11. ŽSA 5 UAB (activities of head offices).

Investments in subsidiaries are described in more detail in Note 2 *Securities*.

This condensed interim financial information for the nine month period ended 30 September 2018 has been prepared in accordance with IAS 34, "Interim Financial Reporting" as adopted by the EU. The condensed interim financial information should be read in conjunction with the annual financial statements for the year ended 31 December 2017, which have been prepared in accordance with International Financial Reporting Standards ("IFRS") as adopted by EU. Except for the points described below, all the accounting policies applied in the preparation of this condensed interim financial information are consistent with those of the annual financial statements of the Bank for the year ended 31 December 2017.

<u>Income tax</u>
Income tax in the interim periods is accrued using the tax rate that would be applicable to expected total annual earnings.

<u>New and amended standards, and interpretations</u>
The Group adopted IFRS9 from 1 January 2018. The impact of adoption of the standard is described in Bank's annual financial statements for the year ended 31 December 2017. The impact of IFRS9 adoption to accumulated comprehensive income is decribed in more detail in Note 6 to the condensed interim financial staments, the impact to loans and finance lease receivables - in Note 1, the impact to derivative financial instruments – in Note 3, the impact to allowance for impairment – in Note 10.

IFRS16, which will be effective for annual periods starting from 1 January 2019 or later, also may have a material impact to the Group's financial statements. The impact of IFRS16 is described in Bank's annual financial statements for the year ended 31 December 2017.

Except for the standards mentioned above, the Bank's management do not believe the newly published standards, amendments and interpretations that are mandatory for the Bank's reporting periods beginning on or after 1 January 2018 will have a material impact on the Bank's financial statements, also there are no new standards, amendments and interpretations that are mandatory for the Bank with effect from 2018, and that would have a material impact on the Bank's financial information.

The preparation of financial statements in conformity with IFRS requires the use of estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Although these estimates are based on management's best knowledge of current event and actions, actual results ultimately may differ from those estimates. Except for the impact of above-described IFRS9 (most importantly, to the financial assets impairment assessent, the model of which changed from incurred loss to expected loss), in preparing these condensed interim financial statements, the significant judgements made in applying Group's accounting policies and the key sources of estimation uncertainty were the same as those applied to the financial statements as at and for the year ended 31 December 2017.

These financial statements combine the consolidated financial statements for the Group and stand-alone financial statements of the Bank. Such format of reporting was adopted to ensure consistency of presentation with the format prescribed by the Bank of Lithuania and applied for statutory reporting.

No significant amounts of the Group's and the Bank's income or expenses are of a substantial seasonal nature.

(All amounts are in EUR thousand, unless otherwise stated)

NOTE 1
LOANS TO CUSTOMERS AND FINANCE LEASE RECEIVABLES

Credit risk is defined as the risk for the Group to incur losses due to the Group's customers' failure to fulfil their financial obligations towards the Group. Credit exposures arise principally in lending activities and it is the most significant risk in the Group's banking activities. There is also credit risk in investment activities that arise from debt securities and in the Group's asset portfolio as well as in the off-balance sheet financial instruments, such as loan commitments, guarantees and letters of credit.

The Bank regularly reviews its credit risk management policies which include lending policies, credit risk limit control, other credit risk mitigation measures as well as the internal control and internal audit of credit risk management.

The Bank takes risks only in the fields, which are well known to it and where it has long-term experience, trying to avoid excessive risk in transactions that can have negative influence to the big portion of shareholders' equity but seeks the sufficient profitability which, in terms of increasing competition, would ensure the stable Bank's position in the market and would increase the Bank's value. In assessing exposure to credit risk, the Bank adheres to the principle of prudence.

The aim of the Bank's credit risk management policy is to ensure that the conflict between interests of staff or structural units is avoided. With respect to provision of credits to clients, the principle stating that profit should not be earned at the expense of excessive credit risk is observed.

From 1 January 2018 the Group adopted IFRS9 "Financial Instruments". The Group designed and implemented an ECL (expected credit loss) measurement model, which covers four main groups of financial assets: loan and finance lease portfolio; debt securities; due from banks; other financial assets. Model for loan and finance lease portfolio ECL measurement is based on Group's historical credit loss experience (for calculation of probabilities of default based on internal ratings – 7 years, for calculation of loss given default based on recovery ratios of different types of collateral – 5 years) adjusted by factors to reflect the differences between the economic conditions of the period of which historical data was used, and economic developments expected over the next 12 months or estimated life of instruments. The Group performed ECL calculations for segments of customers that share similar risk characteristics (segments of corporate customers were defined using economic sector, individual customers were split between consumer financing and other). Model for other financial assets uses simplified assumptions from the loan and finance lease portfolio model. Models for debt securities and due from banks rely on external ratings and probability of default and recovery rate data of Moody's Investors Service.

Aggregated assessment of impact of the standard to the allowance for impairment at 1 January 2018 is presented in the table:

Increase in allowance for impairment at IFRS9 adoption	*Group*	*Bank*
Loans to customers	8,130	6,214
Finance lease receivables	1,565	1,543
Debt securities	296	291
Due from banks	22	22
Other financial assets	307	288
Total increase in allowance for impairment of financial assets	10 320	8 358

The reconciliation of allowance for impairment of financial assets is presented in Note 10.

Credit risk management procedure was also reviewed and renewed. New version of the procedure came into force from 1 January 2018. Besides changes necessary for IFRS9 adoption, internal risk indicators systems was reviewed and expanded.

Loans are assigned to stages using the following principles (a deviation from these principles is allowed in the process of individual loan assement based on contract-specific circumstances if it would result in more precise assessment of the risk of the contract):

Stage 1 loans: loans with no increase in credit risk observed.

Stage 2 loans: loans with an increase in credit risk observed. Main reasons for determining an increase in credit risk are: deterioration of borrower's financial status from the initial (this criteria is not applicable to the low credit risk loans, i.e. loans that have internal borrower's financial status assessment grades "very good" or "good" or investment grade credit ratings by external credit rating agencies), payment delay of over 30 days, and other objective criteria showing an increase in credit risk.

Stage 3 loans: defaulted loans. Main reasons for determining a default are: payment delay of over 90 days, bankruptcy of the borrower, termination of the contract, start of the foreclosure procedures and other objective criteria.

NOTE 2
SECURITIES

Securities in the trading book

Securities in the trading book are comprised of trading securities and other securities that cover technical insurance provisions under unit-linked insurance contracts of life insurance subsidiary. These securities are measured at fair value through profit or loss. In the 2017 financial statements these securities were presented as Securities at fair value through profit or loss. IFRS9 adoption resulted in no changes except for the change of line title.

derivatives related to prices of financnial instruments	*(671)*	*-*	*(671)*	*(949)*

On IFRS9 adoption, the embedded derivative financial instruments related to interest rate floor in variable rate loan contracts were derecognized.

As the variable rate loans that contain such conditions pass the SPPI test and are held in line with the business model, main purpose of which is to collect cash flows from the financial instrument, the Group has to apply the classification requirements on the whole instrument and therefore embedded derivatives related to interest rate floor in variable rate loan contracts are no longer recognised separately on the balance sheet. The derecognition results in decrease of value of derivatives and retained earnings by EUR 2,284 thousand for the Group and the Bank.This impact is offset by change in accrued interest as when initially recognized, value of loan was reduced by value of embedded derivative, and later the difference was included in the effective interest rate and amortized through interest income. Change in accrued interest results in an increase in loans and retained earnings by EUR 2,385 thousand. Therefore the total effect of derecognition of embedded derivatives results in increase in retained earnings by EUR 101 thousand

Income tax expense

After receiving the commentary from tax authority regarding the tax treatment of IFRS9 impairment provisions, which allows to add the result from changes of impairment provision on adoption of IFRS9 to the impairment expenses of 2018 for income tax calculation purposes, the Bank adjusted current year income tax and deferred income tax amounts. Accordingly, current year profit was increased by EUR 1,502 thousand (adjustments were made to the income statement line *Income tax expense*), and retained earnings was decreased by EUR 1,127 thousand (the amount, which was recognized in equity on IFRS9 adoption by recognizing deferred income tax assets and increasing retained earnings, was reversed directly in equity by reducing retained earnings).

(All amounts are in EUR thousand, unless otherwise stated)

NOTE 12
RELATED-PARTY TRANSACTIONS

Related parties with the Bank are classified as follows:

a) members of the Bank's Supervisory Council and Board (which also are the main decision makers of the Group), their close family members and companies that are controlled, jointly controlled or significantly influenced over by these related parties. For some companies the presumed significant influence threshold of 20% voting rights has been reduced if other evidence shows that a person/ entity can exercise significant influence by additional means (e.g. by holding a seat in the Board of Directors of a particular entity);
b) subsidiaries of the Bank and subsidiaries held for sale;
c) the shareholders holding over 5 % of the Bank's share capital.

During 2018 and 2017, a certain number of banking transactions were entered into with related parties in the ordinary course of business. These transactions include settlements, loans, deposits and foreign currency transactions. Starting from 2018, according to the local legislation, the information on executed material transactions with related parties is published on Bank's website (www.sb.lt › About bank › Information › Reports regarding the transactions with related parties).

The balances of loans granted to and deposits accepted from the Bank's related parties, except for subsidiaries, were as follows:

	30 September 2018		*31 December 2017*	
	Balances of deposits	Balances of loans (incl.off-balance sheet credit commitments)	Balances of deposits	Balances of loans and debt securities (incl.off-balance sheet credit commitments)
Members of the Council and the Board	4,324	261	2,036	133
Other related parties (excluding subsidiaries of the Bank)	18,512	57,614	19,667	53,335
Total	22,836	57,875	21,703	53,468

The Group and the Bank held debt securities of one entity attributable to related parties. On 30 September 2018 debt securities attributable to related parties exposure amounted to EUR 117 thousand for the Group and the Bank (31 December 2017: EUR 234 thousand).

Transactions with EBRD:

The Group/Bank has a subordinated loan received from European Bank for Reconstruction and Development (hereinafter – EBRD), book value of which was EUR 29,244 thousand as of 30 September 2018 (31 December 2017: EUR 34,203 thousand). The agreement for the loan was signed at the end of February 2013. Loan amount is EUR 20 million, term – 10 years. Loan agreement provides a conversion option to EBRD, under which EBRD has a right to convert a part of or the whole loan to ordinary shares of the Bank at a price, which at certain scenarios could be more favourable than the market price (but in any case, not less than the nominal value of the share). Because of this option, which is an embedded derivative, the Bank chose to account for the whole instrument as a financial liability at fair value through profit or loss. Subordinated loan fair value consists of:

	30 September 2018	31 December 2017
Derivative part of the financial liability	8,572	12,990
Debt part of the financial liability	20,672	21,213
Total value of financial liability at fair value through profit or loss:	29,244	34,203

Subordinated loan related interest expenses amounted to EUR 753 thousand, a gain of EUR 4,959 thousand related to revaluation of the liability to fair value was recorded in profit (loss) statement for the nine month period ended 30 September 2018 (nine month period ended 30 September 2017: interest expenses EUR 741 thousand, revaluation loss EUR 10,520 thousand).

On 6 August 2018 the Bank received a conversion notice from EBRD on the implementation of the right to convert the loan. The extraordinary general shareholders meeting passed resolutions, which allow to implement the conversion (see Note 6 for more details). Bank's management expects that the conversion procedures will be finalized during the fourth quarter of 2018. The carrying value of subordinated loan will increase Bank's shareholders equity (via Share capital, Share premium and Retained earnings lines) as a result of the conversion.

(All amounts are in EUR thousand, unless otherwise stated)

NOTE 13
LIQUIDITY, MARKET AND OPERATIONAL RISKS

Liquidity risk

Liquidity risk means the risk that the Bank is unable to meet its financial obligations in time or that it will not manage to receive financial resources during a short time by borrowing or selling the assets.

Liquidity risk management process

The liquidity risk management depends on the Bank's ability to cover the cash shortage by borrowing from the market and the liquidity of the market itself. Liquidity risk management is regulated by the Procedures for Liquidity Risk Management approved by the Board of the Bank. The management of the current and non-current liquidity risk is distinguished in the mentioned procedures. The current liquidity is based on the control of the incoming and outgoing cash flow. The non-current liquidity is managed on the limit system basis.

Tables below present the assets and liabilities according to their remaining maturity defined in the agreements. However, actual maturity of the particular types of assets and liabilities may be longer as, for example a portion of loans and deposits is extended and thus the real repayment terms of short-term loans and demand deposits move forward.

Market risk

The Group takes on exposure to market risk, which means the risk for the Bank to incur losses due to the adverse fluctuations in the market parameters such as currency exchange rates (foreign currency risk), interest rates (interest rate risk) or equities prices (equity risk). The most significant market risk for a Group is interest rate risk while other market risks are of lower significance.

Interest rate risk

Interest rate risk is the risk to incur loss because of uncoordinated re-evaluation of the Bank's assets and liabilities. The risk management is regulated by the Interest Rate Risk Management Procedures which define the risk assessment approaches as well as risk management measures. The present procedure specifies that the Bank shall avoid guessing the future interest rates. The scope of the risk is assessed referring to the interest rate gap model.

NOTE 13
LIQUIDITY, MARKET AND OPERATIONAL RISKS (continued)

Sensitivity of interest rate risk

Assessing the sensitivity of the Group's profit towards the change of interest rates, it has been assumed that interest is to change by 1 percentage point.

The data provided in the table below specify the Group and the Bank's interest rate risk when the assets and liabilities shown at the carrying amount are allocated by the date of the interest rate review or by maturity of assets and liabilities, depending on which comes first. The scenarios presented in the table show the changes in Group's/Bank's profit in the event of interest rate increase by the number specified. In case interest rates decreased, the values of the changes in profit would be opposite.

NOTE 13
LIQUIDITY, MARKET AND OPERATIONAL RISKS (continued)

Operational risk

The Bank defines operational risk as the risk to incur losses due to inadequate internal control processes or incorrect process implementation, errors and(or) illegal actions of employees, malfunctioning of information systems or external incidents.

The principles for management operational risk in the Bank: proper identification and assessment of operational risk; preventing larger operational risk and losses by implementation of efficient internal control; proper organisation and supervision of internal control environment by continuous revision of applicable control methods; concentration of resources and time towards idenfication and management of main sources of operational risk in all the areas of Bank's activity.

Bank's operational risk management procedure, which is an integral part of the Bank's risk management policy, defines the principles of operational risk management applicable to the Bank and its subsidiaries. Operational risk management procedure is subject to continuous improvement.

The operational risk management methods are implemented in the Bank – the system for registration of operational risk events in the administrative information system (AIS), functioning of which is regulated by the Instruction for registration of Operational risk events; the system of operational risk indicators and monitoring of limits of these indicators; operational risk self assessment performed by the Bank annually; evaluation of new products. The Bank set out the regulations on the principles for reliable and appropriate internal control system, guidelines for the business continuity organization.

In 2017 the Bank continued to develop systems of operational risk management and internal control, renewed the process for conducting investigations on very important operational risk events. The organization of business continuity was improved, i.e. the business continuity instructions for main processes and critical IT systems were prepared. The scope of risk indicators was reviewed and expanded. Employees perception of operational risk was strengthened by organizing operational risk training of new employees.

In 2018, the Bank further strengthened its operational risk management and internal control systems. In the beginning of the year, the provisions for organization of internal control were updated, in which the principles for assigning Bank's structural units to lines of defence were clarified. Attention is allocated towards Bank's business continuity management: update of provisions for business continuity organization, processes for extreme situations and Bank's information system incidents management.

NOTE 14
FINANCIAL ASSETS AND LIABILITIES MEASURED AT FAIR VALUE

Types of inputs used in valuation techniques determine the following fair value hierarchy:

- Level I – Quoted prices (unadjusted) or public price quotations in active markets for identical assets or liabilities;
- Level II – Inputs other than quoted prices included within Level I that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices);
- Level III – inputs for the asset or liability that are not based on observable market data (unobservable inputs).

During the nine month period ended 30 September 2018, the process of fair value measurement did not change significantly as compared to the process described in the annual financial statements for the year 2017. For the valuation of financial assets and liabilities purposes, estimates, valuation techniques and inputs used to develop those measurements have not changed significantly during the nine month period ended 30 September 2018, no new circumstances that could have a significant impact on the fair values of financial assets and liabilities were identified during the period.

Fair value of investment securities held to collect cash flows:

The fair value for investment securities held to collect cash flows is based on market prices or broker/dealer price quotations – i.e. it is estimated using valuation technique attributable to Level 1 in the fair value hierarchy. The estimated fair value of unlisted securities is estimated using valuation technique attributable to Level 3 in the fair value hierarchy, it represents the discounted amount of estimated future cash flows expected to be received. Expected cash flows are discounted at current market rates to determine fair value. Listed securities priced on market prices or broker/dealer quotations represent over 99% of the investment securities held to collect cash flows portfolio of the Group.

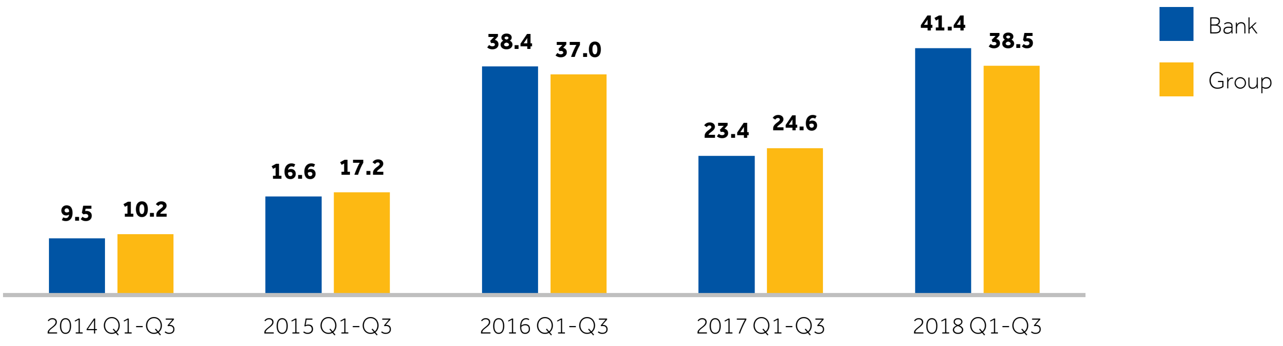
ŠIAULIŲ BANKAS

ADDITIONAL INFORMATION

RESULTS FOR THE FIRST THREE QUARTERS OF THE YEAR

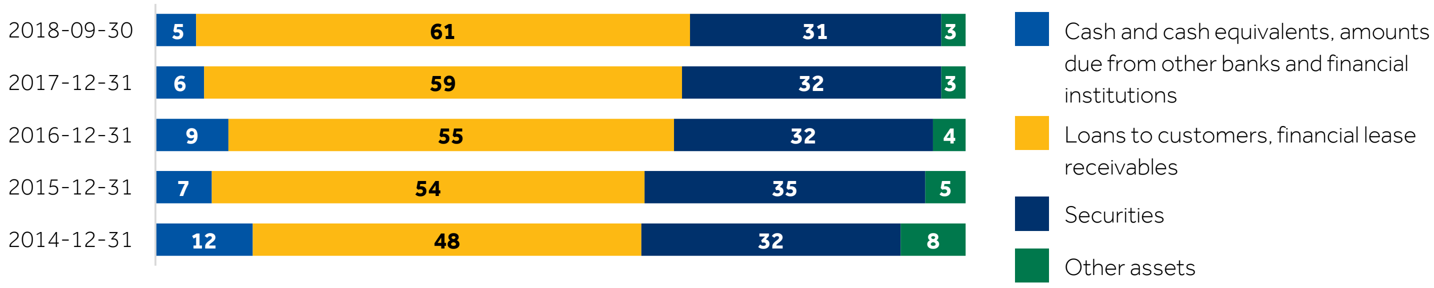
In nine months of this year, Šiaulių Bankas group had an unaudited net profit of 38 million euros, or 56 per cent more than in the same period last year. The profit of the bank alone in the three quarters was over 41 million euros, compared to the 23 million euros earned in respective period last year.

Net Profit earned by the Bank and Group, in thousand EUR



Šiaulių Bankas group's loan and financial lease portfolio is growing steadily: the size of the portfolio increased by 4 per cent during the third quarter and 13 per cent from the start of the year, to more than 1.3 billion euros at the end of September. In the first nine months of this year more than 0.5 billion euros of new loan agreements were signed.

The Group's Asset Structure, in per cent

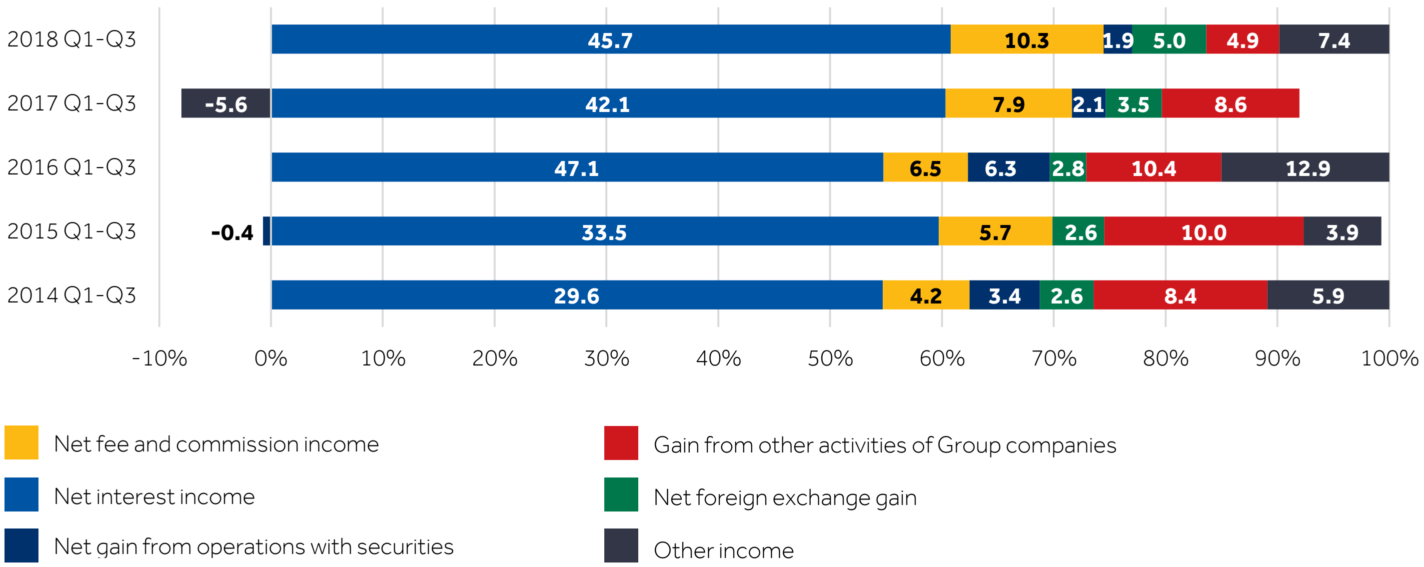


The group's deposit portfolio expanded by 3 per cent in the third quarter and 11 per cent from the start of the year, exceeding 1.8 billion euros as of the end of September 2018.

The Group's Liability Structure, in per cent

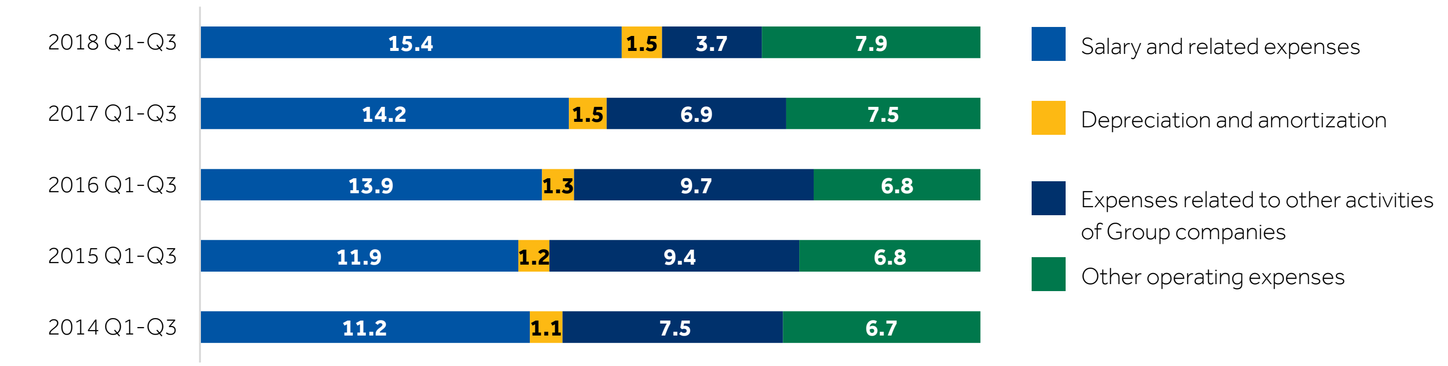
Growth of net interest income and net service fees and commission income also contributed heavily to earnings improvement. With the loan and lease portfolio expanding rapidly and loan yields held stable, the group earned 45.7 million euros of net interest income in nine months. Significant impact on the growth of net fee and commission income is caused by increasing settlement volumes and not decreasing cash transactions turnover. Net service fees and commission income grew 30 per cent compared with the same period last year to over 10 million euros. Profit from foreign exchange operations also grew notably, with gains of 5 million euros for the Šiaulių Bankas group in the first three quarters of the year. Assessing the condition of borrowers conservatively, an additional 2.1 million euros of loan impairment losses were recognized during the third quarter of this year, and a loss of 2.7 million euros due to the change in value of non-financial assets was also recognized.

Structure of the Group's Operating Income (million EUR)



An extraordinary general meeting of shareholders on 24 September 2018 approved the conversion of the 20-million-euro European Bank for Reconstruction and Development (EBRD) subordinated loan and an increase of the authorized capital of Šiaulių Bankas through an issue of new shares. This process is expected to be completed by the end of this year. The change in the value of a subordinated loan, which has had a significant impact on bank results in recent years, was re-adjusted in the third quarter of this year, accounting for an unrealized positive effect of 2.5 million euros. After a loan conversion and all related procedures, this factor will not affect the results any longer. The decision that has been made and its approval by shareholders dispel the uncertainty which reigned for some time about possible conversion of the EBRD loan. The decision to strengthen the bank's capital not only shows that the largest shareholder has a positive view of the bank's operating strategy and its outlook, but also creates conditions for the bank to continue expanding its activities and increasing its shares' attractiveness for investors.

Structure of the Group's Operating Expenses (million EUR)



A sustainable and steady increase of profit is supported by the group's recurring activities, earnings for which grew by 13 per cent for the second consecutive quarter.
