INDEPENDENT AUDITOR'S REPORT

To the Shareholders of UAB Sun Investment Group

Opinion

We have audited the consolidated financial statements of UAB Sun Investment Group and its subsidiaries (hereinafter – the Group), which comprise the consolidated statement of financial position as at 31 December 2021, and the consolidated statement of profit (loss) and other comprehensive income for the year then ended, and the consolidated statement of cash flows, the consolidated statement of changes in equity, and the explanatory Notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, the consolidated financial statements set out on pages 7 to 53 give a true and fair view of the consolidated financial position of the Group as at 31 December 2021 and of the consolidated financial performance and consolidated cash flows of the Group for the year then ended, in accordance with International Financial Reporting Standards as adopted by the European Union.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (hereinafter – the ISA). Our responsibilities under those standards are described in detail in the section of this report entitled “Auditor’s responsibility for the audit of financial statements”. We are independent of the Group in accordance with the Code of Ethics for Professional Accountants issued by the International Ethics Standards Board for Accountants (hereinafter – the IESBA Code) and with the requirements of the Republic of Lithuania Law on Audit of Financial Statements that are relevant to the audit in the Republic of Lithuania, and we have fulfilled our other ethical responsibilities in accordance with the Republic of Lithuania Law on Audit of Financial Statements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other information

Other information comprises the information presented in the Annual Report of the Group, but excludes the consolidated financial statements and our auditor's report thereon. Management is responsible for the presentation of other information.

Our opinion on the consolidated financial statements does not include other information and we do not express any form of assurance on it except as set out below.

In performing our audit of the consolidated financial statements, our responsibility is to read the other information and consider whether there are any material inconsistencies with the information presented in the consolidated financial statements or with our knowledge based on our audit and whether they are otherwise materially misstated. If, based on our work, we become aware of a material misstatement of other information, we are required to disclose that fact. We do not have any related observations.

We are also required to assess whether the financial information presented in the Annual Report of the Group is consistent with the consolidated financial statements for the same financial year and whether the Annual Report has been prepared in accordance with applicable legal requirements. In our opinion, based on our work performed in connection with our audit of the financial statements, in all material respects:

- the financial data presented in the Annual Report of the Group is consistent with the data of the financial statements for the same financial year; and
- The Annual Report of the Group has been prepared in accordance with the requirements of the republic of Lithuania Law on Consolidated Financial Reporting by Groups of Undertakings.

Responsibility of management and those charged with governance for the financial statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting standards and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to make an assessment of the Group's ability to continue as a going concern and to disclose, as necessary, matters related to going concern and the application of the going concern basis of accounting, unless management intends to liquidate the Group or to cease operations, or has no reasonable alternative but to do so.

The persons charged with governance are responsible for overseeing the preparation of the Group's financial statements.

Auditor's responsibility for the audit of financial statements

Our objective is to obtain reasonable assurance about whether the financial statements taken as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Satisfactory assurance is a high level of assurance, not a guarantee, that a material misstatement, if any, will always be detected in an audit performed in accordance with IAS. Distortions that may result from fraud or error are considered material if, individually or in the aggregate, they can be reasonably expected to have a significant effect on the economic decisions of users of financial statements.

In conducting our audit in accordance with IAS, we exercised professional judgement and professional scepticism throughout the audit. We also:

- Identified and assessed the risks of material misstatement of the financial statements, whether due to fraud or error, planned and performed procedures to address those risks, and obtained sufficient appropriate audit evidence to provide a basis for our opinion. The risk of a material misstatement due to fraud not being detected is greater than the risk of a material misstatement due to error not being detected, as fraud may include fraud, forgery, intentional omission, misinterpretation, or failure to comply with internal controls;
- Obtained the understanding of internal control relevant to the audit is designed to enable us to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Assessed the appropriateness of the accounting policies used and the reasonableness of management's accounting estimates and related disclosures.
- Concluded on the appropriateness of the going concern basis of accounting and whether, based on the evidence gathered, a material uncertainty exists related to events or conditions that may cast significant doubt about the Group's ability to continue as a going concern. If we conclude that such a material uncertainty exists, the auditor's report is required to address the related disclosures in the financial statements or, if such disclosures are insufficient, to modify our opinion. Our conclusions are based on audit evidence that we have obtained up to the date of the auditor's report. However, future events or conditions may cause the Group to be unable to continue as a going concern.
- Assessed the overall presentation, structure and content of the financial statements, including disclosures, and whether the financial statements presented the underlying transactions and events in a manner consistent with the concept of fair presentation;
- We have obtained sufficient appropriate audit evidence about the financial information or business activities of the Group companies to express an opinion on the consolidated financial statements of the Group. We are responsible for directing, supervising and performing the audit of the Group. We are solely responsible for expressing our audit opinion.

We must, among other things, inform those charged with governance of the scope and timing of the audit and of significant audit observations, including significant internal control weaknesses that we have identified during the audit.

¹ In bold – the main workplace.

There are no specific environmental requirements for the activities of companies in the Group.

III. References and additional explanations for the disclosures in the consolidated financial statements

The disclosures in the consolidated financial statements and Notes are sufficient, complete and do not require further explanation.

IV. Information on significant events after the end of the reporting period

There have been no subsequent events after the end of the reporting period until the date of approval of these consolidated financial statements that would affect these financial statements or require additional disclosures, except as disclosed in Note 29 of the explanatory Notes to these consolidated financial statements.

V. Operational plans and forecasts for the Group

The main investments are planned to be directed towards the development of renewable energy in Lithuania, Poland, Germany, Spain and Italy. These investments reflect the Group's long-term strategic priorities.

VI. Information on R&D activities of the Group

Market studies are commissioned to support the projects carried out by the Group. There is no annual research budget and research is carried out as and when required.

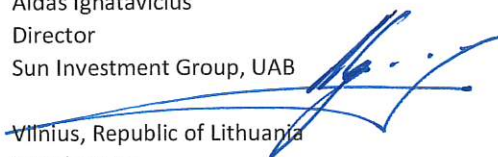

VII. Number and nominal value of shares of the parent company held by the company itself, its subsidiaries or persons acting on their behalf but in their own name

The Company has no own shares.

VIII. Information about the objectives of financial risk management, the hedging instruments used that are subject to hedge accounting, and the extent of the group's exposure to price risk, credit risk, liquidity risk, and cash flow risk when the group uses financial instruments that are relevant to the measurement of the Group's assets, equity, liabilities, income and expenses

The Group did not use any significant financial instruments that are relevant to the measurement of the Group's assets, liabilities, financial position and performance.

1. General information (continued)

Sales of group companies

On 21 June 2021, Sun Investment Group, UAB, the sole shareholder of UAB Nogridas, entered into the agreement on sale and purchase whereby it sold 100 % of the shares in the company.

On 22 December 2021, Sun Investment Group, UAB subsidiary UAB Solinvesticijos PL, the sole shareholder of Elektrownia PV Komorowo sp.z o. o and PV Zachod sp.z o. o, entered into the agreement on sale and purchase of the aforementioned companies, whereby it sold 100 % of the shares of the aforementioned companies.

Entities acquired /set up by Group companies

In 2021, the following companies were set up: SIG Development Italy S.r.l.; Sun Investment Services, UAB; Eternia Solar, UAB; Eternia Services, UAB; Sun Investment Services PL sp. z o.o.; SIG Poland 4, UAB; SIG Poland 5, UAB; SIG PV 32 sp. z o.o.; SIG Project Italy 2 S.r.l.; Eternia Solar PL sp. z o.o.; Eternia Services LT, UAB; Eternia Services PL sp. z o.o.; SIG PL Holding 1, UAB; SIG PL Holding 2, UAB; SIG PL Holding 3, UAB; SIG LT holding 1, UAB.

Other general information

In 2021, the average number of employees in the Group was 190 (2020: 125).

2. New standards, amendments and interpretations

Application of new and/or amended IFRS and interpretations of the IFRS Interpretations Committee (IFRIC)

In 2021, the Group adopted all new and revised standards, amendments and interpretations issued by the International Accounting Standards Board (IASB) and the IFRS Interpretations Committee (IFRIC) that are relevant to the Group's operations and that became effective for the reporting period beginning on 1 January 2021.

The following guidance is effective from 1 January 2021. The implemented guidance had no impact on the preparation of the Group's financial statements of 2021:

- Amendments to IFRS 16 Leases related to COVID-19;
- Interest Rate Benchmark Reform (amendments to IFRS 9, IAS 39 and IFRS 7).
-

New IFRS and interpretations that have not yet been applied

Certain new standards, amendments to standards and interpretations have been published that will be adopted for subsequent annual periods or are not yet applicable in the European Union. Such standards have not been applied in the preparation of these financial statements. The Group has no plans to early adopt these standards. The following revised standards are not expected to have a material impact on the Group's financial statements:

- Annual Improvements to IFRS 2018-2020 Cycle;
- Amendments to IAS 1 "Presentation of Financial Statements" relating to the classification of liabilities into current and non-current;
- Disclosure of Accounting Policies (Amendments to IAS 1 and IFRS 2 Practice Statement).

3. Accounting policies

a. Compliance with standards

These consolidated financial statements (hereinafter – the financial statements) have been prepared according to International Financial Reporting Standards (IFRS) as adopted by the European Union, in accordance with the Republic of Lithuania Law on Financial Reporting by Undertakings.

These financial statements were prepared and signed by the management of the Group on 19 July 2022. The shareholders of the Group have the legal right to approve or disapprove these financial statements and to require management to prepare new financial statements. The financial statements have been prepared on a going concern basis assuming that the Group will continue in operation in the foreseeable future.

b. Basis of preparation of the financial statements

Statement of conformity

These financial statements have been prepared in accordance with International Financial Reporting Standards (hereinafter – the IFRS) as adopted by the European Union (hereinafter – the EU).

Measurement basis

The financial statements are prepared on the historical cost basis.

These financial statements are presented in the legal tender of Lithuania – the euro (EUR).

The main accounting policies used are presented below.

c. Currency

In these financial statements, all amounts are presented in the single currency of the European Union adopted for settlements in Lithuania – the euro (EUR), which is the functional currency of the Group companies operating in Lithuania and other countries of the European Union. The functional currencies of companies operating in the Member States of the European Union that have not adopted the euro for settlements are their local currencies

d. Consolidation principles and investments in subsidiaries and associates

The consolidated financial statements of the Group include the Company and its subsidiaries and associates. The financial statements of the subsidiaries are prepared for the same financial year and using the same accounting principles.

Subsidiaries are consolidated from the date on which control passes to the Group and are no longer consolidated from the date on which control is passed outside the Group. All intercompany transactions, balances and unrealised transaction profit or loss between Group companies are eliminated. Equity and net result attributable to the non-controlling interest are presented separately in the statement of financial position and in the profit (loss) statement.

Investments in associates, i.e. those over which the Group has significant influence, are accounted for using the equity method in the consolidated financial statements of the Group. Investments in associates are assessed for impairment when there are indications of impairment or when an impairment recognised in the previous year no longer exists.

Goodwill acquired in a business combination is recognised at cost and is the excess of the cost of the acquisition over the total consideration transferred, including the amount of the non-controlling interest recognised, over the net fair value of the assets acquired, liabilities and contingent liabilities assumed in the business combination over the proportionate share of the shares acquired. After initial recognition, goodwill is carried at cost less any accumulated impairment losses. Goodwill is reviewed annually or more frequently if events or changes in circumstances indicate that the carrying amount is impaired.

The amount by which the fair value of the recognised assets, liabilities and contingent liabilities acquired still exceeds the cost of the investment after the reassessment of the recognised assets, liabilities and contingent liabilities and the determination of the cost of the investment is recognised immediately in the profit (loss) statement.

3. Accounting policies (continued)

For the purpose of impairment measurement, goodwill acquired in business combinations is allocated at the acquisition date to the cash-generating units or groups of cash-generating units that are expected to benefit from the combination, irrespective of whether the Group's other assets and liabilities are allocated to those units or groups of units.

Value impairment is determined by measuring the recoverable amount of the cash-generating unit to which the goodwill relates. When the recoverable amount of the cash-generating unit is less than the residual value, an impairment loss is recognised. When goodwill forms part of a revenue-generating unit and part of the operations within that unit is sold, the goodwill associated with the operation sold is included in the residual value of the operation sold in determining the profit or loss on the sale of the operation. In such a case, the goodwill sold is measured by reference to the relative value of the divested operation compared with the remaining portion of the revenue-generating unit.

Losses of subsidiaries are attributed to the non-controlling interest, even if this results in a negative non-controlling interest balance. A change in the ownership interest in a subsidiary without loss of control is accounted for as an equity transaction. If the Group loses control of a subsidiary, it:

- derecognises the assets (including goodwill) and liabilities of the subsidiary;
- derecognises the carrying amount, if any, of the non-controlling interest;
- derecognises cumulative exchange differences accounted for in equity;
- accounts for the consideration received at fair value;
- accounts for a continuing investment at fair value;
- recognises any resulting surplus or deficit in the statement of comprehensive income;
- reclassifies the parent's share of components previously recognised in other comprehensive income to the statement of comprehensive income or retained earnings, as appropriate.

Investments in subsidiaries and associates are carried at cost less impairment in the separate financial statements of the Group companies. Costs directly attributable to the acquisition of subsidiaries and associates are recognised in the profit (loss) statement in the period in which they are incurred. An impairment assessment is performed when there is an indication that an asset may be impaired or that an impairment recognised in a prior year no longer exists.

Sales of special purpose subsidiaries together with a developed solar power plant project are accounted for under operating activities.

e. Business combinations and goodwill

Business combinations are accounted for using the acquisition method. The cost of acquisition is determined by adding the fair value of the consideration transferred at the acquisition date and the amount of the non-controlling interest, if any, in the acquired entity. For each business acquisition, the acquirer measures the non-controlling interest in the acquiree either at fair value or at a proportionate share of the acquiree's identifiable net assets. Acquisition costs incurred are written off to administrative expenses.

If the business combination is achieved in stages, the acquirer's previously held equity interest in the acquiree is measured at fair value through profit or loss at the acquisition date. The contingent part of the consideration to be paid by the acquirer is recognised at fair value at the acquisition date. Subsequent fair value measurements of contingent consideration that is treated as an asset or liability will be recognised in accordance with IFRS 9, either through profit or loss or as a change in other comprehensive income. If the contingent consideration is classified as equity, it is not re-measured and its subsequent payment is recorded in equity.

Goodwill is recognised at cost and is the excess of the total consideration transferred, including the amount of any recognised non-controlling interest, over the net amount of the assets acquired and the liabilities measured.

If the consideration is less than the fair value of the net assets of the acquired subsidiary, the difference is recognised in profit or loss.

After initial recognition, goodwill is carried at cost less any accumulated impairment losses. For the purpose of impairment testing, goodwill acquired in a business combination is allocated from the acquisition date to those of the Group's revenue-generating units that are expected to benefit from the combination, regardless of whether the other assets or liabilities of the acquiree are allocated to those units.

3. Accounting policies (continued)

When goodwill forms part of a revenue-generating unit and part of the operations within that unit is sold, the goodwill associated with the operations sold is included in the carrying amount of the operations sold in determining the profit or loss on the sale of the operations. In such a case, the goodwill sold is measured by reference to the relative value of the divested operation compared with the remaining part of the revenue-generating unit.

f. Cash flow statement

The cash flow statement reflects the Group's cash inflows and the use of cash during the year and its financial position at the year end. The Standards require classifying the cash flows into three groups: cash flows from operating activities, cash flows from investing activities and cash flows from financing activities.

Cash flows from operating activities are presented indirectly, i.e. as net profit adjusted for non-cash operating activities, changes in working capital, changes in fair value of derivatives, interest paid on the Group's borrowings to finance its working capital activities, non-operating amounts and income tax paid.

Cash flows from investing activities consist of payments related to the acquisition/sale of fixed assets and investments, and the receipt of dividends and interest.

Cash flows from financing activities consist of amounts received and paid relating to shareholders, the receipt and repayment of debts, interest payments outside the Group's working capital loans, and long-term and short-term borrowings that are not related to operating activities.

g. Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The determination of fair value is based on the assumption that the sale of the asset or transfer of the liability takes place or:

- in the principal market for the asset or liability; or
- in the absence of a principal market, the most advantageous market for the asset or liability.

The Group must have access to the principal or most advantageous market.

The fair value of the asset or liability is determined assuming that market participants would use to price the asset or liability, assuming that the market participants have the best economic interests.

The fair value of a non-financial asset is determined by reference to the ability of a market participant to generate economic benefits by using the asset in the most efficient and best manner or by selling it to another market participant who would use the asset in the most efficient and best manner.

The Group uses valuation methodologies that are appropriate in the circumstances and for which there is sufficient evidence to determine fair value, using as much relevant observable inputs as possible and as few unobservable inputs as possible.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised according to the fair value hierarchy described below, which is based on the lowest level of inputs that are significant to the fair value measurement:

- Level 1 - quoted (unadjusted) prices in active markets for identical assets or liabilities;
- Level 2: valuation methodologies that observe, either directly or indirectly, the lowest level of inputs that are significant to the fair value measurement;
- Level 3: valuation methodologies that do not observe the lowest level inputs that are significant to the fair value measurement.

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Group reassesses the allocation by deciding whether the amounts transferred have been between the levels of the hierarchy (based on the lowest level of inputs that are significant for the measurement of fair value in the aggregate) at the end of each reporting period.

3. Accounting policies (continued)

The assessments are performed by the Group’s management at each reporting date. For the purpose of fair value disclosures, the Group has identified classes of assets and liabilities based on the nature, characteristics and risks of the assets and liabilities and the level of the fair value hierarchy described above (Note 27).

h. Property, plant and equipment

Property, plant and equipment are assets that the Group owns and controls, from which it expects to derive economic benefits in future periods and that have a useful life of more than one year. Property, plant and equipment are carried at cost less accumulated depreciation and subsequent impairment losses.

The initial value of the property, plant and equipment consists of the purchase price, including non-refundable acquisition taxes and any directly attributable costs incurred in bringing the asset to the point of commissioning or moving it into use. Costs, such as repairs and maintenance, incurred after the property, plant and equipment is put into operation are generally charged to the profit (loss) statement in the period in which they are incurred.

Costs incurred subsequently are added to the carrying amount of the property, plant and equipment or recognised as a separate asset only if it is probable that future economic benefits will flow to the Group from the asset and the cost of the asset can be measured reliably. The carrying amount of the replaced part is written off. All other repairs and maintenance costs are recognised as an expense in the profit (loss) statement as incurred.

Profit or loss arising on the disposal of assets are calculated by deducting from the proceeds received the carrying amount of the assets disposed of and are recognised in the profit (loss) statement.

Depreciation is calculated using the straight-line method over the following useful lives:

Tangible fixed assets group	Useful life, in years	Minimum capitalisation value, EUR
Buildings	15	1 000
Machinery and equipment	5	1 000
Vehicles	6- 10	1 000
Other fixtures, fittings, tools and equipment	4	1 000

The useful lives, depreciation method and residual values are reviewed annually to ensure that they are consistent with the expected use of the property, plant and equipment.

Construction in progress is carried at cost less accumulated impairment. This comprises the value of construction, structures and equipment and other directly attributable costs. Depreciation is not charged on construction in progress until the construction is completed and the asset is put into use.

Borrowing costs directly attributable to the acquisition of an asset that takes time to prepare for its intended use or sale, construction or production are capitalised as part of the cost of the related asset. All other borrowing costs are recognised as an expense when incurred.

i. Intangible assets other than goodwill

Intangible assets are initially recognised at cost. The cost of an intangible asset acquired in a business combination is its fair value at the date of the business combination. An intangible asset is recognised if it is probable that future economic benefits associated with the asset will flow to the Group and the asset value can be measured reliably. Subsequent to initial recognition, intangible assets are carried at cost less accumulated amortisation and accumulated impairment losses, if any.

3. Accounting policies (continued)

Intangible assets with finite useful lives are amortised over their useful lives and are assessed for impairment whenever there is an indication that they may be impaired. Amortisation periods and methods for intangible assets with finite useful lives are reviewed at each financial year-end.

The estimated useful lives for intangible assets with finite useful lives are shown below:

Intangible fixed assets group	Useful life, in years	Minimum capitalisation value, EUR
Software	3	1 000
Concessions, patents, licences, trademarks and similar rights	3	1 000
Other intangible assets	4	1 000

Intangible assets with indefinite useful lives are not amortised, but are tested for impairment at the end of each reporting period.

The useful life, residual value and amortisation method are reviewed annually to ensure that they are consistent with the intended use of the intangible asset (excluding goodwill).

j. Financial instruments

- **Recognition and initial measurement**

Trade receivables are first recognised when they arise. All other financial assets and financial liabilities are recognised for the first time when the Group becomes a party to the contractual provisions of the financial instrument.

A financial asset (other than a trade receivable without a significant financing component) or financial liability is measured at fair value on initial recognition plus, if it is not a financial asset at fair value through profit or loss, transaction costs directly attributable to the acquisition or sale of that asset. The trade receivable, net of any significant financing component, is initially measured at transaction price.

- **Classification and subsequent measurement**

Financial assets. Accounting policies.

On initial recognition, financial assets are classified as assets at amortised cost; debt investments as assets at fair value through other comprehensive income; equity investments as assets at fair value through other comprehensive income; or fair value through profit or loss.

After initial recognition, financial assets are not reclassified unless the Group changes its business model for managing financial assets, in which case all affected financial assets would be reclassified on the first day of the reporting period following the change in business model.

A financial asset is measured at amortised cost if it meets both of these conditions and is not designated as at fair value through profit or loss:

- it is held under a business model whose objective is to hold the asset to collect contractual cash flows; and
- under the terms of the contract, the cash flows are used only to pay the outstanding principal and related interest at specified dates.

On initial recognition of equity investments that are not held for trading, the Group may irrevocably elect to present subsequent changes in the fair value of the investment in other comprehensive income. Such an election is made on an investment basis.

3. Accounting policies (continued)

All financial assets that are not measured at amortised cost or fair value through other comprehensive income as described above are measured at fair value through profit or loss. On initial recognition, the Group may irrevocably designate financial assets that otherwise qualify to be measured at amortised cost or at fair value through other comprehensive income as financial assets at fair value through profit (loss) if doing so eliminates or substantially reduces an accounting mismatch that would otherwise arise.

Financial assets. Business model valuation.

The Group assesses the purpose of the business model where financial assets are located at portfolio level as this best reflects the management of the business and the reporting of information to management. The information discussed includes:

- the principles and objectives established for portfolio construction and their practical implementation. These include whether management's strategy focuses on generating contractual interest income, maintaining a particular interest rate profile, matching the duration of financial assets to the duration of the associated liabilities or expected cash outflows, or realising cash flows through the sale of assets;
- how the performance of the portfolio is evaluated and reported to the management of the Group;
- the risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed;
- how the entity's executives are compensated – e.g., whether the compensation is based on the fair value of the assets under management or the contractual cash flows collected; and
- the frequency, volume and timing of sales of financial assets in prior periods, the reasons for such sales and expectations about future sales activity.

The transfer of financial assets to third parties in transactions that do not qualify for derecognition is not treated as a sale for this purpose, which is consistent with the Group's continuing recognition of assets.

Financial assets that are held for trading or managed and whose performance is measured on a fair value basis are measured at fair value through profit or loss.

Financial assets. Assessment whether the contractual cash flows are solely payments of principal and interest.

For the purposes of this assessment, "principal" is defined as the fair value of the financial asset at initial recognition. "Interest" is defined as the remuneration for the time value of money and the credit risk associated with the principal outstanding in a particular period and for other principal lending risks and costs (e.g., liquidity risk and administrative costs), plus a profit margin.

In assessing whether contractual cash flows are limited to principal and interest payments, the Group considers the terms of the contract. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of the contractual cash flows in a way that would cause it not to meet that term. In making this assessment, the Group considers the following factors:

- unforeseen events that would change the amount or timing of cash flows;
- maturities that could adjust the contractual coupon rate, including variable interest rates;
- prepayment and extension features; and
- conditions that limit the Group's requirement to receive cash flows from a particular asset (e.g., non-recourse options).

A prepayment function meets only the criterion for payment of principal and interest, if the amount of the prepayment is, in substance, a portion of the unpaid principal and interest on the unpaid principal, which may include reasonable additional compensation for early termination of the contract. In addition, for financial assets acquired at a discount or premium to their contractual amount, a function that permits or requires prepayment of an amount that is substantially equal to the contractual amount plus accrued (but unpaid) contractual interest (which may also include reasonable additional compensation for early termination) shall be considered as meeting this criterion if the actual prepayment feature is insignificant at the time of initial recognition.

3. Accounting policies (continued)

Financial assets. Subsequent measurement and profit (loss)

Financial assets measured at fair value through profit (loss) are subsequently measured at fair value. Net gains and losses, including interest or dividend income, are recognised in profit or loss.

Financial assets subsequently measured at amortised cost are carried at amortised cost using the effective interest rate method. Amortised cost is reduced by impairment losses. Interest income, foreign exchange gains and losses and impairment losses are recognised in the profit (loss) statement. Any profit (loss) on derecognition is recognised in profit (loss).

Equity investments measured at fair value through other comprehensive income are subsequently measured at fair value. Dividends are recognised as income in the profit (loss) statement unless the dividend clearly reflects the recovered portion of the cost of the investment. The remaining net gains and losses are recognised in other comprehensive income and are never reclassified to profit or loss.

Financial assets. Subsequent measurement and gains and losses

Financial assets at fair value through profit. The fair value measurement and changes therein, including any interest and dividend income, have been recognised in the profit (loss) statement.

Held-to-maturity financial assets are measured at amortised cost using the imputed interest method. Loans and receivables are measured at amortised cost using the compound interest method.

Financial assets held for sale are measured at fair value and changes therein, other than impairment losses, interest income and foreign currency differences on debt instruments, have been recognised in other comprehensive income and accumulated in the fair value reserve. On derecognition of these assets, the cumulative profit (loss) on equity was reclassified to profit (loss).

Financial liabilities. Classification, subsequent measurement and profit (loss)

Financial liabilities are classified as at amortised cost or fair value through profit (loss). A financial liability is classified as at fair value through profit (loss) if it is held for trading, is a derivative or is designated as such on initial recognition. Financial liabilities at fair value through profit (loss) are measured at fair value through profit (loss), with net profit (loss), including any interest expense, recognised in profit (loss). Other financial liabilities are subsequently measured at amortised cost using the effective interest rate method. Interest expense and foreign exchange profit (loss) are recognised in profit or loss. Any derecognition is also recognised in profit (loss).

- **Derecognition**

Financial assets

The Group derecognises a financial asset when the contractual rights to the cash flows generated by the asset expire, or when the Group transfers those rights in a transaction in which substantially all the risks and rewards of ownership of the financial asset are transferred, or when the Group neither transfers nor retains the risks and rewards of ownership of the financial asset and does not retain the right to exercise control over the asset.

The Group enters into transactions in which it transfers an asset recognised in the statement of financial position but retains all or substantially all of the risks and rewards of the transferred asset. In these cases, the transferred asset is not derecognised.

Financial liabilities

The Group derecognises a financial liability when the Group's obligations are discharged, cancelled or expire. The Group also derecognises a financial liability when the terms of the liability are modified and the cash flows from the modified liability are completely different. In such a case, the new financial liability based on the modified terms is recognised at fair value.

On derecognition of a financial liability, the difference between the derecognised carrying amount and the consideration paid (including any non-monetary assets transferred or liabilities assumed) is carried through profit (loss).

3. Accounting policies (continued)

- **Offsetting**

Financial assets and financial liabilities are offset and the net amount recognised in the statement of financial position when, and only when, the Group has the legal ability to set off the recognised amounts and either intends to settle the offsetting amounts or to realise the assets and settle the liabilities simultaneously.

k. Inventories

Inventories are carried at the lower of cost and net realisable value. Net realisable value is the selling price in the ordinary course of business less costs of completion, marketing and distribution. Cost is calculated using the FIFO method. The cost of production and work in progress includes fixed costs (raw materials, packaging, direct labour, etc.) and variable overheads (depreciation, indirect labour, utilities, etc.) at normal production volumes. Inventories that can no longer be disposed of are written off.

l. Cash and cash equivalents

Cash consists of cash on hand and in bank. Cash equivalents are short-term, highly liquid investments that are readily convertible into a known amount of cash. Such investments have a maturity of less than three months and are subject to very little risk of changes in value.

For the purposes of the cash flow statement, cash and cash equivalents comprise cash in hand, deposits in current accounts, other short-term highly liquid investments and bank overdrafts.

m. Lease

IFRS 16 Leases was adopted from 1 January 2019 and replaced IAS 17 Leases, IFRIC 4 “Testing a contract to determine whether it is a Lease”, SIC-15 “Operating Leases – Incentives” and SIC 27 “Evaluating the substance of transactions involving the legal form of a lease”. The Group applies the requirements of IFRS 16 as of 1 January 2019 on a modified retrospective basis without adjusting the comparative information. The impact of IFRS 16 is recognised as an adjustment to the opening balance of retained earnings at 1 January 2018. Under the retrospective approach without adjusting the comparative information, the 2018 figures are prepared in accordance with IAS 17. The disclosure requirements under IFRS 16 are not applicable to the comparative year. The interpretations and amendments to IFRS 16 Leases that are relevant to the Group are set out below.

During the transition period, the Group applied IFRS 16 to contracts previously identified as leases by applying IAS 17 Leases and IFRIC 4 “Testing a contract to determine whether it is a lease”.

IFRS 16 was not applied to contracts to which IAS 17 and IFRIC 4 did not apply during the reporting period. IFRS 16 was applied only to contracts that were in force or changed on or after 1 January 2019.

Leases where the Group is the lessee

The Group assesses each contract for potential lease elements. If the contract is a lease or involves a lease, the Group accounts for each lease component of the contract as a lease separately from the non-lease (service) components of the contract.

The Group does not apply the lease recognition provisions to short-term leases (leases of less than one year) and leases with low lease values (computers, telephones, printers, furniture, etc.). The Group assesses each asset individually to determine whether it is impaired. In determining whether an asset is impaired, lease payments are not assessed over the lease term. Assets with a value of less than EUR 5 thousand are considered to be low-value assets. Lease payments relating to short-term leases and leases of low-value assets are recognised directly as an expense in the statement of profit or loss and other comprehensive income. The Group does not apply the lease recognition provisions to all intangible assets. The Group applies the provisions of IAS 38 “Intangible Assets” to such assets.

The Group recognises the right-of-use asset and the lease liability in the statement of financial position at the lease commencement date.

3. Accounting policies (continued)

The Group measures assets held under right-of-use at cost at the inception date. After the commencement date, assets held under right-of-use are measured at cost less accumulated depreciation and accumulated impairment losses and an adjustment for any re-measurement of a liability.

At inception, the Group measures the lease liability at the present value of the rentals outstanding at that date. Lease payments shall be discounted using the interest rate provided for in the lease agreement if that rate is readily determinable. If that rate is not readily determinable, the Group uses the borrowing rate charged by the lessee. The Group records the lessee's borrowing rate at the beginning of each year and uses it for all new contracts signed in that year and for contracts for which the terms of the lease liability (not all of which are remeasured) have changed during that year. A lease liability is remeasured if the cash flows change based on the original terms of the lease, for example, if the lease term changes or the lease payments change based on an index or interest rate. Changes that were not part of the original terms of the lease are lease amendments.

n. Provisions

A provision is recorded when, and only when, the Group has a legal obligation or an irrevocable commitment as a result of a past event, it is probable that resources embodying economic benefits will be required to settle the obligation, and a reliable estimate of the amount of the obligation can be made. Provisions are reviewed at each statement of financial position date and adjusted to reflect the best current estimate. Where the effect of the time value of money is material, the amount of the provision is the present value of the expenditure that is expected to be required to settle the obligation. Where discounting is used, the increase in the provision to reflect the passage of time is recorded as interest expense.

o. Income tax

Income tax assets and liabilities for the current and prior years are recorded at the amount expected to be recovered from, or paid to, the tax authority. The tax rates used in the calculation of corporation tax are those enacted at the last date of the accounting period. The calculation of corporation tax is based on the profit for the year after taking into account deferred corporation tax. The Group's income tax is calculated in accordance with the requirements of the tax laws of the Republic of Lithuania.

The corporate income tax rate applicable to companies in the Republic of Lithuania for 2021 and 2020 was 15%.

In the Republic of Lithuania, tax losses can be reversed indefinitely, except for losses arising from the disposal of securities and/or derivatives. Such carry-forwards cease if the Group ceases to carry on the activity giving rise to the losses, unless the Group ceases to carry on the activity for reasons beyond its control. Losses on disposals of securities and/or derivatives may be incurred for a period of 5 years and shall be recovered only from gains on transactions of the same nature. As from 1 January 2014, tax loss carry-forwards can cover a maximum of 70% of the taxable profits for the current tax year.

Corporate income tax for foreign subsidiaries is calculated in accordance with the tax laws in force in those countries requirements. The standard corporate tax rates in the foreign countries in which the Group operates in 2021 and 2020 are:

Country	Tariff, %
Poland	19
Italy	24
Germany	15,825

Deferred taxes are calculated using the balance sheet liability method. Deferred tax reflects the net tax effect of temporary differences between the carrying amounts of assets and liabilities and their tax bases. Deferred tax assets and liabilities are measured at the tax rate that is expected to apply to the period in which the asset is realised or the liability settled, taking into account tax rates enacted or substantively enacted at the statement of financial position date.

Deferred tax assets are recognised in the statement of financial position to the extent that the Group's management expects them to be realised in the foreseeable future in accordance with forecasts of taxable profit. If it is probable that part of the deferred tax will not be realised, that part of the deferred tax is not recognised in the financial statements.

3. Accounting policies (continued)

In Lithuania, tax profits and losses in LR may be transferred between Group companies. The corporate income tax law allows In Lithuania, tax profits and losses in LR may be transferred between Group companies. The Corporate Income Tax Law allows for both transfer of losses for consideration and non-consideration. Group companies seeking to transfer tax profits or losses must meet certain conditions:

- The parent entity in the group owns, directly or indirectly, at least 2/3 of the shares of each subsidiary participating in the tax loss transfer at the date of the tax loss transfer;
- the tax losses are transferred between entities within the Group that have been continuously within the Group for at least two years from the date of the transfer of the tax losses;
- the tax losses are transferred or assumed by the Group entity (-ies) which is (are) present in the Group from the date of its (their) registration and will be present in the Group continuously for at least two years from the date of its (their) registration.

p. Revenue recognition

The Group recognises revenue in accordance with IFRS 15, i.e. the Group recognises revenue at the time and to the extent that the transfer of goods or services to customers reflects the amount of consideration that the Group expects to receive in exchange for those goods or services. In applying this Standard, the Group considers the terms of the contract and all relevant facts and circumstances. The Group recognises revenue using the 5-step model. For information on the accounting policies Group related to contracts with customers, see Note 23.

Step 1 – Identify the contracts with the customer

A contract is an agreement between two or more parties (depending on the terms and conditions of the sale/purchase) that creates enforceable rights and obligations. A contract to which IFRS 15 applies is recognised only if the following criteria are met:

- the parties have approved the contract (whether in writing, orally or otherwise in the ordinary course of business) and are committed to performing the obligations assumed by the contract,
- it is possible to identify the rights of each party to the goods and/or services to be transferred,
- it is possible to identify the terms of payment for the goods and/or services to be transferred,
- the contract is of a commercial nature, there is a likelihood of receiving consideration in exchange for the goods and/or services to be transferred to the customer,

Contracts with the customer may be merged or separated into several contracts, while maintaining the criteria of the previous contracts. Such a merger or separation shall be treated as a contract modification.

Step 2 – Identify the performance obligations in the contracts

The contract contains a promise to transfer goods and/or services to the customer. If the goods and/or services can be identified, the obligations are recognised separately. Each obligation is identified in one of the two ways:

- the good and/or service is distinct; or
- a series of distinct goods and/or services that are substantially the same and that have the same pattern of transferred to the customer.

Step 3 - Setting the transaction price

Under the newly applied IFRS 15, the transaction price may be: fixed, variable or a combination of both.

The transactions entered into by the Group use fixed prices for both continuing services and services performed at a point in time. The Company uses the following methods to calculate the selling price: the adjusted market valuation method and the expected cost and profit margin method. Similar transactions are valued in the same way.

Step 4 - Allocate the transaction price to the operating liabilities

The Group normally allocates a transaction price to each performance obligation based on the relative individual selling prices of each good or service committed to be transferred under the contract. If individual selling prices are not observable in the market, the entity makes an estimate.

Step 5 – Recognise revenue when a performance obligation is satisfied by the Group

The Group recognises revenue when it discharges a performance obligation by transferring the committed goods or services to a customer (i.e. when the customer obtains control of those goods or services). The amount of revenue recognised is equal to the amount attributable to the fulfilment of the performance obligation. A performance obligation may be settled at a point in time or over time.

3. Accounting policies (continued)

Revenue from subcontracting of power plants is recognised over time using the percentage-of-completion method. The related costs are recognised in the statement of profit or loss and other comprehensive income as incurred. Advances received are included in contract liabilities. Revenue on sale of goods is recognised in accordance with INCOTERMS.

Revenue is recognised when the amount of revenue can be measured reliably and it is probable that the economic benefits associated with the transaction will flow to the Group and the specific criteria for each type of revenue have been met as described below. The Company relies on historical performance, taking into account the type of customer, the type of transaction and the characteristics of each arrangement.

Revenue is recognised at the fair value of the consideration received or receivable. Revenue is reduced by the estimated amounts of customer rebates, discounts and other similar provisions. Revenue is recognised when it is probable that the economic benefits associated with the transaction will flow to the entity and the amount of revenue can be measured reliably. Sales revenue is recognised net of VAT and discounts, including accrued expected discounts for the year.

q. Recognition of expenses

Expenses are recognised on an accrual and comparative basis in the period in which the related income is earned, irrespective of the timing of cash outflows. Where expenses incurred during the reporting period cannot be directly attributed to the generation of specific revenue and will not generate revenue in future periods, they are recognised as expenses during the period in which they are incurred.

The amount of the expense is generally measured at the amount of cash paid or payable, excluding VAT. In cases where there is a long settlement period and interest is not earned, the amount of the expense is estimated by discounting the settlement amount at the market interest rate.

r. Foreign currencies

Transactions denominated in foreign currencies are accounted for at the official exchange rate at the date of the transaction. Gains and losses arising from such transactions and from the revaluation of foreign currency denominated assets and liabilities at the statement of financial position date are recorded in the profit (loss) statement. Such balances are revalued at the closing exchange rate.

Subsidiaries are accounted for in their respective local currency, which is their functional currency. Balance sheet items in the financial statements of consolidated foreign subsidiaries are translated into euro using year-end exchange rates and profit (loss) statement items are translated at the average exchange rate for the period. Exchange differences arising on translation are taken directly to the statement of other comprehensive income. On realisation of the related investment, the cumulative translation reserve is transferred to profit (loss) for the period in the same period that the profit or loss on realisation of the investment is recognised.

Goodwill and fair value adjustments arising from the acquisition of a foreign subsidiary are recognised as net assets of the acquired company and are recorded at the exchange rate at the last day of the reporting period.

The following principal exchange rates were applied for the preparation of the statement of financial position at 31 December:

2020	2021
EUR 1 = PLN 4.5597	EUR 1 = PLN 4.5969

3. Accounting policies (continued)

s. Impairment of assets

- **Non-derivative financial assets**

Financial instruments and contract assets

The Group recognises provisions for expected credit losses (ECL) on the following assets:

- financial assets measured at amortised cost;
- contract assets.

The Group calculates the provision for losses in an amount equal to the duration of the ECL, except for the following with an ECL of 12 months comprising:

- debt securities with low credit risk at the reporting date;
- and other debt securities and bank balances for which the credit risk (i.e. the risk of default over the expected life of the financial instrument) has not increased significantly since initial recognition.

Provisions for losses on trade receivables and contract assets are always measured at an amount equal to the full duration of the ECL.

In determining whether the credit risk of a financial asset has increased significantly since initial recognition and in assessing the ECL, the Group considers reasonable and supporting information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis based on the Group's historical experience and informed credit judgement and forward-looking information.

The Group assumes that the credit risk of a financial asset increases significantly if it has a maturity of more than 90 days.

The Group considers a financial asset to be in default when it is more than 180 days past due.

The ECL duration is the ECL derived from all possible events of default over the expected life of the financial instrument.

The 12-month ECL is the portion of the ECL that arises from events of default that are probable within 12 months of the reporting date (or a shorter period if the expected life of the instrument is less than 12 months).

For the purpose of calculating the ECL, the maximum period of the ECL is the maximum contract period over which the Group is exposed to credit risk.

Measurement of the ECL

ECLs are credit losses measured on the basis of a probability-weighted estimate. Credit losses are measured as the present value of any cash shortfall (i.e. the difference between the entity's contractual cash flows and the cash flows that the Group expects to receive). ECLs are discounted using the effective interest rate of the financial asset.

Credit-impaired financial assets

At each reporting date, the Group assesses whether financial assets carried at amortised cost and debt securities at fair value through other comprehensive income are credit-impaired. A financial asset is considered to be "credit-impaired" if one or more events occur that adversely affect the future cash flows of the financial asset.

The Group assumes that the credit risk of a financial asset increases significantly if its Evidence of credit impairment includes the following observable data:

- significant financial difficulties of the lender or issuer;
- a breach of contract, such as a default or a settlement more than 90 days past due;
- restructuring of the Group's loan or prepayment on terms that the Group would not otherwise consider;
- the debtor is likely to enter bankruptcy or other financial restructuring; or
- the disappearance of an active market for the securities due to financial difficulties.

3. Accounting policies (continued)

Presentation of a provision for ECL in the statement of financial position

Impairment losses on financial asset measured at amortised cost are deducted from the gross carrying amount of those assets.

Write-downs

The gross carrying amount of a financial asset is written down when the Group no longer has a reasonable expectation of recovering all or part of the financial asset. For individual and corporate customers, the Group makes an individual assessment of the timing and amount of write-downs based on whether there is a reasonable expectation of recovery. The Group does not expect to recover the amounts written off in a material way, but the written-off financial assets may still be recoverable through past due recovery procedures.

- **Non-derivative financial assets**

The Group recognises an impairment loss, calculated as the difference between the asset's carrying amount and the present value of future cash flows discounted at the estimated interest rate, if it is probable that the Group will not be able to collect the receivables.

- **Non-financial assets**

The Company reviews the carrying amounts of non-financial assets (other than inventories and deferred tax assets) at each date of the statement of financial position to determine whether there is any indication of impairment. If any such indication exists, the recoverable amount of that asset is calculated. For the purpose of impairment testing, assets that generate cash in the course of their continuous use and are largely independent of the cash inflows generated by other assets or groups of assets (cash-generating units) are grouped into the smallest group.

The recoverable amount is calculated as the higher of the fair value less costs to sell and the value in use of the asset. The value in use of an asset is calculated by discounting the future cash flows to their present value using a pre-tax discount rate that reflects realistic market assumptions about the time value of money and the risks associated with that asset. An impairment is recorded when the residual value of an asset or cash-generating unit exceeds its estimated recoverable amount.

t. Use of estimates in preparing financial statements

The preparation of financial statements in conformity with International Financial Reporting Standards requires management to make certain assumptions and estimates that affect the reported amounts of assets, liabilities, income and expenses and the disclosure of uncertainties. Significant areas of estimation in these financial statements include property, plant and equipment (Note 4); intangible assets (Note 5); long and short-term loans granted (Note 6); impairment of trade and other receivables (Note 7); write-down of inventories (Note 8); depreciation and amortisation (Notes 4, 5); and valuation of contractual assets. Future events may change the assumptions used in making the estimates. The result of such changes in estimates will be accounted for in the financial statements when determined.

In the opinion of management, at the date of these financial statements, there was no significant risk that the carrying amounts of assets and liabilities would have to be materially adjusted in future periods as a result of a change in management's assumptions and accounting estimates.

u. Contingencies

Contingent liabilities are not recognised in the financial statements. They are described in the financial statements unless the probability of loss of economic benefits is remote.

Contingent assets are not recognised in the financial statements, but are described in the financial statements when it is probable that income or economic benefits will flow.

3. Accounting policies (continued)

v. Events after the end of the financial year

Events after the date of preparation of the financial statements that provide additional information about the Group's position at the last day of the reporting period (adjusting events) are reflected in the financial statements. Events after the date of preparation of the financial statements that are not adjusting events are described in the Notes when material.

w. Related parties

Related party is a legal and/or natural person who meets at least one of the following conditions:

- a) directly or indirectly exercises a determining influence over the undertaking;
- b) is in a position to exercise significant influence over the undertaking;
- c) jointly controls the subject matter of the joint operating agreement;
- d) is an undertaking over which the same parent undertaking or the same natural person (a group of natural persons) has a decisive influence;
- e) is an associate or subsidiary;
- f) is an undertaking controlled under a joint operating agreement;
- g) is one of the directors of the undertaking or the parent undertaking;
- h) is a close family member of one of the persons referred to in points a), b), c) or g);
- i) is an undertaking which is significantly influenced, jointly controlled or potentially significantly influenced by any of the persons referred to in points (g) or (h);
- j) is an undertaking which accumulates and pays pensions and other post-employment benefits to the employees of the undertaking or of a related legal person

x. Offsets

Assets and liabilities and income and expenses are not offset in the preparation of financial statements unless a separate International Financial Reporting Standard requires or permits such offsetting.

Amortisation of the Group's intangible assets and depreciation of property, plant and equipment were charged to the profit (loss) and other comprehensive income statement under administrative expenses (Note 22) in the amount of EUR 238 thousand (2020: EUR 141 thousand, adjusted by EUR 20 thousand in 2020).

Sun Investment Group UAB

Company code: 302662621, address: Gedimino pr. 44A-501, LT-01110 Vilnius
Consolidated explanatory Notes for the year ended 31 December 2021
(in EUR thousand, unless otherwise specified)

Cost of acquisition of property, plant and equipment that is fully depreciated but still used in the Group's operations:

	31 December	
	2021	2020
Buildings	–	–
Machinery and equipment	13	–
Vehicles	–	–
Other fixtures, fittings and tools	–	–
Total	13	–

The residual value of property, plant and equipment acquired under lease was (Note 13):

	31 December	
	2021 m.	2020 m.
Buildings	313	282
Machinery and equipment	–	–
Vehicles	170	–
Other fixtures, fittings and tools	–	–
Total	483	282

In 2021 and 2020, there was no property, plant and equipment leased to third parties (operating leases).

During 2021, the amount of interest capitalised by the Group was EUR 37 thousand (none in 2020).

As at 31 December 2020 and 2021, there was no impairment of property, plant and equipment.

In original currency		
PLN	–	84
Total	–	84
EUR		
PLN	–	18
Total	–	18

Loans are subject to fixed interest rates from 2.5 % to 5.00 % set under market conditions.

7. Trade and other receivables

Trade and other receivables of the Group consisted of:

	31 December	
	2021	2020
Trade receivables	1 011	2 441
Receivables from related parties (Note 28)	352	–
	1 363	2 441
Less: impairment allowance for receivables	–	–
Less: impairment allowance for receivables from related parties (Note 28)	–	–
Trade receivables (net)	1 363	2 441
Receivable VAT	692	431
Overpayments of other taxes and prepaid taxes	–	–
Collaterals and other receivables	333	602
	1 026	1 033
Less: non-current finance lease receivables	–	–
Less: other non-current receivables	–	–
Other receivables (net)	1 025	1 033
Total	2 388	3 474

There was no impairment of the trade receivables of the Group over the year.

The aging of the Group's trade receivables from third parties, net of impairment, was as follows:

	31 December	
	2021	2020
Amounts not overdue	642	2 327
Overdue for up to 1 month	287	58
Overdue from 1 to 3 months	66	32
Overdue from 3 to 6 months	15	7
Overdue from 6 to 12 months	–	14
Overdue more than 12 months	1	2
Total	1 011	2 441

Sun Investment Group UAB

Company code: 302662621, address: Gedimino pr. 44A-501, LT-01110 Vilnius
Consolidated explanatory Notes for the year ended 31 December 2021
(in EUR thousand, unless otherwise specified)

The aging of the Group's trade receivables from related parties, before impairment, was as follows:

	31 December	
	2021	2020
Amounts not overdue	34	–
Overdue up to 1 month	39	–
Overdue from 1 to 3 months	9	–
Overdue from 3 to 6 months	61	–
Overdue from 6 to 12 months	34	–
Overdue more than 12 months	175	–
Total	352	–

For trade and other receivables that are not past due and for which no impairment has been recognised, at the statement of financial position date, management believes that there was no indication that the debtors would be unable to meet their payment obligations.

No impairment loss is recognised for trade receivables overdue more than 12 months if the debt has been recovered by the date of signing these consolidated financial statements.

8. Inventories

Inventories of the Group consisted of:

	31 December	
	2021	2020
Goods purchased for resale	789	1 127
Raw materials and components	–	–
Unfinished products and work in progress	8 027	2 574
	8 816	3 701
Less: write-down to net realisable value	–	–
Total	8 816	3 701

As at 31 December 2021 and 2020, there was no pipeline inventory.

As at 31 December 2021 and 31 December 2020, all goods for resale were stored in warehouses owned by third parties.

In 2021, inventories amounting to EUR 12 733 thousand (2020: EUR 1 584 thousand) were recognised as expenses incurred during the year and were included in the cost of sales.

9. Other investments

The Group's other non-current investments consisted of:

- 1) Investments in associates accounted for using the equity method:

	31 December	
	2021	2020
Onice Solar, S.L.	3	3
Other investments	–	32
Total	3	34

Sun Investment Group UAB

Consolidated explanatory Notes for the year ended 31 December 2021
(in EUR thousand, unless otherwise specified)

Changes in the Group's investments in associates accounted for using the equity method during the year were as follow:

	2021	2020
Group investments in associates at the beginning of the period	34	10
Investments acquired during the period	(32)	24
Increase (decrease) due to share of net profit (loss)	-	-
Group investments in associates at the end of the period	3	34

Increase (decrease) of the Group's investments in associates due to net profit (loss) is recorded in the profit (loss) and other comprehensive income statement under share of profit of associates and jointly controlled entities.

Information on associates is disclosed in the general information section of the consolidated explanatory Notes.

2) Non-equity securities:

Investments in shares:

	31 December	
	2021	2020
Galway Investment sp. z o.o.	0.5	0.5
Total	0.5	0.5

10. Prepayments, deferred costs and accrued income

The Group's prepayments, deferred costs and accrued income consisted of:

	31 December	
	2021	2020
Prepayments	2 638	243
Prepayments to related parties (Note 28)	-	-
Accrued income	-	359
Deferred costs	101	25
Total	2 739	627

11. Cash and cash equivalents

The cash and cash equivalents of the Group consisted of:

	31 December	
	2021	2020
Cash at bank	664	3 026
Cash in hand	2	118
Cash in transit	1	-
Total	667	3 144

Cash and cash equivalents are denominated in the following currencies:

	31 December	
	2021 m.	2020 m.
EUR	157	531
PLN	510	2 613
Total	667	3 144

Sun Investment Group UAB

Company code: 302662621, address: Gedimino pr. 44A-501, LT-01110 Vilnius
Consolidated explanatory Notes for the year ended 31 December 2021
(in EUR thousand, unless otherwise specified)

The Group has measured cash and cash equivalents as at 31 December 2021 and 31 December 2020, as required by IFRS 9, and no material impairment has been identified – the carrying amount of the Group’s cash and cash equivalents approximates their fair value.

12. Equity

Authorised capital

As at 31 December 2021, the Company’s authorised capital consisted of 10 063 600 ordinary shares of EUR 0.1 nominal value of one share.

As at 31 December 2020, the Company’s authorised capital consisted of 100 ordinary shares of EUR 28.96 nominal value of one share. All shares are fully paid up.

In 2021 and 2020, the Group did not acquire or dispose its own shares.

Legal reserve

Legal reserve is a mandatory reserve required by laws of the Republic of Lithuania. At least 5% of net distributable profit is transferred to it each year until the legal reserve reaches 10 % of the share capital. It may be used solely to cover future losses.

Profit distribution plan

As at the date of approval of these consolidated financial statements, no profit distribution plan has been prepared.

13. Bank loans and lease liabilities

Bank loans and lease liabilities of the Group consisted of:

		31 December 2021			
Borrower	Lender	Short-term part	Long-term part	Total	Interest rate
Eterna Solar LT, UAB	AS Citadele banka Lithuanian Branch	2 228	–	2 228	6 months. EURIBOR +margin
Lease liabilities	n/a	264	235	498	n/a
Total		2 492	235	2 726	

		31 December 2020			
Borrower	Lender	Short-term part	Long-term part	Total	Interest rate
Lease liabilities	n/a	118	214	332	n/a
Total		118	214	332	

Maturities of the Group’s long-term bank loans and lease liabilities were as follows:

	31 December	
	2021	2020
In the second – fifth years	235	214
After five years	–	–
Total	235	214

The Group’s long-term and short-term bank loans and lease liabilities are denominated in EUR.

Sun Investment Group UAB

Company code: 302662621, address: Gedimino pr. 44A-501, LT-01110 Vilnius
Consolidated explanatory Notes for the year ended 31 December 2021
(in EUR thousand, unless otherwise specified)

As at 31 December 2021, 2020, financial debts of the Group were denominated in euro. Loans from related parties are subject to fixed interest rates set under market conditions

As at 31 December 2021, 2020, the loans were subject to variable interest rates depending on EURIBOR of different maturities plus margins reflecting market conditions.

At 31 December 2021, trade and other receivables amounting to EUR 968 thousand (at 31 December 2020 – none) were pledged to credit institutions to secure the repayment of loans. The pledge expires in January 2023 (Note 7).

As at 31 December 2021, inventories with a carrying amount of EUR 756 thousand (at 31 December 2020 – none) were pledged to credit institutions to secure the repayment of loans. The pledge expires in January 2023 (Note 8).

As at 31 December 2021, cash and cash equivalents with a carrying amount of EUR 116 thousand (at 31 December 2020 – none) were pledged to credit institutions to secure the repayment of loans. The pledge expires in March 2022 (Note 11).

As at 31 December 2021, shares in subsidiaries with a value of EUR 2,600 thousand (at 31 December 2020 – none) were pledged to credit institutions to secure the repayment of loans. The pledge expires in March 2022.

15. Prepayments received , accrued liabilities and deferred income

Prepayments received, accrued liabilities and deferred income of the Group were as follows:

	31 December	
	2021	2020
Accrued expenses	346	106

Consolidated explanatory Notes for the year ended 31 December 2021
(in EUR thousand, unless otherwise specified)

The above mentioned trade and other payables and current liabilities are interest-free and normally have a payment period of up to 60 days.

18. Revenue

The following table presents revenue from contracts with customers by primary geographic market, major product and service lines and timing of revenue recognition.

For the year ended 31 December, the Group's revenue was as follows:

	2021	2020
Primary geographic markets		
Lithuania	14 236	8 035
Poland	23 669	3 237
Cyprus	1 063	–
Other countries	2	9
Total	39 000	11 281

	2021	2020
Main product and service lines		
Revenue from contracting of power plants	26 403	4 428
Revenue from the sale of equipment	12 596	6 853
Other	–	–
Total	39 000	11 281

	2021	2020
Timing of revenue recognition		
Transfer of risks and rewards at a specific point in time	1 228	8 141
Transfer of risks and rewards over the period	37 771	3 140
Total	39 000	11 281

Contract assets and contract liabilities

The following table provides information on receivables, contract assets and contract liabilities under contracts with customers.

	31 December	
	2021	2020
Contract assets	4 396	–
Contract liabilities	246	–
Total	4 642	–

Contract assets relate primarily to the Group's rights to consideration for subcontracted work performed but not taxed as at 31 December. No impairment was identified in respect of the contract assets during the period ended 31 December 2021 and 2020. Contract assets are transferred to receivables when rights become unconditional. This usually occurs when the Group invoices the customer.

Contract liabilities relate to prepayments received from customers for subcontracted work for which income is recognised during the period.

Sun Investment Group UAB

Company code: 302662621, address: Gedimino pr. 44A-501, LT-01110 Vilnius
Consolidated explanatory Notes for the year ended 31 December 2021
(in EUR thousand, unless otherwise specified)

Operating liabilities and revenue recognition policies

Revenue is measured based on the consideration specified in the contract with the customer. The Group recognises revenue when it transfers control of the good or service to the customer.

The following table provides information about the nature and timing of performance obligations under contracts with customers, including significant payment terms and revenue recognition policies.

Product / service type	The nature and timing of performance obligations, including significant payment terms	Revenue recognition under IFRS 15
Power plant subcontracting revenue	The Group constructs solar power plants for customers. Each project starts after the signing of a contract and according to the time limits of construction phases set out in the contract. The duration of the project depends on the complexity of the project, but usually does not take more than one year. During construction, the customer has control over all work in progress and if the customer terminates the contract, the Group is entitled to reimbursement of costs incurred until the point of termination, including the agreed margin. Invoices are issued under the contractual terms and conditions are generally due within 30 days of issue.	Revenue is recognised over the period using the cost method. The related expenses are recognised when incurred. Advances received are included in contractual obligations. The Group's rights to consideration for subcontracted work performed but not invoiced at 31 December are included in contract assets.
Other revenue	The Group provides other services (management, etc.) and sells other goods (raw materials, etc.). Invoices are issued under the contractual terms and conditions are generally due immediately or within 30 days.	Revenue is recognised when the service is actually rendered or, in the case of sales of goods, when the customer takes over all risks and rewards.

19. Cost of sales

For the year ended 31 December, the Group's cost of sales comprised the following:

	2021	2020
Contracting costs	1 350	152
Installation works	5 774	394
Logistics and warehousing services	258	5
Solar modules, inverters and other solar power plant components	19 700	2 386
Other construction costs	1 611	504
Total	28 693	3 441

20. Other activity result

23. Gain on disposal of investments in subsidiaries

Gain on disposal of investments in subsidiaries

In 2021, the Group disposed its investment in subsidiary Nogridas UAB. The disposal is not considered to be a discontinuation of operations because the activities in which the sold entity was engaged are continuing or the entity disposed did not constitute a significant separate operating segment.

The table below is presented for the sale transaction (the values at the date of sale and at the date of the carrying amounts, and the carrying amounts were not materially different from the fair values):

Item / entity	Nogridas, UAB
Non-current assets	
Property, plant and equipment	13
Intangible assets	11
Deferred income tax assets	-
Long-term loans granted and long-term deposits	35
Trade and other receivables	-
Total non-current assets	59
Current assets	
Inventories	435

(in EUR thousand, unless otherwise specified)

24. Finance income and expenses

For the year ended 31 December, finance income (expenses) comprised the following:

	2021	2020
FINANCE INCOME		
Gain from currency exchange rates	–	–
Interest and other related income	8	102
Penalties and fines	–	–
Dividends received	–	188
Other income from financing and investing activities	80	–
	<u>88</u>	<u>290</u>
FINANCE EXPENSES		
Currency exchange loss	(89)	(202)
Interest and other related expenses	(1 066)	(310)
Penalties and fines	(20)	–
Other expenses from financing and investing activities	(4)	(30)
	<u>(1 179)</u>	<u>(542)</u>
Result from financing activities	(1 091)	(252)

25. Income tax

For 2021 and 2020, income tax for the Group and its Lithuanian subsidiaries is calculated using 15 % corporate income tax rate on the estimated taxable profit for the period. In other countries, corporate income tax is calculated using the corporate income tax rates applicable in those countries.

As at 31 December, the Group's income tax expenses (benefit) recognised in the profit (loss) statement was as follows:

	2021	2020
Income tax expenses for the reporting year	340	289
Income tax adjustments for previous reporting periods	(7)	–
Deferred income tax expenses (income)	–	–
Income tax expenses (income) recognised in statement of profit or loss and other comprehensive income	333	289

26. Contingent liabilities

During 2021 and 2020, the Group was not involved in any material legal proceedings that, in the opinion of management, could have a material effect on the consolidated financial position of the Group.

The tax authorities have not performed a full tax audit of the Group. The tax authorities may at any time examine the accounting, transactional and other documents, records and tax returns of the Group for the current and 3 preceding calendar years and, in certain cases, for the current and 5 or 10 preceding calendar years and assess additional taxes and penalties. The management of the Group has no information on any circumstances that could give rise to a potential material liability for unpaid taxes.

The Group has not issued any guarantees / sureties.

In 2021, some of the Group companies did not comply with the requirement of the Law on Companies that the equity capital of a company must be at least ½ of its authorised capital. As at 31 December 2021, this requirement was not fulfilled by the following companies: UAB Astroinvesticijos PL, UAB Siginvesticijos PL2, Sun Investment Services, UAB.

27. Financial instruments – fair value and risk management

The main financial liabilities of the Group consist of loans, finance lease, other financial debts, trade and other payables. The primary purpose of these financial liabilities is to increase the funding of the Group's operations and to provide liquidity.

The Group classifies all financial liabilities into three categories:

- bank loans and lease liabilities (Note 13);
- other financial debts (Note 14);
- trade, other payables and current liabilities (Note 17).

The Group has different financial assets: trade and other receivables, loans granted, short-term investments and cash. The Group classifies financial assets into three categories:

- cash and cash equivalents (Note 11);
- other investments (Note 9);
- trade, other receivables and loans granted stated at amortised cost (Notes 7 and 6 respectively).

Fair value

As at 31 December 2021 and 2020, the Group had no significant financial instruments that were carried at fair value in the statement of financial position, except for the investments into shares and investment units (Note 9).

The main financial assets and liabilities of the Group that are not reflected at fair value are trade and other receivables (including loans granted), long-term and short-term trade and other debts.

As at 31 December 2021 and 2020, the fair value of financial assets and liabilities of the Group was close to their carrying amounts.

The methods and assumptions used in determining the fair values are described below:

- The carrying amounts of current trade and other receivables, current trade and other payables and short-term borrowings approximate their fair values due to the short-term maturity of the instruments.
- The fair value of long-term debt and long-term receivables is determined by reference to the market price of the same or a similar loan or the interest rate then prevailing for debts of the same maturity. The fair value of long-term liabilities and receivables with variable interest approximates their carrying amount;
- The fair value of investments in shares and units is determined by reference to valuations made by independent external valuers.

The main risks arising from financial instruments are credit risk, interest rate risk, liquidity risk and foreign currency risk. The Group is also exposed to capital management and inventory risks. The risks are identified and described below.

Credit risk

The credit risk of the Group mainly relates to receivables (including loans) and arises from the possible default of counterparties. In the statement of financial position, receivables are presented net of doubtful receivables, which are estimated by the Group based on historical experience and the current economic environment. The credit risk related to cash is limited as the Group transacts with banks with high credit ratings from foreign agencies.

The maximum amount of credit risk is equal to the carrying amount of receivables, contract assets, loans granted and cash and cash equivalents.

The credit risk of the Group is assessed separately by Group companies. Receivable balances and past due receivables of Group companies are monitored on a monthly basis.

The Group's concentration of credit risk related to trade receivables is insignificant. The Group does not have any significant transactions that are outside the country in which the relevant Group entity operates.

The analysis of outstanding and overdue receivables and loans as at 31 December 2021 and 2020 and impairment

recognised is presented in Notes 7 and 6.

Assessment of expected credit losses

Trade and other receivables

Trade receivables do not have a significant financing component. The Group's credit terms for sales are 30 days from receipt of invoice.

Following the impairment loss analysis as at 31 December 2021 and 2020, the Group has determined that there are no significant impairment losses other than those recorded.

Loans granted

The Group uses an individual valuation model to determine the expected loss on granted loans.

The analysis did not reveal any significant expected credit losses.

As at 31 December 2021 and 2020, there were no indications that receivables for which no impairment had been recorded may not be recoverable.

Interest rate risk

The Group is exposed to interest rate risk on bank loans and other financial debts with variable interest rates.

Liquidity risk

The objective of short-term liquidity risk management is to regulate the daily need for funds. Each Group company independently plans its internal cash flows. The Group's short-term liquidity is monitored on a daily basis by checking cash and cash equivalent balances and the need.

Long-term liquidity risk is controlled by analysing the expected future cash flows in relation to possible sources of funding. The ability of the Group to raise the necessary funds and the impact of the investment on the Group liquidity are assessed before a new investment project is approved.

Foreign currency risk

The financial position of the Group may be affected by changes in exchange rates as a result of its operations.

The Group is exposed to foreign exchange risk when sales, purchases and financial debts are denominated in currencies other than euro.

Capital management

The Group manages its capital to ensure that it is sufficient to support the Group's operations. The management of the undertakings controls that the companies comply with the capital requirements prescribed by legal acts and loan agreements and report to the management of the Group.

In 2021 and 2020, the capital management policy or process did not change.

The Republic of Lithuania Law on Companies requires that the equity capital of an individual company must be at least 50 % of its share capital. In 2021 and 2020, the Group's equity capital complied with the legal requirements.

Raw materials' price risk

Some companies of the Group are exposed to the risk of fluctuations in the prices of raw materials, which are dependent on prices on international markets. The management of the Group believes that this risk is managed by entering into long-term and short-term contracts with suppliers of raw materials.

Sun Investment Group UAB

Company code: 302662621, address: Gedimino pr. 44A-501, LT-01110 Vilnius
Consolidated explanatory Notes for the year ended 31 December 2021
(in EUR thousand, unless otherwise specified)

28. Related party transactions

Remuneration and related taxes of the Group's key management personnel:

	2021	2020
Employment related amounts calculated during the year:		
Key remuneration and related taxes	680	227
Number of key management personnel	6	4

During 2021 and 2020, the main transactions with related parties undertaken by Group companies were obtaining loans from related parties, granting loans to Group companies and supplying goods.

The related parties of the Group are:

- a. Ultimate beneficial owner (shareholder) – D. Varabauskas
- b. Parent company – Sun investment Group B.V.
- c. Group companies – companies of Sun investment Group B.V. group;
- d. Associated entities – the list of companies is given in the General Information part of the explanatory Notes;
- e. Other related entities – other undertakings controlled by Sun investment Group B.V. shareholder, his family members and the management of the Group.

The table below shows the transactions with related parties during the period ended 31 December 2021:

Related party	Receivables (including loans granted)	Payables (including loans received)	Sales of goods and services (including interest)	Purchases of goods and services (including interest)
<i>Ultimate beneficial owner</i>	86	–	(7)	–
<i>Parent company</i>	1	–	–	–

Total	619	(570)	(18)	–

The table below reflects transactions with related companies during the period ended 31 December 2020:

Related party	Receivables (including loans granted)	Payables (including loans received)	Sales of goods and services (including interest)	Purchases of goods and services (including interest)
<i>Ultimate beneficial owner</i>	263	–	(8)	–
<i>Parent company</i>	–	–	–	–
<i>Group companies</i>	52	–	(7)	–
<i>Associated entities</i>	–	–	–	–
<i>Other related entities</i>	–	–	–	–
Total	315	–	(15)	–

29. Events after the end of the financial year

On 24 March 2022, Sun Investment Group, UAB subsidiary UAB Solinvesticijos PL, the sole shareholder of Gardno PV sp. z o.o.; Gardno2 PV sp. z o.o.; RA01 sp. z o.o., entered into the agreement for sale and purchase the aforementioned companies and sold 100 % of shares in the above companies under the agreement.

During 2022, Sun Investment group established the following project companies: SIG PL Holding 4, UAB; SIG PL Holding 5, UAB; SIG Land LT, UAB; SIG Projektai LT 1, UAB; SIG Projektai LT 2, UAB; SIG Projektai LT 3, UAB; SIG Projektai LT 4, UAB; SIG Projektai LT 5, UAB; SIG Projektai LT 6, UAB; SIG Projektai LT 7, UAB; SIG Projektai LT 8, UAB; SIG Projektai LT 9, UAB; SIG Projektai LT 10, UAB; SIG PL Holding 6, UAB; SIG PL Holding 7, UAB; SIG PV 40 sp. z o.o.; SIG PV 41 sp. z o.o.; SIG PV 42 sp. z o.o.; SIG PV 43 sp. z o.o.; SIG PV 44 sp. z o.o.; SIG PV 45 sp. z o.o.; SIG PV 46 sp. z o.o.; SIG PV 47 sp. z o.o.; SIG PV 48 sp. z o.o.

On 24 February 2022, the Russian Federation invaded the Republic of Ukraine. Shortly after the invasion, the EU and the rest of the world, including global institutions, imposed a wide-ranging set of restrictive measures on Russia, which are constantly being updated and expanded. This non-adjusting post-acquisition event did not affect the accounting estimates and assumptions as at 31 December 2021. The restrictive measures taken up to the date of approval of these financial statements did not have a material impact on the Group's results, and at the date of the financial statements, no operations have been suspended and the Group has not incurred any significant direct losses related to the restrictive measures.

There have been no post-financial year-end events, other than those referred to above, that have occurred after the end of the financial year and before the date of approval of these financial statements that have an impact on these financial statements or that require additional disclosure.
