in accordiance to the period of the time.

#### Deals with related parties

Related parties are defined as shareholders that may significantly affect the Company's operations, Council and Board members, their close relatives and companies in which they have significant influence or control.

#### Enterprise income tax

Enterprise income tax consists of the enterprise income tax calculated for the reporting year and the deferred enterprise income tax. Enterprise income tax for the reporting year is calculated applying a tax rate in the amount of 15% to the taxable income gained in the respective taxable period.

Deferred income tax is calculated using the liability method, on temporary differences between assets and liabilities amounts in the financial statements and their values for tax purposes. Deferred tax is calculated by applying the statutory 15% tax rate. These temporary differences have mainly occurred from different depreciation rates for accounting and tax purposes of provisions for vacation pay, as well as tax losses carried forward tax periods. In cases where the total deferred tax result is shown in the balance sheet, it is included in the financial statements only when it is expected that there will be available taxable profit, which will be subject to the deductible temporary difference that created the deferred tax asset.

#### Events after the balance sheet date

The Financial Statement reflects such events after the end of the reporting year that provide additional information about the Company's financial position on the balance sheet date (adjusting events). If the events after the end of the reporting year are not adjusting, they are reflected in the annexes to the Financial Statement only if they are material.

#### Financial risk management

Sabiedrības nozīmīgākie finanšu instrumenti ir aizņēmumi no kredītiestādēm. Šo finanšu instrumentu galvenais uzdevums ir nodrošināt Sabiedrības saimnieciskās darbības finansējumu. Sabiedrība saskaras arī ar vairākiem citiem finanšu instrumentiem, piemēram, parādi piegādātājiem un darbuzņēmējiem, kas izriet tieši no tā saimnieciskās darbības.

The Company's principal financial instruments comprise loans from credit institutions. These financial instruments is to ensure that the Company's operations. The Company is also exposed to other financial instruments, such as trade payables, which arise directly from its operations.

The main financial risks related to the Company's financial instruments are interest rate risk, liquidity risk and credit risk.

#### Interest rate risk

The Company is exposed to interest rate risk mainly through its current and long-term borrowings. The Company's policy is designed to ensure that the largest part of the loan interest rate would be unchanged.

#### Liquidity risk

The Company manages its liquidity risk by maintaining adequate cash and cash equivalents and ensuring adequate availability of credit to meet its obligations.

### Credit risk

Financial resources, which potentially subject the Company to concentrations of credit risk, consist principally are trade receivables. The Company has introduced and observes a credit policy, providing services on credit only for state and local government bodies, or customers with a good credit history. For the remaining buyers Company conducts preventive measures to mitigate credit risk, requiring a significant advance for the service and through regular trade receivables monitoring. At the end of

Joint Stock Company "GROBINA" Address: Lapsu istreet 3, Dubeni, Grobina parish., Grobina county., LV-3438

Unified registration Nr: 40003017297

the reporting period, the Company was not subject to significant concentrations of credit risk, as the net of some state structures and the partnership of which a member is also the Company itself, no customer debt did not exceed 5% of total trade receivables volume.

#### 27. Collateral and securities

All the company's assets as a set of case and its future components, including the mark "A / S GROBIŅA" herd u.t.t. stocks are pledged as security for credit and the Finnish auction house Saga Furs of advances paid for the security. Secured claims the maximum amount of the balance sheet date amounts to EUR 21 435 562.

#### 28. Events after the balance sheet date

In he global markets in 2016 there was a dramatic fur sales prices fall, as compared to March 2015 the average auction price of EUR 48.44 - March 2016 auction, the average price fell by 54% and amounted to only EUR 22.30. Consequently, it is given that March 2016 was sold at auction essential JSC "Grobina" produced skin amount ~ 78 300 skins - JSC "Grobina" cash flow March planned auction revenues lagged behind by about 2 million. EUR. Result of these developments the company was unable to meet in full its obligations towards its creditors. Thus, the rapid response to the situation in the Court there was submitted an application for the JSC "Grobina" process of legal protection proceedings. Consequently, the Court of Liepaja on April 6, 2016 a decision was instituted Nr.C20153616 JSC "Grobina" legal protection proceedings. As the majority of the creditors, according to the Insolvency Law Article 42, third paragraph, agreed JSC "Grobina" management developed by the process of legal protection plan with respect to the accumulation of unsecured creditors (suppliers) debts essentially provides only the debt principal repayments deferred until June 2018, based on the Liepaja Court judgment of 29 June 2016 the JSC "Grobina" May 17, 2016 the legal defence plan was approved. By 3d of March 2017, Liepaja court decision is confirmed JSC "Grobina" redress process plan amendments.
