Management report

General information

The Group is one of the biggest pharmaceutical companies in Latvia with 40 years of experience in production of medication and chemical and pharmaceutical products. A basic principle of Group's operations is to produce reliable and effective top quality products for Latvia and the rest of the world. Products made by the Group are being exported to more than 30 countries of the world, including the Baltics, Russia, other CIS, Europe, Asia, North America and Australia.

At the end of the reporting period the Group mainly consisted from the Parent company JSC Olainfarm, its subsidiaries pharmaceutical retail company SIA Latvijas aptieka, food supplement company SIA Silvanols and travel agency SIA First Class Lounge. In December 2014 in Kyrgyzstan a subsidiary named Olainfarm Azija was established, while in March 2015 a subsidiary Olainfarm-Lietuva in Lithuania was opened and in July 2015 subsidiary Olainfarm Azerbaijan was opened. Main activity of the new subsidiaries is promotion of products of JSC Olainfarm and its partners in respective markets. During the reporting period 100% of shares in SIA Nikafarm, SIA Aptieka Ālante, SIA Jāras Aptieka and SIA Nikapharm were acquired, these companies own pharmacies in Olaine, Plavinas, Ventspils and Vilaka respectively.

Our priority is organizing an environmentally friendly manufacturing and constant increase of the Company's shareholders value.

Corporate vision:

We are aiming to become the leading manufacturer of finished drug forms and chemical-pharmaceutical products in the Baltics and to make our products known and available worldwide.

Company's Corporate Governance Report is available at www.olainfarm.lv.

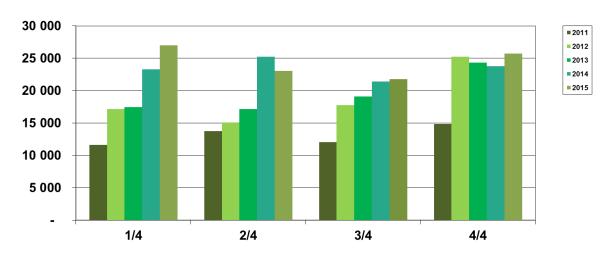

Operational environment

During the reporting period, the operational environment remained turbulent in all crucial CIS markets. Local currencies remained considerably turbulent in Russia, Belarus, Ukraine and Kazakhstan. Belarus continues tightening imports of several products, including pharmaceuticals. Only because of increased marketing activities, the company managed to maintain the same level of sales in Russia and increase sales a little in Kazakhstan (by7%). Sales in Ukraine dropped by 7%, while sales to Belarus dropped by 19%.

Financial results

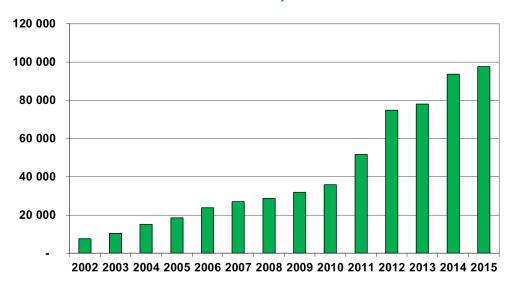

4th quarter of 2015 has in terms of sales been the best last quarter in corporate history, as sales of the Group reached 25.7 million euros, which exceeds the sales made during 4th quarter of 2014 by 8%. This has been achieved despite the fact that sales to many important markets, including, Ukraine, Belarus, UK and Poland were shrinking.

Sales by Quarters, Thsnd. EUR

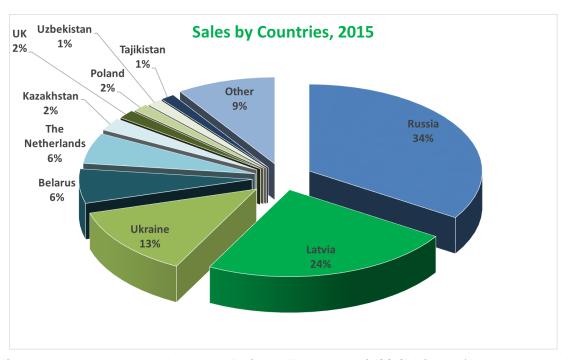

During 2015, the sales volumes grew by 4% compared to 2014 and reached 97.6 million euros. Although the annual sales target was not met, 2015 in terms of sales has been the most successful for the company so far. Successful operations in Latvia and Central Asian countries and good cooperation with the World Health Organization's anti-tuberculosis program are the key driving forces behind such increase.

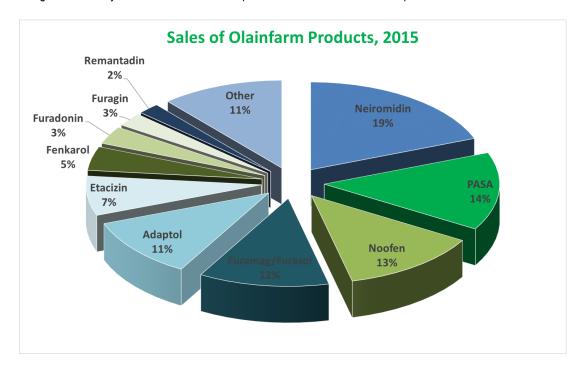

Annual Sales, Thsnd. EUR

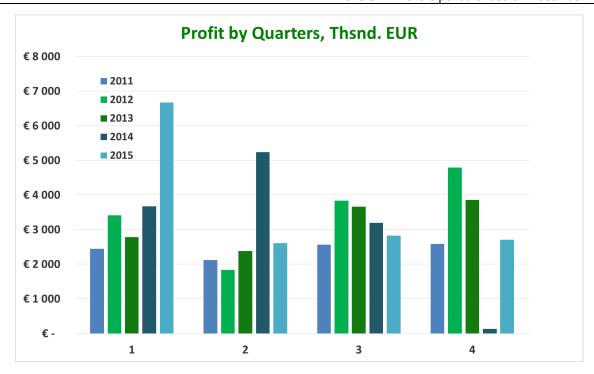

During nine months of 2015 Company's sales grew in Latvia (by 11%), The Netherlands (WHO shipments, by 107%), Kazakhstan (by 7%), Tajikistan (by 39%), Uzbekistan (by 3%) and other countries (by 23% on average). Sales have been shrinking to Ukraine (by 7%), Belarus (by 19%), UK (by 6%), Poland (by 13%) and Russia (by 1%). Sales split by countries has remained relatively unchanged with minor redistribution of shares among the biggest markets.

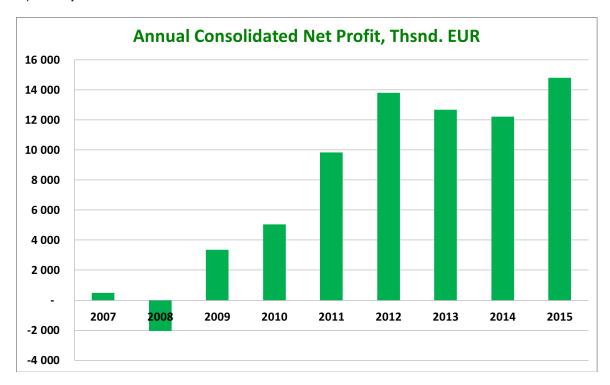

No significant changes have been occurring to the split of bestselling products of JSC Olainfarm in 4th quarter compared to the third quarter of 2015. Due to increased demand for anti-tuberculosis product PASA Sodium salt, this product has become the second best-selling product with a total share of 14% of all Olainfarm products sold. As volumes of MAG have been shrinking, this product is no longer among 10 bestselling products and is replaced by Rementadin. Share of all 10 bestselling products has also been shrinking a little as they all combined now make up 89% of sales of JSC Olainfarm products.

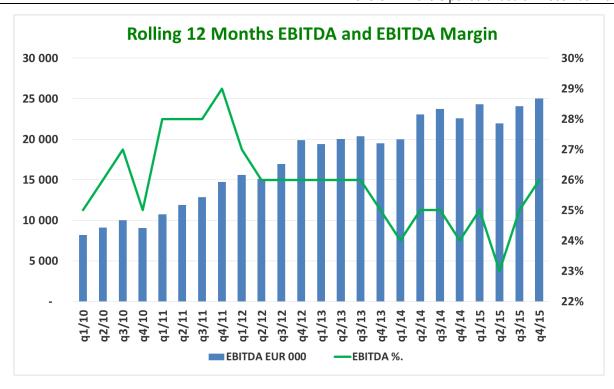

Although the 4th quarter was the best last quarter in corporate history in terms of sales, in terms of profit it is significantly lagging behind 4th quarters of 2012 and 2013. In 4th quarter of 2015 the decision has been made to make additional provisions for receivables from Ukraine worth 1.1 million euro due to depreciation of Ukrainian currency, and after these provisions, the remaining net profit was at the level of 2.7 million euros. Since results of the 4th quarter of 2014 were very adversely affected by devaluating Russian Rouble, which was much less significant in 2015, the quarter on quarter increase is particularly impressive at more than 2000%.

Because of very profitable first quarter of 2-15 and rather stable other quarters, not only has the company managed to exceed last year's profit, but it has also set a new annual profit record of 14.8 million euros. Although the profit target of 15 million is not reached, last year's profit has been surpassed by 21% and the profit of 2012, which previously has been the most profitable year, was surpassed by 7%.

Financial success is also reflected in company's EBITDA numbers. A new EBITDA record has been set in 2015 at the number exceeded 25 million for the first time. EBITDA margin has also returned to rather high level of 26%.

3. Business combination

Goodwill acquired through business combinations has been allocated to SIA Latvija Aptieka Cash Generating Unit (Pharmacy CGU) and Silvanols CGU. Premises lease agreements and licences are fully related to Pharmacy CGU.

The recoverable amount of Pharmacy CGU is determined based on a value in use calculation using cash flow projections from financial budgets approved by the management of the Group. Applying the same key assumptions in value in use calculation as for the latest year end testing, management has not identified circumstances that indicate the carrying value of Pharmacy CGU related goodwill, premises lease agreements and licenses may be materially impaired at the date of these interim financial statements.

The recoverable amount of Silvanols CGU is determined based on the company's market value applying comparison method. Market values and financial data of similar companies operating in emerging Europe and Asia markets were analysed to establish the market value of Silvanols CGU. Average rate of market value to revenue of comparative companies was selected as multiple to calculate Silvanols CGU market value. The management has not identified circumstances that indicate the carrying value of Silvanols CGU related goodwill may be materially impaired at the date of these interim financial statements.

5. Income tax

The Group calculates the period income tax expense using the tax rate that would be applicable to the expected total annual earnings.
