AS Pro Kapital Grupp in brief

Established in 1994 AS Pro Kapital Grupp AS (hereinafter as „the Company“ and/or „Pro Kapital“) is a leading Estonian real estate company with a focus on development, management and sale of modern large-scale retail and residential real estate in the capitals of Estonia, Latvia and Lithuania. Risks

Market risk, liquidity risk and risk of financing are of the most significant influence on the Company. The long-term orientation in business model the Company enables to mitigate the risks of possible market fluctuation.

The Company is further pursuing long term strategic approach, enabling it to acquire properties for development when market is low and sell the developed properties at the peak of business cycle, thus naturally capitalising on market opportunities and hedging market risk.

Liquidity risk is managed on ongoing basis, with increased focus on working capital dynamics and needs. Both careful roll-on basis cash planning, monitoring of development project cash flow and flexibility in everyday cash needs contribute to effective management of liquidity risk.

Risk of financing might prolong the Company's schedule of property development and causing the slow-down of realization of its real estate portfolio. The risk is managed through the maintaining of continuity of funding and flexibility through the use of bank overdrafts, bank loans, bonds and other debentures as well as expanding its investor base and attracting additional private equity.

Asset risks are covered by effective insurance contracts.

Note 5. Property, plant and equipment

As of 31. December 2011 Pro Kapital's land and buildings (three hotel properties) were valued into their fair value based on the valuation of independent expert. The valuation, which conforms to International Valuation Standards, was performed by independent real estate appraiser SIA Newsec Valuation LV and was determined by reference to discounted cash flow method. Current market conditions (at the moment the valuation was performed) were used as assumptions for the valuations performed.

The last valuation by independent real estate appraiser Newsec Valuations was performed in November 2015. Although some properties' fair value appeared to be higher than book value, the Management Board decided to follow revaluation of fixed assets once in each 5 years (next planned at the end of 2016) unless impairment of assets has to be recognised. As a result of valuation report, the hotel property in Germany was decreased in value by 1,9 million euros in 2015. Other properties remained unchanged.

Note 13. Earnings per share

Earnings per share are calculated by dividing the net profit (loss) for the period with the weighted average number of shares in the period.

Average number of shares:

In period 01.01.2016-30.09.2016 (54 203 938* 274/274) =54 203 938

In period 01.01.2015-30.09.2015 (54 106 575* 273/273) =54 106 575

Indicative earnings per share:

01.01.2016-30.09.2016 - 2 315 thousand euros/ 54 203 938 = -0,04 euros

01.01.2015-30.09.2015 - 2 935 thousand euros/ 54 106 575 = -0,05 euros

The convertible bonds issued did not have a dilutive effect on earnings in 2016 and 2015, therefore they have not been included in the calculation of the diluted net loss per share and the diluted loss per share equals the net loss per share indicator.
