Statement of the Management

In 2007 Latvijas Krājbanka (further, Krājbanka or the Bank) successfully continued to strengthen its positions as one of the leading commercial banks in Latvijas Krājbanka as a bank can be proud of more than 80 years of experience and is continuing dynamic development within the modern market conditions. The bank's success and growth are proved not just by its financial indicators that have been growing year by year but also by research and polls placing Latvijas Krājbanka in high positions by the bank's recognition, security, the quality of provided services, and other factors.

Financial data

On 31 December 2007 the audited profit of Krājbanka Group accounted for LVL 4,954 thousand after-tax, which is by LVL 913 thousand or 22.59% more than as of 31 December 2006. On 31 December 2007 the total amount of the Group's assets represented LVL 671 million marking the increase of LVL 266 million or 65.7% in comparison with the beginning of 2007. The main growth of the Group's resource base is due to non-Monetary Financial Institution deposits which increased by LVL 260 million or 79.7% reaching LVL 586 million over the 12 months of 2007. Such a significant growth of resources promoted the increase of the Bank's non-MFI credit balance by LVL 107 million or 55.9% that facilitated reaching the balance of LVL 298 million by the end of the accounting period. Moreover, the asset item of balances due from credit institutions experienced a significant growth accounting for the increase of LVL 175 million or 176.1% and by the end of the year reached the balance of LVL 275 million.

The Krājbanka Group's profit increase over the 12 months of 2007 was promoted by the net interest income growth of LVL 4,292 thousand or 37.5% (compared to 12 months of 2006), net commission and fee income growth by LVL 823 thousand or 16.7% and increase of the profit on sale of securities and foreign exchange trading by LVL 1,523 thousand or 70 %.

It should be noted that in order to strengthen competitiveness in the labour market, the amount of staff expense of the Krājbanka Group was increased significantly – by LVL 2,205 thousand or 30.3 %. Under the influence of the high inflation rate in the country and the rise in the group's business volume, the amount of other operating expenses has grown substantially as well.

Despite the severe competition existing in the sector of Latvian commercial banks, Krājbanka retained stable market positions with a growth trend. Comparing to the situation on 31 December 2006, Krājbanka's market share by assets grew from 2.6% to 3.1%, by deposits – from 4.2% to 5.7%, and by granted loans – from 1.8% to 2.0%. Overall Krājbanka's assets, deposits and loans growth rate during 12 months of 2007 continued to outperform the comparative figure growth in the banking sector.

Major achievements and decisions

During the first half of 2007 the Bank moved its corporate headquarters to the newly built administrative building situated at 15 Jāṇa Daliṇa Street, Riga, LV-1013. The building is constructed in the style of functionalism that represents a topical tendency for the construction of financial sector buildings. Latvijas Krājbanka's building has a perfect cube form embraced by a curved shape of concrete. Thus it has become an attractive landscape accent of the city, at the same time emphasizing the stability and the certain conservatism - fully bank related characteristics.

In January 2007 year the public offer of the Bank's newly emitted ordinary and preference shares ended successfully with all 800 000 ordinary shares and 2,834 preference shares being placed for the total amount of LVL 2.8 million.

In accordance with the resolution of the extraordinary meeting of the shareholders held on 15 October 2007, the Bank has issued 2,240 thousand ordinary bearer shares. The Bank's shareholders and investors subscribed for all 2,240 thousand ordinary shares and paid in full the sales price set as LVL 5 per share.

As of 31 December 2007 the Bank's registered and paid-in capital comprised LVL 12,149 thousand (2006: LVL 9,106 thousand). The share capital consists of 12,149,246 shares, including 12,146,412 ordinary bearer shares and 2,834 "A" category preference bearer shares. Nominal value of one share is 1 (one) lat.

Latvijas Krājbanka has bought the joint-stock company AS "Pirmais atklātais pensiju fonds" (First Open Pension Fund), which was previously owned by the Commercial Bank "Baltikums". Thus, Krājbanka has become the holder of 100% of the company's shares. A new board and council were elected for the company. It is planned to change the company's name and the range of offered products. Currently the company is working on the development of two new pension plans targeted at the existing clients and also new ones interested in pension plans.

Moreover, next year Latvijas Krājbanka will continue supporting one of the major Latvian cultural events - the Latvian Nationwide Song and Dance Celebration. On 9 July 2007 the letter of intent was signed, certifying the support of our Bank to the Latvian Nationwide Song and Dance Celebration 2008. Latvijas Krājbanka will provide identification cards to every participant of the Song and Dance Celebration. Latvijas Krājbanka is ready to undertake the responsibility and will do everything possible to make the celebration unforgettable to Latvian residents.

STATEMENT OF THE MANAGEMENT

Major news on Bank's products and services

In January 2007 two investment funds were established - "LKB Obligāciju fonds" ("LKB Bond Securities Fund") and "LKB Sabalansētais fonds" ("LKB Balanced Fund"), which are managed by company "Astra Krājfondi" of the Latvijas Krājbanka Group. In November 2007, another investment fund - LKB Akciju fonds" ("LKB Share Fund) was established.

By the end of December the number of clients of Latvijas Krājbanka Group's company "Astra Krājfondi" pension plans accounted for more than 64 000, but the total assets of the 2nd tier pension plans managed by "Astra Krājfondi" comprised more than LVL 11.1 million.

On 7 January 2007 Latvijas Krājbanka established a subsidiary company "LKB Līzings". From the beginning of the year 2007 up to June "LKB Līzings" made all the necessary preliminary work in order to ensure competitive leasing service. Active sale of leasing services was launched in June 2007, and by the end of the month it had reached the portfolio amounting to LVL 757,701. As of 31 December 2007, the leasing portfolio accounted for LVL 9,545,862, which proves that during half a year the portfolio has increased 12.6 times.

The Bank continued to expand the range of broker services. Krājbanka offers its clients different transactions with financial instruments not only in the Baltic stock market, but also in foreign stock markets (Europe, the USA, Russia, etc).

Latvijas Krājbanka has expanded its investment offer to the clients – in October the distribution of Raiffeisen Capital Management (RCM) company's funds was launched. RCM offers more than 20 different investment funds, among which even the most demanding investor will be able to find the most appropriate one.

The number of foreign exchange transactions at Krājbanka has grown rapidly. Clients are offered favourable terms for forward foreign exchange rate and currency swap instruments. The attraction of new co-operation partners and increase in credit limits has facilitated even more competitive prices for the Bank's clients, as well as more effective management of the Bank's liquid assets.

The consumer loan service sector continues rapid development in the market and the Consumer loan offered by Latvijas Krājbanka plays a considerable role in its expansion.

Due to the stable growth of portfolio as well as intensive work with customers and implementation of improved customer analysis and monitoring processes, total portfolio indicators maintained a stable position and overdue debts considerably decreased. Minimum reserves for overdue loans are still below 1%, which is an excellent ratio in bank sector.

Latvijas Krājbanka will continue active work in the area of private crediting by implementing new ideas, demonstrating different work approaches and by offering its clients modern and convenient crediting services.

Latvijas Krājbanka Online bank was acknowledged to be the second best internet bank among 18 commercial banks in Latvia. According to the research by market consultation company "Metasite Business Solutions" on internet banks in the Baltic region, this year Latvijas Krājbanka`s Online bank has experienced the most rapid rise from being the sixth.

According to the market research and consultation company "Euro Data", the number of Latvijas Krājbanka online bank users has grown most rapidly among all Latvian banks. When compared to 2005, the number of Latvijas Krājbanka online bank users has grown by 60% and the total number of users has reached 96,000. Latvijas Krājbanka continues implementing different projects in order to facilitate clients to perform transactions not only by using our wide Client service centre network, but also the Online bank and Telephone banking system.

In 2007 Latvijas Krājbanka also ranked first by the number of client service centres in the banking sector in Latvia. In October in Jaunkalsnava the 100th client service centre was opened. For the clients` convenience a new clients service centre was opened in Riga, in the shopping park "Alfa". Similarly, next year considerable efforts will be devoted to the optimization and development of client service centres to provide for the improvement of client service quality and for the increase of the number of service centres throughout Latvia.

On 31 December 2007 Latvijas Krājbanka had 107 client service centres, 29 of which were mini banks. Besides, the bank installed 31 new ATMs, and by the end of December their number reached 177. Latvijas Krājbanka continues expanding the Bank's network throughout Latvia.

Public activities

The fact that the Bank follows the latest tendencies is being proved not only by good financial indicators and development level of bank technologies, but also by its successful social activities. The success was confirmed by residents` polls, in which Latvijas Krājbanka ranked in top positions by the bank's recognition, security and other categories.

There has been a significant increase in the reputation of the Bank. In the Top of Enterprises, designed by newspaper "Diena" in cooperation with the public relations company "Nords Porter Novelli", Latvijas Krājbanka ranked 37th, leaving behind the majority of banks and enterprises working in the economic sector. In comparison with the previous year Latvijas Krājbanka has climbed 4 positions up in the reputation Top.

AS LATVIJAS KRĀJBANKA

STATEMENT OF THE MANAGEMENT

In 2007 corporate estimators from the financial company "Laika Stars" determined the TOP 100 of Latvia's most valuable enterprises. Latvijas Krājbanka ranked 23rd among the most valuable enterprises and 8th among the most valuable banks in Latvia.

Latvijas Krājbanka is the second best-known bank in Latvia. According to the bank research made by the market and public opinion research centre SKDS in January 2007, 83% Latvian residents know Latvijas Krājbanka. At the same time the residents consider Latvijas Krājbanka one of the most reliable banks in Latvia. The sociological poll results made by the Economic Research Institute ranked Latvijas Krājbanka the fourth with 27.6%.

During 2007 Latvijas Krājbanka continued strategic promotion of the Latvian musical and cultural life by supporting several important cultural events. Latvijas Krājbanka was the main sponsor of the "Latvian Annual Music Award Ceremony 2006" and has supported other important musical and cultural life events. The rock-opera "The Chosen One" ("Izredzētais") and the concert of songs by Latvian composer Imants Kalniņš "Imanta Kalniņa Dziesmu spēles" were organized in cooperation with Latvijas Krājbanka.

In cooperation with Vītols Fund, Latvijas Krājbanka has established a scholarship, which will be awarded to students from different regions of Latvia every year. This year four students from the historical regions of Latvia - Vidzeme, Zemgale, Kurzeme and Latgale - were granted the scholarship.

In the first half of 2007 Latvijas Krājbanka demonstrated achievements not only in the financial sector, but also in sports. In the traditional Bank Basketball Cup Tournament, which since 1993 has become a tradition Latvijas Krājbanka won the championship cup. Latvijas Krājbanka has signed the collaboration agreement with the basketball club "Valmiera" which is a promising team showing great play not only in Latvia, but also in the whole Baltic region.

In order to help the state in solving a topical problem and minding its clients and their security, Latvijas Krājbanka in collaboration with the State Police presented reflectors to the residents throughout Latvia. This campaign gained response in the society and mass media. During the campaign 20,000 reflectors were distributed to the residents during the police raids on highways and in the client service centres of Latvijas Krājbanka throughout Latvia.

The reasons behind the success of Latvijas Krajbanka lie firstly in the Bank's history. Latvijas Krājbanka is the oldest bank in Latvia and has kept its values, and it is not necessary to reaffirm them. At the same time Latvijas Krājbanka has proved to be a new, dynamic and modern bank. Not only the good financial results and development level of the Bank's technologies but also its successful social activities suggest that the bank follows the latest trends of banking.

The accompanying notes on pages 14 to 57 form an integral part of these financial statements.

1. INCORPORATION AND PRINCIPAL ACTIVITIES

JSC Latvijas Krājbanka (hereinafter – the Bank) was founded in 1924 as Latvijas Pasta Krājbanka (*Latvian Post Savings Bank*). In June 1940 it was reorganized and included into the structure of the USSR Savings Bank. Until 1991 the main task of the Bank was to attract financial resources and service them within the framework of the Soviet banking system.

On 3 September 1991, the Supreme Council of the Republic of Latvia decided to re-establish AS Latvijas Krājbanka. AS Latvijas Krājbanka took over all rights of the former USSR National Savings Bank and on 15 October 1992 received a license to perform banking operations. The Bank was registered in the Enterprise Register of the Republic of Latvia on 16 October 1992, as a state owned commercial bank. On 29 March 1994, the Bank was re-registered as a state joint-stock company Latvijas Krājbanka. In accordance with the Order of the Cabinet dated 18 January 1996, the state joint stock company Latvijas Krājbanka was included into the list of entities to be privatized. During the first phase of the privatization process in 1997, the Bank was merged with Rīgas Apvienotā Baltijas banka (Union Baltic Bank in Riga). During the subsequent public offering the shares of the Bank were purchased by residents of Latvia using privatization certificates. On 20 September 2005, Snoras, one of the largest commercial banks in Lithuania, purchased an 83.01% shareholding and became the major shareholder of the Bank. The Bank's financial statements are consolidated in the financial statements of the Snoras Group.

As of 31 December 2007, the Bank had customers' service centres in all regions of Latvia:

<u>Region</u>	Customer service centres			
Riga Latgale	45 (38) 21			
	(12)			
Vidzeme, except Riga	17 (13)			
Kurzeme	17 (11)			
Zemgale	7			
-	(7)			
Total	107 (81)			

The comparatives for 2006 are disclosed in brackets.

The financial statements of the Bank for the year ended 31 December 2007 were approved by a resolution of the Bank's Board on 28 February 2008. The Bank's shareholders have the power to amend the financial statements after issue.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A summary of the principal accounting policies consistently applied (unless otherwise stated) throughout the years ended 31 December 2007 and 2006, is set out below:

a) Statement of compliance

The financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS) as adopted by the European Union and the Latvian Financial and Capital Market Commission's "Regulations on the preparation of annual reports and annual consolidated accounts for banks, investment brokerage firms and investment management companies".

b) Basis of preparation

The consolidated financial statements have been prepared on a historical cost basis, except for the following assets and liabilities which are measured at fair value: derivative financial instruments, financial assets and financial liabilities at fair value through profit or loss, as well as land and buildings which are measured at revalued amount.

The accounting policies adopted in the preparation of these consolidated financial statements are consistent with those followed in the preparation of the Group's annual financial statements for the year ended 2006, except for the adoption of the following amendments mandatory for annual periods beginning on or after 1 January 2007:

- IFRS 7 Financial Instruments: Disclosures. This standard requires disclosures that enable users of the financial statements to evaluate the significance of the Group's financial instruments and the nature and extent of risks arising from those financial instruments. The new disclosures are included throughout the financial statements. While there has been no effect on the financial position or results, comparative information has been revised where needed.
- IFRIC 7 Applying the Restatement Approach under IAS 29 "Financial Reporting in Hyperinflationary Economies". This interpretation provides guidance on how to apply the requirements of IAS 29 in a reporting period in which an entity identifies the existence of hyperinflation in the economy of its functional currency, when that economy was not hyperinflationary in the prior period. The interpretation had no impact on the financial position or performance of the Group.
- IAS 1 Presentation of Financial Statements. This amendment requires the Group to make new disclosures to enable users of the financial statements to evaluate the Group's objectives, policies and processes for managing capital. These new disclosures are shown in Note 42.

- IFRIC 8 Scope of IFRS 2. This interpretation requires IFRS 2 to be applied to any arrangements in which the entity cannot identify specifically some or all of the goods received, in particular where equity instruments are issued for consideration which appears to be less than fair value. As equity instruments are not issued to employees, the interpretation had no impact on the financial position or performance of the Group.
- IFRIC 9 Reassessment of Embedded Derivatives. IFRIC 9 states that the date to assess the existence of an embedded derivative is the date that an entity first becomes a party to the contract, with reassessment only if there is a change to the contract that significantly modifies the cash flows. The interpretation had no impact on the financial position or performance of the Group.
- IFRIC 10 Interim Financial Reporting and Impairment. The Group adopted IFRIC Interpretation 10 as of 1 January 2007, which requires that an entity must not reverse an impairment loss recognised in a previous interim period in respect of goodwill or an investment in either an equity instrument or a financial asset carried at cost. As the Group had no impairment losses previously reversed, the interpretation had no impact on the financial position or performance of the Group.

The Bank and the Group has also early adopted IFRS 8. Adoption of this standard did not have any effect on the financial performance or the position or the disclosures of the Bank and the Group.

- The principal effect of the change to IFRS 8 Operating Segments is that this standard requires disclosure of the information about the Group's operating segments and replaced the requirement to determine primary (business) and secondary (geographical) reporting segments of the Group. The Group determined that there are no operating segments used by the management of the Group, as the management of the Group are not using disaggregated information.
- The entity-wide disclosures are presented in these financial statements in the following notes. The
 revenues by external customers for similar products and services are reported in Notes 3 and 5. As the
 major Group's clients during the reporting year were Latvian residents, no geographical analysis of
 revenues is disclosed. Majority of Group's non-current assets other than financial instruments are
 located in Latvia, so no geographical analysis of non-current assets is disclosed.

The accompanying financial statements are reported in thousands of Lats (LVL 000's), unless stated otherwise.

c) Basis of consolidation

The consolidated financial statements comprise the financial statements of the Bank as at and for the year ended 31 December 2007 and 2006. The Bank has consolidated its subsidiaries as disclosed in Note 20. Subsidiaries are consolidated from the date on which the control is transferred to the Bank. Control is achieved when the Bank has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities.

In preparing the consolidated financial statements, respective items have been evaluated in accordance with the uniform accounting policies and valuation principles applied by the Bank in conformity with the requirements of the Financial and Capital Market Commission and International Financial Reporting Standards as adopted by the European Union. The subsidiaries' financial statements are included in the Group's consolidated financial statements based on the full consolidation method.

All items in the Bank's and Group's financial statements have prior year comparatives. Should the difference between information on the Group and that on the Bank be insignificant, such information on the Group is not separately presented.

d) Income and expense recognition

Interest revenue and expenses are recognized in the income statement on an accrual basis using the effective interest rate. Interest revenue includes various fixed payments, coupons earned on fixed income investments and trading securities and accrued discount and premium on treasury bills and other discounted investments.

Commission and fee revenue and expense are included in the income statement over the period or at a specific time, except for commission and fee revenue and expense directly attributable to financial assets/ liabilities measured at amortised cost – for these assets/ liabilities the respective commission and fee revenue and expense form an integral part of the effective interest rate.

e) Foreign currency translation

Transactions denominated in foreign currencies are recorded in lats at the actual rates of exchange published by the Bank of Latvia at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are translated into lats at the rate of exchange prevailing at the year-end. Any gain or loss resulting from currency rate fluctuations subsequent to the date of the transaction is included in the income statement as a profit or loss from revaluation of foreign currency positions.

The principal foreign exchange rates (LVL to 1 foreign currency unit) published by the Bank of Latvia and used in the preparation of the Bank's balance sheet were as follows:

<u>Reporting date</u> <u>USD</u> <u>EUR</u>

As of 31 December 2007 0.484000 0.702804 As of 31 December 2006 0.536000 0.702804

f) Corporate income tax

Corporate income tax at the rate of 15% (2006: 15%) is calculated in accordance with Latvian tax regulations and is based on the taxable profit reported for the taxation period.

Deferred taxes are provided for temporary differences between the tax base of an asset or liability and its carrying amount in the balance sheet. The tax base of an asset or liability is the amount attributed to that asset or liability for tax purposes. The amount of deferred tax provided is based on the expected manner of realization or settlement of the carrying amount of assets and liabilities, using future tax rates applicable at the balance sheet date. Deferred income tax relating to items recognized directly in equity is recognized in equity and not in income statement.

Deferred tax assets are recognized only to the extent that it is probable that future taxable profits will be available against which the asset can be utilized. Deferred tax assets are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

g) Earnings per share

Earnings per share are calculated by dividing the net profit for the year attributable to ordinary shareholders of the Bank by the weighted average number of shares in issue during the year.

For the purpose of calculating diluted earnings per share, the net profit attributable to ordinary shareholders of the Bank and the weighted average number of shares outstanding are adjusted for the effects of all dilutive potential ordinary shares (subordinated debt).

h) Impairment of non-financial assets

Where the carrying amount of an asset is greater than its estimated recoverable amount, it is written down immediately to its recoverable amount. The recoverable amount is the greater of the following amounts: the market value which can be recovered from the sale of an asset under normal conditions, net of selling costs (fair value less costs to sell), or the estimated future economic benefits arising from the use of the asset (value in use). The largest components of the Group's assets are periodically tested for impairment and impairments are provisioned through the profit and loss account "Impairment losses".

i) Originated loans and loan impairment

The Management of the Group have considered both specific and collective (portfolio) risks in determining the allowance for credit losses (impairment). The specific allowance is determined after individually reviewing all loans for potentially uncollectible amounts and is based on the customer's financial position, value of collateral and fulfilment of loan agreement. The collective (portfolio) allowance relates to existing credit losses, as well as to the losses 'incurred, but not yet known to the Group. This method permits to attribute each group of loans to historical loss experience for groups of assets with similar credit characteristics and observable market data reflecting current circumstances.

When a loan or advance has been classified as non-performing, an allowance for credit losses is established for that specific loan or advance for the amount of the outstanding balance, which is deemed impaired. The level of the allowance is based on the present value of expected future cash flows considering relevant factors including, but not limited to, the Group's past loan loss experience, known and inherent risks in the portfolio of loans and advances, adverse situations that may affect the borrowers' ability to repay, the collateral value and current economic conditions as well as other relevant factors affecting loan and advance collectability and collateral values. Ultimate losses may vary from the current estimates.

The value of the collateral held in connection with loans and advances is based on the estimated realisable value of the asset and is taken into account when determining expected cash flows and accordingly the allowance. The above estimates are reviewed periodically, and, as adjustments become necessary, they are reported in the income statement in the reporting period in which they become known. The Management of the Group have made their best estimates of losses and believe the estimates presented in the financial statements to be reasonable in the light of the available information.

When loans and advances cannot be recovered, they are written off and charged against allowances for credit losses. They are not written off until all the necessary legal procedures have been completed and the ultimate amount of the loss is determined.

j) Finance lease (Group as a lessor)

For the purposes of these financial statements, finance lease receivables are classified as Loans and advances to customers.

Finance leases, which confer risk and rewards similar to those attached to owned assets, are recognized as assets on commencement of the lease term at amounts equal at the inception of the lease to the net investment in the lease. The finance income is allocated to periods during the lease term to produce a constant periodic return on the net investments outstanding in respect of the finance leases.

k) Operating lease (Group as a lessor and lessee)

Operating lease is a lease transaction, which is not a finance lease. The lessor bears substantially all the risks and rewards that are associated with the right of ownership.

Operating lease is the type of lease, where entering in the contract for a certain period based on the client choice, the client is paying lease every month. In the case of operating lease, the ownership of the object after the end of lease period does not transfer to lessee. Operating lease income is recognized on a straight-line basis.

Where the Group is the lessee, operating lease expense is recognized on a straight line basis.

Financial instruments

Classification

Held-to-maturity investments are financial assets with fixed or determinable payments and fixed maturity that the Group has the intent and the ability to hold to maturity.

Financial instruments at fair value through profit or loss: the Group/ the Bank at inception has classified these financial assets or liabilities as designated at fair value through profit or loss and trading investments. The sub-category financial assets designated at fair value through profit or loss, is classified based on the way the management analyses these assets that is compliant with the documented risk management approach accepted by Asset and liability management committee (ALMCo). Assets are classified as designated at fair value through profit or loss when the ALMCo makes the decision about financial assets and liabilities or class of them before transaction is initialized.

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market.

Available-for-sale assets are financial assets that are not classified in one of the above mentioned categories.

Financial liabilities are classified into those at fair value through profit or loss and those accounted for at amortized cost.

Recognition

The Group recognizes a financial asset or a financial liability on its balance sheet when and only when, the Group becomes a party to the contractual provisions of the instrument.

Purchase of securities is accounted for using settlement date.

Measurement

Held-to-maturity investments are initially recognized at fair value plus transaction costs and subsequently remeasured at amortised cost less impairment. Amortised cost is calculated using the effective interest method. Premiums or discounts, as well as initial transaction costs, are included in the carrying amount of the related financial instrument and amortised based on the effective interest rate of the instrument.

Revaluation of financial assets at fair value through profit or loss, trading investments and available-for-sale assets are based on quoted market price. If quoted prices are not readily available, the Bank uses alternative methods to determine the fair value, for example, using pricing models or discounted cash flow techniques.

Where discounted cash flow techniques are used, estimated future cash flows are based on the Management's best estimates and the discount rate is a market rate at the balance sheet date for an instrument with similar terms and conditions and risk. Where pricing models are used, the information is based on market related measures at the balance sheet date. There are no assets where quoted prices are not available.

Revaluation of financial assets and financial liabilities at fair value through profit or loss and trading investments is directly recognized in the income statement.

Financial liabilities accounted for at amortized cost are initially measured at fair value less any transaction costs that are directly attributable to the issue of the respective liability. Subsequently, they are measured at amortized cost using the effective interest method. The components of compound financial instruments such as convertible bonds, that contain both liability and equity elements, are accounted for separately. The equity component, representing the conversion feature of the bond, is measured at the residual amount after deducting from the instrument as a whole the amount separately determined as the fair value of the liability component on the date of issue. The fair value of the liability component on the date of issue is determined as the fair value of a bond with similar terms and conditions but without a conversion feature.

Derecognition

A financial asset (or, where applicable a part of a financial asset or part of a group of similar financial assets) is derecognised where:

• the rights to receive cash flows from the asset have expired; or

- the Group and the Bank has transferred its rights to receive cash flows from the asset, or retained the right to receive cash flows from the asset, but has assumed an obligation to pay them in full without material delay to a third party under a 'pass-through' arrangement; and
- the Group and the Bank either (a) has transferred substantially all the risks and rewards of the asset, or (b) has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

Where the Group and the Bank has transferred its rights to receive cash flows from an asset or has entered into a passthrough arrangement, and has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the asset is recognised to the extent of the Group's and the Bank's continuing involvement in the asset. Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Group and the Bank could be required to repay.

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires.

Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognised in profit or loss.

m) Investments in privatization certificates

Investments in privatization certificates are stated at their market value determined in accordance with instructions of the Bank of Latvia.

Unrealized profits or losses arising as a result of stating privatization certificates at market value are respectively credited or charged to the statement of income as profit or loss from the revaluation of securities.

n) Derivatives

In the normal course of business, the Bank is a party to contracts for forward foreign exchange rate and currency swap instruments. Financial assets and financial liabilities arising from recognizing derivatives at their fair value are recognized in the balance sheet as the assets or liabilities of these agreements. Foreign exchange instruments are valued according to the present value of the difference between the current forward rate at the balance sheet date for the remaining maturity of the contract, based on rates set by the Bank of Latvia, and the contractual rate. The revaluation result is disclosed as profit or loss from currency exchange trading.

o) Intangible assets

Intangible assets are recognized when it is probable that the asset will generate future economic benefits and their cost can be measured reliably. Intangible assets are amortized over the period of their useful life on a straight-line basis. Computer software is treated as an intangible asset only when it is not an integral part of the related hardware. The amortisation rates in range of 12.5% to 20% are applied to intangible assets.

p) Business combinations and goodwill

Upon acquisition, subsidiaries are accounted for under the purchase method of accounting. Any goodwill arising on acquisition is recognised in the consolidated balance sheet, any negative goodwill is immediately charged to the income statement.

Goodwill represents the excess of the acquisition cost over the fair value of the Group's share of the net assets of the acquired subsidiary/ associated undertaking at the date of acquisition. Goodwill is reported in the balance sheet as a component of "Intangible assets". Goodwill is not amortized and is tested for impairment on an annual basis.

q) Fixed assets

Fixed assets are recorded at historical cost or their revalued amount, less accumulated depreciation. If the recoverable amount of a fixed asset is lower than its carrying amount, the fixed asset is written down to its recoverable amount.

Depreciation is provided using the straight-line method over the estimated useful life of the asset. Assets under construction and preparation are not depreciated. The following depreciation rates have been applied:

Type of fixed assets	<u>Annual Rate</u>
Buildings	2%-6,667%
EDP equipment	25%
Equipment and fixtures	10%-33,33%
Transport vehicles	10%

Fixed assets maintenance and running repair costs are charged to the income statement as incurred.

Leasehold improvements and capital repair costs are capitalized and depreciated over the shorter of the useful life and the remaining lease contract period on a straight-line basis.

r) Sale and repurchase agreements

Sale and repurchase agreements are accounted for as financing transactions. Under sale and repurchase agreements, where the Group is the transferor, assets transferred remain on the Group's balance sheet and are subject to the Group's usual accounting policies, with the purchase price received stated as a liability to the transferee.

Where the Group is the transferee, the assets are not recognized in the Group's balance sheet, but the purchase price paid to the transferor is included as a receivable from the transferor. Interest income or expense arising from outstanding sale and repurchase agreements is recognized in the income statement over the term of the agreement using effective interest rate.

s) Cash and cash equivalents

Cash and cash equivalents comprise cash and deposits with the Bank of Latvia and other credit institutions with original maturity of three months or less.

t) Provisions

A provision is recognized in the balance sheet when the Group has a legal or constructive obligation as a result of a past event, and it is probable that an outflow of economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. If the effect is material, provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability.

u) Vacation accruals

The vacation accruals are future salary expected to be paid and are estimated for the Group's personnel based on the total number of holidays earned but not taken, multiplied by the average daily remuneration expense for the preceding six months including social security contributions, that approximates the expected cash flows to be paid.

v) Other off-balance sheet instruments

In the ordinary course of business the Group is involved with commitments to extend loans and advances, set limits for credit cards accounts, issue overdrafts and financial guarantees, as well as commercial letters of credit. Such financial instruments are recorded in the financial statements as follows:

- Commitment to extend loans ad advances, credit card and overdraft facilities are recognized on drawdown;
- financial guarantees and letters of credit are recognized when the related fee received as consideration is recognized.

w) Assets and liabilities under management

Assets and liabilities managed by the Group on behalf of its customers, trusts and other institutions are not regarded as assets or liabilities of the Group and, therefore, are not included in its balance sheet. The Group assumes no control, no risk and no benefit for assets and liabilities under management.

x) The fair value of financial assets and liabilities

The fair value of financial assets and liabilities represent the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transactions. If the fair value of financial assets and liabilities is different from the balance sheet value, then the fair value of financial assets and liabilities is disclosed in the notes to the financial statements.

y) Adoption of new and revised IFRSs

The Group in these financial statements has not adopted the following IFRS and IFRIC interpretations, which are published, but have not yet come into force.

- IAS 1 Presentation of Financial Statements Revised (effective for annual periods beginning on or after 1 January 2009 once adopted by EU). IAS 1 has been revised to enhance the usefulness of the information presented in the financial statements. Revision includes number of changes, including introduction of a new terminology, revised presentation of equity transactions and introduction of a new statement of comprehensive income as well as amended requirements related to the presentation of the financial statements in a case of their retrospective restatement.
- IAS 23 Borrowing Costs Revised (effective for annual periods beginning on or 1 January 2009 once adopted by EU). The revised standard eliminates the option of expensing all borrowing costs and requires borrowing costs to be capitalised if they are directly attributable to the acquisition, construction or production of a qualifying asset. In accordance with the transitional requirements of the Standard, the Group will adopt this as a prospective change. Accordingly, borrowing costs will be capitalized on qualifying assets with a commencement date after 1 January 2009. No changes will be made for borrowing costs incurred to this date that have been expensed.

- IAS 27 Consolidated and Separate Financial Statements Revised (effective for annual periods beginning on or 1 January 2009 once adopted by EU). Revised standard requires that changes in ownership interest in a subsidiary are accounted for as equity transactions. Also, accounting for losses incurred by the subsidiary was changed: such losses will be allocated between the controlling and non-controlling interests even if the losses exceed the non-controlling equity investment in the subsidiary. On a loss of control of a subsidiary, any retained interest will be remeasured to fair value and will impact the gain or loss recognized on disposal. In addition, revised standard provides more guidance as to when multiple arrangements should be accounted for as a single transaction. These most significant changes introduced by the revised standard will be applied prospectively, except for the multiple arrangements that have been accounted for as a single transaction these arrangements require retrospective assessment.
- IFRS 3 Business Combinations Revised (effective for annual periods beginning on or 1 January 2009 once adopted by EU). The scope of IFRS 3 has been revised to include combinations of mutual entities and combinations without consideration (dual listed shares). Also a number of changes are introduced in accounting for business combinations that will impact the amount of goodwill recognized, the results in the period when the acquisition occurs, and future revenues reported. In accordance with the transitional requirements of the Standard, the Group will adopt this as a prospective change. Accordingly, assets and liabilities arising from business combinations prior to the date of application of the revised standard will not be restated.
- IFRIC 11 IFRS 2 Group and Treasury Share Transactions (effective for annual periods beginning on or after 1 March 2007). The interpretation provides guidance on classification of transactions as equity-settled or as cash-settled and also gives guidance on how to account for share-based payment arrangements that involve two or more entities within the same group in the individual financial statements of each group entity.
- IFRIC 12 Service Concession Agreements (effective for annual periods beginning on or after 1 January 2008 once adopted by EU). The interpretation addresses how service concession operators should apply existing International Financial Reporting Standards (IFRSs) to account for the obligations they undertake and rights they receive in service concession arrangements.
- IFRIC 13 Customer Loyalty Programmes (effective for annual periods beginning on or after 1 July 2008
 once adopted by EU). This interpretation requires customer loyalty award credits to be accounted for as
 a separate component of the sales transaction in which they are granted and therefore part of the fair
 value of the consideration received is allocated to the award credit and deferred over the period that
 the award credit is fulfilled.
- IFRIC 14 IAS 19 The Limit on Defined Benefit Asset, Minimum Funding Requirements and their Interaction (effective for annual periods beginning on or after 1 January 2008 once adopted by EU).
 This interpretation specifies the conditions for recognising a net asset for a defined benefit pension plan.

The Group expects that the adoption of the pronouncements listed above will have no significant impact on the Group's financial statements in the period of initial application, except for IAS 1 Presentation of Financial Statements – Revised.

IAS 1 Presentation of Financial Statements – Revised

This standard sets out new requirements on the presentation of the statement of changes in equity and introduces a new statement of comprehensive income that combines all items of income and expense recognized in profit or loss together with "other comprehensive income" and requires a separate disclosure of all items reclassified from other comprehensive income to profit and loss as well as disclosure of the income tax relating to each component of other comprehensive income. Also, requirements related to the presentation of the financial statements in a case of their retrospective restatement are amended and new terminology, replacing "balance sheet" with "statement of financial position" and "cash flow statement" with "statement of cash flows", although the titles are not obligatory, is introduced. The Group is still estimating the impact of the adoption of this revision.

3. INTEREST REVENUE AND EXPENSE

Loss from fixed assets disposal	87	40	87	40
Other operating expenses	1,220	443	1,097	437
Total operating expenses	8,076	5,386	7,926	5,328

In 2007 the Bank concluded an operating lease contract for the usage of real estate and land. The building at 15 Jāṇa Daliṇa Street is being used as an administrative office. The term of the lease contract is 20 years, ending 31 March 2027. The total expected minimum lease payment amounts to LVL 25,975 thousand. That includes payments up to 1 year of LVL 1,355 thousand, payments 1-5 years – LVL 5,421 thousand and LVL 19,199 thousand for payments over 5 years.

In 2006 and 2007 the Bank concluded operating lease contracts with SIA "Unilīzings" for the time period from one to three years for the lease of 49 (forty-nine) cars. According to those contracts, the operating lease per year comprises LVL 99 thousand. The total amount of operating lease payments throughout the period comprises of LVL 472 thousand. The payments up to one year comprise of LVL 99 thousand, from one up to five years – LVL 375 thousand.

10. IMPAIRMENT LOSSES

An analysis of impairment losses for the Bank and the Group is presented as follows:

LVL`000	Impairment losses for loans	Other impairment losses	Total
Impairment losses as at 31 December 2005	2,814	181	2,995
Impairment losses	1,175	11	1,186
Reversal of impairment losses	(482)	(2)	(484)
Recovery of assets previously written-off	(183)	-	(183)
Net charge to the income statement	510	9	519
Foreign exchange movements	(12)	(1)	(13)
Net write-offs and recoveries of assets	(462)	(14)	(476)
Impairment losses as at 31 December 2006	2,850	175	3,025
Impairment losses	1,769	11	1,780
Reversal of impairment losses	(551)	(1)	(552)
Recovery of assets previously written-off	(214)	-	(214)
Net charge to the income statement	1,004	10	1,014
Foreign exchange movements	(2)	(1)	(3)
Net write-offs and recoveries of assets	(1,607)	(3)	(1,610)
Impairment losses as at 31 December 2007	2,245	181	2,426

There is no impairment for off-balance sheet items.

11. CORPORATE INCOME TAX

	Group	Group	Bank	Bank
LVL '000	2007	2006	2007	2006
Deferred tax income	(43)	(76)	(43)	(76)
Corporate income tax	962	730	955	730
Corporate income tax for the reporting year	919	654	912	654

The reconciliation of corporate income tax at the statutory rate of 15% (2006: 15%) and the actual corporate income tax expense was as follows:

LVL '000	Group 2007	Group 2006	Bank 2007	Bank 2006
Profit before corporate income tax	5,873	4,695	6,062	4,760
Theoretical tax: 15% (2006: 15%)	881	704	909	714
Non-deductible expenses, net	207	59	172	49
Tax allowance on charity	(169)	(109)	(169)	(109)
Corporate income tax for the reporting year	919	654	912	654

Reconciliation of prior year deferred tax balance with that of current period is as follows:

LVL '000	Group 2007	Group 2006	Bank 2007	Bank 2006
Deferred tax liability at the beginning of the reporting period	755	840	755	840
Deferred tax charged through the income statement	(43)	(76)	(43)	(76)
Deferred tax charged through revaluation reserve	136	(9)	136	(9)
Deferred tax liability at the end of the reporting period	848	755	848	755

The deferred tax assets and liabilities relate to the following items:

	Group	Group	Bank	Bank
LVL '000	2007	2006	2007	2006
Deferred tax liability:				
-temporary difference on fixed asset carrying value for				
financial purposes and tax written down value	1,192	1,002	1,192	1,002
Deferred tax asset:				
- loan commissions	(225)	(165)	(225)	(165)
- other provisions	(119)	(82)	(119)	(82)
Deferred tax liability	848	755	848	755

12. EARNINGS PER SHARE

Earnings per share are calculated based upon the profit after taxation attributable to ordinary shareholders of the Bank and the average number of shares in issue during the year.

	Group 2007	Group 2006
Profit after taxation (LVL'000)	4,954	4,041
Average number of shares in issue (thousand)	9,745	9,106
Earnings per share	0.508	0.444

Preference shares have not been added.

Diluted earnings per share are calculated based on the agreements, which in future might impact the number of shares in issue, as well as leave an impact on the current year income statement. Thus the diluted earnings per share are calculated by dividing profit or loss after taxation adjusted for the interest paid on subordinated debt, by the average number of shares in issue during the year adjusted for the effects of the amount of shares, which might be issued by converting subordinated debt from "Convers group management company" at the ratio of 1.15 LVL of subordinated debt for one share (see also Note 29).

	Group 2007	Group 2006
Profit after taxation (LVL'000) Interest for subordinated debt, net of income tax (LVL'000)	4,954 230	4,041 233
	5,184	4,274
Average number of shares in issue (thousand) Potential shares as a result of conversion of subordinated debt (thousand)	9,745 3,361	9,106 3,361
	13,106	12,467
Diluted earnings per share (LVL)	0.396	0.343

13. CASH AND DEPOSITS ON DEMAND WITH THE CENTRAL BANK

In 2007 the Bank established its own company SIA "LKB līzings" ("LKB Līzings" Ltd) with share capital in the amount of LVL 120 thousand. SIA "LKB līzings" was registered in the Commercial Register of the Republic of Latvia on 3 January 2007.

In 2006 the Bank established its own asset management company "LKB Asset management" with share capital in the amount of LVL 120 thousand. The asset management company "LKB Asset management" was registered in the Commercial Register of the Republic of Latvia on 11 April 2006.

The shares of the subsidiaries are not listed.

20. BUSINESS ACQUISITION

On 25 June, 2007, the Bank bought 100% of AS "Pirmais atklātais pensiju fonds"" (JSC "First Open Pension Funs"), acquiring 292,000 shares for the total amount of 32 thousand lats, thus becoming the only holder of the company's shares. On the acquisition date, the fair value of net acquired assets was equal to the purchase consideration.

Fair value of AS "leguldījumu sabiedrība " Pirmais atklātais pensiju fonds "" assets, liabilities and off-balance sheet liabilities at the acquisition date were as follows:

	Fair value at the acquisition date	Carrying value at the acquisition date
Balances due from credit institutions	30	30
Other assets	3	5
Total	33	35
Liabilities	1	1
Bank's share of net assets measured at fair value	32	-
Paid	32	-

AS "Pirmais atklātais pensiju fonds" turnover and net profit for the time period from 1 July 2007 to 31 December 2007 comprised LVL (9) thousand and LVL (8) thousand respectively. Early in the year 2007 the fair value comprised 27 thousand LVL and by the end of 2007 – LVL 21 thousand. The transaction would cause loss in the amount of LVL 5 thousand in the early 2007, and in the amount of LVL 11 thousand by the end of 2007.

In 2006 the Bank bought an additional 50% of AS "leguldījumu sabiedrības "Astra Krājfondi"", by acquiring 120,000 shares for the amount of 241 thousand lats, thus becoming the only owner of the company's shares.

Revaluation reserve statement:

LVL '000	Group
Revaluation reserve as at 31.12.2005	2,830
Change in deferred tax related to revaluation reserve	9
Revaluation reserve 31.12.2006	2,839
Increase of revaluation reserve after revaluation of the land and building in 2007	2,913
Decrease of the previously revaluated building value	(264)
(A) Change in revaluation reserve due to changes in fixed assets value	2,649
Change in temporary deferred tax differences due to asset revaluation difference	(146)
Change in deferred tax related to revaluation reserve	10
Revaluation reserve as at 31.12.2007	5,352
(B)Decrease of revaluation reserve, which is reflected in the income statement	(56)
Total revaluation reserve changes for fixed assets (A+B)	2,593

The land and buildings are measured, applying the revaluation method, unified for the whole category.

On 28 September 2007, the Bank signed a contract with two independent consultants for the revaluation of the Bank's real estate. Only services of certified valuers were used and revaluation was made in accordance with Latvian Property Valuation Standards and International Valuation Standards. Revaluation was made within 40 (forty) days from the day of the Contract conclusion. The fair value was determined by reference to market-based evidence, both using the comparable market transactions and the income methods.

As a result of valuations in 2005 and 2007, the revalued value of fixed assets is approximately LVL 5,472 thousand, including revaluation reserve increase to the amount of LVL 5,592 thousand. If both revaluations were not performed, the carrying amount of those fixed assets would comprise of LVL 2,353 thousand.

"Convers Group Management Company"	3,866	3,865	
"Akademgrupp" Total other liabilities	5,047 8,913	3,810 7,675	

On 8 November 2005 the Bank signed a subordinated loan contract with "Convers Group Management Company" for the amount of EUR 5.5 million with an interest rate of 7 % per year and the repayment term seven years. The lender has the right to request conversion of the subordinate capital into ordinary shares in accordance with the procedure specified in the contract and the applicable regulatory acts. If the subordinate capital is converted into ordinary shares, the purchase price of the ordinary shares under the contract is LVL 1.15 per one share.

On 27 December 2006, the Bank signed a subordinated loan contract with the closed joint-stock company "Akademgrupp" for the amount of USD 7.1 million with an interest rate of 8.6 % per year and the repayment term of seven years.

On 23 August 2007, the Bank signed a subordinated loan contract with the closed joint-stock company "Akademgrupp" for the amount of USD 3.3 million with an interest rate of 9.3 % per year and the repayment term of six years.

According to the provisions under the above-mentioned contracts, the lender has the right to demand early repayment of the loan only upon liquidation of the Bank, and the lender's claim will be settled following settlement of the claims of all other creditors but before settlement of the claims by the Bank shareholders.

30. SHAREHOLDERS' EQUITY AND RESERVES

On 31 December 2007 ,the Bank's registered and paid-in capital comprised LVL 12,149 thousand lats (in 2006: LVL 9,106 thousand). The stock capital consists of 12,149,246 shares, including 12,146,412 ordinary bearer shares and 2,834 "A" category preference bearer shares. Nominal value of one share is 1 (one) lat.

In accordance with the resolution of the extraordinary meeting of the shareholders held on 29 October 2006, the Bank has issued 800 thousand ordinary bearer shares and 850 thousand "A" category preference bearer shares. The Bank's shareholders and investors subscribed for all 800 thousand ordinary shares and 2,834 "A" category preference shares and paid in full the sales price set as LVL 3.50 per ordinary share and LVL 7.00 per preference share. Thus after closing of the public offer the Bank's paid-in capital comprised LVL 9,909 thousand. The share capital increase was registered in the Commercial Register on 26 March 2007.

In accordance with the resolution of the extraordinary meeting of the shareholders held on 15 October 2007, the Bank has issued 2,240 thousand ordinary bearer shares. The Bank's shareholders and investors subscribed for all 2,240 thousand ordinary shares and paid in full the sales price set as LVL 5.00 per share. Thus after closing of the public offer the Bank's paid-in capital comprised LVL 12,149 thousand. The share capital increase was registered in the Commercial Register on 18 December 2007.

All 12,149,246 shares of AS "Latvijas Krājbanka" are listed on the Baltic Second List of the AS "Rīgas Fondu Birža". There are no limitations for transfer of the Bank's shares.

The Bank's principal shareholders as at 31 December 2007 and 2006 were as follows:

	31.	31.12.2007		2.2006
LVL '000	Paid-in share capital	% of total paid-in capital	Paid-in share capital	% of total paid-in capital
AS banka "Snoras"	9,223	75.92	6, 829	75.00
AS "West Investment"	868	7.15	868	9.53
"Geminy Investment Fund LTD"	_*	-	729	8.01
"Ratto Holdings Limited"	1,213	9.98	-	-
Other	845	6.95	680	7.46
Total	12,149	100.00	9,106	100.00

^{*} The total number of the shares held by the shareholder is smaller than 5% of the total number of the Bank's voting shares.

By the end of the reporting year the Bank's Board and Council members did not own the Bank's shares.

During the reporting period the Bank did not issue any employee shares. There are no shareholders with the special control rights. The Bank has no information about any agreements that may cause restrictions to the shareholders in transferring their shares or voting right to other persons.

The decisions about changes in the Bank's Articles of Association are adopted at the shareholders` meeting by a ³/₄ majority vote of the shareholders with voting rights represented at the meeting.

The Bank has not concluded any contracts, which would come into force, would be terminated or altered in the case of change of the control type.

The Bank's shareholder's voting rights can be restricted in the cases stated in the regulatory acts of the Republic of Latvia. The Bank's Articles of Association do not envisage the shareholders` right to the profit share, which is not related to the part of shares proportionally owned by them.

Bank reserves:

- The reserve was based on legislation that existed in 1993 2001 and mainly refers to privatization and the treatment of capital increase and distribution of profit. The last movement relates to the share capital increase on 21 November 2000. As of the 31 December 2007 the Bank's reserve amounted LVL 626 thousand (2006: LVL 626 thousand).
- The revaluation reserve is a reserve from revaluation of fixed assets. Based on the provisions of IAS 16 revaluations shall be made with the sufficient regularity to ensure that the carrying amount does not differ materially from that which would be determined using fair value at the balance sheet date. As of 31 December 2007 the Bank has performed revaluation of all its property under "Land and Building". As a result, the revaluation reserve was increased by LVL 2,648 thousand. Revaluation was performed by certified, independent valuers. For recognition purposes the average value between two unrelated valuers' statements was used.

Share premium relates to the share capital increase in 2001. The excess of share capital sales value over its nominal value was LVL 1.323 thousand.

The share capital increase in the first half of 2007 resulted in the issue of 800,000 ordinary and 2,834 preference shares with nominal value of 1 LVL for each type of shares. Ordinary share premium is LVL 2.50 per share totalling LVL 2, 000 thousand for the issue.

The preference share premium is 6.00 LVL per share totalling LVL 17 thousand for the issue. The difference between the nominal value of the shares and the sales price was LVL 2,017 thousand.

During the second half of 2007 the Bank completed the issue of additional 2,240,000 ordinary shares. The share premium is 4.00 LVL per share. The difference between the nominal value of the shares and the sales price was LVL 8,960 thousand.

31. ASSETS AND LIABILITIES UNDER MANAGEMENT

As of 31 December 2007 total assets under management amounted to LVL 90,188 thousand (2006: LVL 14,315 thousand) recognized off-balance sheet. Based on the fund owner's specific requests, the Bank issues loans to non-banking customers classified as funds under trust management. Based on the trust management agreements with customers, the fund owners bear all the risks associated with these loans, and the Bank acts only as an intermediary for loan issuance.

32. ASSETS HELD IN CUSTODY

Assets held in custody reached total value of LVL 27,435 thousand (2006: LVL 66,108 thousand) as of 31 December 2007. This includes investments in non-resident and resident financial instruments in the amount of LVL 4,974 thousand and LVL 22,461 thousand (2006: LVL 1,694 thousand and LVL 64,414 thousand), respectively.

33. CASH AND CASH EQUIVALENTS

LVL '000	Group	Group	Bank	Bank
	31.12.2007	31.12.2006	31.12.2007	31.12.2006
Cash and deposits with the Bank of Latvia	48,151	69,659	48,151	69,659
Balances due from credit institutions	261,081	96,639	261,081	96,639
Balances due to credit institutions	(26,668)	(46,390)	(26,668)	(46,390)
Total cash and cash equivalents	282,564	119,908	282,564	119,908

34. FINANCIAL INSTRUMENTS AT FAIR VALUE

The table represents a breakdown of differences between carrying value and fair value of the Bank's financial instruments by asset groups. The table does not include fair value revaluation of non-financial items.

As of 31 December 2007			
	Carrying value	Fair value	Difference
LVL '000			
Financial assets			
Cash and demand deposits with central banks	48,151	48,151	-
Due from credit institutions	275,008	275,008	=
Loans and advances to customers	298,247	297,912	(335)
Financial assets at fair value through profit or loss	21,985	21,985	=
Held-to-maturity investments	4,747	4,734	(13)
Financial liabilities			
Due to the other credit institutions	26,668	26,668	-
Deposits from the customers	586,571	586,336	235
Derivative financial instruments	456	456	-
Issued debt securities	3,593	3,593	=
Subordinated debt	8,913	8,199	714
Net position of accounting and fair value			601

As at 31 December 2006, The Bank/ Group estimated that fair value of its assets and liabilities, except fair values of held-to-maturity investment, did not diverge significantly from their carrying amount.

Fair value of financial assets/ liabilities approximate carrying value

Fair value of financial assets/ liabilities with a term less than 1 year approximate carrying value. Such assumption is attributed to demand deposits, saving accounts and financial instruments with variable interest rate.

Fixed rate financial instruments

The fair value of the fixed rate instruments with the remaining maturity term of more than a year is determined comparing the yield with the market rates and discounting the future cash flows. Held-to-maturity investments are valued using the publicly quoted prices.

The table represents the Bank's financial assets and financial liabilities according to different methods of assessment.

As of 31 December 2007		J	nous or assessment	
LVL '000	Quotation value	Valuation techniques – market observable inputs	Valuation techniques – nonmarket observable inputs	Total
Financial assets				
Derivative financial instruments	-	291	-	291
Financial assets designated as at fair value through			_

36. CAPITAL ADEQUACY

Capital adequacy reflects capital resources necessary to cover credit and market risks associated with the Bank's assets and off-balance sheet exposures.

As of 31 December 2007 the Bank's capital adequacy ratio calculated in accordance with the Basel Committee guidelines was 12.3% (2006: 12.1%), exceeding the minimum ratio of 8% recommended by the Basel Committee in the year 1988. At the same time, as of the end of the year 2007 the capital adequacy ratio calculated in accordance with the methodology approved by the Latvian Financial and Capital Market Commission (FCMC) amounted to 12.1% (2006: 11.7%), exceeding the minimum ratio of 8% imposed on the Latvian banks by the Law on Credit Institutions.

The FCMC requires credit institutions to calculate market risk capital requirements for the trading book positions. The Bank's management believes that the Bank's trading activities are insignificant, therefore the calculation of market risk capital requirements will not have a material impact on the Bank's capital adequacy ratio. As of 31 December 2007 the market risk capital requirements are calculated only for foreign exchange risks.

The FCMC capital adequacy regulations have been developed in accordance with the European Union directives and are in conformance with the guidelines developed by the Basel Committee.

The Group's capital adequacy ratio calculated in accordance with the FCMC methodology as of 31 December 2007 was 12.0% (31 December 2006: 11.9%).

^{*} These items are considered off-balance sheet items for the purpose of this disclosure as required by local legislation.

The regulations of the Republic of Latvia state that an open position in each foreign currency shall not exceed 10% of the equity, but total open position shall not exceed 20% of the equity.

Consolidated companies use LVL as the functional currency, therefore the Group's currency position does not differ from the Bank's currency position.

As at 31 December 2007 and 2006, the Bank complied with the requirements for the net open currency position.

In May 2007 the amendments to the Credit Institution Law came into force, restricting also EUR position to 10% of the equity.

LVL is used as the functional currency by all Group entities, there is no significant difference between currency profiles of the Bank and the Group.

All deals with related parties are made in accordance with the Bank's regulations and conditions applicable to the transactions with clients.

The Bank has issued a 770,000 EUR guarantee in favour of Hansabank to assist a related party with real estate acquisition. The standard fee has been charged. The guarantee expires on 8July 2011. The guarantee had been secured by a collateral with the value that exceeds the guarantee amount several times. The Bank also has issued a EUR 300,000 guarantee to American Express Services Europe Ltd to secure credit card transactions.

There is no accrued impairment loss in relation to the loans issued to related parties.

41. COMMITMENTS AND CONTINGENCIES

Memorandum items include the following contingent liabilities and commitments, as well as client security account balances outstanding at the end of the year:

LVL '000	Group 31.12.2007	Group 31.12.2006	Bank 31.12.2007	Bank 31.12.2006

commitments	53,467	40,419	53,711	40,419

Credit commitments include unused credit limits granted on settlement cards, which as at 31 December 2007 amounted to LVL 4,232 thousand (2006: LVL 3,618 thousand).

42. RISK MANAGEMENT

Introduction

The Bank has developed a system for identification, supervision and management of the main financial risks to which the Bank and the Group entities are exposed. The main risk management principles are stated in the Risk Management Policy and in the Group's internal control regulations.

The main aim of risk management is to prevent occurring of significant loss that can affect the Group's Equity and Reserves.

Identification, effective management, accordant evolution and continuous monitoring are the basic risk management principles.

Bank development and activities are closely related to exploration of new market segments. The work on internal processes and technologies that support customer services continues steadily. To ensure effective management of the risks related to those processes, automation and process documentation takes place. The tools for risk control and management are regularly improved to meet the requirements of effective risk management. Stability, continuance of processes and safety of operations are the core principles that are stated in the Bank's Information Safety Policy.

In December 2007, the Bank finished work on introducing necessary changes required by Basel 2. This fact allows the Bank to ensure regular improvement of the procedures necessary for Capital Adequacy and for management of identified and possible risks

During the daily activities, the principle of independence and duty segregation is used to ensure more accurate analysis of risk and business factors.

Risk Management Structure

The Bank and the Group's Risk Management Policy is approved by the Council of the Bank. Principles of the Bank's Risk Management Policy are at one with the risk management principles that are determinate by the Snoras Bank.

The Board is responsible for implementation of the Risk Management Policy principles. The Board also is responsible for implementation of the risk control system that can prevent loss of assets, unauthorised management and unauthorised use. Risks that occur during daily activities should be continuously identified, monitored and managed and the Equity of the Bank is sufficient to cover the identified and possible risks. All deals should be made only in accordance with the internal regulations. The Bank, when making decisions, should follow the principles of caution, critical thinking and effectiveness, also all relevant laws and regulations should be observed.

The Board had authorized the Assets and Liabilities Management Committee to handle the risk management during the processes of asset placement and liability attracting as well as the fund-raising.

Main tasks of the Assets and Liabilities Management Committee are:

- observation of the Risk Management Policy principles, ensuring complete monitoring and management of risk;
- management of the Bank's assets according to principles of diversification between separate business lines to ensure adequate capitalization of risk;
- assess and confirm adequate and valid position limits and methodology of limit calculation.

The Assets and Memorandum Item Assessment Committee is a permanent body mainly responsible for evaluation of all loans, other assets and memorandum items, which can be influenced by credit risk.

The Money Laundering Prevention Committee is a permanent body established to ensure and control the Bank's operations in accordance with the Republic of Latvia legislation, the Bank's policies and internal regulations, to prevent legalization of illegally acquired funds and to prevent financing of terrorism. The Committee also ensures the process of customer and transaction monitoring, cooperates with the authorized state institutions and oversees the Customer Transaction Control Unit.

Management of money laundering risks during daily activities is performed by the Customer Transaction Control Unit.

Management of other risks is performed by the Risk Management Department. the Risk Management Department is responsible for implementation of risk management principles, evaluation of risk identification tools, oversight of risk assessment and management (including IT risk), planning of the Bank's further operations and disclosure of the relevant information. Each business function has its own responsible managers, which are independent and separated from business units.

Credit risk

Credit risk relates to uncertainty in the counterparty's ability or willingness to meet its contractual obligations, thus causing financial loss for the entities within the Group. The Bank is affected by credit risk while performing daily lending operations. The credit risk is significant, it is reflected in the Balance Sheet.

The Bank is exposed to credit risk also in relation with other products, including derivatives and investments in debt securities.

The Bank can also be affected by off-balance credit risk that occurs from financial commitments like loans granted and not fully drawn down, unutilised credit lines and outstanding guarantees.

The Bank can be affected by credit risk during trading, crediting and investing activities and also while acting as intermediary or issuing guarantees to third parties.

Credit risk that occurs during investing and trading activities is managed in line with the Bank's trading risk management procedures.

Credit risk arising from potential default on the part of the Bank's counterparties in transactions with derivatives or other financial instrument is managed on a daily basis.

To prevent occurrence of credit risk, the Bank cooperates only with well-rated counterparties.

The Group's main principles for Credit Risk Management are included in the Loan Policy and are defined as follows:

- · risk should be undertaken only in well known business lines;
- main source of loan repayment funds are cash flow from core business, salary and other income;
- the price of the loan product should be adequate to the customer credit risk risk should be evaluated according to the future yield;
- the customer must be able to provide adequate contribution to the project financing;
- each collateral must be liquid and sufficient for covering possible loss;
- the loan should be issued only for a certain definite aim, the term structure of the loan should be consistent with the aim:
- · there are standardized criteria and procedures for handling lending transactions;
- risk control should be arranged through segregation of the employee functions and adoption of the limitation system.

The core principle of credit risk management is adequate estimation of customer ability to repay debt, as customer related risk increases, customer ability to repay must be analyzed more accurate. The Bank monitors customer ability to repay and collateral actual value on regular basis. The Assets and Memorandum Item Assessment Committee performs assessment of loan actual value on a monthly basis. The Risk Management Department is responsible for development of loan valuation methodology and for use of such methodology in all Group entities.

The Bank carries out a stress test to test possible impact of different events on capital adequacy of the Bank and the Group.

Maximum exposure to credit risk

The table represents maximum exposure of different financial instrument groups to credit risk before taking into account any collaterals held or other credit enhancements.

Credit risk concentration to single customer		55,660	53,617	55,660	53,617

The Board has approved a regulation that the loan amount to a single customer or a group of related customers should not exceed the limit of 25% of the Group's equity.

On 31 December of 2007, the largest loan to a single customer was LVL 6,817 thousand (2006: LVL 3,719 thousand). The loan collateral value amounts to LVL 17,000 thousand.

There also are certain limits for industries in the Group. The maximum amount (35%) is set for lending operations related to real estate purchase and management (the actual figure was 27.4% in 2007 and 24.3% in 2006). Quality of such loans can be classified as outstanding.

Limits exist also by the loan type – the largest limit is for mortgage loans and should not exceed 45% of the total portfolio (the actual figure was 25.4% in 2007 and 30.1% in 2006).

The Bank had also set limits for country risk – the maximum limit at 600% of the equity applies to investments in the countries with the highest financial environment rating (Fitch AAA, Moody's Aaa). There are no country risk limits for investments in the Republic of Latvia.

Maximum exposure to credit risk by industry

The table represents the Bank's (and the Group's) maximum exposure to credit risk by industry before taking into account any collaterals held or other credit enhancements:

Carrying amount per class of financial assets (loans and advances to customers) with renegotiated terms (Bank and Group):

LVL'000	2007	2006
Enterprises	5,674	3,227
Private individuals	2,079	1,663
Total	7,753	4,890

Carrying amount per class of financial assets with renegotiated terms represent the carrying amount of financial assets that would otherwise be past due or impaired whose terms have been renegotiated.

See Note 15 for more detailed information with respect to the allowance for impairment losses on loans and advances to customers.

Impairment assessment

Assets and off-balance liabilities of the Bank and the Group are rated on a monthly basis to record loans in the balance sheet at fair value. The main criterion for the loan evaluation is the customer' ability to repay the loan. At the moment of evaluation all important factors that affect the value of loan are taken into account:

- the customer's loan history,
- the customer's financial position,
- the customer's financial performance and projections,
- · reasonable use of the loan, analysis of sufficiency of current and future cash flow for loan repayment,
- collateral and guarantees, their market value, etc.

Where the decision on issue of the loan is made by evaluating the collateral, its fair value should be evaluated at the lowest possible value, using the principle of caution.

If the due date has passed or if it seems that the borrower might not be able to make the payments as they become due, impairment allowances are charged. The amount of the allowance charge is calculated based on the difference between the loan's carrying value and the recoverable amount or present value of estimated future cash flows, including realization value of the collateral and guarantees, discounted by the initial effective interest rate.

The Bank determines loan impairment on an individual and collective basis. Based on the individual assessment of the loan, it can be rated as standard, supervised, sub-standard, doubtful and lost.

If there is no any doubt about repayment, the loans are classified as standard.

Supervised loans are the loans which will take additional monitoring and control, because there are some doubts about future payments from the customer. A loan can be classified as supervised if the due date passed less than 90 days ago but there is no doubts about covering debt from the collateral value.

Sub-standard loans are the loans that shoe definite signs of the probability that the loans will not be repaid in full and the Bank would incur some loss. The due date has passed more than 90 days ago, yet the collateral is reliable. The loan payments are irregular.

Doubtful loans – there is great probability of the Bank incurring losses, however, it is hard to determine the exact amount of the loss. There is a significant decrease in liquidity of the customer and doubts about covering the loss through realization of the collateral.

Lost loans - loans that do not have any actual value, enterprises have been declared bankrupted.

Market risk

Market risk is the risk that the fair value or future cash flows of financial instruments will fluctuate due to changes in market variables such as interest rates, foreign exchange rates, and equity price.

Interest rate risk

Interest rate risk is determined to the extent of the effect that changes in the market rates have on the Bank's profit and net interest income, as well as equity. Net interest income will change due to fluctuation between interest revenue earned on assets and interest expense spent on liabilities.

Interest rate risk indicates the market risk impact on the financial situation of the Group and the Bank.

To determine possible interest rate impact on the Bank's future income and the amount of equity, the Bank uses GAP analysis method

GAP analysis – analysis of difference between assets and liabilities that can be affected by repricing.

While using GAP analysis, Bank determinates value that can describe amount of interest rate risk – sensitiveness to interest rate change. Risk impact on Statement of Profit and Loss is determined while changing actual interest rate by 100 base points.

To calculate the amount of interest rate risk, Bank uses cumulative weighted GAP with the remaining term of 1 year. The acceptable amount of possible impact on the Bank's income or equity market value should not exceed 5% of equity. The Council has approved such restriction.

Treasury performs interest rate control and supervision on daily basis.

The Assets and Liabilities Management Committee evaluates the interest risk value on a monthly basis.

The Risk Management Department regularly informs the Board about the situation.

The Bank does not use VaR method to determine the risk impact amount, because there are few assets that are classified as trading portfolio in the balance sheet and the Bank's Investment Policy does not foresee any involvement into speculative deals.

The following table shows the split of interest bearing assets in their nominal value as of 31 December 2007 (the Bank and the Group):

Interest rate sensitivity analysis

The following table demonstrates the sensitivity to a reasonable possible change in interest rates, with all other variables held constant

of the Bank's and the Group's income statement and equity for the currencies to which the Bank and the Group had significant exposure at 31 December 2007.

The sensitivity of the income statement is the effect of the assumed changes in interest rates on the net interest income for one year,

based on the repricing maturity analysis of financial assets and financial liabilities held at 31 December 2007, including the effect of hedging

instruments. Additional effect on profit before taxes is calculated by revaluing fixed rate financial assets at fair value at 31 December 2007 for the effects of the assumed changes in interest rates.

Currency	Interest rate increase/ decrease in base points 2007	Effect on profit before taxes 2007	Effect on Equity pre-tax 2007	Interest rate increase/ decrease in base points 2006	Effect on profit before taxes 2006	Effect on Equity pre-tax 2006

EUR	-50	33	-	-50	(84)	-

USD -50 (22) - -50 (91) -

Currency risk

The Bank manages foreign exchange risk by establishing and regulating the principles related to foreign exchange risk control and governance to minimize the impact of exchange rate volatility on income statement.

Foreign exchange risk arises if the Bank has an open position in currency, which is subject to rate fluctuations.

The open currency position can arise:

- from the Bank's core business operations customer driven currency buying/selling transactions, foreign exchange transactions in open market, issuance of loans and acceptance of deposits;
- by engaging in speculative foreign exchange transactions;
- as a result from internal foreign exchange transactions;
- through expenses in foreign currency.

The foreign currency open position limits are regulated by the legislative acts of the Republic of Latvia.

The Bank's Council has approved the following limits. The foreign currency position limit for individual currencies is defined as maximum 10% of the equity. The foreign currency position limit in aggregate is defined as maximum 20% of the equity.

To restrict foreign exchange risk the Bank chooses the most favourable hedging method that is appropriate for hedging the particular risk. Hedging tools are chosen depending on currency, term, amount and associated expenses. The Bank employs the following financial instruments to hedge foreign exchange risk:

- spot and forward fx deals;
- currency SWAPs.

The Treasury Department ensures the Bank's operation within the limits approved in Foreign Currency Risk Management Policy. The Risk Management Department controls compliance with the limits stated in the policy and reports to the Bank's Board.

Sensitivity analysis of foreign exchange deals

The table represents the Bank's and the Group's sensitivity analysis of EUR currency. The Bank and the Group has a significant open position in this currency so there is possible future impact on the Bank's and the Group 's income statement and equity.

Currency	Change in currency rate % 2007	Effect on P/L before taxes 2007	Effect on Equity pre-tax 2007	Change in currency rate % 2006	Effect on P/L before taxes 2006	Effect on Equity pre-tax 2006
EUR	+1.7	29	-	+1.8	420	-
EUR	-0.3	(5)	-	-0.2	(47)	-

Management of liquidity risk and investments

The liquidity risk is subject to the main funding of the Bank's activities and the position management. It includes both the risk of being unable to invest into assets at appropriate term and amount, and the risk of being unable to realize assets at reasonable price and in an appropriate frame of time.

The Council of the Bank has accepted the liquidity management policy.

Liquidity policy determines the permitted difference between the Bank's assets and liabilities, evaluating them according to the repayment term, managing, overseeing and planning changes in the Bank's demand deposits, cash and also investing certain part of assets into liquid financial instruments and short term assets.

Liquidity is managed to meet the required conditions:

- the Bank's assets should be placed in the manner allowing access to them anytime it is necessary to ensure the necessary liquidity conditions;
- to ensure liquidity ratio in accordance with the liquidity regulations;
- to ensure compliance with the internal liquidity limits.

Liquidity risk may occur if:

- the Bank is not able to cover its liabilities and to ensure performance of the transactions by the Bank and customers;
- the Bank's ability to repay decreases due to external factors.

The Bank's current liability base consists of:

- demand deposits by customers (private individuals and legal entities);
- term deposits by customers;
- other financial resources, which the Bank has attracted as payment for services etc. (money in transit);
- issued debt securities;

• off-balance liabilities, if there is possibility that the counterparty may require their settlement;

Liquid assets are the following assets:

- cash:
- demand deposits with central banks and other credit institutions;
- balances due from central banks and other credit institutions, if the maturity does not exceed 30 days, and other assets,
 if the transaction terms permit early withdrawal of the funds (even if additional fee will be charged);
- investments in financial instruments, if there is possibility to sell them very quickly without suffering serious loss.

Loans and advances to customers are not classified as liquid assets.

To assess the difference between assets and liabilities in each period as well as the possibility of covering it from demand deposits and deposits with a 1 month withdrawal notice, the Bank uses statistical information on "sticky" deposits.

Bank has set a limit for deposits that can be accepted from one person or a group of related persons.

While managing liquidity, the Bank assesses its assets and liabilities according to the term structure:

- the repayment and selling dates for the assets are set according to the contracts and notices about early withdrawal;
- assets that are invested with an option of receive them on demand can be classified as demand investments;
- maturity of investments held for trading and investments available for sale that can be sold quickly without significant loss and also other financial instruments that can be used as collateral to receive a loan can be classified based on the conditions of the deal;
- assets that do not have any definite selling date are open-ended assets;
- assets or any part thereof that are past due more than 14 days can be classified as past due assets.

The Bank maintains the liquidity ratio at least equal to 30% of total current liabilities.

The Treasury plans the asset and liability term structure and necessary liquid asset amount on a daily basis.

The Risk Management Department regularly examines the liquidity ratio and informs the Board about volatility. The principles of managing high risk transactions (transactions with a single customer or a group of related customers in excess of 10% of the Bank's equity) are defined in the Liquidity Management Policy.

The Risk Management Department is responsible for control of compliance of high risk transactions with internal regulations and limits within all Group entities.

There also are definite measures that should be carried out upon occurrence of any payment or liquidity crisis, and the responsible persons have been granted the necessary powers to act if any warning signs are noticed.

The Investment Policy regulates investment of available resources in financial instruments as part of the investment portfolio.

This policy states all aims, requirements, allowed financial instruments and describes the principles of portfolio management and supervision as well as sets the rules for value assessment.

The Investment Policy is approved by the Council and the Board of the Bank.

Changes in the policy are introduced based on proposals from the Assets and Liabilities Management Committee.

Changes in the Investment Policy are implemented at least once in a year.

The Assets and Liabilities Management Committee also defines the investment portfolio management strategy and structure by approving limits for investment and financial instrument groups.

The Treasury, the Investment Department and the Risk Management Department ensure compliance of the investments with the financial targets set by the Bank.

The Bank's liquidity ratio during the year was as follows:

	2007	2006
	%	%
Average during the period	53.27	62.00
Highest	72.75	77.59
Lowest	46.14	54.95

The table represents analysis of the term structure of the Bank's and the Group's financial liabilities and off-balance liability after non-discounted contractual cash flows:

Operational risk management.

Operational risk is a possibility to incur loss due to the inadequate or incomplete internal process, human or system operation, or due to the impact of external conditions, including legal risk, but excluding strategic and reputation risk.

Bank has developed the Operational Risk Management Policy.

The main aim of operational risk management is to ensure identification of the Bank's processes exposed to operational risk, to analyze and mitigate the causes and potential loss.

In 2007 the Group developed a system for identification of operational risk factors. The system ensures gathering of operational risk events related information.

The Bank facilitates development of operational risk management environment and takes measures to reduce the possibility of operational risk occurrences by:

- developing already existing internal regulations and procedures and creating new procedures before the Bank starts offering new products;
- introducing changes to the Bank's structure and management model;
- ensuring participation of structural unit managers into operational risk management process;
- ensuring involvement of internal control bodies and increasing efficiency of their operations;
- improving the system for defining transaction limits and signature rights;
- facilitate segregation of functions in the Bank's operations;
- expanding the use of the "four eyes" principle in authorization of all major deals;
- ensuring mutual authorization of all major deals;
- updating the Bank's contingency plan;
- creating the strategy for response to emergencies;
- implementing recommendations by internal and external auditors;
- ensuring training of the employees;
- by ensuring continuity of the operational risk management process.

The Bank continuously takes measures to prevent or decrease occurrence of operational risk:

- information about development, approval and implementation of the Bank's key products, operations, assets, processes and systems is being analysed;
- possible threats to major positions are being identified;
- factors affecting risk occurrence are being identified;
- · types of risks, likely consequences and possible control measures are being analysed;
- several other risk mitigation measures are being implemented (avoidance, prevention, mitigation, insurance).

The Risk Management Department is responsible for process of risk identification and mitigation. All the Bank's structural units are responsible form identification, mitigation and prevention of operational risk.

- the head of each unit has designated a person responsible for identification and reporting of the structural unit's operational risk;
- the responsible employees also prepare reports about operational risk occurrences within the structural unit which include information about internal data, external events and market conditions that may materially affect the Bank's operations as well as about results of the operational risk monitoring and the problems identified.

The Risk Management Departments is responsible for management and coordination of the operational risk managing process. All gathered information is assessed and a monthly report about the operational risk level is prepared for the Board and unit managers.

Information is being analyzed to develop the Bank's operational risk management practice and to improve the necessary management processes and internal procedures.

43. CAPITAL

The Bank maintains its capital resources at a level sufficient to sustain financial operations appropriate to its activities, volumes and risks. The Law on Credit Institutions stipulates the minimum requirement with respect to the ratio of the Bank's capital resources to risk weighted assets and memorandum items at 8%.

The Financial and Capital Market Commission has developed rules regulating the calculation of the capital requirements. In 2007 the Bank has fully complied with the regulatory capital adequacy requirements.

Capital Management

The Bank determines the required capital resources by assessing the capital required to cover the risks associated with its current and prospective activities, plans the measures to maintain the capital, and ensures that the available capital is at all times larger than or equal to the required capital resources.

The Bank ensures that its capital is at all times larger than or equal to the total of the following requirements:

- Credit risk and residual value impairment risk capital requirement
- foreign exchange risk and commodity price risk capital requirement
- debt and equity price risk capital requirement
- settlement risk and counterparty risk for trading book transactions.

The Bank carefully monitors the Bank's capitalisation level by analysing the possible changes in legislation, regulations and standards and forecasting possible impact of economic and political factors on the results of the activities by the Bank and clients.

To ensure the adequacy of the capital structure to the capital management strategy (capitalisation increase) the Bank plans to increase its capital mainly by raising Tier 1 capital. The attraction of subordinated capital is planned to ensure the Bank's capitalization level in the circumstances of the rapid economic expansion. The Bank includes fixed asset revaluation reserve in the Tier II capital, if material changes occurred to the value of its assets. The revaluation value is the lowest of the real estate value estimates provided by two certfied real estate valuation experts.

	Group	Group	Bank	Bank
	31.12.2007	31.12.2006	31.12.2007	31.12.200

INDEPENDENT AUDITOR'S REPORT

To the shareholders of AS Latvijas Krājbanka

Report on the Financial Statements

We have audited the accompanying consolidated financial statements of AS Latvijas Krājbanka and its subsidiaries (hereinafter - the Group) and the accompanying financial statements of AS Latvijas Krājbanka (hereinafter the Bank) for the year ended 31 December 2007 (jointly "financial statements"), set out on pages 9 through 57 which comprise the balance sheet as at 31 December 2007, the statements of income, changes in equity and cash flows for the year then ended, and a summary of significant accounting policies and other explanatory notes.

Management's Responsibility for the Financial Statements

The Company's management is responsible for the preparation and fair presentation of these financial statements in accordance with International Financial Reporting Standards as adopted by the European Union. This responsibility includes: designing, implementing and maintaining internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements give a true and fair view of the financial position of the Group and the Bank as at 31 December 2007, and of its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards as adopted by the European Union.

Report on Compliance of the Management Report

Furthermore, we have read the Management Report for the year ended 31 December 2007 (included on pages 3 through 5 of the accompanying 2007 Annual Report) and have not noted any material inconsistencies between the financial information included in it and the financial statements for the year ended 31 December 2007.
