\* These subsidiaries were not consolidated due to their insignificance.

Seven above subsidiaries, joint venture and branches are incorporated in Lithuania. SIA “Jekabpils Piena Kombinats” is incorporated in Latvia.

The Group's main line of business is the production of fermented cheese and a wide range of other dairy products.

On 31<sup>st</sup> March 2009, the average number of the Group's employees was equal to 1 681 (compared to 1 768 employees as at 31<sup>st</sup> March 2008).

## 2. Accounting Principles

These consolidated financial statements have been prepared according to International Financial Reporting Standards as adopted by the European Union.

The consolidated financial statements have been prepared under the historical cost convention. The principal accounting policies applied in the preparation of these consolidated and parent company's financial statements are set out below. These policies have been consistently applied to all the years present, unless otherwise stated.

The preparation of consolidated and parent company's financial statements in conformity with IFRS requires the use of estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period.

Subsidiaries are the entities over which the Group has the power to govern the financial and operating policies generally accompanying a shareholding of more than one half of the voting rights. Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are de-consolidated from the date that control ceases.

Transactions among the Group's enterprises, residual values and retained transaction earnings between the Group's enterprises are eliminated. Unrealised loss is eliminated too; however, it is considered to be the sign of transfer asset value decrease. The accounting principles of daughter enterprises were changed where necessary in order to ensure their consistency with the accounting principles applied by the Group.

The Group applies a policy of treating transactions with minority interests as transactions with parties external to the Group. Disposals to minority interests result in gains and losses for the Group that are recorded in the income statement.

The Group's interests in jointly controlled entities are accounted for by proportionate consolidation. The Group combines its share of the joint ventures' individual income and expenses, assets and liabilities and cash flows on a line-by-line basis with similar items in the Group's financial statements. The Group recognises the portion of gains or losses on the sale of assets by the group to the joint venture until it resells the assets to an independent party. However, a loss on the transaction is recognised immediately if the loss provides evidence of a reduction in the net realisable value of current assets, or an impairment loss.

Items included in the financial statements of the Company and each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates (hereinafter "the functional currency"). The financial statements are presented in Litas (LTL), which is the Company's (and each of the Group entity's) functional and presentation currency.

The value of long-term tangible assets is valued at historical cost less accumulated depreciation. Subsequent costs are included into the asset's carrying amount or recognized as separate assets, as appropriate, only when it is likely that in future the Group will receive economic benefits associated with the item and the cost of the item will be measured accordingly. All other repairs and maintenance expenses are charged to the income statement during the financial period in which they have been incurred.

Depreciation on property, plant and equipment is calculated using the straight-line method to allocate their cost to their residual values over their estimated useful lives, as follows:

|                                                   |               |
|---------------------------------------------------|---------------|
| Buildings                                         | 15 – 55 years |
| Plant & machinery                                 | 5 - 29 years  |
| Motor vehicles                                    | 4 - 10 years  |
| Equipment and other property, plant and equipment | 3 - 20 years  |

The asset residual values and useful lives are reviewed, and adjusted, if appropriate, at each balance sheet date.

The Group's software which is expected to bring the Group material benefit in future, is valued at cost price less accumulated depreciation. Depreciation is calculated using the straight-line method for the estimated useful life from 1 to 5 years.

Borrowings and receivables are non-derivative financial assets which have fixed or determined payments and which are not quoted in the active market. They are reported as current assets when their term is no longer than 12 months from the balance sheet preparation date; otherwise, they are reported as non-current assets. In the balance sheet borrowings and receivables are reported under trade and other receivables.

Inventories are reported at their cost price or at their net sale value, depending on which of the values is smaller. The cost price is calculated using the method of FIFO. The cost of ready production or production in progress consists of raw material, direct labour and other direct or indirect production expenses less borrowing costs. Net sale value is a valuated sale price under usual business conditions less production completion and sale expenses.

In the beginning receivable sums are reported at their fair value and subsequently at their depreciated cost less value decrease sum, using the method of effective interest rate. The value decrease of receivables is determined when there is objective evidence that the Group will fail in getting back all the sums during the terms determined in advance. Value decrease sum is the difference between the carrying amount and the actual value of evaluated future cash flows, discounted using the effective interest rate method. In the income statement the value decrease sum is reported under general and administrative expenses. Bad debts are written off in the year when they are determined as impossible to settle.

Cash and cash equivalents are reported at their nominal value. In the cash flow statement cash and cash equivalents mean bank and cash-register money, as well as bank overdrafts. In the balance sheet bank overdrafts are reported under financial debts as current liabilities.

Ordinary registered shares are reported at their nominal value. The sum received from sold shares exceeding their nominal value is reported as share premium. Additional expenses directly attributed to new share emission are reported by subtracting them from share premium.

When the company or its daughter enterprises acquire the company shares, the sum paid for them, including all additional expenses, is subtracted from shareholder property as treasury shares until they are not sold, newly launched for sales or cancelled. When treasury shares are sold, launched for sales or cancelled no profit or loss are reported in the income statement. When such shares are subsequently sold or launched for sales again, the means received are reported as shareholders' own capital change in the consolidated balance sheet.

Other reserves are formed following the general annual shareholder meeting decision concerning division of retained earnings.

In the beginning liabilities are reported at their fair value without transaction costs. Subsequently the loans granted are reported at their depreciated cost, whereas the difference amount between the proceeds received (less transaction costs) and the loan repayments is reported in the income statement during the entire loan period using the method of effective interest rate.

Income is taxed 20 per cent (in 2008 - 15 per cent) of income tax rate according to the laws on taxes of the Republic of Lithuania.

For its employees the Group pays social income payments to the State Social Insurance Fund (henceforth – the fund), following a determined payment plan and in accordance to local legal act requirements. Social insurance payments are considered to be expenses, following accumulation principle. They are reported under salary expenses.

Income from sale consists of the fair value of proceeds received or receivable for the goods sold and services provided during the Group's operating activities. It is received by subtracting the added value tax, returned goods and price allowances, and by removing the sales inside the Group. The income from production sale is counted only after the purchaser overtakes all the significant risks and benefits related to proprietary rights.

Interest income is acknowledged in proportion using the method of effective interest rate.

In the Group's financial report payment of dividends to the company's shareholders becomes obligatory only after it is confirmed by the company's shareholders.

The general income per share is counted by dividing the shareholders' net profit by the weighted average of ordinary registered shares launched. The ordinary registered shares bought by the Group are not included since they are valued as treasury shares.

The Company's single business segment is production of cheese and other dairy products, therefore, information on key business segment is not presented. The Group is organized on a basis of two main business segments: Fresh milk products and Cheese and other dairy products. Secondary reporting format – geographical. A geographical segment is engaged in providing products or services within a particular economic environment that are subject to risks and return that are different from those of segments operating in other economic environments.

Governmental subsidies are counted at their fair value when there is enough evidence confirming that subsidies are to be received and the Group is in conformity with the conditions raised.

Export subsidies, paid by the Government for every ton of goods in conformity with requirements, are registered under income from sales.

In the balance sheet the government subsidies granted to finance the purchase of long-term tangible assets are reported under long-term future income. They are acknowledged as income using the straight-line method during the relative long-term tangible asset functional working period.

Putting offs are evaluated as the actual value of expected obligatory expenses, applying the pre-tax tariff which reflects actual market considerations concerning cash time value and appropriate obligation risks. Putting off increase due to period changes is acknowledged as interest costs.

Trade payables are recognized initially at fair value and subsequently measured at amortised cost using effective interest method.

### 3. Information on segments

#### *Primary segment – business segments*

The Group's main business segments:

- Fresh dairy products
- Cheese and other dairy products.

Other operations of the Group mainly comprise of milk collecting activity which is not of a sufficient size to be reported separately. Transactions between the business segments are on normal commercial terms and conditions.

#### *Secondary segment – geographic segments*

Analysis of the Group's income from sales according to markets is as follows:

|                                               | 2009 03 31 | 2008 03 31 | Change (%) |
|-----------------------------------------------|------------|------------|------------|
| Lithuania                                     | 61 265     | 62 722     | -2,32      |
| European Union countries                      | 50 853     | 49 660     | 2,40       |
| Other (including the United States and Japan) | 14 916     | 26 483     | -43,68     |
| Total                                         | 127 034    | 138 865    | -8,52      |

Income analysis according to groups:

|                   | 2009 03 31 | 2008 03 31 | Change (%) |
|-------------------|------------|------------|------------|
| Product Sales     | 126 402    | 138 596    | -8,80      |
| Export subsidies  | 446        | -          | 100,00     |
| Provided services | 186        | 269        | -30,86     |
| Total             | 127 034    | 138 865    | -8,52      |

Following the European Commission's Regulation "Concerning covering export costs of milk and dairy products", starting from 1<sup>st</sup> May 2004 the company has the right to receive subsidies for the cheese exported to the countries determined by the latter Regulation. Export subsidies are paid for every ton of exported production which is in conformity with the Regulation requirements. Payable export subsidies are reported under trade and other payables.

### 4. Long-term tangible assets

In the income statement the depreciation charge of long-term tangible assets is reported in the following entries: selling and marketing expenses, general and administrative expenses and cost of sales, as well as in production in progress and ready production entries.

Software and intangible asset depreciation charge are accounted in the entry of general and administrative expenses.

## 5. Other receivables

As at 31<sup>st</sup> March 2009, the Group's receivables was made of:

|                                      | 2009 03 31 | 2008 03 31 | Change (%) |
|--------------------------------------|------------|------------|------------|
| Long-term loans granted to farmers   | 7 208      | 10 976     | -34,33     |
| Long-term loans granted to employees | 227        | 340        | -33,24     |
| Investments                          | 186        | 2 695      | -93,10     |
| Loans to other companies             | 17 440     | -          | 100,00     |
| Other                                | 5 176      | 1 590      | 225,53     |
| Total                                | 30 237     | 15 601     | 93,81      |

The repayment terms of loans granted to farmers vary from 2 months to 10 years, whereas the annual interest rate varies from 0 to 10 per cent.

The repayment terms of loans granted to employees vary from 1 to 22 years, whereas the interest rate for them is not calculated.

The company's managing bodies believe that the balance sheet values of long-term receivables are their fair values.
