Head of Administration

In Q3 2022, all our businesses grew in volume terms. Compared to the same quarter last year, the amount of loans issued through the Paskolų klubas platform grew by 16%, the number of payment transactions by 30% and the amount of loans issued to SMEs through Finomark grew by 4.5 times. It is important to note that the growth in business volumes has been achieved while maintaining profitable operations, which is extremely rare among growing Fintech companies. In Q3 2022, the company managed to increase both EBITDA profitability and pre-tax profitability, which grew by 17% and 38%, respectively, compared to the same quarter of last year.

Like everyone else, we are currently working in a difficult economic and geopolitical situation. Consumer sentiment is deteriorating due to high inflation, higher energy prices and the ECB raising interest rates. This may reduce the need to borrow for consumption, and may also reduce the volume of purchases in online shops. However, I believe that this period should not be prolonged for long, as energy prices are falling, the state has announced, in the new budget, the compensation of energy prices for both the population and businesses, and inflation should follow the fall in energy prices. Therefore, in the near future, the negative impact on personal spending will be mainly due to the rise in EURIBOR interest rates as a result of the ECB's decisions to increase base rates. At the moment, we are seeing a slight decrease in the activity of retail investors due to the war situation and other negative factors, but institutional investors are not reducing their investment volumes, in fact, they are doing the opposite, which is allowing them to continue to increase their volumes while maintaining a sufficient money supply.

So, while the overall market backdrop is negative, there are also positive signs in our performance. I believe that, thanks to rising interest rates, the Paskoly Klubas is becoming more and more competitive on the consumer credit market compared to bank prices. It is possible that banks will be more aggressive in raising the price of consumer credit than the investors in the Paskoly Klubas, and that a larger number of customers with better credit ratings will be able to borrow through us on better terms. Also, the favorable pricing of the Paskoly Klubas platform is currently attracting a growing number of existing consumer borrowers with the aim of refinancing their loans by transferring them to Paskoly Klubas. Although the cost of lending on the platform has increased slightly, the prices offered by investors remain guite attractive. Thus, we are likely to continue to maintain the growth of loans originated through the platform in the next quarter despite the unfavorable economic situation and weaker consumer sentiment. It is important to note that the income generated during the guarter from brokerage activities does not reflect the current income from the origination of the loans generated, as the income is accrued from the loans originated on the platform in previous months and years. Therefore, the Company's revenue is accrued with a significant time lag. During the year, the amount of brokerage fee receivable in the future increased by EUR 1.1 million, from EUR 6.68 million to EUR 7.78 million, and by EUR 0.42 million in Q3 compared to Q2 (from EUR 7.36 million). This increase is not reflected either in the Company's income statement or in the balance sheet. As peer-to-peer lending is already profitable, even with a conservative profit calculation (based on brokerage fees collected rather than generated), the Company has already granted more than EUR 120 million in loans in Lithuania, with a loan portfolio of more than EUR 50 million. In addition, the Company has

invested more than EUR 3 million in its own ("in-house") software to manage its peer-to-peer lending business. Taking into account the investments made, the experience gained and the understanding that Lithuania is a very small market with limited scope for volume growth, the Board decided to prepare for expansion into one foreign market and to launch there in the second half of next year. NEO Finance, AB has already started the preparatory work to develop its consumer lending business in a larger European Union country and will aim to do so in the second half of 2023.

Neopay's transaction growth reached 30% in Q3 compared to the same quarter a year ago and reached a record number of transactions in a quarter with 5.184 million units. Currently, investments are focused on product development and the introduction of new services such as Buy Now Pay Later and POS Lending in the Lithuanian market, as well as the growth of the main service – payment initiation in foreign markets. In addition, we have seen an increasing interest in the market from e-shops for the "automated refunds" functionality. "The main task of Neopay's business branch remains unchanged – to grow business volumes by expanding in EEA markets. To this end, Neopay's payment method has been integrated with major banks in Croatia, Bulgaria, Slovakia and Denmark and Neopay is now able to offer payment acceptance in 15 EEA countries. It is worth noting that Neopay still generates most of its revenues in the Baltic markets, where competition is fierce, resulting in a slower growth in revenues than in transactions.

Finomark's loan volume grew by a factor of 4.45, due to several reasons: a small comparative base (only EUR 181 thousand of loans issued in Q3 2021) and a stronger focus on sales. The result of the loans issued through the platform in September is particularly pleasing, with loans issued for as much as EUR 569 thousand. Finomark is still in its infancy and we see an opportunity to sustain its strong growth if investors continue to actively fund loans and increase their investment portfolios. It is important to note that we are aware of the uncertainty in the economy in the short term and therefore loans are selected for funding with the care and responsibility in order to maintain the planned level of non-performing loans and to provide investors with the opportunity to earn investment returns of up to 10% by investing in short-term loans up to 3 years.

The Company continues to invest significant resources and time in compliance management, ensuring the prevention of money laundering and terrorist financing, in order to comply with all legal and regulatory requirements. Every month we update our internal processes, conduct internal audits, implement recommendations and keep our information systems up to date. During the last quarter, we have also devoted considerable time and IT resources to updating our international sanctions screening procedures.

Company structure

NEO Finance AB is currently conducting its activities under three different brands: Paskoly Klubas, Neopay and FinoMark.

In 2016, the company was the first to be included on the Bank of Lithuania's list of P2P lending platforms. NEO Finance AB's Paskolų Klubas brand provides P2P lending services in Lithuania. NEO Finance AB's investments

NEO Finance AB, as a provider of consumer credit, can also invest in loans on the Paskolų Klubas P2P lending platform along with other registered lenders. By investing in loans, the company aims to increase the speed with which loans are financed, thereby ensuring the platform's attractiveness for both borrowers and lenders.

As the amount of credit requests on the Paskolų Klubas market increases and in order to finance them faster, from May 20, 2022, a decision was made to increase the limit of NEO Finance, AB, which allows the company to invest in loans.

The investment limit of NEO Finance, AB has been increased from 50% up to 80% of initial amounts of consumer loan. The company can immediately invest up to 50 percent the initial amounts of A+, A and B rated consumer credit. However, if the financing of the above-mentioned rated loans is not completed within 48 hours, NEO Finance, AB has the opportunity to finance an additional 30% of initial amounts of consumer loan.

NEO Finance, AB had the opportunity to finance up to 50% of all loans placed on the market on the Paskolų Klubas platform. Due to the growing supply of loans, it was decided to increase the investment limit of NEO Finance, AB to 80% of the initial consumer credit amount. When a credit rating of A+ or A is granted to a consumer credit recipient - NEO Finance, AB can immediately grant a consumer credit of up to EUR 15,000, if a credit rating of B is granted - up to EUR 8,800, but not more than 80 percent of the initial amount of the consumer credit. NEO Finance may not adhere to the above maximum investment amounts and grant consumer credit to consumer credit recipients of all credit ratings, if the investors have already financed at least 20 percent of the consumer credit amount and at least 24 hours have passed since the application for consumer credit was submitted to the loan market.

NEO Finance, AB can invest in C and C-rated loans only when other investors finance at least 20 percent of loan amount and at least 48 hours have passed from the submission of the application for consumer loan on the loan market.
