JSC "DAUGAVPILS LOKOMOTĪVJU REMONTA RŪPNĪCA"

CONSOLIDATE REPORT

For 6 months 2012

TABLE OF CONTENTS:

INFORMATION ON THE COMPANY

Name of the company	DAUGAVPILS LOKOMOTĪVJU REMONTA RŪPNĪCA
Legal status of the company	Joint-stock company
Number, place and date of registration	Enterprise Register Nr.40003030219 Riga, 3 October 1991 Commercial register Riga, 8 June 2004
Address	Marijas street 1, Daugavpils LV-5401 Latvia
Type of operations	Railway rolling stock overhaul repair, maintenance and upgrade, manufacturing and repair of its spare parts
Names of the major shareholders	AS SKINEST RAIL – 47,97% Moisa 4, 13522 Tallinn, Estonia AS SPACECOM - 25,27% Kadaka tee 1, 10621 Tallinn, Estonia LLC LOKOMOTIIV IVESTEERINGUUD - 15,37% Tartu street 18-18, 10115 Tallinn, Estonia Other shareholders - 11,39%
Names and positions of the Counsel Members	Oleg Ossinovski - Chairman of the Council Aivar Keskula - Vice Chairman of the Council Natalja Kumar – Member of the Council Sergei Jakovlev - Member of the Council (from 27.04.2012) Tomas Petraitis - Member of the Council (from 27.04.2012) Juri Krasnošlik – Member of the Council (until 27.04.2012) Aleksandr Golubnitši – Member of the Council (until 27.04.2012)
Names and positions of the Board Members	Natālija Petrova – Chairman of the Board Eduards Krukovskis - Member of the Board Mihails Mamonovs - Member of the Board
Auditor`s name and address	Report not vise

Report of the management.

I. The key figures of the enterprise.

In 6 months 2012 year joint-stock company „Daugavpils Lokomotīvju Remonta Rūpnīca" has distributed goods for **8517.8** thousand lats, which constitutes 108.1% compared to the appropriate period of 2011.

Displayed below is the dynamics of the output of the production of the basic classification.

Table No.1

The basic classification of the production.

thousands,Ls

Designation	6 months 2012	6 months 2011	(+, -)
Diesel locomotive repair, section	6900.3	5534.8	+1365.5
Wheel pair repair, pieces	233.0	219.7	+13.3
Electric machines repair,pieces	344.5	377.2	-34.7
Other production	1040.0	1749.7	-707.7
Total	**8517.8**	**7881.4**	**+636.4**

Table No.2

The structure of the distributed goods by the clients.

The client	6 months 2012		6 months 2011	
	sum	%	sum	%
Latvia	908.5	10.7	886.0	11.2
Lithuania	202.9	2.4	432.6	5.4

Accounting policies

(1) Basis of preparation

These financial statements have been prepared in accordance with the EU-approved International Financial Reporting standards (IFRS).

Financial statements are prepared on the basis of historical cost accounting method, that is modified by the revaluation of the real estate property at their fair value and using this value as its costs on transition to IFRS.

Preparation of the financial statements in compliance with the IFRS requires critical assumptions. Moreover, preparation of the statements requires from the Management to make estimates and judgments applying the accounting policies adopted by The Group.

a) Standards, amendments and interpretations effective in the current year

IAS 24, Related Party Disclosures - Amendment

The amended standard simplifies the disclosure requirements for government-related entities and clarifies the definition of a related party. The amendment is applied retrospectively. The amendment did not have any material effect on related parties disclosures in these financial statements.

IAS 32 Classification of Rights Issues - Amendment

The amendments alter the definition of a financial liabilities in IAS 32 to enable entities to classify rights issues and certain options or warrants as equity instruments. The amendment is applied retrospectively. The adoption of this amendment did not affect the Group's financial position or performance because the Group does not have such instruments.

IFRIC 14 - Prepayments of a Minimum Funding Requirements - Amendment

The amendment removes an unintended consequence when an entity is subject to minimum funding requirements and makes an early payment of contributions to cover such requirements. The amendment permits a prepayment of minimum funding requirements to be recognised as a pension asset. The amendment is applied retrospectively. This amendment did not affect these financial statements because the Group does not have defined benefit assets.

IFRIC 19, Extinguishing Financial Liabilities with Equity Instruments

The interpretation clarifies that equity instruments issued to a creditor to extinguish a financial liability are consideration paid. The equity instruments issued are measured at their fair value. In case that this cannot be reliably measured, the instruments are measured at the fair value of the liability extinguished. Any gain or loss is recognised immediately in profit or loss. This interpretation did not affect these financial statements because the Group does not have such transactions.

Improvements to IFRS issued in May 2010

Amendments have been made to IFRS 1, IFRS 3, IFRS 7, IAS 1, IAS 27, IAS 34 and IFRIC 13. Improvements consist mostly of a mixture of insignificant changes and clarifications in the different areas. These amendments did not have any material effect on Group's financial statements.

b) Standards, amendments and interpretations, which are not yet effective and not yet adopted by the Group

IAS 12 Income Taxes – Recovery of Underlying Assets - Amendment (effective for annual periods beginning on or after 1 January 2012, not yet adopted by the EU).

The amendment clarified the determination of deferred tax on investment property measured at fair value. The amendment introduces a rebuttable presumption that deferred tax on investment property measured at fair value will be recognized on a sale basis. Furthermore, it introduces the requirement that deferred tax on non-depreciable assets that are measured using the revaluation model in IAS 16 always be measured on a sale basis of the asset. The Group has assessed that this amendment will not affect its financial position and performance because the Group measure their investment properties according to the cost model.

IFRS 1 First-time Adoption of IFRS - Severe Hyperinflation and Removal of Fixed Dates for First-time Adopters - Amendment (effective for annual periods beginning on or after 1 July 2012, not yet adopted by the EU).

The amendment provides guidance on how an entity should resume presenting IFRS financial statements when its functional currency ceases to be subject to severe hyperinflation. This amendment will not have an impact to Group's financial statements.

IAS 1 Financial Statement Presentation – Presentation of Items of Other Comprehensive Income - Amendment (effective for annual periods beginning on or after 1 July 2013, not yet adopted by the EU).

The amendments to IAS 1 change the grouping of items presented in Other Comprehensive Income. Items that could be reclassified (or 'recycled') to profit or loss at a future point in time (for example, upon derecognition or settlement) would be presented separately from items that will never be reclassified. The amendment affects only presentation of Other Comprehensive Income and will not impact the Group's financial position or performance. The Group is considering the impact of amendment on its financial statements.

IAS 19 Employee Benefits - Revised (effective for annual periods beginning on or after 1 January 2013, not yet adopted by the EU).

The revised standard includes a number of amendments that range from fundamental changes such as removing the corridor mechanism and the concept of expected returns on plan assets to simple clarifications and re-wording. The Group is considering the impact of amendment on the its financial statements.

IAS 27 Separate Financial Statements - Revised (effective for annual periods beginning on or after 1 January 2013, not yet adopted by the EU).

As a result of the new IFRS 10 and IFRS 12, revised IAS 27 is limited to accounting for subsidiaries, jointly controlled entities and associates in separate financial statements. The Company is in the process of assessing the impact of this amendment on the financial position or performance of the Company.

IAS 28 Investments in Associates and Joint Ventures -Revised (effective for annual periods beginning on or after 1 January 2013, not yet adopted by the EU).

As a result of the new IFRS 11 the revised IAS 28 has been renamed as Investments in Associates and Joint Ventures, and describes the application of the equity method to investments in joint ventures in addition to associates. As the Company does not hold any investments in jointly controlled entities and associates there is no impact of revised standard on the Company's financial statements.

IFRS 10 Consolidated Financial Statements (effective for annual periods beginning on or after 1 January 2013, not yet adopted by the EU).

IFRS 10 replaces the portion of IAS 27 Consolidated and Separate Financial Statements that addresses the accounting for consolidated financial statements. It also includes the issues raised in SIC-12 Consolidation — Special Purpose Entities. IFRS 10 does not change the consolidation procedures, rather changes whether an entity is consolidated by revising the definition of control. The Company is in the process of assessing the impact of this standard on the financial position or performance of the Company.

IFRS 11 Joint Arrangements (effective for annual periods beginning on or after 1 January 2013, not yet adopted by the EU).

IFRS 11 replaces IAS 31 Interests in Joint Ventures and SIC-13 Jointly-controlled Entities — Non-monetary Contributions by Venturers. IFRS removes the option to account for jointly controlled entities using proportionate consolidation. Instead, jointly controlled entities that meet the definition of a joint venture must be accounted for using the equity method. As the Company does not have any investments in subsidiaries and special purpose entities there is no impact of this standard on Company's financial statements.

IFRS 12 Disclosures of Involvement with Other Entities (effective for annual periods beginning on or after 1 January 2013, not yet adopted by the EU).

IFRS 12 includes all of the disclosures that were previously in IAS 27 related to consolidated financial statements, as well as all of the disclosures that were previously included in IAS 31 and IAS 28. These disclosures relate to an entity's interests in subsidiaries, joint arrangements, associates and structured entities. A number of new disclosures are also required. The Company is in the process of assessing the impact of this standard on the disclosure in Company's financial statements.

IFRS 13 Fair Value Measurement (effective for annual periods beginning on or after 1 January 2013, not yet adopted by the EU).

IFRS 13 establishes a single source of guidance under IFRS for all fair value measurements. IFRS 13 does not change when an entity is required to use fair value, but rather describes how to measure fair value where fair value is required or permitted. This standard should be applied retrospectively and early adoption is permitted. The Group is considering the impact of the standard on the Company's financial statements.

IAS 32 Financial Instruments: Presentation - Offsetting Financial Assets and Financial Liabilities - Amendment (effective for annual periods beginning on or after 1 January 2014, not yet adopted by the EU).

This amendment clarifies the meaning of "currently has a legally enforceable right to set-off" and also clarifies the application of the IAS 32 offsetting criteria to settlement systems which apply gross settlement mechanisms that are not simultaneous. The amendments to IAS 32 are to be retrospectively applied. Earlier application is permitted, but only with the IFRS 7 Offsetting Financial Assets and Financial Liabilities amendments. The Group is considering the impact of the amendment on the Group's financial statements.

IFRS 7 Financial Instruments: Disclosures - Offsetting Financial Assets and Financial Liabilities - Amendment (effective for annual periods beginning on or after 1 January 2013, not yet adopted by the EU).

The amendment introduces common disclosure requirements. These disclosures would provide users with information that is useful in evaluating the effect or potential effect of netting arrangements on an entity's financial position. The amendments to IFRS 7 are to be retrospectively applied. The Group is considering the impact of the amendment on the Group's financial statements.

IFRS 9, Financial Instruments Part 1: Classification and Measurements, issued in November 2009 (effective for annual periods beginning on or after 1 January 2013, not yet adopted by the EU).

The IFRS 9 replaces those parts of IAS 39 relating to the classification and measurement of financial assets. The Group is considering the impact of the standard on the financial statements.

IFRIC Interpretation 20 Stripping Costs in the Production Phase of a Surface Mine (effective for annual periods beginning on or after 1 January 2013, not yet adopted by the EU).

This interpretation only applies to stripping costs incurred in surface mining activity during the production phase of the mine ('production stripping costs'). The Group is not involved in mining activities and, therefore, the interpretations will not effect its financial statements.

(2) Methods of consolidation

The consolidated financial statements include the financial statements of the Company and its subsidiaries. The financial year and accounting principles of the Company and subsidiary companies are the same. Financial statements of subsidiaries are included in the consolidated financial statements of the Group based on the full consolidation method. Taking into consideration that all subsidiaries of the Company were established by the Company, no goodwill of acquisition has appeared. Subsidiary companies are consolidated from the time of its incorporation till their disposal.

(3) Foreign currencies

(a) Functional and presentation currency
Items are shown in the financial statements of the Group are measured using the currency of the primary economic environment in which the Group operates the functional currency). Financial statements are presented in Latvian lat (Ls), which is the Group's functional and presentation currency.

(b) Transactions and balances
All foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation

at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the income statement for the period.

Exchange rates used at the balance sheet date are as follows:

	30.06.2012.	30.06.2011.
1 USD	0.562	0.489
1 EUR	0.702804	0.702804
1 LTL	0.204	0.204
1 RUB	0.0171	0.0174

(4) Segment disclosure

An operation segment is a component of the Group which qualifies for the following criteria: (i) engages in business activities from which it may earn revenues and incur expenses; (ii) whose operation results are regularly reviewed by the Company's chief operating decision maker to make decisions about resources to be allocated to the segment and assess its performance and (iii) for which discrete financial information is available.

Operation segments are reported in a manner consistent with the internal reporting provided to the Company's chief operating decision maker being the Board.

(5) Income recognition

Net sales represent the total of goods and services sold during the year net of discounts, value added tax and excise tax. Main operation of the Group is repair and modernization of railway rolling stock. Taking into account the type of repair and modernization work and complicity of the order the period of provisioning the services could exceed 3-6 months.

Contract costs related to repair and modernization services are recognised on the basis of completion. Expenses connected with repair service agreement are recognized in the moment when occurred. When the outcome of a contract cannot be estimated reliably, contract revenue is recognised only to the extent of contract costs incurred that are likely to be recoverable. When the outcome of a contract can be estimated reliably and it is probable that the contract will be profitable, contract revenue is recognised over the period of the contract. When it is probable that total contract costs will exceed total contract revenue, the expected loss is recognised as an expense immediately.

The Group apply the stage of completion method to determine the appropriate amount of revenues to recognize in a given period. The stage of completion is measured by reference to the contract costs incurred up to balance sheet date as a percentage of total estimated costs for each contract or carrying out surveys of work performed to date, which of them are more reliable. Costs incurred in the year in connection with future activity on a contract are excluded from contract costs in determining the stage of completion. They are presented as inventories or other assets, depending on their nature.

The Group presents as an asset the gross amount due from the customers for contract work for all contracts in progress for which costs incurred plus recognized profit (less recognized losses) exceed progress billings. Progress billings not yet paid by customers and retention are included within "Trade receivables".

The Group presents as a liability the gross amount due to customers for contract work for all contracts in progress for which progress billings exceed costs incurred plus recognized profit (less recognized losses). Advances received from customers are included within "Other liabilities".

Income from sales of goods in Latvia is recognized when the customer has accepted the goods. Income from sales of goods outside Latvia is recognized in accordance with the terms of delivery. Income from provision of other services is recognized by reference to the stage of completion of the services.

Interest income or expenses are recognized in the income statement for all loans and borrowings assessed at amortized cost applying the effective interest rate method.

(6) Intangible assets

Intangible assets mainly consist of licenses and patents. Intangible assets are stated at historical cost, less accumulated amortization. Depreciation is calculated from the moment as the assets are available for use. Intangible assets depreciation is calculated on a straight- line method to allocate the purchase price up to the estimated residual value of the useful life, using the following periods:

	Depreciation % per annum
Licenses and patents	20

In cases where an intangible asset's financial statement value is greater than its estimated recoverable amount, respective asset's value is reduced to its recoverable value. Recoverable value is the higher of fair value of intangible investment, less costs to sell or value in use.

(7) Property, plant and equipment (tangible assets)

Property, plant and equipment (tangible assets) are initially accounted at the purchase cost. Purchase cost includes costs, which are directly related to the purchase of tangible assets. In financial statements tangible assets are recognised at purchase cost less depreciation and any impairment losses.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. Other repairs and maintenance are charged to the income statement during the financial period in which they are incurred.

Land is not depreciated. Depreciation on other assets is calculated using the straight-line method to allocate their cost or revaluated amounts to their residual values over their estimated useful live, as follows:

	Depreciation % per year
Buildings	1,11-20
Plant and equipment	4-20
Other fixtures and fittings, motor vehicles	20

The asset's residual values and useful lives are reviewed, and adjusted if appropriate, at each balance sheet date.

Where the carrying amount of an asset exceeds its estimated recoverable amount, it is written down immediately to its recoverable amount. The decrease in the value of assets is recognised as the expenses.

Costs of borrowing to finance assets under construction and other direct charges related to the particular asset under construction are capitalised during the time that is required to complete and prepare the asset for its intended use as part of the cost of the asset. Capitalisation of the borrowing costs is suspended during extended periods in which active developments are interrupted.

Gains or losses on disposals are determined by comparing the proceeds with the carrying amounts and are recognised within the statement of comprehensive income for the relevant period.

(8) Impairment of tangible and intangible assets

All tangible and intangible assets of the Group have their estimated useful lives and they are amortised or depreciated. Assets that are subject to amortisation and depreciation are revaluated every time when events or circumstances evidence of probable non-recoverability of their carrying amount. Loss from value decrease is recognised at difference between book value of the asset and its recoverable value. Recoverable value is the higher of an asset's fair value less costs to sell and its value in use. In order to determine decrease of the value, assets are classified based on the lower level of identifiable cash flows (cash-bearing units). Assets, which value has been decreased, are assessed at the end of every reporting year to identify the probable value decrease reservation.

(9) Lease without redemption rights (operating lease)

In cases, when the material part of the risks and rewards of ownership of the leased assets are remained to the lesser, the transaction is classified as operating lease. Lease payments and prepayment for lease are included in income statement on a straight-line basis over the lease period.

(10) Inventories

The inventories are stated at the lower of cost and net realisable value. Cost is determined using the weighted average method. Net realisable value is the estimated selling price in the ordinary course of Group's business, less the costs of completion and selling expenses. When the net realisable value of inventories is lower than their cost, provisions are created to reduce the value of inventories to their net realisable value.

(11) Loans and trade receivables

Loans and trade receivables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method less provision for impairment. A provision for impairment is established when there is objective evidence that the Group will not be able to collect all amounts according to the original terms of receivables. Significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or financial reorganisation, and default or delinquency in payments are considered indicators that the trade receivable is impaired. The amount of the provision is the difference between the asset' s carrying amount and the present value of estimated future cash flows, discounted at the original effective rate. Changes in inventories are shown in the income statement.

(12) Cash and cash equivalents

For the purposes of the cash flow statement, cash and cash equivalents comprise cash, the balances of the current bank account and other current liquid financial assets with maturities up to 90 days.

(13) Share capital and dividends

Ordinary shares are classified as equity. Dividends to be paid to shareholders of the Group are represented as liabilities during the financial period of the Group, when shareholders of the Group approve the dividends.

(14) Borrowings

Borrowings are recognised initially at fair value net of transaction costs incurred. Borrowings are subsequently stated at amortised cost using the effective interest method. Any difference between the proceeds (net of transaction costs) and the redemption value is recognised in the income statement over the period of the borrowings using the effective interest method.

Borrowings are classified as current liabilities unless the Group has an unconditional right to defer settlement of the liability for at least 12 months after the balance sheet date.

(15) Provisions

Provisions are recognized, when there is a present obligation as a result of current or previous years events, it is probable that an outflow or resources will be required, and the amount has been reliably estimated. Provisions are measured at the present value of the expenditures expected to be required to settle the obligation.

(16) Pension obligations

The Group pays social security contributions for state pension insurance and to the state funded pension scheme in accordance with Latvian laws. State funded pension scheme is a defined contribution plan under which the Group pays fixed contributions determined by the law and they will have no legal or constructive obligations to pay further contributions if the state pension insurance system or state funded pension scheme are not able to settle their liabilities to employees. The social security contributions are recognised as an expense on an accrual basis.

(17) Accrued liabilities for unused annual leave

Amount of accumulated unused annual leave is determined by multiplying the average day rate of employees for the last six months of the financial year by the amount of accrued but unused annual leave at the end of the reporting year.

(18) Grants

Grants or subsidies received for the acquisition of fixed assets or other non-current assets are recorded as deferred income and recognized as an income in the statement of comprehensive income on straight-line basis over the useful life of the assets acquired. Other subsidies or grants to cover the expenses are recognized as an income in the same period when the respective expenses have arisen and all material conditions in respect of the grants received has been fulfilled. Grants are recognized at the moment of its receipt.

(19) Income tax

Corporate income tax is calculated in accordance with tax laws of the Republic of Latvia. Effective laws provide for 15 % tax rate.

Deferred income tax is provided in full using the liability method on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. Deferred income tax is determined using tax rates (and laws) that have been enacted by the balance sheet date and are expected to apply when the deferred income tax is settled.

The principal temporary differences, in general, arise from different tangible assets depreciation rates as well as provisions for slow-circulating goods, accruals for unused annual leave and accruals for bonuses. Where an overall deferred income tax arises it is only recognised to the extent it is probable which the temporary differences can be utilised.

(20) Earnings per share

Earnings per share are determined dividing the net gains or losses attributable to shareholders of the Company by the average weighted quantity of the shares in the reporting year.

(21) Related parties

Related parties are defined as major shareholders of the Company, Board and Council members, their close family members and Companies, in which the previously mentioned persons have significant influence or control. Related parties are considered also the companies, that are being under the ultimate control or significant influence of related parties.
