Independent auditor's report

To the Shareholders of the Klaipėdos Baldai AB

Report on the financial statements

We have audited the accompanying financial statements of Klaipėdos Baldai AB (the 'Company') set out in pages 5 - 28 which comprise the balance sheet as of 31 December 2006 and the income statement, statement of changes in equity and cash flow statement for the year then ended and a summary of significant accounting policies and other explanatory notes.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with International Financial Reporting Standards as adopted for use in European Union. This responsibility includes: designing, implementing and maintaining internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. Except as discussed in paragraph *Basis for Qualified Opinion*, we conducted our audit in accordance with International Standards on Auditing. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

PRICEWATERHOUSE COPERS 18

Basis for Qualified Opinion

In the Company's financial statements, investment property includes a building with a carrying value of LTL 5,598 thousand as at 31 December 2006 and LTL 5,900 thousand as at 31 December 2005. In accordance with IAS 40 "Investment Property", the Company has chosen to account for its investment property using the fair value approach. During our audit we were not able to obtain sufficient appropriate audit evidence to satisfy ourselves as to the actual fair value of this building as at 31 December 2006 and 31 December 2005.

Qualified Opinion

In our opinion, except for the possible effect of such adjustment, if any, as might have been determined to be necessary, had we been able to obtain sufficient evidence concerning the matter described in the Basis for Qualified Opinion paragraph, the accompanying financial statements give a true and fair view of the financial position of the Company as of 31 December 2006 and of its financial performance and cash flows for the year then ended in accordance with International Financial Reporting Standards as adopted for use in European Union.

Report on other legal and regulatory requirements

Furthermore, we have read the Annual Report for the year ended 31 December 2006 set out on pages 29-60 and have not noted any material inconsistencies between the financial information included in it and the audited financial statements for the year ended 31 December 2006.

On behalf of PricewaterhouseCoopers UAB

Christopher C. Butler

Partner

Notes to the financial statements

1. General information

Klaipėdos Baldai AB (hereinafter "the Company") was registered as a public company on 3 March 1993. The Company's registration No. is AB 93-59. The Company's registered address is as follows:

Joniškės g. 21, LT-91267 Klaipėda Republic of Lithuania

Shareholders of the Company as at 31 December 2006:

	Number of shares held	Percentage of share capital
SBA Furniture Group UAB	5,508,441	67.45
Hansabank UAB	539,888	6.61
Virgilijus Rančys	400,000	4.90
Asociacija Pramonės ir marketingo biznio centras	262,374	3.21
Skandinaviska Enskilda Banken	247,139	3.03
Other shareholders	1,208,470	14.80
Total	8,166,312	100

The Company's ordinary registered shares are quoted on the Current List of Vilnius Stock Exchange.

The Company's core line of business is manufacturing of furniture.

In 2005, the activities of SBA Furniture Group companies was restructured and centralized by transferring the functions of raw material purchase and sale of products to newly established company SBA Baldų Kompanija UAB. As a result of this restructuring, SBA Baldų Kompanija UAB take over the Company's non-group suppliers and customers. SBA Baldų Kompanija UAB purchase on arm's length price products from the Company and sell them to diversified number of clients.

During the year ended 31 December 2006 98.1 per cent of the total Company's sales were made to its related party SBA baldų kompanija UAB (2005- 97.2 per cent).

In 2006, the Company's average number of employees was 717 (2005: 676).

2. Summary of significant accounting policies

The principal accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all the periods presented, unless otherwise stated.

2.1 Basis of preparation

The financial statements have been prepared in accordance with International Financial Reporting Standards as adopted by the European Union (IFRS). All International Financial Reporting Standards issued by the IASB and effective at the time of preparing these statements have been adopted by the EU through the endorsement procedure established by the European Commission with the exception of the International Accounting Standard IAS 39 "Financial Instruments: Recognition and Measurement". Following the Accounting Regulatory Committee decision of October 2004, the Commission adopted the Regulation 2086/2004 requiring the use of IAS 39, excluding certain provisions on portfolio hedging of core deposits.

The financial statements have been prepared under the historical cost convention, as modified by the revaluation of buildings and investment property.

(All tabular amounts are in LTL '000, unless otherwise stated)

2.1 Basis of preparation (continued)

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Company's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the financial statements, are disclosed in Note 4. Although these estimates are based on management's best knowledge of current events and actions, actual results ultimately may differ from those estimates.

(a) Standards, amendments and interpretations adopted in 2006

Amendments to IAS 39 Financial Instruments: Recognition and Measurement, and IFRS 4 Insurance Contracts Financial Guarantee Contracts are mandatory for Company's accounting periods beginning on or after 1 January 2006. These amendments are intended to ensure that issuers of financial guarantee contracts include the resulting liabilities in their balance sheet. As the estimated fair value of financial guarantee contracts issued by the Company was not material as at 1 January 2006 and 31 December 2006, adoption of this standard did not have any material impact on the Company's accounts.

(b) Standards, amendments to standards and interpretations effective in 2006 but not relevant. The following standards, amendments and interpretations are mandatory for accounting periods beginning on or after 1 January 2006 but are not relevant to the Company's operations:

- IAS 19 (Amendment), Actuarial gains and losses, group plans and disclosures;
- IAS 21 (Amendment), Net Investment in a Foreign Operation;
- IAS 39 (Amendment), Cash Flow Hedge Accounting of Forecast Intragroup Transactions;
- IAS 39 (Amendment), The Fair Value Option;
- IFRS 6, Exploration for and Evaluation of Mineral Resources;
- IFRS 1 (Amendment), First-time Adoption of International Financial Reporting Standards and IFRS 6 (Amendment), Exploration for and Evaluation of Mineral Resources;
- IFRIC 6, Liabilities arising from Participating in a Specific Market Waste Electrical and Electronic Equipment;
- IFRIC 4, Determining whether an Arrangement contains a Lease; and
- IFRIC 5, Rights to Interests arising from Decommissioning, Restoration and Environmental Rehabilitation Funds
- (c) Standards, amendments to standards and interpretations that have been issued but are not effective for 2006 and have not been early adopted
- IFRS 7, Financial Instruments: Disclosures, and the complementary Amendment to IAS 1, Presentation of Financial Statements Capital Disclosures (effective from 1 January 2007). Management is currently assessing the impact of IFRS 7 on the Company's operations;
- IFRS 8, Operating segments (effective from 1 January 2009). Management have not yet started its assessment of the impact of IFRS 8 on the Company's operations;
- IFRIC 8, Scope of IFRS 2 (effective for annual periods beginning on or after 1 May 2006). The Company will apply IFRIC 8 from 1 January 2007, but it is not expected to have any impact on the Company's accounts;
- IFRIC 10, Interim Financial Reporting and Impairment (effective for annual periods beginning on or after 1 November 2006). The Company will apply IFRIC 10 from 1 January 2007, but it is not expected to have any impact on the Company's accounts.
- IFRIC 7, Applying the Restatement Approach under IAS 29, Financial Reporting in Hyperinflationary Economies (effective from 1 March 2006). IFRIC 7 is not relevant to the Company's operations;
- IFRIC 9, Reassessment of Embedded Derivatives, Management believes that this interpretation is not relevant for the Company's operations;
- IFRIC 11, 'IFRS 2 Company and treasury share transactions',. Management do not expect the interpretation to be relevant for the Company;
- IFRIC 12, 'Service Concession Arrangements', Management do not expect the interpretation to be relevant for the Company.

IFRIC 10, 11, 12 and IFRS 8 have not been yet endorsed by EU.

(All tabular amounts are in LTL '000, unless otherwise stated)

2.2 Foreign currency translation

(a) Functional and presentation currency

Items included in the financial statements are measured using the currency of the primary economic environment in which the entity operates ('the functional currency'). The financial statements are presented in a local currency, the litas (LTL), which is the Company's functional and presentation currency.

On 2 February 2002 the litas was fixed to the euro at an exchange rate of LTL 3.4528 = EUR 1.

(b) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the income statement.

2.3 Revenue recognition

Revenues from sales of goods are recognised at the point of transfer of risks and rewards of ownership of the goods, normally when the goods are shipped. Sales are shown net of VAT and discounts. Revenues are measured at the fair value of the consideration received or receivable.

Interest income is recognised on a time-proportion basis using the effective interest method. Rental yield on investment property is recognised in equal parts over the lease term.

2.4 Segment reporting

A segment is a distinguishable component of the Company that is engaged either in providing products or services (business segment) or in providing products or services within a particular economic environment (geographical segment), which is subject to risks and rewards that are different from those of other segments. Segments with a majority of revenue earned from sales to external customers and whose revenue, result or assets are ten percent or more of all the segments are reported separately.

2.5 Employee benefits

Wages, salaries, contributions to the State Social Security Fund paid, annual leave and sick leave, bonuses, and non-monetary benefits are accrued in the year in which the associated services are rendered by the employees of the Company.

2.6 Earnings per share

Basic earnings per share are calculated by dividing the net profit attributable to the shareholders by the weighted average number of ordinary shares outstanding during the period.

2.7 Dividends

Dividends are recorded in the Company's financial statements in the period in which they are approved by the shareholders.

2.8 Income tax

(1) Income tax expenses

Profit is taxable at a rate of 15 percent (2005: 15 percent) in accordance with the Lithuanian regulatory legislation on taxation.

(All tabular amounts are in LTL '000, unless otherwise stated)

According to the Lithuanian Provisional Law on Social Tax, social tax at the rate of 4 per cent for 2006 and at a rate of 3 per cent for 2007 should be paid on taxable income earned during 2006 and 2007 respectively.

Income tax expenses are calculated and accumulated in the financial statements on the basis of information available at the moment of the preparation of the financial statements, and based on management's estimates of income tax in accordance with the Lithuanian regulatory legislation on taxation.

(2) Deferred income tax

Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. However, the deferred income tax, if it is not accounted for, arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the balance sheet date and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Deferred income tax assets are recognised to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised.

Deferred income tax is provided on temporary differences arising on investments in associates, except where the timing of the reversal of the temporary difference is controlled by the Company and it is probable that the temporary difference will not reverse in the foreseeable future.

2.9 Property, plant and equipment

The Company's buildings are stated at fair value less accumulated depreciation and impairment loss. Independent valuation of assets is carried out on a regular basis. The last valuation of assets was performed as at 1 June 2006 by an independent property valuation company Korporacija Matininkai UAB. Other property, plant and equipment of the Company is stated at acquisition cost less accumulated depreciation and impairment.

Increases in the carrying amount arising on revaluation of buildings are credited to revaluation reserve in shareholders' equity. Decreases that offset previous increases of the same asset are charged against other reserves directly in equity; all other decreases are charged to the income statement. Each year the difference between depreciation based on the revalued carrying amount of the asset charged to the income statement and depreciation based on the asset's original cost is transferred from 'revaluation reserve' to 'retained earnings'.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. All other repairs and maintenance are charged to the income statement during the financial period in which they are incurred.

Depreciation of assets is calculated using the straight-line method to allocate their cost or revalued amounts to their residual values over their estimated useful lives as follows:

	<u>Years</u>
Buildings	15 - 50
Plant and machinery	5 - 15
Motor vehicles	5 - 7
Other fixtures, fitting, tools and equipment	3 - 5
Other property, plant and equipment	4 - 6

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at each balance sheet date.

Where the carrying amount of an asset is greater than its estimated recoverable amount, it is written down immediately to its recoverable amount (Note 2.14).

2.10 Investment property

(All tabular amounts are in LTL '000, unless otherwise stated)

Investment property, principally comprising buildings, is held for long-term rental yields or for capital appreciation and is not occupied by the Company.

Investment property is initially recognised at cost, including transaction costs, and subsequently remeasured at fair value based on its market value. Market value of the Company's investment property is obtained from reports of independent appraisers, who hold a recognised and relevant professional qualification and who have recent experience in valuation of property of similar location and category. Earned rental income is recorded in profit or loss within other operating income. Gains and losses resulting from changes in the fair value of investment property are recorded in profit or loss and presented separately.

Subsequent expenditure is capitalised only when it is probable that future economic benefits associated with it will flow to the Company and the cost can be measured reliably. All other repairs and maintenance costs are expensed when incurred.

Reclassifications to investment property are performed only when there is an evidenced change in use of assets. If an investment property becomes owner-occupied, it is reclassified to property, plant and equipment, and its carrying amount at the date of reclassification becomes its deemed cost to be subsequently depreciated.

2.11 Intangible assets

Intangible assets expected to provide economic benefit to the Company in future periods are valued at acquisition cost less subsequent accumulated amortisation. All of the Company's intangible assets have definite useful lives. Amortisation is calculated on the straight-line method over estimated economic benefit period of 1-4 years.

Development costs that are directly associated with identifiable and unique software controlled by the Company are recorded as intangible assets if inflow of incremental economic benefits exceeding costs is probable. Capitalised costs include staff costs of the software development team and an appropriate portion of relevant overheads. All other costs associated with computer software, e.g. related borrowings costs, maintenance etc, are expensed when incurred.

2.12 Impairment of non financial assets

Assets that are subject to amortisation and depreciation are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash-generating units). Non-financial assets that suffered an impairment are reviewed for possible reversal of the impairment at each reporting date.

2.13 Leases

A company is the lessee

(a) Finance lease

Leases of property, plant and equipment where the Company has substantially all the risks and rewards of ownership are classified as finance leases. Finance leases are capitalised at the lease's commencement at the lower of the fair value of the leased property and the present value of the minimum lease payments. Each lease payment is allocated between the liability and finance charges so as to achieve a constant rate on the finance balance outstanding. The corresponding rental obligations, net of finance charges, are included in long-term payables except for instalments due within 12 months which are included in current liabilities. The property, plant and equipment acquired under finance leases is depreciated over the shorter of the asset's useful life and the lease term.

(All tabular amounts are in LTL '000, unless otherwise stated)

(b) Operating lease

Leases in which a significant portion of the risks and rewards of ownership are retained by the lessor are classified as operating leases. Payments made under operating leases (net of any incentives received from the lessor) are charged to the income statement on a straight-line basis over the period of the lease.

A company is the lessor

(c) Operating lease

Properties leased out under operating leases are included in investment property in the balance sheet (Note 2.10. Payments received under operating leases (net of any incentives given to the lessee) are credited to the income statement on a straight-line basis over the period of the lease.

2.14 Financial assets

The Company classifies its financial assets in the following categories: loans and receivables, and available-forsale. The classification depends on the purpose for which the financial assets were acquired. Management determines the classification of its financial assets at initial recognition and re-evaluates this designation at every reporting date.

(a) Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are included in current assets, except for maturities greater than 12 months after the balance sheet date. These are classified as non-current assets. Loans and receivables are classified as 'trade and other receivables' in the balance sheet.

(b) Available-for-sale financial assets

Investments intended to be held for an indefinite period of time, which may be sold in response to needs for liquidity or changes in interest rates, are classified as available-for-sale; these are included in non-current assets unless management have the express intention of holding the investment for less than 12 months from the balance sheet date or unless they will need to be sold to raise operating capital, in which case they are included in current assets.

All purchases and sales of investments are recognised on the trade date, which is the date that the Company commits to purchase or sell the asset. Cost of purchase includes transaction costs. Available-for-sale investments subsequently are carried at fair value. In assessing the fair value, the Company uses a variety of methods and makes assumptions that are based on market conditions existing at each balance sheet date. Changes in fair value of available-for-sale investments are recognised in equity. Investments, the fair value of which cannot be reliably measured, are carried at acquisition cost less impairment. When securities classified as available-for-sale are sold or impaired, the accumulated fair value adjustments are included in the income statement as gains and losses from investment securities.

2.15 Inventories

Inventories are recorded at the lower of cost and net realisable value. Cost of inventory is determined on the first in first out basis. The cost of finished goods and work in progress comprises raw material, direct labour, other direct costs and related production overheads (based on normal operating capacity) but excludes borrowing costs. Net realisable value is the estimated selling price in the ordinary course of business, less the cost of completion and selling expenses.

2.16 Trade and other receivables

Amounts receivables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method, less provision for impairment. A provision for impairment of amounts receivables is established when there is objective evidence that the Company will not be able to collect all amounts due according to the original terms of receivables. The amount of the provision is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the effective interest rate. The amount of the provision is recognised in the income statement within administrative expenses. Bad debts are written off during the year in which they are identified as irrecoverable.

2.17 Cash and cash equivalents

(All tabular amounts are in LTL '000, unless otherwise stated)

Cash and cash equivalents are carried in the balance sheet at nominal value. For the purposes of the cash flow statement, cash and cash equivalents comprise cash in hand and at bank.

2.18 Borrowings

Borrowings are recognised initially at fair value, net of transaction costs incurred. Borrowings are subsequently stated at amortised cost; any difference between the proceeds (net of transaction costs) and the redemption value is recognised in the income statement over the period of the borrowings using the effective interest method.

2.19 Trade and other payables

Trade payables are accrued when the counterparty performed its obligations under the contract and are carried at amortised cost using the effective interest method.

2.20 Share capital

Ordinary shares are stated at their par value.

2.21 Revaluation reserve

Any increase in value of buildings is accounted for in revaluation reserve unless and to the extent it covers any decrease in revaluation of the same assets previously recognised as expenses. In such cases it is recognised as income. Any decrease is initially set off against increase in the value of the same assets during the previous valuation, and only the balance outstanding is recognised as expenses.

Revaluation reserve is realised using the assets: when revalued property, plant and equipment is depreciated, revaluation reserve is reduced by the amount, by which asset depreciation expenses increased as a result of revaluation. When revalued property, plant and equipment is written off, a corresponding amount of revaluation reserve arising as a result of revaluation is transferred from the revaluation reserve directly to retained result.

3. Financial risk management

Credit risk

The Company's exposure to credit risk is related to concentration of sales to its related party SBA baldukompanija UAB (for more detailed information see in General information Note 1). Credit risks or the risks of counterparties defaulting are controlled by the application of credit terms and monitoring procedures.

Liquidity risk

Prudent liquidity risk management implies maintaining sufficient cash and cash equivalents necessary to cover the expected expenditures. The Company makes short-term cash flow forecasts. The Company has signed contracts with the banks to ensure the availability of funding upon necessity.

Interest rate risk

As the Comapny has no significant interest-bearing assets, the Company's income and operating cash flows are substantially independent of changes in market interest rates.

The Company's interest rate risk arises from long-term borrowings. Borrowings issued at variable rates expose the Company to cash flow interest rate risk.

Fair value estimation

The nominal value less impairment provision of trade receivables and the nominal value of accounts payable is assumed to approximate their fair values. The fair value of financial liabilities for disclosure purposes is estimated by discounting the future contractual cash flows at the current market interest rate that is available to the Company for similar financial instruments.

(All tabular amounts are in LTL '000, unless otherwise stated)

4. Critical Accounting Estimates, and Judgements in Applying Accounting Policies

The Company makes estimates and assumptions that affect the reported amounts of assets and liabilities within the next financial year. Estimates and judgements are continually evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Management also makes certain judgements, apart from those involving estimations, in the process of applying the accounting policies. Judgements that have the most significant effect on the amounts recognised in the financial statements and estimates that can cause a significant adjustment to the carrying amount of assets and liabilities within the next financial year include:

Tax legislation

Tax authorities have right to examine the Company's accounting records at anytime during the 5 year period after the current tax year and account for additional taxes and fines. In the opinion of the Company's management currently there are no circumstances which would raise substantial liability in this respect.

Related party transactions

In the normal course of business the Company enters into transactions with its related parties. These transactions are priced predominantly at market rates. Judgement is applied in determining if transactions are priced at market or non-market interest rates, where there is no active market for such transactions. The basis for judgement is pricing for similar types of transactions with unrelated parties.

Furthermore within current amounts receivable balance as at 31 December 2006 receivable of LTL 13,961 thousand from the Company's related party SBA baldų kompanija is accounted. In the opinion of the Company's management the above mentioned receivable will be recovered during the forthcoming twelve month period.

Investment property measurement

The Company's investment property is carried at fair value. In 2006 independent valuers performed valuation of investment property of the Company with an exception of the building with a carrying amount of LTL 5,598 thousand as at 31 December 2006 (Note 14). This building was acquired in 2005 from the Company's related party Klaipėdos baldų prekyba UAB. Valuation of the building by independent valuers was not performed at the date of acquisition and thereafter.

In the opinion of the Company's management building's carrying amount as at 31 December 2006 is close to its fair value.

(All tabular amounts are in LTL '000, unless otherwise stated)

5. Segment information

The Company operate in one business segment- manufacturing of furniture, as well as one geographical segment – Lithuania, with 98.1 per cent of the total Company's sales made to related party SBA baldų kompanija UAB and all Company's assets allocated in Lithuania.

12. Earnings per share

Earnings per share are calculated as follows:

	2006	2005
Profit attributable to equity holders of the Company	3,031	3,855
Weighted average number of shares in issue (thousands)	8,166	8,166
Basic earnings per share (LTL)	0.37	0.47

The Company has no dilutive potential ordinary shares, therefore, the diluted earnings per share are the same as basic earnings per share.

13. Property, plant and equipment

(All tabular amounts are in LTL '000, unless otherwise stated)

- 10t oook uniount	20,103	17,071	2))		13,777

The Company's buildings are stated at fair value less accumulated depreciation and impairment loss.

The last valuation of buildings was performed as at 1 June 2006. The revaluation was performed based on the reports of independent appraisers, who hold a recognised and relevant professional qualification and who have recent experience in valuation of assets of similar location and category. Valuation was made on the basis of market value. The revaluation surplus net of applicable deferred income taxes was credited to revaluation reserve in shareholders equity (Note 22).

At 31 December 2006 the carrying amount of buildings would have been LTL 14,058 thousand had the buildings been carried at historical cost (2005: LTL 9,728 thousand).

Additions include assets amounting to LTL 5,369 thousand acquired under finance lease (where the Company is the lessee) (2005: LTL 223 thousand).

Leased assets, where the Company is a lessee under finance lease comprised as follows as at 31 December:

All tabular amounts are in LTL '000, unless otherwise stated)		
	2006	2005
Cost – capitalised finance lease amount		
 Plant and machinery and vehicles 	10,937	5,625
Accumulated depreciation		
 Plant and machinery and vehicles 	(2,508)	(1,601)
Net book value	8,429	4,024

To secure the repayment of borrowings from banks and non-financial institutions, the Company has pledged its property, plant and equipment with the net book value of LTL 20,378 thousand as at 31 December 2006 (2005: LTL 12,694 thousand).

Depreciation expenses of property, plant and equipment are accounted for in administrative expenses, and in cost of sales in the income statement, as well as in work in progress and finished products in the balance sheet.

14. Investment property

Investment properties at fair value as at 1 January	2006 7,189	2005 1,292
Additions	-	6,000
Transfer from owner occupied premises	45	91
Fair value gains (Note 8)	1,372	-
Fair value losses (Note 8)	(470)	(194)
Investment properties at fair value as at 31 December	8,136	7,189

Investment property except for the building with a carrying amount of LTL 5,598 thousand (Note 4) are measured at fair value based on market value determined by independent appraisers, who hold a recognised and relevant professional qualification and who have recent experience in valuation of property of similar location and category. The last valuation of assets was performed as at 1 June 2006 by an independent property valuation company Korporacija Matininkai UAB. The management believes that the fair value of investment property as at 31 December 2006 is not materially different from the fair value as at 1 June 2006.

As at 31 December 2006 all of the Company's investment property is pledged to secure the repayment of borrowings from banks and non-financial institutions.

As at 31 December 2006 and 2005, except for the contingent liabilities described in Note 28, there were no other material restrictions on realisation of investment property or utilisation of proceeds received from sale of such property. At the year-end, there were no material contractual commitments to purchase, build, develop or perform repairs, maintenance and improvements of the investment property.

For amounts related to investment property recognised in the income statement see 'rental income' (Note 6) and 'direct operating expenses arising from investment poperties' (Note 7).

15. Intangible assets

At 31 December 2006			
Cost	_	1,315	1,315
Accumulated amortisation	-	(827)	(827)
Net book amount	-	488	488

Amortisation expenses of intangible assets are accounted for in administrative expenses, and cost of sales in the income statement, as well as in work in progress and finished products in the balance sheet.

16 Available-for-sale investments

	2006	2005
Beginning of the year	210	210
Reversal of impairment	78	-
Closing balance	288	210
Closing balance cost	288	288
Less: impairment		(78)
	288	210

Available-for-sale investments comprise of investments in unquoted equity instruments and are carried at cost.

There were no acquisitions/ disposals of available-for-sale investments in 2006 and 2005.

17 Other receivables

	2006	2005
Non current part of loans granted to		
related parties (Note 27)	2,339	3,255
Loans granted to employees	12	25
	2,351	3,280

Interest rate of loans granted to related parties is based on corresponding borrowing rate, therefore carrying amount of loans to related parties is equal to its fair value.

Interest rates on non-current receivables were as follows:

	2006	2005
Loans to related parties	4.4-5%	3.3-4%
		21

(All tabular amounts are in LTL '000, unless otherwise stated)

Current portion of non-current receivables is disclosed in Note 19.

18 Inventories

	2006	2005
Raw materials	6,775	6,924
Work in progress	2,221	2,393
Finished products and goods for resale	6,225	1,314
Write-down to net realisable value	(195)	(516)
	15,026	10,115

As at 31 December 2006, the Company has pledged its inventories amounting to LTL 10,000 thousand (31 December 2005: LTL 8,000 thousand) to secure the repayment of its borrowings.

19 Trade and other receivables

	2006	2005
Receivables from related parties, including		
current portion of long-term debts (Note 27)	19,571	15,036

The effective interest rate amounted to 0.25 per cent as at 31 December 2006.

21. Share capital

As at 31 December 2006, the share capital comprised 8,166,312 ordinary registered shares with par value of LTL 1 each. All the shares are fully paid. There were no changes in share capital during the year.

22. Reserves

	2006	2005
– revaluation reserve	12,668	5,792
– legal reserve	817	817
– other reserves	7,698	7,698
	21,183	14,307

Revaluation reserve

(All tabular amounts are in LTL '000, unless otherwise stated)

As at 31 December 2006, revaluation reserve amounted to LTL 12,668 thousand (2005: LTL 5,792 thousand). This reserve was recognised upon revaluation of buildings.

Latest revaluation of buildings on 1 June 2006 (Note 12) resulted in revaluation surplus of LTL 7,738 thousand (net of deferred income tax of LTL 1,365 thousand) which was credited to revaluation reserve.

As at 31 December 2006, as a result of depreciation of revalued assets, revaluation reserve was reduced by LTL 862 thousand (2005: LTL 374 thousand), whereas the retained result for the year then ended was increased by the same amount. The above mentioned amounts were disclosed in the statement of changes in shareholders' equity.

Legal reserve

A legal reserve is a compulsory reserve under the Lithuanian legislation. Annual transfer of 5 per cent of net profit of the reporting period is compulsory until the reserve reaches 10 per cent of the share capital. The legal reserve cannot be distributed as dividends and is formed to cover future losses. A part of legal reserve in excess of 10 per cent of the authorised share capital may be redistributed when appropriation of profit for the following financial year is performed.

Other reserves

Other reserves are established following the decision made during the annual general meeting of shareholders in relation to distribution of profit available for appropriation. This reserve may be used only for the purposes approved by annual general meeting of shareholders.

23. Deferred income tax

Deferred income taxes are calculated in full on temporary differences under the liability method using currently enacted tax rate.

As at 7 June 2005 Lithuanian Republic social tax law was enacted. Base of social tax is taxable profits calculated in accordance with the Profit tax law. Social tax rate of 4 per cent for 2006 was applied (3 per cent for 2007). When calculating deferred tax asset in respect of the portion of assets and liabilities which will be realized in 2007, a tax rate of 18 per cent was applied. Temporary differences in respect of the portion of assets which will be realized in 2008 and later on was taxed at 15 per cent tax rate.

The movement in deferred income tax account was as follows:

	2006	2005
At beginning of year	(1,050)	(1,313)
Charged to equity (Note 22)	(1,365)	-
Income statement credit/ (charge) (Note 10)	(360)	263
At end of year	(2,775)	(1,050)
Deferred tax assets:		
 Deferred tax asset to be recovered after more than 12 months 	-	198
Deferred tax asset to be recovered within 12 months	316	267
	316	465
Deferred tax liabilities:		
 Deferred tax liability to be recovered after more than 12 months 	(2,701)	(1,245)
 Deferred tax liability to be recovered within 12 months 	(390)	(270)
	(3,091)	(1,515)
	(2,775)	(1,050)

The movement in the Company's deferred tax assets and liabilities (prior to and after offsetting the balances) during the period was as follows:

All tabular amounts are in LTL '000, u	nless otherwi	se stated)				
	2004	Credited (debited) to income statement	2005	Credited (debited) to income statement	Charged to equity	2006
Deferred tax assets						
Inventories	61	37	98	(37)	-	61
 Differences in depreciation 						
rates applied	81	117	198	(198)	-	-
 Accrued charges 	158	11	169	86	-	255
_	300	165	465	(149)	-	316
Deferred tax liabilities						
 Differences in depreciation 						
rates applied	-	-	-	(367)	-	(367)
 Revaluation of fixed assets 	(783)	29	(754)	(51)	(1,365)	(2,170)
 Investment relief 	(830)	69	(761)	207	-	(554)
_	(1,613)	98	(1,515)	(211)	(1,365)	(3,091)
Deferred tax liabilities, net	(1,313)	263	(1,050)	(360)	(1,365)	(2,775)
-						

Deferred income tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when the deferred income taxes relate to the same fiscal authority.

24. Borrowings

	2006	2005
Short-term borrowings		
Short-term loans received from banks	3,072	6,372
Current portion of long-term loans received	,	,
from banks	15,678	4,325
Finance lease liabilities	2,201	1,229
	20,951	11,926
Long-term borrowings		
Long-term loans received from banks	4,658	5,445
Finance lease liabilities	3,446	1,463
	8,104	6,908
Total borrowings	29,055	18,834

Bank borrowings are secured by the property plant and equipmet (Note 13), investment property (Note 14) and inventories (Note 18).

The fulfilment of finance lease liabilities is substantially secured since the title to assets acquired under finance lease automatically reverts to the lessor in the event of default.

According to loan agreements signed with Hansabankas AB, the Company has a commitment to ensure that over the validity period of the loan agreements its borrowing costs coverage ratio will be not lower than 3 (three). As at 31 December 2006, the Company has complied with this commitment.

All Company's borrowings are denominated in EUR and LTL.

The weighted average interest rates (%) were as follows as at 31 December:

	2006	2005
Long-term bank loans	4.43	3.40
Short-term bank loans	4.76	3.60
Finance lease liabilities	4.76	3.42

Interest rate of borrowings is based on market interest rate, therefore carrying amount of borrowings approximates to its fair value.

(All tabular amounts are in LTL '000, unless otherwise stated)

The exposure of the Company's borrowings to interest rate changes and the contractual repricing dates at the balance sheet dates are as follows:

Maturity terms of long-term borrowings (excluding finance lease liabilities):	Within 12 months or less	2006 29,055	2005 18,834

28. Contingent liabilities and commitments

Tax audits

The Tax Authorities may at any time during 5 successive years after the end of the reporting tax year carry out an inspection of the Company's books and accounting records and impose additional taxes or fines. The Company's management is not aware of any circumstances that might result in a potential material liability in this respect.

(All tabular amounts are in LTL '000, unless otherwise stated)

Guarantees issued

The Company has guarantee agreements with the bank DnB Nord AB, bank Snoras AB, Bayerische Hypo- und Wereinsbank AG and the bank Hansabankas AB, based on which it has issued a guarantee for the amount of all its assets on behalf of SBA Furniture Group UAB and SBA Baldų Kompanija UAB, to secure their borrowings from the above-mentioned banks.

The Company's management believe that SBA Furniture Group UAB and SBA Baldų Kompanija UAB will meet their obligations to the banks and other creditors.

Furthermore the Company has a commitment against VB Lizingas UAB to repurchase equipment leased by Akmena UAB from VB Lizingas UAB for the amount EUR 118 thousand in case the lease agreement between VB Lizingas UAB and Akmena AB is terminated prior to its expiry term.

Commitments

Following the agreement with Klaipėda Municipality dated 2 October 2002, the Company in exchange to right for expansion of its factory facilities has committed to finance various municipality projects with total preliminary costs of LTL 1,100 thousand. In 2006, the Company did not finance the above mentioned projects (in 2005: LTL 174 thousand).

Annual Report

Overview of Klaipėdos Baldai AB performance during 2006

CAPITAL STRUCTURE

As at 31 December 2006, the authorised share capital of Klaipėdos Baldai AB amounted to LTL 8,166,312. Par value of one share is equal to LTL 1.

There are no state-owned shares in the Company's authorised share capital.

In 2006, the Company's revenue from sales of goods amounted to LTL 119.5 million. Sales of chests of drawers and shelving represent the biggest portion of revenue from sales of goods amounting to LTL 103.8 million. The Company's gross profit for 2006 was LTL 7.4 million, operating expenses amounted to LTL 4.5 million, and profit before tax was LTL 4.2 million. In 2006, for the development of its business activities, Klaipėdos Baldai AB made investments in property, plant and equipment, which

resulted in increase in the balance of property, plant and equipment up to LTL 56.8 million. Furthermore, in 2006 a valuation of buildings was performed for the purpose of determining their fair value. The carrying amount of current assets amounted to LTL 36.4 million as at 31 December 2006. When performing its business activities the Company is exposed to a variety of risks.

Financial risk management is carried out by the Board.

<u>Credit risk</u> is mostly affected by the financial position of SBA Baldų Kompanija UAB, since most of the Company's sales revenue is generated from SBA Baldų Kompanija UAB. Prudent liquidity risk management implies maintaining sufficient cash and cash equivalents necessary to cover the expected expenditures. The Company makes short-term cash flow forecasts. The Company has signed contracts with the banks to ensure the availability of funding upon necessity.

Market risk: the Company's core products are realised by SBA Baldų Kompanija UAB. Marketing and sale functions are carried out by SBA Baldų Kompanija UAB.

<u>Inventory (raw materials) risk arises</u> due to constantly growing prices of raw materials. Raw materials are purchased via SBA Baldų Kompanija UAB, thereby enabling to expect more favourable prices from the suppliers of raw materials through consolidation of purchases of several companies.

<u>Product quality risk</u>: In 2006 the Company renovated its facilities to increase production volumes and improve production quality, as well as an overall profitability. Since 1997, the Company has Quality Management System, which has been effectively operating in compliance with the requirements of a new standard LST EN ISO 9001:2001. This is affirmed through annual audits by the experts of TUV CERT. The Company seeks to satisfy the needs of its customers, maintain successful performance not only in present days, but also in future, and earn long-term profit. The problems faced are analysed and solved on a regular basis, the operations are subject to continuous improvements by selecting a better Quality Management Development stage – Overall Quality Management.

Environmental risk: Environment protection management system was introduced at Klaipėdos Baldai AB in 1999 in accordance with ISO 14001 standard requirements. For modernization of manufacturing process, only up-to-date, patented and more environmentally friendly technology is acquired. Environment protection management system requires continuous and systematic monitoring of effectiveness of the system, assessment and forecasting of outcomes. For that purpose monitoring is carried out to observe changes over certain time (energy costs to furniture production ratio, energy resources costs per 1,000 m2 of manufactured products and etc.). Moreover, internal and external audits are carried out for the existing system.

Staff risk: In 2006, a higher number of employees were made redundant. This was mostly caused by emigration of employees to work abroad and poor adaptability of newly hired employees to the requirements and objectives of the Company. Most of the workers are unskilled, therefore, they need to receive training from the Company. Training and professional qualification development requirements are applicable to all staff members of the Company. Total training expenses of personnel amounted to LTL 39,708 in 2006. Currently, the Company is focused on improving its labour productivity and simultaneously increasing the level of remuneration.

The financial statements have been prepared on a going concern basis assuming that the Company will be able to continue its business activities in the near future. The validity of such assumption depends on whether sufficient funding sources will be available to the Company to cover its current liabilities.

Performance plans for 2007

The Company's performance targets for 2007:

Sales amounting to LTL 149.9 million;

Profit before tax amounting to LTL 3.8 million;

Maintenance of Quality Management System in accordance with ISO 9001 and ISO 14001;

Improvement of work efficiency and reduction of manufacturing costs;

Mitigation of business risk.

Sales

In 2007, the Company plans to achieve sales of goods and services amounting to LTL 149.9 million.

Profit

In 2007, the Company plans to earn profit before tax amounting to LTL 3.8 million.

Issues of the highest priority:

Cost reduction.

Reduction of operating expenses.

Investments

In 2007, the Company plans to invest LTL 5.02 million.

Information technology

Issues of the highest priority:

Secure IS operation maintenance;

Maintenance and development of a new business management system (SAP) and other software;

Maintenance and renewal of computer and network hardware.

7 March 2007

Direktorius Eimuntas Jankauskas

Adopted by the Meeting of the Board of the Vilnius Stock Exchange as of 23 January 2007, Minutes No. 07-06

Concerning disclosure of compliance with the Governance Code of the companies whose securities are traded on a regulated market

The Board of the Stock Exchange acting in accordance with item 20.5 of the Trading Rules of the Vilnius Stock Exchange (Official Gazette No 65-2348, 2005) herewith provides to approve the disclosure form concerning the compliance with the Governance Code of the companies whose securities are traded on a regulated market (Annex 1).

Chairman of the Board

Arminta Saladžienė

Disclosure form concerning the compliance with the Governance Code for the companies listed on the regulated market

The public company "Name of Issuer", following Article 21 paragraph 3 of the Law on Securities of the Republic of Lithuania and item 20.5 of the Trading Rules of the Vilnius Stock Exchange, discloses its compliance with the Governance Code, approved by the VSE for the companies listed on the regulated market, and its specific provisions. In the event of non-compliance with the Code or with certain provisions thereof, it must be specified which provisions are not complied with and the reasons of non-compliance.

DDINGIDLES/DECOMMENDATIONS	AMECAIO	COMMENTADY			
PRINCIPLES/ RECOMMENDATIONS	YES/NO	COMMENTARY			
	/NOT				
	APPLICAB				
Principle I: Basic Provisions					
The overriding objective of a company should be to	operate in c	ommon interests of all the shareholders by optimizing			
over time all shareholder value.					
1.1. A company should adopt and make public the	YES	Published in the company's reports and is available on			
company's development strategy and objectives by		the Stock Exchange and the committee of the securities			
clearly declaring how the company intends to meet the		websites.			
interests of its shareholders and optimize shareholder					
value.					
1.2. All management bodies of a company should act in	YES				
furtherance of the declared strategic objectives in view					
of the need to optimize shareholder value.					
or the need to optimize shakeholder that					
1.3. A company's supervisory and management	YES				
bodies should act in close co-operation in order to attain					
maximum benefit for the company and its shareholders.					
- '					
1.4. A company's supervisory and management	YES				
bodies should ensure that the rights and interests of					
persons other than the company's shareholders (e.g.					
employees, creditors, suppliers, clients, local					
community), participating in or connected with the					
company's operation, are duly respected.					

Principle II: The corporate governance framework					
The corporate governance framework should ensure the strategic guidance of the company, the effective oversight of the					
company's management bodies, an appropriate balance and distribution of functions between the company's bodies,					
protection of the shareholders' interests.	T				
2.1. Besides obligatory bodies provided for in the Law on Companies of the Republic of Lithuania — a general shareholders' meeting and the chief executive officer, it is recommended that a company should set up both a collegial supervisory body and a collegial management body. The setting up of collegial bodies for supervision and management facilitates clear separation of management and supervisory functions in the company, accountability and control on the part of the chief executive officer, which, in its turn, facilitate a more efficient and transparent management process.		The Company's bodies are as follows: a general shareholders' meeting, a supervisory board (a collegial supervisory body), a management board (a collegial management body), and the chief executive officer.			
2.2. A collegial management body is responsible for the strategic management of the company and performs other key functions of corporate governance. A collegial supervisory body is responsible for the effective supervision of the company's management bodies.	YES	The functions of a collegial supervisory body and a collegial management body are set in the company's rules and regulations following the requirements of law on Private companies of the Lithuanian Republic.			
2.3. Where a company chooses to form only one collegial body, it is recommended that it should be a supervisory body, i.e. the supervisory board. In such a case, the supervisory board is responsible for the effective monitoring of the functions performed by the company's chief executive officer.		Both a supervisory board and a management board are formed in the company.			
2.4. The collegial supervisory body to be elected by the general shareholders' meeting should be set up and should act in the manner defined in Principles III and IV. Where a company should decide not to set up a collegial supervisory body but rather a collegial management body, i.e. the board, Principles III and IV should apply to the board as long as that does not contradict the essence and purpose of this body. ¹					
2.5. Company's management and supervisory bodies	YES	A company's management comprises 3 members while a			

supervisory board also consists of 3 members. The chief

executive officer is not a member of the company's

management board or its supervisory board.

should comprise such number of board (executive

directors) and supervisory (non-executive directors)

board members that no individual or small group of individuals can dominate decision-making on the part of

these bodies.²

Definitions 'executive director' and 'non-executive director' are used in cases when a company has only one collegial body.

¹ Provisions of Principles III and IV are more applicable to those instances when the general shareholders' meeting elects the supervisory board, i.e. a body that is essentially formed to ensure oversight of the company's board and the chief executive officer and to represent the company's shareholders. However, in case the company does not form the supervisory board but rather the board, most of the recommendations set out in Principles III and IV become important and applicable to the board as well. Furthermore, it should be noted that certain recommendations, which are in their essence and nature applicable exclusively to the supervisory board, should not be applied to the board, as the competence and functions of these bodies according to the Law on Companies of the Republic of Lithuania (Official Gazette, 2003, No 123-5574) are different. For instance, item 3.1 of the Code concerning oversight of the management bodies applies to the extent it concerns the oversight of the chief executive officer of the company, but not of the board itself; item 4.1 of the Code concerning recommendations to the management bodies applies to the extent it relates to the provision of recommendations to the company's chief executive officer; item 4.4 of the Code concerning independence of the collegial body elected by the general meeting from the company's management bodies is applied to the extent it concerns independence from the chief executive officer.

2.6. Non-executive directors or members of the supervisory board should be appointed for specified terms subject to individual re-election, at maximum intervals provided for in the Lithuanian legislation with a view to ensuring necessary development of professional experience and sufficiently frequent reconfirmation of their status. A possibility to remove them should also be stipulated however this procedure should not be easier than the removal procedure for an executive director or a member of the		In accordance with the company's rules, the term of office of supervisory board members lasts 4 years. According to the company's rules and regulations and valid legislation, it is not forbidden to re-elect these members for other terms.			
2.7. Chairman of the collegial body elected by the general shareholders' meeting may be a person whose current or past office constitutes no obstacle to conduct independent and impartial supervision. Where a company should decide not to set up a supervisory board but rather the board, it is recommended that the chairman of the board and chief executive officer of the company should be a different person. Former company's chief executive officer should not be immediately nominated as the chairman of the collegial body elected by the general shareholders' meeting. When a company chooses to departure from these recommendations, it should furnish information on the measures it has taken to ensure impartiality		Chairman of the supervisory board has never been the company's chief executive officer.			
Principle III: The order of the formation of a collegia	l body to be 6	elected by a general shareholders' meeting			
The order of the formation a collegial body to be elected by a general shareholders meeting should ensure representation of minority shareholders, accountability of this body to the shareholders and objective monitoring of the company's operation and its management bodies.					
3.1. The mechanism of the formation of a collegial body to be elected by a general shareholders' meeting		Following the requirements of law on Private companies of the Lithuanian Republic, a collegial supervisory body is formed on disclosing the information to the			

(hereinafter in this Principle referred to as the

'collegial body') should ensure objective and fair

monitoring of the company's management bodies as

well as representation of minority shareholders.

Attention should be drawn to the fact that in the situation where the collegial body elected by the general shareholders' meeting is the board, it is natural that being a management body it should ensure oversight not of all management bodies of the company, but only of the single-person body of management, i.e. the company's chief executive officer. This note shall apply in respect of item 3.1 as well.

is formed on disclosing the information to the

collegial supervisory body.

shareholders about the candidates for the company's

3.2. Names and surnames of the candidates to become members of a collegial body, information about their education, qualification, professional background, positions taken and potential conflicts of interest should be disclosed early enough before the general shareholders' meeting so that the shareholders would have sufficient time to make an informed voting decision. All factors affecting the candidate's independence, the sample list of which is set out in Recommendation 3.7, should be also disclosed. The collegial body should also be informed on any subsequent changes in the provided information. The collegial body should, on yearly basis, collect data provided in this item on its members and disclose this in the company's annual report.	YES	The information about the candidates for the company's collegial supervisory body was provided to the shareholders together with the announcement of a general shareholders' meeting and the agenda of the general shareholders' meeting when the supervisory board was being elected. The supervisory board was not elected in 2006. In the company's annual report, in this item data about its members were not provided due to the fact that the information mentioned above did not change and there were no changes on the whole.
3.3. Should a person be nominated for members of a collegial body, such nomination should be followed by the disclosure of information on candidate's particular competences relevant to his/her service on the collegial body. In order shareholders and investors are able to ascertain whether member's competence is further relevant, the collegial body should, in its annual report, disclose the information on its composition and particular competences of individual members which are relevant to their service on the collegial body.	NO	This recommendation is realized on disclosing the shareholders the information about the candidates for the company's collegial supervisory body. The information about the qualification of the members of the collegial supervisory body is provided in annual reports. In the company's annual report, in this item the indicated data about its members were not revealed due to the fact that the information mentioned above did not change and the supervisory board was not elected in 2006.
3.4. In order to maintain a proper balance in terms of the current qualifications possessed by its members, the collegial body should determine its desired composition with regard to the company's structure and activities, and have this periodically evaluated. The collegial body should ensure that it is composed of members who, as a whole, have the required diversity of knowledge, judgment and experience to complete their tasks properly. The members of the audit committee, collectively, should have a recent knowledge and relevant experience in the fields of finance, accounting and/or audit for the stock exchange listed companies.		The members of the collegial supervisory body do the active work in different fields in other companies, which ensures the adequacy of the competence in their current duties. The information about the qualification of the members of the collegial supervisory body is provided in annual reports.
3.5. All new members of the collegial body should be offered a tailored program focused on introducing a member with his/her duties, corporate organization and activities. The collegial body should conduct an annual review to identify fields where its members need to update their skills and knowledge.	NO	The members of the collegial supervisory body do the active work in different fields in other companies, which ensures the adequacy of the competence in their current duties.

3.6. In order to ensure that all material conflicts of interest related with a member of the collegial body are resolved properly, the collegial body should comprise a sufficient number of independent members.	NO	The independence of the members of the collegial supervisory body was not considered by the company by now.
3.7. A member of the collegial body should be considered to be independent only if he is free of any business, family or other relationship with the company, its controlling shareholder or the management of either, that creates a conflict of interest such as to impair his judgment. Since all cases when member of the collegial body is likely to become dependant are impossible to list, moreover, relationships and circumstances associated with the determination of independence may vary amongst companies and the best practices of solving this problem are yet to evolve in the course of time, assessment of independence of a member of the collegial body should be based on the contents of the relationship and circumstances rather than their form. The key criteria for identifying whether a member of the collegial body can be considered to be independent are the following: 1) He/she is not an executive director or member of the board (if a collegial body elected by the general shareholders' meeting is the supervisory board) of the company or any associated company and has not been such during the last five years; 2) He/she is not an employee of the company or some any company and has not been such during the last three years, except for cases when a member of the collegial body does not belong to the senior management and was elected to the collegial body as a representative of the employees; 3) He/she is not receiving or has been not receiving significant additional remuneration from the company or associated company other than remuneration for the office in the collegial body. Such additional remuneration includes participation in share options or some other performance based pay systems; it does not include compensation payments for the previous office in the company (provided that such payment is no way related with later position) as per pension plans (inclusive of deferred compensations);		The independence of the members of the collegial supervisory body was not considered by the company by now.

⁴ The Code does not provide for a concrete number of independent members to comprise a collegial body. Many codes in foreign countries fix a concrete number of independent members (e.g. at least 1/3 or 1/2 of the members of the collegial body) to comprise the collegial body. However, having regard to the novelty of the institution of independent members in Lithuania and potential problems in finding and electing a concrete number of independent members, the Code provides for a more flexible wording and allows the companies themselves to decide what number of independent members is sufficient. Of course, a larger number of independent members in a collegial body is encouraged and will constitute an example of more suitable corporate governance.

⁵ It is notable that in some companies all members of the collegial body may, due to a very small number of minority shareholders, be elected by the votes of the majority shareholder or a few major shareholders. But even a member of the collegial body elected by the majority shareholders may be considered independent if he/she meets the independence criteria set out in the Code.

- 4) He/she is not a controlling shareholder or representative of such shareholder (control as defined in the Council Directive 83/349/EEC Article 1 Part 1);
- 5) He/she does not have and did not have any material business relations with the company or associated company within the past year directly or as a partner, shareholder, director or superior employee of the subject having such relationship. A subject is considered to have business relations when it is a major supplier or service provider (inclusive of financial, legal, counseling and consulting services), major client or organization receiving significant payments from the company or its group; 6) He/she is not and has not been, during the last three years, partner or employee of the current or former external audit company of the company or associated company;
- 7) He/she is not an executive director or member of the board in some other company where executive director of the company or member of the board (if a collegial body elected by the general shareholders' meeting is the supervisory board) is non-executive director or member of the supervisory board, he/she may not also have any other material relationships with executive directors of the company that arise from their participation in activities of other companies or bodies;
- 8) He/she has not been in the position of a member of the collegial body for over than 12 years;
- 9) He/she is not a close relative to an executive director or member of the board (if a collegial body elected by the general shareholders' meeting is the supervisory board) or to any person listed in above items 1 to 8. Close relative is considered to be a spouse (common-law spouse), children and parents.
- 3.8. The determination of what constitutes independence is fundamentally an issue for the collegial body itself to determine. The collegial body may decide that, despite a particular member meets all the criteria of independence laid down in this Code, he cannot be considered independent due to special personal or company-related circumstances.

3.9. Necessary information on conclusions the collegial body has come to in its determination of whether a particular member of the body should be considered to be independent should be disclosed. When a person is nominated to become a member of the collegial body, the company should disclose whether it considers the person to be independent. When a particular member of the collegial body does not meet one or more criteria of independence set out in this Code, the company should disclose its reasons for nevertheless considering the member to be independent. In addition, the company should annually disclose which members of the collegial body it considers to be independent.	NO	The independence of the members of the collegial supervisory body was not considered by the company by now.
3.10. When one or more criteria of independence set out in this Code has not been met throughout the year, the company should disclose its reasons for considering a particular member of the collegial body to be independent. To ensure accuracy of the information disclosed in relation with the independence of the members of the collegial body, the company should require independent members to have their independence periodically re-confirmed.	NO	The independence of the members of the collegial supervisory body was not considered by the company by now.
3.11. In order to remunerate members of a collegial body for their work and participation in the meetings of the collegial body, they may be remunerated from the company's funds. The general shareholders' meeting should approve the amount of such remuneration.	N/A	The members of the collegial supervisory body were not remunerated from the company's funds in 2006.
Principle IV: The duties and liabilities of a collegial bo	dy elected by	the general shareholders meeting
The corporate governance framework should ensure the general shareholders' meeting, and the powers of the company's management bodies and protection	granted to	the collegial body should ensure effective monitoring
4.1. The collegial body elected by the general shareholders' meeting (hereinafter in this Principle referred to as the 'collegial body') should ensure integrity and transparency of the company's financial statements and the control system. The collegial body should issue recommendations to the company's management bodies and monitor and control the company's management performance. ⁸		The supervisory board elected by the company provides the general shareholders' meeting with reviews and offers regarding the company's annual financial statements, proposed profit appropriation, and the company's annual report.

⁶ It is notable that currently it is not yet completely clear, in what form members of the supervisory board or the board may be remunerated for their work in these bodies. The Law on Companies of the Republic of Lithuania (*Official Gazette*, 2003, No 123-5574) provides that members of the supervisory board or the board may be remunerated for their work in the supervisory board or the board by payment of annual bonuses (tantiems) in the manner prescribed by Article 59 of this Law, i.e. from the company's profit. The current wording, contrary to the wording effective before 1 January 2004, eliminates the exclusive requirement that annual bonuses (tantiems) should be the *only* form of the company's compensation to members of the supervisory board or the board. So it seems that the Law contains no prohibition to remunerate members of the supervisory board or the board for their work in other forms, besides bonuses, although this possibility is not expressly stated either.

⁷ See Footnote 3.

⁸ See Footnote 3. In the event the collegial body elected by the general shareholders' meeting is the board, it should provide recommendations to the company's single-person body of management, i.e. the company's chief executive officer.

4.2. Members of the collegial body should act in good faith, with care and responsibility for the benefit and in the interests of the company and its shareholders with due regard to the interests of employees and public welfare. Independent members of the collegial body should (a) under all circumstances maintain independence of their analysis, decision-making and actions (b) do not seek and accept any unjustified privileges that might compromise their independence, and (c) clearly express their objections should a member consider that decision of the collegial body is against the interests of the company. Should a collegial body have passed decisions independent member has serious doubts about, the member should make adequate conclusions. Should an independent member resign from his office, he should explain the reasons in a letter addressed to the collegial body or audit committee and, if necessary, respective company-not-pertaining body (institution).	YES	According to the data owned by the company, all members of the collegial body act in good faith in the interests of the company, follow the company's interests and not those of their own or third parties so that they could keep their independent view on making decisions.
4.3. Each member should devote sufficient time and attention to perform his duties as a member of the collegial body. Each member of the collegial body should limit other professional obligations of his (in particular any directorships held in other companies) in such a manner they do not interfere with proper performance of duties of a member of the collegial body. In the event a member of the collegial body should be present in less than a hair of the meetings of the collegial body throughout the financial year of the company, shareholders of the company should be notified.	YES	Company's members of the collegial body perform their duties properly: take an active part in the collegial body meetings and, as a collegial member, devotes sufficient time to perform his duties.
4.4. Where decisions of a collegial body may have a different effect on the company's shareholders, the collegial body should treat all shareholders impartially and fairly. It should ensure that shareholders are properly informed on the company's affairs, strategies, risk management and resolution of conflicts of interest. The company should have a clearly established role of members of the collegial body when communicating with and committing to shareholders.		Following the Law on Private Companies of the Lithuanian Republic, the collegial body's method of cooperation with the shareholders is set in the company's rules and regulations.

⁹ It is notable that companies can make this requirement more stringent and provide that shareholders should be informed about failure to participate at the meetings of the collegial body if, for instance, a member of the collegial body participated at less than 2/3 or 3/4 of the meetings. Such measures, which ensure active participation in the meetings of the collegial body, are encouraged and will constitute an example of more suitable corporate governance.

4.5. It is recommended that transactions (except insignificant ones due to their low value or concluded when carrying out routine operations in the company under usual conditions), concluded between the company and its shareholders, members of the supervisory or managing bodies or other natural or legal persons that exert or may exert influence on the company's management should be subject to approval of the collegial body. The decision concerning approval of such transactions should be deemed adopted only provided the majority of the independent members of the collegial body voted for such a decision.	There were none of such transactions in 2006.
4.6. The collegial body should be independent in passing decisions that are significant for the company's operations and strategy. Taken separately, the collegial body should be independent of the company's management bodies ¹⁰ . Members of the collegial body should act and pass decisions without an outside influence from the persons who have elected it. Companies should ensure that the collegial body and its committees are provided with sufficient administrative and financial resources to discharge their duties, including the right to obtain, in particular from employees of the company, all the necessary information or to seek independent legal, accounting or any other advice on issues pertaining to the competence of the collegial body and its committees.	

In the event the collegial body elected by the general shareholders' meeting is the board, the recommendation concerning its independence from the company's management bodies applies to the extent it relates to the independence from the company's chief executive officer.

4.7. Activities of the collegial body should be organized in a manner that independent members of the collegial body could have major influence in relevant areas where chances of occurrence of conflicts of interest are very high. Such areas to be considered as highly relevant are issues of nomination of company's directors, determination of directors' remuneration and control and assessment of company's audit. Therefore when the mentioned issues are attributable to the competence of the collegial body, it is recommended that the collegial body should establish nomination, remuneration, and audit committees. Companies should ensure that the functions attributable to the nomination, remuneration, and audit committees are carried out. However they may decide to merge these functions and set up less than three committees. In such case a company should explain in detail reasons behind the selection of alternative approach and how the selected approach complies with the objectives set forth for the three different committees. Should the collegial body of the company comprise small number of members, the functions assigned to the three committees may be performed by the collegial body itself, provided that it meets composition requirements advocated for the committees and that adequate information is provided in this respect. In such case provisions of this Code relating to the committees of the collegial body (in particular with respect to their role, operation, and transparency) should apply, where relevant, to the collegial body as a whole.	NO	None of the committees were formed in the company by now. Following the company's rules and valid legislation, the indicated issues are considered by the company's supervisory board, management board and the chief executive officer.
4.8. The key objective of the committees is to increase efficiency of the activities of the collegial body by ensuring that decisions are based on due consideration, and to help organize its work with a view to ensuring that the decisions it takes are free of material conflicts of interest. Committees should present the collegial body with recommendations concerning the decisions of the collegial body. Nevertheless the final decision shall be adopted by the collegial body. The recommendation on creation of committees is not intended, in principle, to constrict the competence of the collegial body or to remove the matters considered from the purview of the collegial body itself, which remains fully responsible for the decisions taken in its field of competence.	N/A	The company's supervisory board, management board and the chief executive officer are considering the indicated issues.

4.9. Committees established by the collegial body should normally be composed of at least three members. In companies with small number of members of the collegial body, they could exceptionally be composed of two members. Majority of the members of each committee should be constituted from independent members of the collegial body. In cases when the company chooses not to set up a supervisory board, remuneration and audit committees should be entirely comprised of non-executive directors. Chairmanship and membership of the committees should be decided with due regard to the need to ensure that committee membership is refreshed and that undue reliance is not placed on particular individuals.	N/A	The company's supervisory board, management board and the chief executive officer are considering the indicated issues.
4.10. Authority of each of the committees should be determined by the collegial body. Committees should perform their duties in line with authority delegated to them and inform the collegial body on their activities and performance on regular basis. Authority of every committee stipulating the role and rights and duties of the committee should be made public at least once a year (as part of the information disclosed by the company annually on its corporate governance structures and practices). Companies should also make public annually a statement by existing committees on their composition, number of meetings and attendance over the year, and their main activities. Audit committee should confirm that it is satisfied with the independence of the audit process and describe briefly the actions it has taken to reach this conclusion.	N/A	The company's supervisory board, management board and the chief executive officer are considering the indicated issues.
4.11. In order to ensure independence and impartiality of the committees, members of the collegial body that are not members of the committee should commonly have a right to participate in the meetings of the committee only if invited by the committee. A committee may invite or demand participation in the meeting of particular officers or experts. Chairman of each of the committees should have a possibility to maintain direct communication with the shareholders. Events when such are to be performed should be specified in the regulations for committee activities.	N/A	The company's supervisory board, management board and the chief executive officer are considering the indicated issues.

4.12. Nomination Committee. 4.12.1. Key functions of the nomination committee should be the following: • Identify and recommend, for the approval of the collegial body, candidates to fill board vacancies. The nomination committee should evaluate the balan of skills, knowledge and experience on the management body, prepare a description of the rol and capabilities required to assume a particular office, and assess the time commitment expected. Nominatio committee can also consider candidates to membe of the collegial body delegated by the shareholders of the company; • Assess on regular basis the structure size, composition and performance of the supervisory and management bodies, and make recommendations to the collegial body regarding the means of achieving necessary changes; • Assess on regular basis the skills, knowledge and experient of individual directors and report on this to the collegial body; • Properly consider issues related to succession planning; • Review the policy of the management bodies for selection and appointment of senior management.	ees ness	The company's supervisory board, management board and the chief executive officer are considering the indicated issues.
4.12.2. Nomination committee should consider proposals by other parties, including management as shareholders. When dealing with issues related executive directors or members of the board (if collegial body elected by the general shareholded meeting is the supervisory board) and seni management, chief executive officer of the compasshould be consulted by, and entitled to submit proposate to the nomination committee.	ad a ass' or	
4.13. Remuneration Committee. 4.13.1. Key functions of the remuneration committee should be the following • Make proposals, for the approval of the collegial body, on the remuneration policy for members of management bodies and executive directors. Such policy should address all forms of compensation, including the fixed remuneration, performance-based remuneration schemes, pension arrangements, and termination payments. Proposals considerin performance-based remuneration schemes should be accompanied with recommendations on the related objectives and evaluation criteria, with a view to properly aligning the pay of executive director and members of the management bodies with the long-term interests of the shareholders and the objectives set by the collegial body; • Make proposals to the collegial body on the individual remuneration for executive directors and member of management bodies in order their remuneration are consistent with company's remuneration policy and the evaluation of the performance of these persons concerned. In doing so, the committee should be properly informed on the total compensation obtained by executive directors and members of the management bodies from the affiliated companies; Make proposals to the collegial body on suitable form of contracts for executive directors and members of the management bodies; • Assist the collegial body in overseeing how the company complies with applicable provisions regarding the remuneration-related information disclosure (in particular the remuneration policy applied and individual remuneration of directors); • Make general recommendations to the executive directors		The company's supervisory board, management board and the chief executive officer are considering the indicated issues.

and members of the management bodies on the level and structure of remuneration for senior management (as defined by the collegial body) with regard to the respective information provided by the executive directors and members of the management bodies. 4.13.2. With respect to stock options and other share-based incentives which may be granted to directors or other employees, the committee should: • Consider general policy regarding the granting of the above mentioned schemes, in particular stock options, and make any related proposals to the collegial body: • Examine the related information that is given in the company's annual report and documents intended for the use during the shareholders meeting; • Make proposals to the collegial body regarding the choice between granting options to subscribe shares or granting options to purchase shares, specifying the reasons for its choice as well as the consequences that this choice has. 4.13.3. Upon resolution of the issues attributable to the competence of the remuneration committee, the committee should at least address the chairman of the collegial body and/or chief executive officer of the company for their opinion on the remuneration of other executive directors or members of the management bodies.

N/A

4.14. Audit Committee.

4.14.1. Key functions of the audit committee should be the following: • Observe the integrity of the financial information provided by the company, in particular by reviewing the relevance and consistency of the accounting methods used by the company and its group (including the criteria for the consolidation of the accounts of companies in the group); • At least once a year review the systems of internal control and risk management to ensure that the key risks (inclusive of the risks in relation with compliance with existing laws and regulations) are properly identified, managed and reflected in the information provided: • Ensure the efficiency of the internal audit function, among other things, by making recommendations on the selection, appointment, reappointment and removal of the head of the internal audit department and on the budget of the department, and by monitoring the responsiveness of the management to its findings and recommendations. Should there be no internal audit authority in the company, the need for one should be reviewed at least annually; • Make recommendations to the collegial body related with selection, appointment, reappointment and removal of the external auditor (to be done by the general shareholders' meeting) and with the terms and conditions of his engagement. The committee should investigate situations that lead to a resignation of the audit company or auditor and make recommendations on required actions in such situations; • Monitor independence and impartiality of the external auditor, in particular by reviewing the audit company's compliance with applicable guidance relating to the rotation of audit partners, the level of fees paid by the company, and similar issues. In order to prevent occurrence of material conflicts of interest, the committee, based on the auditor's disclosed inter alia data on all remunerations paid by the company to the auditor and network, should at all times monitor nature and extent of the non-audit services. Having regard to the principals and guidelines established in the 16 May 2002 Commission Recommendation 2002/590/EC, the committee should determine and apply a formal policy

The company's supervisory board, management board and the chief executive officer are considering the indicated issues.

establishing types of non-audit services that are (a) excluded, (b) permissible only after review by the committee, and (c) permissible without referral to the committee. 4.14.4. Internal and external auditors should be secured with not only effective working relationship with management, but also with free access to the collegial body. For this purpose the audit committee should act as the principal contact person for the internal and external auditors. 4.14.5. The audit committee should be informed of the internal auditor's work program, and should be furnished with internal audit's reports or periodic summaries. The audit committee should also be informed of the work program of the external auditor and should be furnished with report disclosing all relationships between the independent auditor and the company and its group. The committee should be timely furnished information on all issues arising from the audit. 4.14.6. The audit committee should examine whether the company is following applicable provisions regarding the possibility for employees to report alleged significant irregularities in the company, by way of complaints or through anonymous submissions (normally to an independent member of the collegial body), and should ensure that there is a procedure established for proportionate and independent investigation of these issues and for appropriate follow-up action. 4.14.7. The audit committee should report on its activities to the collegial body at least once in every six months, at the time the yearly and half-yearly

	L	l .	

4.15. Every year the collegial body should conduct the assessment of its activities. The assessment should include evaluation of collegial body's structure, work organization and ability to act as a group, evaluation of each of the collegial body member's and committee's competence and work efficiency and assessment whether the collegial body has achieved its objectives. The collegial body should, at least once a year, make public (as part of the information the company annually discloses on its management structures and practices) respective information on its internal organization and working procedures, and specify what material changes were made as a result of the assessment of the collegial body of its own activities.		There's no such a policy within the company, like evaluation of the work done by the supervisory board as well as making a report on it.
Principle V: The working procedure of the company's	collegial bo	dies
The working procedure of supervisory and management operation of these bodies and decision-making and enco	nt b bodies e	established in the company should ensure efficient
5.1. The company's supervisory and management bodies (hereinafter in this Principle the concept 'collegial bodies' covers both the collegial bodies of supervision and the collegial bodies of management) should be chaired by chairpersons of these bodies. The chairperson of a collegial body is responsible for proper convocation of the collegial body meetings. The chairperson should ensure that information about the meeting being convened and its agenda are communicated to all members of the body. The chairperson of a collegial body should ensure appropriate conducting of the meetings of the collegial body. The chairperson should ensure order and working atmosphere during the meeting.		This recommendation is realized by the chairmen of the supervisory and management boards.
5.2. It is recommended that meetings of the company's collegial bodies should be carried out according to the schedule approved in advance at certain intervals of time. Each company is free to decide how often to convene meetings of the collegial bodies, but it is recommended that these meetings should be convened at such intervals, which would guarantee an interrupted resolution of the essential corporate governance issues. Meetings of the company's supervisory board should		Meetings of the company's management board are convened at least once in a quarter, and the company's supervisory board should meet at least once a year. The meetings of the management and supervisory boards can be convened more frequently, if needed.

The frequency of meetings of the collegial body provided for in the recommendation must be applied in those cases when both additional collegial bodies are formed at the company, the board and the supervisory board. In the event only one additional collegial body is formed in the company, the frequency of its meetings may be as established for the supervisory board, i.e. at least once in a quarter.

be convened at least once in a quarter, and the company's board should meet at least once a month.

5.3. Members of a collegial body should be notified	YES	
about the meeting being convened in advance in order to		
allow sufficient time for proper preparation for the		
issues on the agenda of the meeting and to ensure		
fruitful discussion and adoption of appropriate		
decisions. Alongside with the notice about the meeting		
being convened, all the documents relevant to the		
issues on the agenda of the meeting should be submitted		
to the members of the collegial body. The agenda of the		
meeting should not be changed or supplemented		
during the meeting, unless all members of the collegial		
body are present or certain issues of great importance		
to the company require immediate resolution.		
5.4 In order to according to apprecian of the commonvis	VEC	
5.4. In order to co-ordinate operation of the company's		
collegial bodies and ensure effective decision-		
making process, chairpersons of the company's		
collegial bodies of supervision and management should		
		l l
closely co-operate by co-coordinating dates of the		
meetings, their agendas and resolving other issues of		
meetings, their agendas and resolving other issues of corporate governance. Members of the company's		
meetings, their agendas and resolving other issues of corporate governance. Members of the company's board should be free to attend meetings of the

Principle VI: The equitable treatment of shareholder rights			
The corporate governance framework should ensure the equitable treatment of all shareholders, including minority and foreign shareholders. The corporate governance framework should protect the rights of the shareholders.			
6.1. It is recommended that the company's capital should consist only of the shares that grant the same rights to voting, ownership, dividend and other rights to all their holders.		Company's authorized share capital consisting of ordinary shares grant the same rights to all company's shareholders.	
6.2. It is recommended that investors should have access to the information concerning the rights attached to the shares of the new issue or those issued earlier in advance, i.e. before they purchase shares.		None of company's new shares were issued during 2006. Information about the rights attached to the shares of the new issue is provided in company's rules and its annual reports.	
6.3. Transactions that are important to the company and its shareholders, such as transfer, investment, and pledge of the company's assets or any other type of encumbrance should be subject to approval of the general shareholders' meeting. All shareholders should be furnished with equal opportunity to familiarize with and participate in the decision-making process when significant corporate issues, including approval of transactions referred to above, are discussed.		Company follows the requirements of law on Private companies of the Lithuanian Republic.	

¹² The Law on Companies of the Republic of Lithuania (*Official Gazette*, 2003, No 123-5574) no longer assigns resolutions concerning the investment, transfer, lease, mortgage or acquisition of the long-terms assets accounting for more than 1/20 of the company's authorised capital to the competence of the general shareholders' meeting. However, transactions that are important and material for the company's activity should be considered and approved by the general shareholders' meeting. The Law on Companies contains no prohibition to this effect either. Yet, in order not to encumber the company's activity and escape an unreasonably frequent consideration of transactions at the meetings, companies are free to establish their own criteria of material transactions, which are subject to the approval of the meeting. While establishing these criteria of material transactions, companies may follow the criteria set out in items 3, 4, 5 and 6 of paragraph 4 of Article 34 of the Law on Companies or derogate from them in view of the specific nature of their operation and their attempt to ensure uninterrupted, efficient functioning of the company.

	1	
6.4. Procedures of convening and conducting a general shareholders' meeting should ensure equal opportunities for the shareholders to effectively participate at the meetings and should not prejudice the rights and interests of the shareholders. The venue, date, and time of the shareholders' meeting should not hinder wide attendance of the shareholders. Prior to the shareholders' meeting, the company's supervisory and management bodies should enable the shareholders to lodge questions on issues on the agenda of the general shareholders' meeting and receive answers to them.		
6.5. It is recommended that documents on the course of the general shareholders' meeting, including draft resolutions of the meeting, should be placed on the publicly accessible website of the company in advance ¹³ . It is recommended that the minutes of the general shareholders' meeting after signing them and/or adopted resolutions should be also placed on the publicly accessible website of the company. Seeking to ensure the right of foreigners to familiarize with the information, whenever feasible, documents referred to in this recommendation should be published in English and/or other foreign languages. Documents referred to in this recommendation may be published on the publicly accessible website of the company to the extent that publishing of these documents is not detrimental to the company or the company's commercial secrets are not revealed.		This information is not disclosed on the company's website. The company does not disclose information in English as by now the company's shareholders did not show their interest in receiving the information in English. While preparing the documents referred to the shareholders' general meeting, the company follows its own rules and the rules of law on Private companies of the Lithuanian Republic.
6.6. Shareholders should be furnished with the opportunity to vote in the general shareholders' meeting in person and in absentia. Shareholders should not be prevented from voting in writing in advance by completing the general voting ballot.	YES	Company's shareholders can realize/materialize their right to take part in general shareholders' meeting both in person and in absentia in case a person has a valid/proper/suitable warrant/authorization or an agreement on voting right transfer/disposal in the manner prescribed by legislation. The company also has to provide conditions for the shareholders so that they could vote by completing the general vote ballot as it is required by the law on Private companies of the Lithuanian Republic.
6.7. With a view to increasing the shareholders' opportunities to participate effectively at shareholders' meetings, the companies are recommended to expand use of modern technologies in voting processes by allowing the shareholders to vote in general meetings via terminal equipment of telecommunications. In such cases security of telecommunication equipment, text protection and a possibility to identify the signature of the voting person should be guaranteed. Moreover, companies could furnish its shareholders, especially foreigners, with the opportunity to watch shareholder meetings by means of modern technologies.		By now there was no need to realize this recommendation in the company.

¹³ The documents referred to above should be placed on the company's website in advance with due regard to a 10-day period before the general shareholders' meeting, determined in paragraph 7 of Article 26 of the Law on Companies of the Republic of Lithuania (Official Gazette, 2003, No 123-5574).

Principle VII: The avoidance of conflicts of interests an	nd their discl	losure			
The corporate governance framework should encourage members of the corporate bodies to avoid conflicts of interest and assure transparent and effective mechanism of disclosure of conflicts of interests regarding members of the corporate bodies.					
7.1. Any member of the company's supervisory and management body should avoid a situation, in which his/her personal interests are in conflict or may be in conflict with the company's interests. In case such a situation did occur, a member of the company's supervisory and management body should, within reasonable time, inform other members of the same collegial body or the company's body that has elected him/her, or to the company's shareholders about a situation of a conflict of interest, indicate the nature of the conflict and value, where possible.					
7.2. Any member of the company's supervisory and management body may not mix the company's assets, the use of which has not been mutually agreed upon, with his/her personal assets or use them or the information which he/she learns by virtue of his/her position as a member of a corporate body for his/her personal benefit or for the benefit of any third person without a prior agreement of the general shareholders' meeting or any other corporate body authorized by the meeting.	YES				
7.3. Any member of the company's supervisory and management body may conclude a transaction with the company, a member of a corporate body of which he/she is. Such a transaction (except insignificant ones due to their low value or concluded when carrying out routine operations in the company under usual conditions) must be immediately reported in writing or orally, by recording this in the minutes of the meeting, to other members of the same corporate body or to the corporate body that has elected him/her or to the company's shareholders. Transactions specified in this recommendation are also subject to recommendation 4.5.					
7.4. Any member of the company's supervisory and management body should abstain from voting when decisions concerning transactions or other issues of personal or business interest are voted on.					

Principle VIII: Company's remuneration policy				
Remuneration policy and procedure for approval, revision and disclosure of directors' remuneration established in the company should prevent potential conflicts of interest and abuse in determining remuneration of directors, in addition it should ensure publicity and transparency both of company's remuneration policy and remuneration of directors.				
8.1. A company should make a public statement of the company's remuneration policy (hereinafter the remuneration statement). This statement should be part of the company's annual accounts. Remuneration statement should also be posted on the company's website.	NO	At present the company prepares neither remuneration policy reports nor makes public statements of them. The company's remuneration policy, i.e. payments to employees, specialists and managers is set in remuneration rules, which are constituent part of the collective agreement. The remuneration policy and its alterations are also provided in business plans prepared by the company as well as reports, which are approved by the company's board. Following the law on Private companies of the Lithuanian Republic, this information is available for both company's employees and its		
8.2. Remuneration statement should mainly focus on directors' remuneration policy for the following year and, if appropriate, the subsequent years. The statement should contain a summary of the implementation of the remuneration policy in the previous financial year. Special attention should be given to any significant changes in company's remuneration policy as compared to the previous financial year.	NO	See commentary No. 8.1		
8.3. Remuneration statement should leastwise include the following information: • Explanation of the relative importance of the variable and non-variable components of directors' remuneration; • Sufficient information on performance criteria that entitles directors to share options, shares or variable components of remuneration; • Sufficient information on the linkage between the remuneration and performance; • The main parameters and rationale for any annual bonus scheme and any other non-cash benefits; • A description of the main characteristics of supplementary pension or early retirement schemes for directors.	NO	See commentary No. 8.1		
8.4. Remuneration statement should also summarize and explain company's policy regarding the terms of the contracts executed with executive directors and members of the management bodies. It should include, inter alia, information on the duration of contracts with executive directors and members of the management bodies, the applicable notice periods and details of provisions for termination payments linked to early termination under contracts for executive directors and members of the management bodies.		See commentary No. 8.1		

8.5. The information on preparatory and decision-	NO	
making processes, during which a policy of	1	
remuneration of directors is being established, should	I	
also be disclosed. Information should include data, if	I	
applicable, on authorities and composition of the	I	
remuneration committee, names and surnames of	1	
external consultants whose services have been used in	I	
determination of the remuneration policy as well as the	1	
role of shareholders' annual general meeting.		
8.6. Without prejudice to the role and organization of	NO	
the relevant bodies responsible for setting directors'		
remunerations, the remuneration policy or any other	1	
significant change in remuneration policy should be	1	
included into the agenda of the shareholders' annual		
general meeting. Remuneration statement should be		
put for voting in shareholders' annual general meeting.	1	
The vote may be either mandatory or advisory.		

8.7. Remuneration statement should also contain NO See commentary No. 8.1 detailed information on the entire amount of remuneration, inclusive of other benefits, that was paid to individual directors over the relevant financial vear. This document should list at least the information set out in items 8.7.1 to 8.7.4 for each person who has served as a director of the company at any time during the relevant financial year. 8.7.1. The following remuneration and/or emoluments-related information should be disclosed: • The total amount of remuneration paid or due to the director for services performed during the relevant financial year, inclusive of, where relevant, attendance fees fixed by the annual general shareholders meeting; • The remuneration and advantages received from any undertaking belonging to the same group; • The remuneration paid in the form of profit sharing and/or bonus payments and the reasons why such bonus payments and/or profit sharing were granted; • If permissible by the law, any significant additional remuneration paid to directors for special services outside the scope of the usual functions of a director; • Compensation receivable or paid to each former executive director or member of the management body as a result of his resignation from the office during the previous financial year; • Total estimated value of non-cash benefits considered as remuneration, other than the items covered in the above points. 8.7.2. As regards shares and/or rights to acquire share options and/or all other share-incentive schemes, the following information should be disclosed: • The number of share options offered or shares granted by the company during the relevant financial year and their conditions of application; • The number of shares options exercised during the relevant financial year and, for each of them, the number of shares involved and the exercise price or the value of the interest in the share incentive scheme at the end of the financial year; • The number of share options unexercised at the end of the financial year; their exercise price, the exercise date and the main conditions for the exercise of the rights; • All changes in the terms and conditions of existing share options occurring during the financial year. 8.7.3. The following supplementary pension schemes-related information should be disclosed: • When the pension scheme is a defined-benefit scheme, changes in the directors' accrued benefits under that scheme during the relevant financial year; • When the pension scheme is defined-contribution scheme, detailed information on contributions paid or payable by the company in respect of that director during the relevant financial year. 8.7.4. The statement should also state amounts that the company or any subsidiary company or entity included in the consolidated annual financial statements of the company has paid to each person who has served as a director in the company at any time during the relevant financial year in the form of loans, advance payments or guarantees, including the amount outstanding and the interest rate.

8.8. Schemes anticipating remuneration of directors in shares, share options or any other right to purchase shares or be remunerated on the basis of share price movements should be subject to the prior approval of shareholders' annual general meeting by way of a resolution prior to their adoption. The approval of scheme should be related with the scheme itself and not to the grant of such share-based benefits under that scheme to individual directors. All significant changes in scheme provisions should also be subject to shareholders' approval prior to their adoption; the approval decision should be made in shareholders' annual general meeting. In such case shareholders should be notified on all terms of suggested changes and get an explanation on the impact of the suggested changes.

N/A

- 8.9. The following issues should be subject to approval by the shareholders' annual general meeting: Grant of share-based schemes, including share options, to directors; Determination of maximum number of shares and main conditions of share granting; The term within which options can be exercised; The conditions for any subsequent change in the exercise of the options, if permissible by law; All other long-term incentive schemes for which directors are eligible and which are not available to other employees of the company under similar terms. Annual general meeting should also set the deadline within which the body responsible for remuneration of directors may award compensations listed in this article to individual directors.
- 8.10. Should national law or company's Articles of Association allow, any discounted option arrangement under which any rights are granted to subscribe to shares at a price lower than the market value of the share prevailing on the day of the price determination, or the average of the market values over a number of days preceding the date when the exercise price is determined, should also be subject to the shareholders' approval.
- 8.11. Provisions of Articles 8.8 and 8.9 should not be applicable to schemes allowing for participation under similar conditions to company's employees or employees of any subsidiary company whose employees are eligible to participate in the scheme and which has been approved in the shareholders' annual general meeting.

Company does not apply schemes anticipating remuneration of directors in shares, share options or any other right to purchase shares or be remunerated on the basis of share price movements. The director and functional managers are given remunerations, bonuses and other benefits. Their motivation is increased by other forms.

8.12. Prior to the annual general meeting that is	
intended to consider decision stipulated in Article 8.8,	
the shareholders must be provided an opportunity to	
familiarize with draft resolution and project-related	
notice (the documents should be posted on the	
company's website). The notice should contain the	
full text of the share-based remuneration schemes or	
a description of their key terms, as well as full names of	
the participants in the schemes. Notice should also	
specify the relationship of the schemes and the overall	
remuneration policy of the directors. Draft resolution	
must have a clear reference to the scheme itself or to the	
summary of its key terms. Shareholders must also be	
presented with information on how the company intends	
to provide for the shares required to meet its	
obligations under incentive schemes. It should be	
clearly stated whether the company intends to buy	
shares in the market, hold the shares in reserve or	
issue new ones. There should also be a summary on	
scheme-related expenses the company will suffer due to	
the anticipated application of the scheme. All	
information given in this article must be posted on	
the company's website.	

Principle IX: The role of stakeholders in corporate governance

The corporate governance framework should recognize the rights of stakeholders as established by law and encourage active co- operation between companies and stakeholders in creating the company value, jobs and financial sustainability. For the purposes of this Principle, the concept "stakeholders" includes investors, employees, creditors, suppliers, local community and other persons having certain interest in the company concerned.

- 9.1. The corporate governance framework should assure that the rights of stakeholders that are protected by law are respected.
- 9.2. The corporate governance framework should create conditions for the stakeholders to participate in corporate governance in the manner prescribed by law. Examples of mechanisms of stakeholder participation in corporate governance include: employee participation in adoption of certain key decisions for the company; consulting the employees on corporate governance and other important issues; employee participation in the company's share capital; creditor involvement in governance in the context of the company's insolvency, etc.
- 9.3. Where stakeholders participate in the corporate governance process, they should have access to relevant information.

Company prepares collective agreements between an employer and a company's trade-union. The employees' interests are presented in a proper way; the company's employees take an active part in preparation of a collective agreement as well as control of its performance.

The interests of other interest holders (creditors, suppliers, customers) are assured by applying the carrying obligations agreed by the company as well as following valid requirements of legislation.

Principle X: Information disclosure and transparency

The corporate governance framework should ensure that timely and accurate disclosure is made on all material information regarding the company, including the financial situation, performance and governance of the company.

YES

- 10.1. The company should disclose information on: The financial and operating results of the company; Company objectives; • Persons holding by the right of ownership or in control of a block of shares in the company; • Members of the company's supervisory and management bodies, chief executive officer of the company and their remuneration; • Material foreseeable risk factors; • Transactions between the company and connected persons, as well as transactions concluded outside the course of the company's regular operations; • Material issues regarding employees and other stakeholders; • Governance structures and strategy. This list should be deemed as a minimum recommendation, while the companies are encouraged not to limit themselves to disclosure of the information specified in this list.
- 10.2. It is recommended that consolidated results of the whole group to which the company belongs should be disclosed when information specified in item 1 of Recommendation 10.1 is under disclosure.
- 10.3. It is recommended that information on the professional background, qualifications of the members of supervisory and management bodies, chief executive officer of the company should be disclosed as well as potential conflicts of interest that may have an effect on their decisions when information specified in item 4 of Recommendation 10.1 about the members of the company's supervisory and management bodies is under disclosure. It is also recommended that information about the amount of remuneration received from the company and other income should be disclosed with regard to members of the company's supervisory and management bodies and chief executive officer as per Principle VIII.
- 10.4. It is recommended that information about the links between the company and its stakeholders, including employees, creditors, suppliers, local community, as well as the company's policy with regard to human resources, employee participation schemes in the company's share capital, etc. should be disclosed when information specified in item 7 of Recommendation 10.1 is under disclosure.

10.5. Information should be disclosed in such a way that neither shareholders nor investors are discriminated with regard to the manner or scope of access to information. Information should be disclosed to all simultaneously. It is recommended that notices about material events should be announced before or after a trading session on the Vilnius Stock Exchange, so that all the company's shareholders and investors should have equal access to the information and make informed investing decisions.

Information is published in the reports. The company's financial statements and annual report are submitted to the Registry of Legal Entities and the information is available to the public, except for the information provided in item 10.3, which says about professional experience, qualification and potential interest conflicts of the company's members of the supervisory and management boards. Besides, this information is not provided in full.

way YES
pe of
d
e
seess

The company provides information with the help of information disclosure system used by the Vilnius Stock Exchange. It is done in 2 languages, i.e. Lithuanian and English, simultaneously, if possible. The Stock Exchange places the information on their website and in the trading system assuring simultaneous disclosure of the information to all. The company does not disclose information, which can influence the price of the securities issued by the company, in the commentaries, interviews or other as long as such information is published via the Stock Exchange information system.

10.6. Channels for disseminating information should provide for fair, timely and cost-efficient access to relevant information by users. It is recommended that information technologies should be employed for wider dissemination of information, for instance, by placing the information on the company's website. It is recommended that information should be published and placed on the company's website not only in Lithuanian, but also in English, and, whenever possible and necessary, in other languages as well.	Notices about material events should be announced by the company via the Stock Exchange information system.
10.7. It is recommended that the company's annual reports and other periodical accounts prepared by the company should be placed on the company's website. It is recommended that the company should announce information about material events and changes in the price of the company's shares on the Stock Exchange on the company's website too.	The indicated information is available on the websites of the Stock Exchange and the committee of securities of the Lithuanian Republic.

Principle XI: The selection of the company's auditor				
The mechanism of the selection of the company's auditor should ensure independence of the firm of auditor's conclusion and opinion.				
11.1. An annual audit of the company's financial statements and report should be conducted by an independent firm of auditors in order to provide an external and objective opinion on the company's financial statements.		The firm follows law requirements on an annual audit of the company's financial statements and report, which is conducted by an independent firm of auditors. Interim audit on the company's financial statements is not conducted.		
11.2. It is recommended that the company's supervisory board and, where it is not set up, the company's board should propose a candidate firm of auditors to the general shareholders' meeting.		The company's supervisory board proposes a candidate firm of auditors to the general shareholders' meeting.		
11.3. It is recommended that the company should disclose to its shareholders the level of fees paid to the firm of auditors for non-audit services rendered to the company. This information should be also known to the company's supervisory board and, where it is not formed, the company's board upon their consideration which firm of auditors to propose for the general shareholders' meeting.		During 2006 the firm of auditors did not render auditing services to the company and did not receive any payment from the company.
