Economic environment

2013 has started out pretty well, and global economic growth is recovering. The banks' analysts are pessimistic about the situation in Southern Europe, but unanimously optimistic about Germany. Also, the US and Chinese economies are recovering. The Institute of Economic Research is observing gradual improvement of several confidence indicators and occurrence of favourable changes in the market. In spite of the above, there are still a number of problems, and in several countries the adoption of political decisions that are important for economic sustainability has not been smooth: be it the last minute conclusion of agreements concerning US budget policy, unclear election results in Italy, or the controversial assistance agreement for Cyprus. Regardless of this, the situation on the financial markets has been relatively calm this year; interest rates have consistently remained low and inflation within the range of 2%. Oil prices did indeed increase at the beginning of the year, mainly due to cool weather and tight reserves; however, the appreciation of metals has decelerated thanks to extensive reserves and low demand by end users.

Estonia's economic growth in 2012 slowed to 3.2%, while remaining the highest in the euro zone. The main reasons for the slowdown were weaker external demand and decreased output in the manufacturing industry. The biggest contribution to economic growth came from the public sector's investments into buildings and facilities, and relatively strong domestic demand. Increased demand for labour may lead to excessive salary pressure; accordingly, it is important to preserve the competitiveness of Estonian companies, so that the productivity of labour force increases.

Main events

In January 2013, AS Harju Elekter Elektrotehnika undertook recertification of the ISO 9001 and ISO 14001 quality systems and new 3-year certificates were issued. The BVC auditors' summary report of recertification was unqualified.

Implementation of the 5S principles, aimed at increasing profitability, continued in AS Harju Elekter Teletehnika. Thanks to successful completion of stage I of the lean 5S system, the company managed to free the production of excessive articles and time cost by the end of 2012. At the beginning of this year, stage II of the Lean 5S system was launched in the company, starting with the mapping of work processes, in order to ensure an even more efficient use of the resources.

The subsidiaries attended professional fairs in Finland: in January, Satmatic Oy and AS Harju Elekter Elektrotehnika introduced their product range, designed for the energy distribution sector, at the (energy) distribution network fair Sähkövirkot 2013, in Tampere; and in February, Satmatic Oy

presented its renewable energy products at the biggest professional fair Sähkö, Tele, Valo and AV in Jyväskylä. The commercial group of AS Harju Elekter introduced the product range for shops at the building fair Eesti Ehitab, in Talllinn, held every spring.

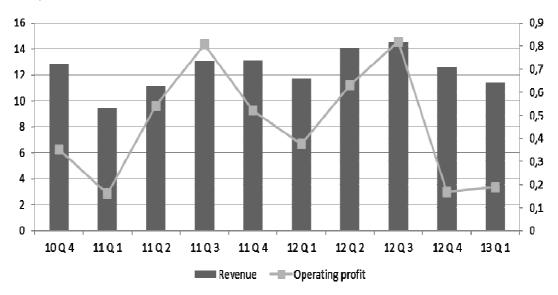

Operating results

In the accounting quarter, the Group's consolidated revenue was 11.4 million euros, which was 0.3 million euros lower compared to the reference period. Operating profit of Q1 2013 was 0.2 million euros, decreasing by half. At the same time, sales revenue as well as operating profit exceeded the figures of Q1 2011. The consolidated net profit of the Q1 2013 increased by more than 100,000 euros up to 0.7 million euros.

Note 7 Basic and diluted earnings per share

Basic earnings per share have been calculated by dividing the profit attributable to equity holders of the parent by the weighted average number of shares outstanding during the period.

Diluted earnings per share are calculated by considering the effects of all dilutive potential shares. As at the reporting date on 31.3.2013 the Group had 434.96 thousand dilutive potential shares. In accordance with the decision of the General Meeting of Shareholders held on 3 may 2012 the price of a share was established at the level of 2.36 euros. As to the share-based payments regulated by IFRS 2 requirements the subscription price of shares covers the costs of services that employees provide in the future for the share-based payments. The value of service for each issued share determined by an independent expert was 0.50 euros. Thus the subscription price per each share within the meaning of IFRS 2 is 2.86 (2.36+0.50) euros and the potential shares become dilutive only after their average market price of the period exceed 2.86 euros.

The average market price of the share of 1-3/2013 was 2.65 euros. Hence, the potential shares did not have any diluting effect.

Share-based payments

In 2012, option contracts were concluded with the group's employees and the members of the directing bodies of group-related companies. Each member of the management and supervisory boards was issued an option for the subscription of up to 20 thousand shares, i.e. 120 thousand shares in aggregate.

During the conclusion period of preliminary contracts, from 18 June to 29 June 2012, the subscription rights for a total of 434,960 shares were registered. The issue price of the shares was determined to be the average price of the share of AS Harju Elekter in euros on the Tallinn Stock Exchange during the trading days of 01.06.-15.06.2012. Thus, the issue price of the share amounted to 2.36 euros.

IFRS 2 principles are used to record the subscription rights for shares. In evaluating the services (labour input) received from the employees for the shares, the Group used the fair value of the subscription right at the moment of concluding the preliminary contracts, the value of which was estimated at 0.50 euros per subscription right by an independent expert. Fair value was assessed using the Black-Scholes pricing model. In determining the price, the weighted average market price of the share (2.36 euros), estimated volatility of the share (35%), risk-free interest rate (1%), forecasted dividends and the length of period between the conclusion of preliminary contracts and the planned subscription moment of shares (3 years) has been taken into account.

In Q1 2013, the Group recorded 18,000 (26,000 y-o-y) euros as labour costs and share-based benefits under shareholder's equity and retained earnings.
