MANAGEMENT REPORT

General information

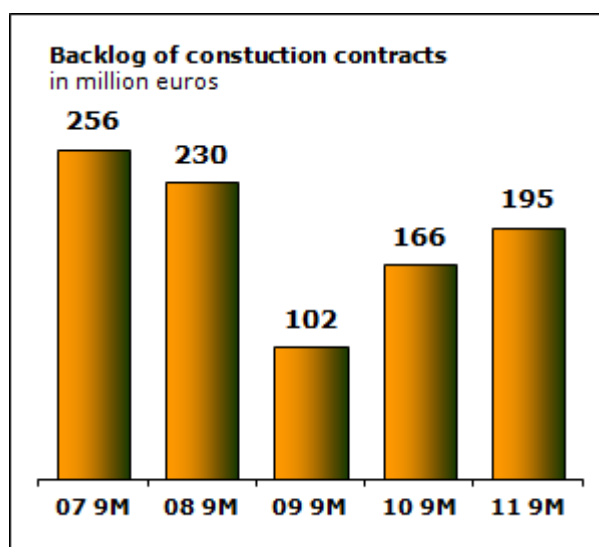

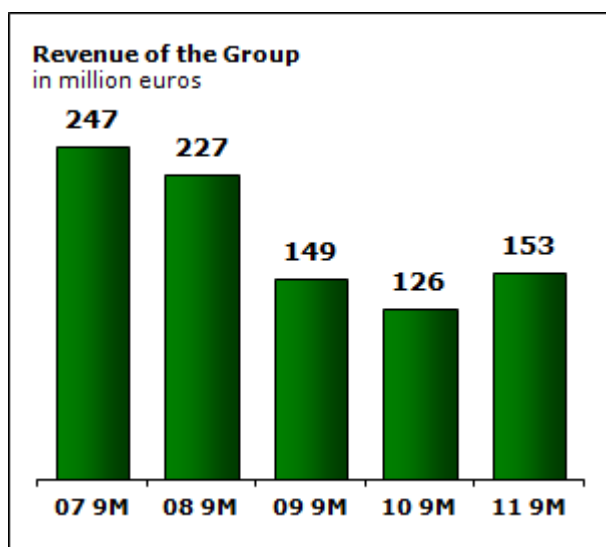

AS Merko Ehitus operates in Estonia, Latvia and Lithuania as a construction group offering complete solutions in the construction field. The largest companies belonging to the group are SIA Merks (100%), UAB Merko Statyba (100%), Tallinna Teede AS (100%), AS Gustaf (85%), OÜ Gustaf Tallinn (80%), AS Merko Tartu (66%), AS Merko Infra (100%) and AS Tartu Maja Betoontooted (25%).

Operating results

In 2011 9 months, the revenue of the construction group was EUR 153.4 million. Estonia contributed 69.8%, Latvia 20.8% and Lithuania 9.4% to the group's revenue. As compared to 2010 9 months, the group's revenue increased by +21.5%, including +17.5% in Estonia, +371.3% in Lithuania and -0.6% in Latvia.

Group's revenue for Q3 2011 was EUR 78.3 million, which constitutes an annual increase of EUR 22.9 million (+41.4%).

As of 30 September 2011, the group's portfolio on unfinished construction contracts totalled EUR 195 million. The contract portfolio does not include residential development projects developed by the Company and the works related to construction of investment properties.

In 2011 9 months, the group sold 113 apartments for EUR 12.3 million, (exclusive of VAT). As of 30.09.2011, the inventories included 64 unsold apartments with a total cost of EUR 6.6 million and 483 apartments in the stage of construction with a total cost of EUR 17.8 million as of the balance sheet date. Of the finished buildings 30 apartments are located in Tartu and 34 in Riga. At the moment the group is building an apartment building with 93 apartments at Tartu road 50A in Tallinn (completion time Q4 2011), two apartment buildings (21 apartments in each) at Hane Street in Tallinn (completion time summer 2012) and an apartment building with 133 apartments at Skanstese street in Riga (completion time October 2012). An apartment building with 15 apartments at Kristiina 12, Tallinn was in finishing stage as of balance sheet date.

In 2011, the share of infrastructure facilities has grown, which has significantly increased the impact of seasonality on the group's quarterly performance (EUR 26.2 million in Q1 and EUR 48.9 million revenue in Q2 compared to EUR 78.3 million in Q3 2011). In Q3, revenue was influenced by the cyclical nature of property developments as follows: apartment sales reached EUR 10.1 million which constituted 82.3% of 2011 9 months apartments total sales, and the group earned EUR 11.1 million as revenue upon the delivery of Balsiu school to the tenant.

In the first 9 months of 2011, the group made a gross profit of EUR 0.4 million, incl. EUR 2.8 million in Q3. Generation of a profit was supported by the stabilisation of construction prices which decreased discount losses and thereby improved the average profitability of works completed.

Marketing and general administrative expenditures of the group decreased by 4.1% with the 9 months of 2011. Work on cutting the marketing and general administrative expenditures continues and the management has set the goal to maintain the proportion of the respective costs under 5.5% of revenue by the end of 2011.

The group's loss before taxes for the first 9 months of 2011 was EUR 7.1 million, with a net loss of EUR 7.3 million – in 9 months 2010, the group had a profit of EUR 5.9 million before taxes and a net profit of EUR 5.2 million. The loss was caused by a faster increase in construction prices than predicted in the tenders prepared in 2009/2010, and by the devaluation of loss-making projects in the first half of 2011 when the estimates were corrected. As of 30.09.2011, the group had allocated a total of EUR 3.5 million as appropriations to cover the costs of completing loss-making projects. As predicted, Q3 2011 was better than the first six months, with the group earning a net profit of EUR 0.3 million.

In 2011 9 months, the change in short-term investments, and cash and cash equivalents of Merko Ehitus group was EUR -7.1 million and as of 30 September 2011, the cash and cash equivalents in the bank accounts and term deposits of the group were in the amount of EUR 5.5 million. The cash flows from operating activities totalled EUR -22.2 million, cash flows from investing activities totalled EUR +3.3 million and cash flows from financing activities totalled EUR +11.8 million. The cash flows from operating activities in the reporting period were mostly affected by the change in trade and other receivables related to operating activities of EUR -38.6 million, change in trade and other payables related to operating activities of EUR +18.3 million and operating loss EUR -6.7 million. Of the cash flows from investing activities, purchase of investment property totalled EUR -2.5 million, the balance of issued and repaid loans totalled EUR +5.1 million and investments in property, plant and equipment totalled EUR -0.9 million. Of the cash flows from financing activities the balance of gained and repaid loans totalled EUR +15.0 million, dividends paid EUR -1.8 million and EUR -1.5 million was spent on finance lease principal payments.

Improvement of the economic environment of the Baltic countries in the first half of the year has had a positive impact on the construction market. Volumes of construction works completed by own forces have grown in all Baltic countries during the year. In Lithuania, construction works in the total volume of 1.27 billion euros* were completed during the first 9 months, meaning a growth of +21.9% compared to the 9 months of the previous year, including +23,7% in Q3. In Latvia, construction works by own forces were completed in the total volume of 0.71 billion euros* during the 9 months, meaning annual growth of +4.5%, including an increase of +21.2% in Q3. In Estonia, the 3rd quarter results of the construction market will be published on 29.11.2011. It is reasonable to expect continuation of the trends of the first semester. During the first 6 months of 2011, construction works by own forces were completed in Estonia in the total volume of 0.56 billion euros*, i.e. +19.7% compared to the result of the previous year (2011 Q1 respectively +31.4%).

* in current prices

The construction market of the neighbouring blocks is affected by the following trends:

The sense of security regarding the future that the region's private contracting entities share has decreased compared to the beginning of the year, which is also why there is no interest in the construction of new buildings/structures. Estonia's adaptation of the euro has failed to significantly increase foreign investment activities in the area and it has not affected the construction market as positively as expected. Most new construction contracts still originate from the public sector and they are financed from the sources of the Structural Funds of the European Union.

The small number of contracting entities remaining in the market (the state, local governments) enjoy their position – they make the guarantee requirements and payment terms prescribed to contractors more severe, the strain on companies' circulating capital increases, and the companies' capability to cope with the management of liquidity and cash flows becomes increasingly decisive.

Due to significant volatility of input prices, it is difficult to budget projects and complete construction works within the limits of planned cost, bringing about additional risks in the performance of fixed-price construction contracts. If in the first half year the rapid increase of construction prices was borne only by contractors, then the second semester has brought the problem also into the attention of the contracting entities. More frequently, contracting entities cancel their procurement procedures due to the fact that the received offers fail to comply with budgets prepared in 2009/2010, and the funds allocated for project financing are insufficient.

Construction of new apartments in Tallinn and Vilnius that enjoyed a growth in the first semester has clearly shrunk in the second half of the year. Due to increasing insecurity in the overall economic environment, the buyers of apartments have taken on a passive role and do not rush into making buying decisions. Significant increase of input construction prices and the currently unchanged level of sales prices of apartments sets limits to the entry of new apartments into the market in the near future. The banks' willingness to finance development activities and final buyers of residence spaces is good in Lithuania and Estonia, and satisfactory in Latvia.

Insecurity in European and American financial markets has shaken the sense of security of investors, yielding to an expected global decrease in the demand for construction services. Due to decreased demand, the future may hold a decrease in the price of global inputs (steel, crude oil products) that may in turn lead to a short-term improvement of the profitability of such construction contracts that have already been entered into. At the same time, the continued insecurity complicates the medium and long term chances of development in the construction sector.

NOTES

Note 1 Accounting policies

The interim report of Merko Ehitus group for the 2011 9 months and III quarter is composed according to the terms of international accounting standard IAS 34 "Interim Financial Reporting" regarding the condensed interim financial statements. In the interim report same accounting principles and methods are used as in the 2010 financial statement. Accounting methods used in the interim report are consistent with the international financial accounting standards, as they are approved by the European Union.

By the opinion of the Management Board the consolidated interim report of Merko Ehitus AS for the 2011 9 months and III quarter reflects the economic results of the group true and fair and according to the principle of continuity. An increase in the proportion of the construction of infrastructure objects has in 2011 significantly increased the impact of seasonality on the group's revenue.

Note 2 Operating segments

in thousand euros

The chief operating decision-maker, i.e. the management of AS Merko Ehitus, monitors the business of the group by operating segments. The performance of the segments is assessed by the chief operating decision maker based on segment revenue derived from outside the group and pre-tax profit. Profit before taxes of the segments comprises in substance of their revenue and cost of goods sold; other expenses and income are not allocated to segments as these are monitored for the group as a whole and are not directly related to operating segments.

The profit and loss account information and assets of reportable segments have been reported in accordance with the accounting principles used in preparation of these financial statements. All segments are involved in the sale of construction services with the exception of the real estate development segment whose revenue is derived from the sale of apartments in development projects.

Note 5 Earnings per share

Basic earnings per share for profit attributable to equity holders of the parent have been derived by dividing the net profit attributable to shareholders by the weighted average number of shares.

	2011 9 months	2010 9 months
Net profit (loss) attributable to shareholders (<i>in thousands of euros</i>)	(7 329)	5 201
Weighted average number of ordinary shares (<i>thousand pcs</i>)	17 700	17 700
Earnings per share (<i>in euros</i>)	(0,41)	0,29

The group did not have any potential ordinary shares to be issued; therefore the diluted earnings per share equal the basic earnings per share.
