Management report

July 31, 2018

Storent was established in 2008 in Latvia with an objective to become the most efficient construction equipment rental company in Baltics and Nordic countries. Today Storent group operates in 6 countries. Annual turnover for Storent group in 2017 was 42 million euros.

In Q2 2018 **Storent group** rent incomes increased by 42% compared to Q1 2018 and by 15% compared to Q2 of 2017. Sales teams continue to be strengthened in regions with higher rental market potentials. In general, price policy is being adjusted according to rapidly increasing demand for earthmoving and access machinery as well as scaffolding.

Baltic region operations have generated almost 10% higher rent incomes than in respective period of 2017. Market conditions in Estonia and Latvia have driven incomes growth, where in Lithuania competition price pressure slowed down growth curve in the beginning of the season. Latvian construction market grew in Q1 by more than 30% and it continues to grow in all segments. A particular demand increase is observed in scaffolding group, driven by EU financed energy efficiency projects. Lithuanian construction market grew by 17% in Q1, same growth rate expected to be in Q2, except for residential segment, where slowdown in activities is obvious. Estonia construction market grew by 29% in Q1 and favourable conditions continue for rental market operators.

Nordic operations have increased by more than 20% compared to Q2 2017. High level of construction activities drive demand for rental machinery. Construction market outlook for the year 2018 is positive for Storent **Sweden**. Sales grew substantially compared to Q1 2018. Continuous growth is expected through the year. According to available estimates, construction market will grow by 3.5% and equipment rental market will grow by 3% in 2018. The main drivers for income increase in Finnish subsidiary **Leinolift** were additional fleet of Storent machinery and local construction market growth.

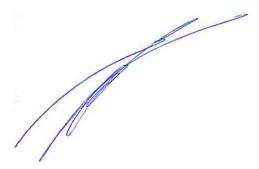

Construction market in **Kaliningrad** region decreased by 19% in Q1, it stays dependent mostly from government financed projects. As a consequence, Storent revenue decreased as well. High impact on the result was caused by insolvency of some key customers and freeze of new construction activities from late April till July due to FIFA championship.

Since June 29 2018 AS Storent Investments bonds issued 30.06.2017 have been listed on the Nasdaq Baltic Bond List. In the future, Company hope to raise more funds on the capital markets in the form of bonds or shares to help us reach our long-term goals. Storent is dedicated already now to using best corporate governance practices and opening itself to a more diverse investor base.

Statement of the management board
