

Lithuanian Government Green Bond

Final Allocation and Impact Report

MINISTRY OF FINANCE of the Republic of Lithuania

In April 2018, the Government of Lithuania issued its first 10-year 1.2% Green Bond LT0000610305 amounting to EUR 20 million through the domestic auction. In 2020, this issue was tapped twice and its final nominal value has reached EUR 68 million. The Green Bond proceeds serve as one of a variety of financing sources along with Operational Programme for the European Union funds investment in 2014-2020 of the Republic of Lithuania and international financial institutions to cover the financing gap for multi-apartment building upgrades and achieve broad national objectives for energy efficiency.

This report is the annual report for 2022 and the final report in accordance with Lithuanian Green Bond Framework. The reporting is based on the World Bank Guide for Public Sector Issuers 'Green Bond Proceeds Management & Reporting' published in 2018.

INTRODUCTION

EUR 68 million

GOVERNANCE AND PROJECT SELECTION

Green bond issuance and oversight is supported by a multi-layered organizational framework that involves:

- Ministry of Finance, which issued the green bond, initially received proceeds and subsequently on-lent them to VIPA.
- Public Investment Development Agency (VIPA), a Lithuanian National Promotional Institution with the goals of financing and promoting sustainable development. VIPA received the green bond proceeds through an on-lending process authorized by government Resolution No. 341 that was adopted on April 9, 2018. VIPA is responsible for eligible green project selection and oversight and subsequent on-lending of the borrowed funds to multi-apartment buildings' owners, represented by project administrators. The 'eligible projects' mean the soviet-era multi-apartment modernization projects which would achieve at least 40 per cent of energy savings after modernization. VIPA carries out financial, reputational and management capacity risk assessments of project administrators, and on a selective basis performs administrative audits on sites.
- The Environmental Projects Management Agency (APVA) (previously Housing Energy efficiency agency, which was merged in 2021 in to APVA), which is an independent agency under the Ministry of Environment, is responsible for implementation and administration of the eligible green bond projects. APVA performs technical project evaluation, including energy efficiency savings performed by accredited entities. APVA also performs planned and unplanned site inspections to check the compliance of performed activities with the requirements of multi-apartment building modernization programme.
- Ministry of Environment, which is responsible for general supervision, coordination and strategic planning related to the green bond projects.
- State Territorial Planning and Construction Inspectorate, an independent agency under the Ministry of Environment, performs planned and unplanned site inspections to check the compliance of performed activities with the requirements of technical regulations and other national legislation.
- State Labour Inspectorate, an independent agency under the Ministry of Social Security and Labour, conducts planned and unplanned site inspections to evaluate the compliance with occupational health and safety requirements.

The Government has decided to allocate the green bond proceeds to the selected eligible projects with the intention of addressing increasing fuel consumption, energy demand and greenhouse gas emissions by modernizing multi-apartment buildings and raising public awareness of the energy performance of buildings and energy savings. These upgrades primarily align with the energy efficiency and green buildings categories of the Green Bond Principles.

APVA is assessing and prioritizing a list of projects received funding from the Green Bond proceeds. Each year the list of around 500 new projects is identified (to be extended to 1000 new projects per year until 2030), with details provided as to their location, amount of project upgrade and expected energy class achieved or to be achieved.

In turn, VIPA evaluates these projects and selects the ones eligible for green financing. By the end of 2019 VIPA had evaluated and issued conditional obligation letters to finance projects for the amount exceeding EUR 68 million. As soon as specified conditions are met (e.g. procurement is completed), VIPA signs loan agreements and allocates green bond proceeds to the energy efficiency projects in multiapartment buildings. Green bond proceeds are allocated to these projects on a first-come, first-served basis. Loan agreements for the total amount of EUR 68 million were signed by the end of 2020.

Total disbursement for eligible projects during 2018-2022 is provided in Figure 1.

USE **OF PROCEEDS**

A scheme for the use of green bond proceeds is shown below:

As a result of the aforementioned scheme, VIPA has got the 10-year loan from the Ministry of Finance, while multi-apartment buildings' owners can get a 20-year sub-loan for renovation.

Interconnection between main participants

Proceeds from the green bond were on-lent to VIPA, which subsequently opened a separate account to manage the proceeds. The separate green bond account is used to receive the net proceeds, disburse payments to the contractors implementing the eligible projects, issue other payments related to the eligible projects and receive loan payments from the end borrowers. Proceeds held in the dedicated green bond account are managed in accordance with VIPA's normal accounting policies which govern all aspects of the proceeds management and accounting processes. VIPA maintains an accounting system with an accounting code for all transactions relating to the distribution of green bond proceeds, allowing it to track green bond proceeds on a project-by-project basis. VIPA accounting policies also govern the list of eligible investments for green bond cash balances that have not yet been allocated to eligible projects, with eligible investments including: • Government securities of the Republic of Lithuania

- Debt securities issued or guaranteed by foreign governments
- Term deposits with the Bank of Lithuania and commercial banks established in accordance with the procedure established by laws of the Republic of Lithuania or branches established by foreign banks in Lithuania
- Time deposits with foreign commercial banks
- Debt securities issued by Lithuanian or foreign commercial banks
- Lithuanian and foreign investment funds, the portfolio of which does not include shares
- Debt securities issued by international organizations •
- Lithuanian and foreign investment funds, the portfolio of which does not include shares
- Debt securities issued by international organizations

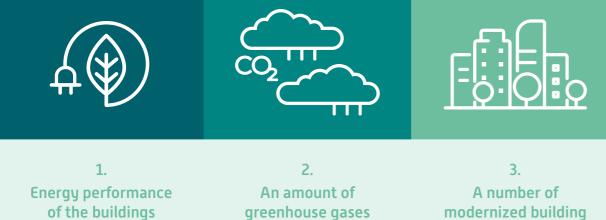

Quarterly flows and balances of funds on the VIPA account is presented in Figure 2.
