# CORPORATE PROFILE

AS PRFoods ("Group") is a company engaged in fish farming, processing and sales. The Group's shares are listed on the main list of NASDAQ OMX Tallinn Stock Exchange since 5 May 2010 and its bonds are listed on the NASDAQ Tallinn bond list since 6 April 2020.

AS PRFoods subsidiary Saaremere Kala AS signed an agreement on 20.09.2022 to transfer 100% shares of Överumans Fisk AB to Vattudalens Fisk AB. The transaction has been concluded.

AS PRFoods will take the future direction of the development of fish farming in Estonia, with the aim of becoming the largest fish farmer in the region.

Since the acquisition of John Ross Jr. and Coln Valley Smokery in the summer of 2017, the Group has sales experience to 37 countries in Europe, North and South America, and Asia.

Main activities of the Group are fish farming and manufacturing of fish products. The main products are salmon and rainbow trout products. Approximately 2/3 of the raw fish used in the Group's rainbow trout production comes from the Group's fish farms in Swedish lakes and from coastal waters of Saaremaa in Estonia, assuring the highest quality and reliable deliveries. The rest of raw fish is purchased mainly from Norway and Denmark. Fish products are manufactured in two modern factories in Saaremaa (Estonia) and in Aberdeen (Great Britain).

Products of the Group are sold as leading brands in their respective operating market and the primary focus is on higher value-added premium products, increasing thereby the profitability of the company.

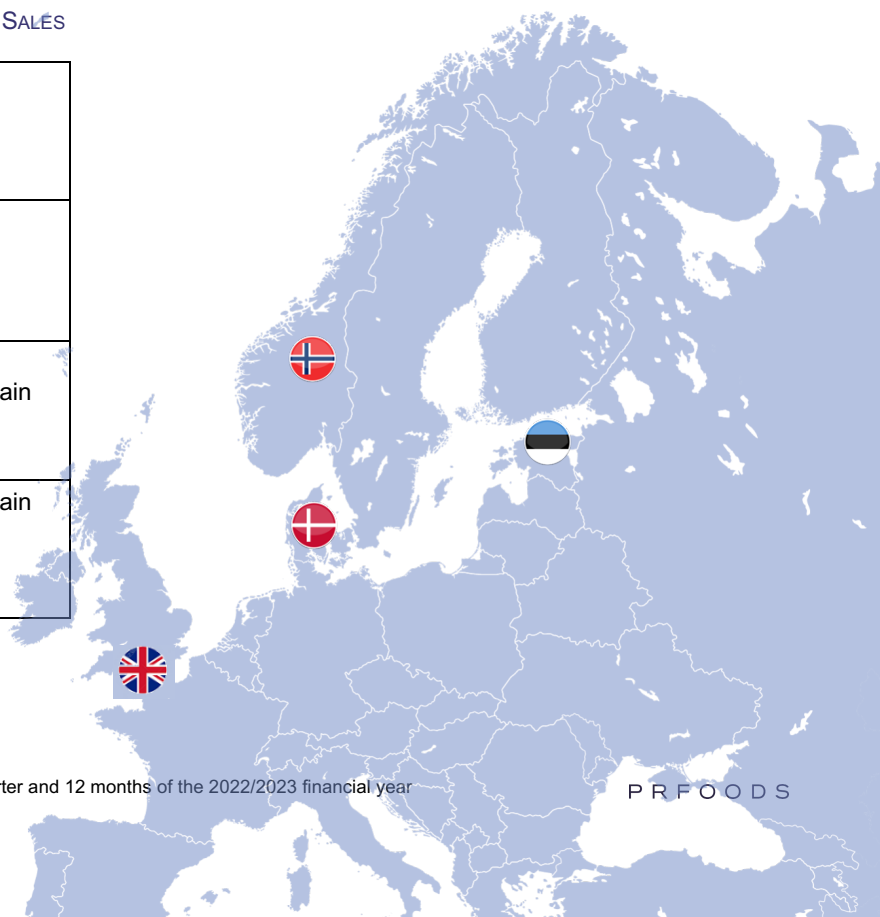

AS PRFoods plans to introduce a new brand this year, which emphasizes our Saaremaa origin.

We process mostly rainbow trout and salmon in our factories, in smaller quantities also whitefish, perch, pikeperch, vendace, Atlantic and Baltic herrings. We always keep the fish in a place of honour – both when farming and processing it – that is why we raise most of our red fish ourselves and smoke it with alder chips in the traditional way. As our product range is quite wide, a favourite product can be found for the whole family – lightly salted trout slices that have won the title of the Best Fish Product in Estonia, children's favourite trout cutlets or trout roe for a more festive occasion.

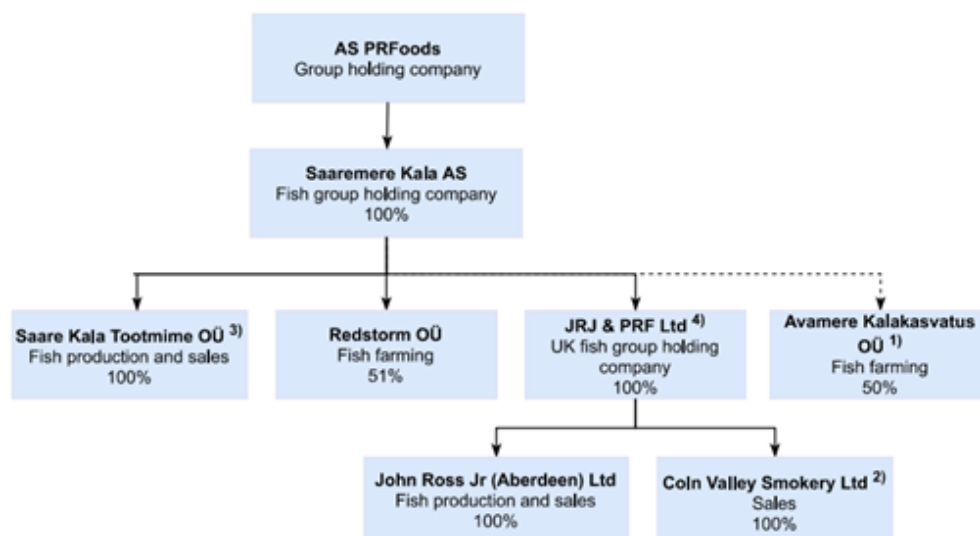

The Group is actively involved in developing new products for expanding also to new export markets.

## GROUP STRUCTURE AS AT 30.06.2023

1) The Group does not consolidate Avamere Kalakasvatus OÜ as it holds neither dominant nor significant control over the company

2) 64% of Coin Valley Smokery Ltd shares owned by JRJ & PRF Ltd and 36% by John Ross Jr (Aberdeen) Ltd

In addition, AS PRFoods holds a 20%-share of AS Toidu- ja Fermentatsioonitehnoloogia Arenduskeskus (Competence Center of Food and Fermentation Technology).

The most significant trademarks of the Group are “PRFoods” and “John Ross Aberdeen”.

## OVERVIEW OF ECONOMIC ACTIVITIES

### MANAGEMENT COMMENTARY

First year as fully transformed company has ended with moderate success. PRFoods regained profitability despite significantly lower revenues. Q4 revenues were less by 25% and full year by 53%, since we no longer have our Swedish or Finnish operations. Center of our operations is now UK and Estonian fish processing and farming.

We ended full year with 19,6 million Euro sales compared to 42,1 million last year, but more importantly, our previous year -1,6 million EBITDA loss was replaced with 0,3 million Euro profit, 118,75% improvement.

Our first net profit in many years was 350,000 Euros (last year - 8,2 million loss). Two out of three of our operations: fish farming, Estonian processing and UK and fish farming were profitable. Estonian processing unit posted loss.

Our result could have been even better, but our exclusive seller in Finland decided to end the co-operation in May. While in short term it causes pain, in long term this will benefit us handsomely, since from 2024 we no longer are prohibited by non-competition in Finland and hope to regain several million Euros in sales already in 2024. High food prices in Estonia and governments plan to raise VAT will dampen demand in Estonia and also affect the competitiveness of Estonian industries. It is a challenge, but with new management in helm at Estonia, I am fully confident that Estonian processing operations will also be profitable next year.

I am extremely pleased that our UK business reached over 1 million Euros Ebitda again, after COVID crisis and now inflationary pressures. John Ross Jr continues to be best Scottish smoked salmon brand and the management has excelled again.

I am also very pleased to announce that our new fish farming licence application in Estonia has been approved and we expect to get the water usage permit in September 2023, meaning we can scale up our fish farming production already from 2024.

Q1 of current year is tough still for Estonia, UK forecast is promising and we expect historically best result from fish farming unit. Cashflow management remains a challenge. At least we do no longer have pressure by our formerly main bank to sell off our profitable units (Sweden) in order to reduce leverage, but leverage is still too high for regained profitability and additional support from shareholders is needed.

We live in interesting times, and one challenge is replaced by another for most of the industries that are not protected or subsidised by government.

Sincerely,

Indrek Kasela

#### COST OF GOODS SOLD (COGS)

COGS was 16,0 million euros and it accounted for 81,63% of the total sales of the four quarters of the 2022/2023 financial year, (12 months 2021/2022: 38,99 million euros, 92,61% of sales).

Purchase cost of raw fish continues to account for the majority (ca 80%) of the largest COGS item “materials in production and cost of goods purchase for resale” that amounted to 11,0 million euros. Remaining costs are mainly attributable to packaging materials and fish feed.

Labour cost of personnel employed in production and fish farms totalled 2,6 million euros and formed 13,27% of total sales. Other cost of goods sold amounted to 2,4 million euros and formed 12,24% of total sales. The cost item includes costs on heating, electricity, rent and utilities, and costs incurred in relation to fish farming and auxiliary activities in production.

#### OPERATING EXPENSES

Operating expenses amounted to 4,71 million euros and accounted for 24,03% of the total sales (12m 2021/2022: 7,21 million euros, 17,12% of sales).

#### FISH FARMING

The competitive advantage of the Group is its vertical integration – fish farming, production and sales. About two thirds of the raw trout used in the Group's production is harvested from the Group's own fish farms in the lakes in Sweden and in coastal area of Saaremaa, Estonia, ensuring that customers receive fast and high-quality deliveries.

Vertical integration enables the Group to reduce costs in certain phases of fish farming and to also enhance control foremost over fish processing and marketing. In the fish business, as fish are livestock, the quality assurance in the technological process has keenly to be maintained throughout the entire product lifecycle. In addition to improved cost control, the vertical integration enables to reduce risks in fish farming, for instance due to poor quality of feed or base materials, and to secure the volume required for processing as well as price stability of raw material.

## PRICE OF FISH

The fish production industry is extremely dependent on availability and the price of raw fish. Large producers make their production plans for three years in advance as it is difficult and expensive in shorter perspective to adapt a fish farm's production cycle to market needs. Therefore, the world market fish supply is relatively rigid in the short-term, while demand is somewhat shifting depending on the season. This imbalance in fish supply and demand results in constantly fluctuating price of raw fish. Moreover, the far-reaching change in supply chains during the past month in connection with the spread of the virus has increased the amplitude and unpredictability of prices. The Group counters the impact of external environment and volatility of fish price through the changes of the Group's production and sales strategy.

The average fish prices have increased compared to the prices three years ago: salmon by 38,78% and rainbow trout by 63,23%.

## BIOLOGICAL ASSETS

Biological assets are fish stock accounted for in PRFoods' fish farms in live weight, including rainbow trout (*Oncorhynchus mykiss*) and European whitefish (*Coregonus lavaretus*).

The Group uses the Norwegian export statistics (source: akvafakta.no) to assess the value of rainbow trout's stock. For assessing the value of whitefish stock, the monthly market price survey of the Finnish Fish Farmers' Association is used. When the price of raw fish increases or decreases, so does the value of fish harvested in fish farms of PRFoods, having either a positive or a negative impact on the Group's financial results.
