KEY DATA

SAF Tehnika (hereinafter – the Group) is a telecommunications equipment company engaged in the development, production and distribution of digital microwave radio equipment. SAF Tehnika products provide wireless backhaul solutions for digital voice and data transmission covering wide frequency range and providing equipment for both licensed and un-licensed frequencies.

Know-how in modern wireless data transmission technologies, creativity in solutions, accuracy in design, precision in production and logistics make SAF Tehnika a unique designer and manufacturer of point-to-point microwave data transmission equipment. Located in Northern Europe, SAF Tehnika managed to acquire and consolidate valuable locally available intellectual resources of the microelectronics industry and spread its presence to more than 100 countries, covering all relevant market segments worldwide within just a decade.

The complete product range offers solutions to mobile network operators, data service providers, and government and private companies. Since its establishment in 1999, SAF Tehnika competes with such multinational corporations as Ericsson, Huawei, Alcatel and NEC.

Currently the Group consists of SAF Tehnika JSC (hereinafter – the Parent) operating from Riga, Latvia, a wholly owned subsidiary “SAF North America” LLC and a joint-venture company “SAF Services” LLC where the Parent holds 50% of the company’s shares. Both of the mentioned companies are operating from Denver, CO serving North American market.

SAF Tehnika JSC is a public joint stock company incorporated under the laws of the Republic of Latvia. The shares of AS SAF Tehnika are quoted on NASDAQ OMX Riga.

Statement of Board's Responsibilities

The Board of SAF Tehnika JSC (hereinafter – the Parent) is responsible for preparing the consolidated financial statements of the Parent and its subsidiaries (hereinafter - the Group).

The consolidated financial statements are prepared in accordance with the source documents and present fairly the consolidated financial position of the Group as of 30 September 2014 and the consolidated results of its financial performance and cash flows for the quarter then ended.

The above mentioned financial statements are prepared in accordance with International Financial Reporting Standards as adopted by the European Union, and are prepared on a going concern basis. Appropriate accounting policies have been applied on a consistent basis. The consolidated interim financial statements have been prepared based on the same accounting principles applied in the Consolidated Financial Statements for the year ended on June 30, 2014.

Prudent and reasonable judgments and estimates have been made by the management in the preparation of the financial statements.

The Board of SAF Tehnika JSC is responsible for the maintenance of proper accounting records, the safeguarding of the Group's assets and the prevention and detection of fraud and other irregularities in the Group. The Board is responsible for compliance with the requirements of normative acts of the countries the Group operates in (Latvia and United States of America).

The interim financial statements have been prepared in Euro.

Aira Loite

COO, Member of the Management Board

Management Report

The Group's non-audited net sales for the first quarter of financial year 2014/15 were 3.2 million EUR, decreasing by 6.3% or 0.2 million EUR compared to the first quarter of the previous financial year and being by 7.6% less than sales in the previous quarter – Q4 of FY 2013/2014.

Investments in marketing, regular participation in industry exhibitions, intense sales activities developing customer base and brand recognition, quick deliveries from a local warehouse had given substantial contribution increasing SAF's product sales in North America. Deliveries to Latin America countries were stabilizing due to expended cooperation with local partners. As a result sales in Americas, similarly as in the previous quarter, formed the largest part - 59% of the turnover in Q1, amounted to 1.88 million EUR. Sales in Europe and CIS region formed 32% from total sales, although the result was 21% worse comparing with 1th quarter of the previous financial year when Group made deliveries to a larger network building project in Europe. Sales in Asia Pacific, Middle East and Africa region substantially declined in the last 3 quarters. The Group continues to look for the most appropriate sales and marketing strategies for this region in order to regain previous sales levels.

SAF Tehnika exhibited in three exhibition – “Andicom 2014” in Cartagena, Colombia, “CTIA 2014 Super Mobility Week” in Las Vegas, USA, and “IBC 2014” show in Amsterdam, the Netherlands. The Groups product actual offerings were presented in all events, but during the exhibition „CTIA 2014” there were presented *Spectrum Compact* product series as well as company's newest product- the world's first pocket sized microwave *Signal Generator SG-* device essential for antenna alignment and testing, line-of-sight verification and different microwave system analysis and measurement applications. Besides “The Microwave Journal” has published a small but useful tech brief about our excellent *Spectrum Compact* in the September issue. Moreover a new variant of our next generation microwave radio platform Integra - Integra S has been released.

Chart 1. Quarter 1 revenue breakdown comparative charts:

The Group's products were sold in 59 countries during the reporting quarter.

The consolidated non-audited net profit of the Group for the first quarter of 2014/15 financial year was 285 thousand EUR, being by 155 thousand EUR more than for the quarter year before. The Group's result was positively impacted by favorable EUR/ USD exchange rate.

The Group's net cash flow for the 3 month period of the financial year was positive – 1.44 million EUR. As of September 30, 2014, the Group carried a net cash balance (excluding interest bearing liabilities) of 5.5 million EUR.

Market overview

The microwave radio market as seen from SAF Tehnika point of view has not experienced any recent drastic changes not we want to predict any such happening in immediate future.

The trend to demand increasingly higher capacity is still present, that is guiding both new deployments and upgrades for existing networks.

Guidance

SAF Tehnika will continue development of new, excellent quality microwave data transmission equipment by offering not only standardized products for general market, but by providing modifications according to specific customer requirements and looking for innovative ideas for application of microwave data transmission competence. Low latency solutions, data transmission in specific climate conditions, spectrum analyzer *Spectrum Compact*, and newly announced spectrum generator are examples of latest innovations. The Group is financially stable. The goal is to regain sales levels which ensures positive net result in a long-term. Due to intense competitive pressure the Board of the SAF Tehnika cannot provide certain prognosis for sales figures and operational results despite positive results of the reporting quarter.

On September 30, 2014 the Group employed 162 people (163 people on September 30, 2013).

Note 10 Segment information

a) The Group's operations are divided into two major structural units – SAF branded equipment designed and produced in-house - CFIP and Freemile (Ethernet/Hybrid/ superPDH systems), *Integra* (Integrated carrier-grade Ethernet microwave radio), *Spectrum Compact* (measurement tools for radio engineers) as the first structural unit and 3rd party products for resale, like Antennas, cables, some OEMed products and accessories as the second unit.

CFIP –product line is represented by:

- a split mount PhoeniX hybrid radio system with Gigabit Ethernet + 20 E1 interfaces;
- Lumina high capacity Full Outdoor all-in-one radio with Gigabit Ethernet traffic interface;
- CFIP-108 entry level radio - perfect for upgrade of E1 networks into packet data networks;
- Marathon FIDU low frequency low capacity system for industrial applications and rural telecom use.

Freemile 17/24, an all outdoor hybrid radio system to be used in 17 and 24 GHz unlicensed frequency bands and providing Ethernet/E1 interfaces for user traffic

All CFIP radios are offered in most widely used frequency bands from 300MHz to 38 GHz, thus enabling the use of CFIP radios all across the globe. PhoeniX radio represents the type of microwave radio which is still dominating market share point of view.

Integra – is a next generation radio system employing latest modem technology on the market as well as radio technology in an innovative packaging.

Spectrum Compact is the latest product line in SAF's portfolio, it is a measurement tool for field engineers for telecom, broadcasting and other industries using radio technologies. It comprises of a number of units covering several frequency bands and proving various functionality.

This note provides information about division of the Group's turnover and balance items by structural units by product type for 3 month of the financial year 2014/15 and financial year 2013/14.
