Subsidiaries, which are companies over which the parent company has control, are consolidated from the date on which effective control is transferred to the Group and are no longer consolidated from the date of disposal. The purchase method of accounting is used to account for the acquisition of subsidiaries by the Group. The cost of an acquisition is measured as the fair value of the assets given, equity instruments issued and liabilities incurred or assumed at the date of exchange, plus costs directly attributable to the acquisition. Identifiable assets acquired, liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date, irrespective of the extent of any minority interest. The excess of the cost of acquisition over the fair value of the Group's share of the identifiable net assets acquired is recorded as goodwill. If the cost of acquisition is less than the fair value of the net assets of the subsidiary acquired, the difference is recognised directly in the statement of income.

All significant inter-company transactions, balances and unrealized surpluses and deficits on transactions between the Group companies have been eliminated. The accounting policies used by the subsidiaries have been changed to ensure consistency with the policies adopted by the Group.

<sup>\*\* -</sup> UAB Ūkio Banko Lizingas owns 100 % of shares of RAB Ūkio Bank Lizing.

Minority interests in the equity and results of companies that are controlled by the Bank are shown as a separate item of the shareholders equity in the consolidated financial statements.
